### What Some iCloud Customers Have to Say

"The iCloud Total Office plan fits the bill for our organization perfectly. It provided the most meaningful business class features without requiring a significant capital outlay. We're operating more productively and professionally with our multi-location work force than ever before. Plus, we couldn't be happier with the level of service we've received from the iCloud technical support staff. We've been so pleased with the service that many of our employees now use an iCloud residential plan in their homes!"

Pharmaceutical Packaging Company  
Phoenix, Arizona USA

"We just moved into a new building and have installed the Total Office Plus package company-wide. After our analysis, we realized it would be less expensive to go with the iCloud service than move our old PBX and get new lines. And, we can't believe what features we're able to use with this system that we didn't have with our old PBX. It's really increased our efficiencies and lowered costs to new levels. We really appreciate the help from the iCloud staff. Not only did we get first-rate installation service and technical support, but they helped us during the analysis phase to really figure out what was best for our company."

Real Estate Investment Firm  
Dallas, Texas USA

"We're very happy with the functionality and performance of our iCloud residential plan. We decided to look into new technologies for voice and data. We wanted cheaper long distance costs and access to more features and services. VoIP seems to do the trick. We've been pleasantly surprised by the excellent voice quality. We have not been able to find such a robust, complete package for the price anywhere."

Residential Customer  
Scottsdale, Arizona USA

"As a start-up company, we were overwhelmed by the complexity and huge costs involved with purchasing a traditional phone system from the larger, established companies. Boy, were we pleasantly surprised (and relieved) to find iCloud! With the iCloud business plan, we've saved a lot of money, got advanced functionality, and best of all, the iCloud team made everything so easy for us. Now, our telecommuting staff is happy and business is growing."

Advertising Agency  
San Jose, California USA

"We can't believe everything that's included in the iCloud Total Call Plus residential service plan. We not only get our phone service -- but tons of useful features, slick applications and a cool looking phone. And it didn't cost an arm and a leg. Thanks!"

Residential Customer  
Dallas, Texas USA

"Our company has several branch offices and iCloud Total Office works like a charm to tie all locations seamlessly together with our corporate office. We've been very happy with the technology and service. We don't hesitate to recommend it to our business associates. iCloud offers a streamlined way for any company to have a fully functional voice and data system without all of the startup and equipment costs."

Financial Investment Company  
Albuquerque, New Mexico USA

[sales@geticloud.com](mailto:sales@geticloud.com)

"What a find! We've cut our telephone expenses by an unbelievable \$500 a month and we're experiencing a very obvious increase in efficient communication. We have 27 employees scattered across the U.S. and we needed the right tools to bring us all together as one cohesive work force. iCloud did just that at a fraction of the cost we would have paid a traditional provider."
