Does anyone know how to make gifs/icons? I'd really like one of the little girl in the Formation vid sucking her mouth to the left of Blue Ivy! Blue Ivy is so cute too but that girl just stole my heart! <3

• [Reply](#) • [Thread](#) • [Link](#)

## Pheromones

 [rosevael](#)

February 6th, 2016, 11:35 pm

Certain queen pheromones (known as queen substance) let the entire colony know that the queen is in residence and stimulate many worker bee activities.

Outside of the hive, the queen pheromones act as a sex attractant to potential suitors (male drone bees). They also regulate the drone (male bee) population in the hive.

Queen pheromones stimulate many worker bee activities, such as comb building, brood rearing, foraging, and food storage.

The worker bees at the hive's entrance produce pheromones that help guide foraging bees back to their hive. The Nassanoff gland at the tip of the worker bee's abdomen is responsible for this alluring scent.

Worker bees produce alarm pheromones that can trigger sudden and decisive aggression from the colony.
