

## Michael Ward's New Gibson is no Wallflower

If this were just gig, what would you play? You'll need a guitar that can cut through a screaming PA and a powerful, rhythmic, solid, tight after-tight. With a flip of a switch, you'll get from a top-up system to blaring ballad, from crisp and clean to wild and subtle. Your guitar should be a one-flick-you-pick. You need a whole

catalog of words in your command. Now, what guitar would you play? Michael chose the Gibson Howard Roberts Fusion. An experienced player like Michael Ward doesn't integrate his guitars by musical style. The same open mind and ears that make his music special come into play

when choosing an instrument. He looks to guitars to hear what they have to offer. The Howard Roberts Fusion has plenty to give. For action Magic neck, 30-finger body with expanded cutaway, versatile humbucking pickups, and a beautiful yet functional top. It just plain feels right. It's no Wallflower, even if Michael is.

## Gibson Sets the Standard

The Gibson Les Paul Standard is the choice of guitar heroes, working musicians, garage band guitarists and collectors alike. Considered the signature instrument of rock and roll, it is the benchmark by which all electric guitars are measured.

Great tone sets a guitar apart from the pack. The Les Paul Standard defines great tone. It is the first solidbody electric guitar composed of select, multiple tone woods. The revolutionary combination of a grade A mahogany back and carved maple top coupled

with the Gibson-pioneered humbucking pickup produce the legendary crunch and creamy sustain that has set "The Standard Since 1952."

Why settle for an imitation? Only one guitar can give you that famous Les Paul tone with rich sustain, effortless playability and quality craftsmanship you have come to expect from Gibson.

Don't just take our word for it. Try this American icon for yourself and discover what demanding players already know.

For more information on the Les Paul Standard and a Gibson dealer in your area call us at 1-800-4-GIBSON or visit our website at [www.gibson.com](http://www.gibson.com)

## Paper Jamz Rock Guitars - 3mm of SOLID ROCK!

July 14, 2010 By [Orderroys](#) Leave a Comment

When I first saw these Paper Jamz Guitars I wasn't really sure what all the fuss was about, but the more I read about them the more I could see their huge appeal.

When I heard a Paper Jamz for the very first time I was utterly blown away at the technology that could make this so! Rock Flipping Tastic!

So what are Paper Jamz I hear you ask! Well Paper Jamz come in 6 different flavors, each looks like a classic axe, like a Fender or Gibson and each one is literally just 3mm thick!

By using the fantastically technological sounding Active Graphics Technology™ those boffins have managed to embed circuits inside the paper of each Paper Jam enabling them to function as close to a real guitar as you can get without actually having a guitar!

Each Paper Jamz comes with three pre loaded songs for you to jam along to and each guitar has three different songs. Each Paper Jamz has four different modes for you to play with...

- Perfect Play - play perfect guitar to the 3 included hits
- Rhythm - control the guitar rhythm for each song
- Freestyle - play real chords - create your own songs

two or three fingers on a set of neck frets - you'll then be able to play just about any rock song in the world! A booklets included with all the fingering patterns you'll need.

This Active Graphics Technology™ uses circuit-embedded paper that activates simply by touching your finger to the surface. Even with this innovative technology, any Paper Jamz guitar is much cheaper than an actual electric guitar - and it's far easier to play.

But don't try any air guitar moves - your fingers must actually touch the surface so that the capacitive touch technology will work. There's a built-in speaker, and a headphone socket will allow you to connect to your headphones, or to the Paper Jamz Amp, or to external speakers. Volume control is done via a neat move - hold down one of the printed controls and run your hand down the guitar neck.

### Playing a Paper Jamz Guitar

There's three ways to play a Paper Jamz guitar:

- Perfect Play Mode, where you strum and hear one of the stored songs.
- Rhythm Mode, where you strum to control the rhythm of each song.
- Freestyle Mode, where you play whatever chords you want to create your own songs.

You can make use of the Karaoke function as well, which lets you remove either the vocals, the drums, or the backing tracks from any of the stored songs.

There are six styles of Paper Jamz guitars, each with its own set of licensed songs, and each with its own distinctive design, based on one of the classic rock guitars such as Gibson or Fender. See all the Paper Jamz Guitar models here.

Whether you're looking for a toy for your children that will keep them fascinated with music, or for a new way to satisfy the Rock Star within yourself, the Paper Jamz line is the way to rock!

### Here's a video clip of how to play a Paper Jamz Guitar

Playing the Paper Jamz Guitar is a lot easier than playing a standard guitar, that's for sure. But there is a bit to learn and work out. A Paper Jamz Guitar comes with a complete set of instructions to help you get the most out of playing the guitar. Of course the temptation always is to just pick it up and have a go. Who can blame us! But eventually it is worth flicking through the instruction manual so that you can get the most out of your Paper Jamz Guitar. The video clip below has been made by someone who clearly plays the standard guitar, and hence her expectations may be a little different to anyone who doesn't give a hoot about minor chords just yet.

shoutoutlounder 4 months ago that drunkit is ridiculously small

dudeguy2157 4 months ago @shoutoutlounder ill say

pokeballguy 4 months ago watch the related video "paper kamz kids rocking out" its sooo funny cuz the kids think they could last a second with a real guitar. if you ask me this is good if you want to learn chords at a young age and then you move on to a real guitar. and the drum set for this is ugly and pointless.

TheCouchVlogger 2 months ago Is there a bass paper jamz?

rippeidthemax67 2 months ago music is going to get lazier thank god for metal

goldenchopsticks 2 months ago @rippeidthemax67 I never got why people always crowd to metal when it comes to looking for talent in music (I was kind of am but not really am a metalhead)... Listen to some jazz fusion, or jam bands like Phish or the Allman Brothers, part of keeping music alive and talented is opening your mind.

famous2169 2 months ago this makes me idea I go to target and buy that paper jamz guitar

murderaddiction 3 months ago Can you shred on this or do single notes not play on this? I need to know before I buy this!

MetallVideos 3 months ago I saw this add on TV. Why would you buy this? Just go out and buy a Gibson Explorer guitar. And a nice big amp. Then you got the real thing.

Thankfully, the folks at Pop ChartLab are bringing beauty, order and a little bit of biology to rap. The **Grand Taxonomy of Rap Names** poster (\$20) breaks down MC names by genus and species, like "Audacious Misspelling" (Cil-N-Tel, Xzibit) and "Dogg's (Nate Dogg, Snoop Dogg, Top Dogg). It's a far classier way to show your love of the genre than putting a bejeweled crunk cup on the mantle. *Buy it at popchartlab.com.*

Air guitar is finally a legitimate instrument with **Paper Jamz** (\$25). (There are Paper Jamz to plug in to and drum pads, too.) The Gibson replica, pictured, comes preloaded with curmudgeonly ditties. Instead, nab the flying V model to strum along to the Ramones, BOC and Halen. Or, in freebie mode, you can legitimately string together rudimentary barre chords and go your own way. The distorted digital crunch sounds better than the guitars on the new No Age album.
