General

Q: How does Glider work?

A: Glider works a lot like a regular player. It looks at your h
energy, etc. It moves the mouse around and pushes key
keyboard. You tell it about your character, where you wa
things, and what to kill. Then it kills for you, automatica
do something else, like eat dinner or go to a movie, and
return, you'll have a lot more experience and loot.

Q: Can I cheat with Glider? Is it a hack?

A: No. It will not show you things that you cannot normally
game and it does not control the game other than keyst
mouse movements. It's not a teleport hack, speed hack,
hack, or anything along those lines.

Q: Is using Glider cause for suspension/ban? *

A: Yes, Glider is against the Terms of Service as provided b
World of Warcraft. If you are detected using Glider, you
be suspended for 72 hours and very likely banned comp
Glider does not violate any of the terms listed under Bliz
"Client/Server Manipulation Policy", it is still a third-party
and their Terms of Service are very open in what falls ur
definition, meaning they can find you in violation for pre
anything they want.

Glider provides a number of features to help lower the r
detection - for more information, see the next topic.

Bottom line: use at your own risk.

Q: Is Glider detectable? *

A: There are two methods of detection for Glider or any oth third-party tool:

1) The game itself detects the software by searching me hard drive, window titles, or some other means. The cur of Glider (1.1.2 Dec 12, 2006) is not detected by these r However, it is technically possible for Blizzard to change detection scheme, if they come up with a new way to de This risk cannot be avoided, as the game client can upda You can help lower your risk by following the suggested posted in the Announcements forum and upgrading to G provide better control of and reaction to changes in the detection software.

2) You can also be detected by a human observing you repeated patrols, robotic behavior, etc. This can largely by always staying near your computer while gliding. Glic number of features built-in, such as detection of whispe players following you. Be careful to avoid areas with lots obstructions and follow the tips in the help file when set profiles.

Unattended automated play is *always* risky and should r in busy areas for a long time.

Q: Is Glider easy to set up?

A: Pretty simple. Create a folder, download the launchpad, rest is done automatically.

In order for it to work properly, you have to configure tv bars in the game (5 and 6) with shortcuts to the differer skills it wants to use. Each class has a section in the hel explanation of its options and the action bars, so getting

running takes mere minutes.

Q: Does Glider modify my game files?

A: Definitely not. Glider does not use a UI mod or make an
the game, either on disk or in memory.

Q: Doesn't it defeat the purpose of the game?

A: If you use it to bypass content, definitely. World of Warc
great game and you'd be doing yourself a huge disservic
various quests and instances and new areas as you leve
up to 60. If you want to start out the game at 60, just b
account or talk to someone who can convince you not to
the biggest and best part of the game design is just silly

Glider is intended for people who want to quickly level u
alternate character or glide through the last few levels to
priest just quit your guild, but got no good recruits? War

Battlegrounds? Those are the problems that the Glider s

Using Glider with an alternate character is particularly ef
because you can supply the character with the money n
food/water/supplies that Glider will most definitely use u

Q: How much does it cost?

A: By default, Glider runs in a demonstration mode. While i
mode, it will stop automatic play after a few minutes, re
to restart Glider if you want to evaluate it further. Aside
limit, the demo is *fully functional*, so we recommend you
before registering to make sure you're happy with it.

You can [register Glider](#) and instantly get a product key f
payable via [PayPal](#). Once you have a product key, it will
future versions of Glider to support new patches of the g
new features that are added to Glider itself. Glider check
updates on startup and notifies you when a new version
for download.

Note that the product key is used during the startup pro
Glider to request memory locations of game information
share your product key and we receive too many reques
will be locked out.

Optionally, you can upgrade to [Glider Elite](#) to get extra f
such as background operation and additional protection
detection software. Glider Elite is a subscription service t
month and can also be purchased in 3-month or 6-mont
without subscription at a discount.

Gameplay

Q: How does Glider actually find and kill things?

A: You show Glider the area you want to clear by marking v
the game. You go to a spot, click the "Add Waypoint" bu
Previous Track on your keyboard). Then you go to the n
it again, until you form a circle. You can also specify
minimum/maximum levels of monsters to target as well
which are like monster "teams".

All that information is a "profile", which you can load an
share). You start up Glider, load the profile, and it runs t
area, clearing it out again and again. The actual mechar
pulling and combat are specific to each class, so check t
for your class.

Q: Can it quest or gain reputation?

A: Indirectly, for sure. Since it loots and kills, Glider is perfe
automating the "kill xx monsters" or "collect xx items fro
quests. In some areas, such as the Barrens and Burning
you can simply go into town to pick up all the quests, gl
for a few hours, and then turn them all in for very fast le
Glider's harvesting options can be used to pick up quest
ground for many quests as well.

It's also very handy for gaining reputation, as it can kill i
hours. It may true that you have to kill over a thousand
Furbolgs to get exalted with the Timbermaw. It's also tru
Glider can do it for you.

Q: Can Glider kill other players?

A: Glider's PvP is very limited and it will not attack other pl
it is attacked first. If configured improperly, Glider *will* ta
players' pets, since they appear as monsters, but never
owner. Since this normally results in said pet owner killir
feel this is a good incentive to set up factions properly w

If Glider is attacked by another player, it will try to fight
not what most people would consider a very good PvPer

Q: What about loot, skinning, mining, etc?

A: Glider will loot bodies when it kills monsters. Glider will a
automatically skin corpses, if you have that option enabl
are gliding in an area with monsters that do not run, it t
loots/skins 95% of the monsters it kills. It can also be cc
skin other players' kills (ninja skin), but it will only appro
corpses that have no players near them to avoid being n

Glider will also automatically harvest mines, herbs, and o

you. You can specify a limit of how many yards you're w
to such items and Glider will go get them when it finds t
have the appropriate gathering skill. You can also tell Gl
up anything, which will let it gather quest items such as
parts, wildkin feathers, etc.

Q: Will Glider automatically resurrect?

A: Yes. When setting up a profile for an area to kill, you ca
list of ghost waypoints, which Glider uses to make it fror
graveyard to your area. It will then patrol your waypoint
your corpse and resurrect. During resurrection, Glider at
position itself in the safest possible spot relative to nearl

Automatic resurrection can be controlled by specifying a
number of times to resurrect, which helps prevent you f
camped or resurrecting too many times in the middle of
monsters. It can also be disabled completely, if necessar

Q: What about eating, buffs, conjured items, etc?

A: We've tried to make Glider as intelligent as possible to e
strength of each class. For instance, it will conjure food
when playing a Mage. It uses heal-over-time spells, sacr
re-summons) demon pets, etc. If you have a suggestion
playing a particular class, definitely let us know by subm
the support page or starting a thread in the forum.

For buffs, it always keeps the most appropriate class-spe
going, re-casting them as necessary.

Q: How about soul shards for warlocks?

A: You simply tell Glider how many shards you want to kee
and it will make sure you have that number at all times,
new shards as necessary to replace dead/sacrificed dem

healthstones, etc.

It also has a "farm shards" mode for warlocks, which is topping off your shards. When gliding in "farm shards" r collect as many shards as you tell it during configuration that many, it will automatically use your hearthstone and

Q: Why do I keep dying?

A: Gliding is a bit different from a regular person playing. I smart as you when it comes to additional monsters piling runners, casters, obstacles in the way, or anything else

When setting up an area to glide, make sure you pick on the monsters are 2-6 levels below you to ensure it can h Keep an eye on while it's playing and if you see it doing stupid, then change your setup to disable it. There are p options in general configuration and class-specific setup to keep Glider on task.

Most importantly, be sure to read the "Tips" section in tl for a lot more information.

Note: if you find yourself dying because other players a along and killing you, there's not much you can do abou it and fight back or find a quiet place to glide or switch t server. Rogues and druids in cat form survive much bett servers because they stealth while patrolling and can be to wait for enemy players to leave the area before attac monsters.

Q: Will it fish?

A: Yes, Glider has an option to create fishing profiles. At hi you can make more money by gliding areas with good d fishing is always an option. And it's a great way to raise

in the mid-level ranges on a server with a well-develope

Operation

Q: What are the system requirements? *

A: Glider requires a PC running Windows 2000, Windows X
Windows XP Pro, or Windows Vista. Glider will not run o
95, 98, SE, or ME because they cannot be secured from
Glider is not supported on 64-bit versions of Windows, a
kernels are not as friendly to Glider's techniques for hidi
process. There is currently no Mac version of Glider.

Hardware-wise, if you have a PC and can run the game,
Glider. The only piece of software it requires is the Micro
Framework 2.0. There's a good chance you already have
lot of software uses it now. You can check by looking fo
"Add/Remove Programs" section of your Control Panel.

You can also download the framework directly from <u>Win</u>
in the "Custom Install" section.

Q: Can it crash the game? *

A: Since Glider only reads memory from the game, it is **inc**
unlikely that it can cause the game to crash. Glider does
"patch", "inject", or otherwise touch any part of the gam
memory or on disk. It is 100% passive, working solely b
memory in the game to see what's going on.

Also, Glider checks the version of World of Warcraft you
startup to determine memory locations of the data it nee
extract. If it's not confident it can work with your version
game, a popup will appear and you will be notified that
incompatible. Typically, this is right after a patch, before

the corresponding updates in our central database so th
get the data it needs.

Q: Can I type while it's playing?

A: If you have [Glider Elite](#), you can use your computer for a
task while gliding, such as reading your email, browsing
playing another game (if your computer is fast enough).

For basic chat in the game, you can enter it while gliding
Glider uses the keyboard to control your movement and
keys are actually captured by Glider first. When you pres
send your message, Glider queues until it is out of comb
sends it all at once. To chat, tap Control twice and then
while gliding. Glider's title bar will change to a cursor an
enter your text there. Hit Escape to abort or Enter to se
message. In addition, Glider includes two other features
chat:

1) Glider includes a semi-automatic "1-Kill" mode that g
its combat progression on the monster you have current
in the game, then stops. Not only is this good for testing
setup, but you can use it as a relaxing way to grind whil
between kills. Since it is semi-automatic, 1-Kill doesn't lc
so do that yourself.

2) If you have a second computer or laptop handy, you
Glider to send messages. If it sees a file named **chat.tx**
folder, it will open it and send the contents of the file as
then delete it. So you can simply use regular Microsoft r
and notepad to save that file from another computer wh
to chat. The file is checked at the end of each kill when

Q: Can I move the camera while it's playing?

A: As long as it isn't looting, yes. You can safely move the
around during combat to watch your back or otherwise j
the view. Glider requires a default camera position wher
though, so be sure to put it back. Or just hover the poin
corpse when you see Glider trying to click on the corpse

Glider Elite

Q: What is Glider Elite?

A: Glider Elite is an optional subscription upgrade to Glider
month. Upgrading to Glider Elite unlocks several feature
not available in core Glider:

- Background gliding, allowing you to use your PC for
  while gliding.
- WardenNet integration from InnerSpace, providing i
  reaction to detection updates.
- Instant plug-in classes and class customization for c
  behavior.

Note: Glider Elite is still in development as of Jan 8, 20(
available for purchase.

Q: Do I need Glider Elite?

A: As mentioned above, Glider Elite is an *optional* upgrade
allowing the use of some key extra features. The core G
hard to detect and as functional as we've kept it for the
a half. Glider Elite is meant to be an upgrade, not a requ
it's up to you to decide.

Q: Will you keep updating Glider for regular customers?

A: Absolutely. Core Glider will continue being updated with
new feature as it's always been. However, large and cor

additions will be added as Glider Elite features. Such fea
never be implemented in the first place without Glider E
regular customers are not being shorted.

We recognize the value of the $25-and-done Glider and
fresh and updated.

Q: Can I get Glider Elite without subscribing to a monthly fe

A: Yes, we will be selling 3-month and 6-month "cards" tha
used to add Glider Elite time to an existing key. These w
discounted from the regularly monthly fee, tentatively pr
for the 3-month card and $20 for the 6-month card.

Miscellaneous

Q: Who are you guys?

A: We are fans of the game that want to try out a lot of dif
things. Getting a bunch of characters to 60 is a pain. Ge
to equip them is a pain. Doing big instances, Battlegrour
and generally socializing in the game is fun. We use the
skip the painful parts and have more fun.

Someone suggested we sell it, so...

Q: How do I know you won't steal my password?

A: With any software installation, there's no way to be sure
we'd go to all the trouble of building this application and
easily-identified web site just to steal your password and
Dreamfoil, then don't download it.

Q: What's it written in? Can I get the source??

A: Glider and Launchpad are written entirely in C#, with th
.NET Framework 2.0. Glider's helper driver is written in ι
i386 assembly.

And, no, you can't get the source. Handing out the sourι
puts us out of business, as far as $25/copy goes. If you
source bad enough that you think you can talk us into th
make an offer via [email](#).

Q: When are you guys going to put in good PvP?

A: Probably never. With the information in the game about
activities, we could definitely make a one-versus-one rol
would wreck any human player in a "fair" fight or duel. /
defeating the purpose of the game, that would also hurt
players' experience and draw Blizzard's ire. Glider's curre
does not make a victim of any other player, with the pos
exception of taking over a busy spot. But the various in-
mechanics (monster tagging, PvP) easily take care of thι

For engaging in PvP, we think it's lame for a computer tι
person. If you're looking for a way to automate killing re
Counter-Strike is out there and there are already a ton c
you can work with/compete against.

Q: Why shouldn't I just use XYZ Free robot or make my ow

A: There's no reason not to. With enough time, you can tw
out there to automate your character the way you want.
you also have to debug it, keep it current with patches,
do the coding yourself. If you find that kind of thing fun
people do, then go for it. It's a good learning experience
challenging.

If you don't find that stuff to be fun, Glider is cheap. For
get all classes, excellent documentation, a polished user

and instant usability. How much is **your** time worth?
