To Judge Steven Rhodes
Case no. 1353846

I'm one of many retirees, who would be adversely affected by the extreme cuts in my pension that proposed. It would be devastating to my self and my wife. My pension is only \$36,000 dollar a year. If these cuts take place, it would leave my income below \$26,000 dollar.

I am a cancer patient in mid treatment level and under sixty years age. Therefore our insurance with the City has been eliminated. The premium for both me and my wife is eight hundred and ninety three dollar per month; my rent is seven hundred forty five dollar a month, this does not included food, utility, and transportation and other bills.

It's easy to say this is what it take to save the city. Cut to save the city and destroy its people in the process. It leave nothing for the infra-structure to be built. This is a road map for the destruction and neither the city or its people will survive.

I pray that you take these things into consideration when making your decision, and don't just count dollar

Respectfully your
Otha D. White
