Maintenance

Soilworks™, LLC is the innovator and manufacturer of **Durasoil™** dust control agent. Durasoil is a revolutionary state-of-the-art innovation; engineered for today's challenging dust control needs. This ultra-pure, synthetic organic fluid is formulated to meet the highest standards of environmental efficacy.

Durasoil is distinctively crystal clear, odorless and is applied neat and simple, without the need for water dilution. This technologically advanced fluid does not cure, allowing for immediate use upon its application. Furthermore, Durasoil has the unique ability to be reworked and still maintain its dust controlling properties. Any equipment capable of spraying water can safely be used to apply Durasoil, without any mess or damage to the equipment. Even in freeing and wet conditions, Durasoil can still be applied regardless of weather conditions or season. Durasoil can be applied to any soil or aggregate and effectively suppress dust all year round. From intense-use military tank trails to gravel driveways, Durasoil is actively solving dust control challenges throughout the world's industrial, military, commercial and residential markets.
