

No. CV-10-3925 (the "Illinois action"). Plaintiff alleges that defendants registered "a vast
 number of Internet domain names incorporating the service marks of Insubuy, and by
 operating commercial websites at those domains in an effort to divert customers and business
 away from Insubuy." <u>Complaint</u>, ¶ 12 (doc. 1-1).

5 On December 22, 2010, plaintiff served subpoenas issued by this court to third parties 6 Go Daddy, Inc. and its affiliate Domains by Proxy, Inc., companies that register internet 7 domain names. See Motion to Quash Subpoena Duces Tecum Issued to Go Daddy, ex. 1, 8 "Subpoena to Go Daddy, Inc." (doc. 2-1); Motion to Quash Subpoena Duces Tecum Issued 9 to Domains by Proxy, ex. 1, "Subpoena to Domains by Proxy" (doc. 3-1). The subpoenas 10 seek: (1) registration information about a list of specific domain names; (2) all domain names 11 registered by defendants CIA, Ramesh Patel, Robert Chorzepa and Gubman N. Moore, Inc. 12 ("Gubman"); and (3) all domain names registered to email addresses for defendants CIA and 13 Gubman. Defendant CIA moves to quash the two subpoenas on the grounds that they: (1) 14 violate a protective order entered in the Illinois action; (2) seek confidential and trade secret 15 information; (3) improperly shift the burden of production; (4) seek information that is not 16 relevant; and (5) are overly broad.

17

Π

18 Plaintiff may obtain discovery on any nonprivileged matter that is relevant to any 19 claim, and information sought need not be admissible at trial "if the discovery appears 20 reasonably calculated to lead to the discovery of admissible evidence." Fed. R. Civ. P. 21 26(b)(1). Pursuant to Rule 26(c)(1)(B), Fed. R. Civ. P., a party may move for an order to 22 protect itself from "annoyance, embarrassment, oppression, or undue burden or expense." 23 Under Rule 45(c)(3)(B), Fed. R. Civ. P., a party may move to quash or modify a subpoena 24 if it requires the disclosure of "a trade secret or other confidential research, development, or 25 commercial information." A party has standing to challenge a subpoena served on another 26 entity only if the party can show it has a personal right or privilege regarding the subject 27 matter of the subpoena. See Delta Mechanical, Inc. v. Garden City Group, Inc., 2010 WL 28 2609057, *2 (D. Ariz. 2010); Firetrace USA, LLC v. Jesclard, 2008 WL 5146691, *2 (D.

- 2 -

Ariz. 2008); Wright & Miller, <u>Federal Practice & Procedure</u> § 2463.1, Quashing or
 Modifying a Subpoena (2010) ("Numerous cases have held that a party lacks standing to
 challenge a subpoena absent a showing that the objecting party has a personal right or
 privilege regarding the subject matter of the subpoena.").

5 Defendant CIA has standing to challenge the subpoenas insofar as they seek 6 information on domain names registered by CIA and its president, defendant Patel. 7 Defendant has a proprietary interest in the domain names that it registers, which it claims it 8 uses for marketing purposes. However, defendant CIA does not have standing to challenge 9 plaintiff's requests for information regarding domain names registered by defendants 10 Chorzepa and Gubman on behalf of clients not party to this litigation. Defendants Chorzepa 11 and Gubman have not joined the motion to quash, and defendant CIA has no cognizable 12 interest in records of domain names registered for other companies. Therefore, we consider 13 defendant's motion only as it relates to plaintiff's request for information about domain 14 names registered on behalf of defendants CIA and Patel.

15

16

17

III

We consider each of defendant's arguments for quashing the subpoenas.

A

Defendant contends that plaintiff is attempting to circumvent the protective order in 18 19 the Illinois action. However, defendant does not point to any specific provisions of the order, 20 or explain exactly how the subpoenas violate it. The protective order allows a party or non-21 party to designate certain documents as either "confidential" or "restricted." Plaintiff states 22 that it has agreed to treat all information provided in response to the subpoenas as 23 "restricted," a designation that is equivalent to "attorneys' eyes only." It is difficult to 24 imagine how plaintiff could circumvent the protective order when it has agreed to treat the 25 produced information according to the order's most limiting terms. Therefore, the subpoenas do not violate the protective order entered in the Illinois action. 26

27

28

B

Defendant claims it has a direct and proprietary interest in the list of domain names

1 it registered, as they are important to its marketing efforts, and that the disclosure of the 2 registered names would create a windfall for plaintiff at defendant's expense, "given the 3 proclivity of Plaintiff to register similar and confusing domain names to that of CIA's to 4 hijack CIA's customers and potential customers." Motion to Quash Subpoena Issued to Go 5 <u>Daddy</u> at 4. However, as explained, plaintiff is willing to treat the produced information as 6 "restricted." Accordingly, only plaintiff's counsel will have access to the domain names, and 7 plaintiff's employees will not see the produced information. The "restrictive designation" 8 provides adequate protection of defendant's proprietary interest in the domain names it has 9 registered.

10

С

11 Defendant argues the subpoena should be quashed because it unreasonably shifts the 12 burden of production to defendant by requiring it to pay the costs of producing the 13 documents. Pursuant to defendant's registration agreement with Go Daddy, Go Daddy will charge defendant for the cost of complying with plaintiff's subpoenas. Motion to Quash 14 Subpoena Issued to Go Daddy at 3. However, this fee would be at most \$29. See Response 15 16 at 11 (doc. 8). An expense of this amount is not an unreasonable burden that justifies 17 quashing the subpoena. Moreover, plaintiff has a duty under Rule 45(c)(1), Fed. R. Civ. P., 18 to take reasonable steps to avoid imposing undue expenses on Go Daddy.

19

Defendant argues the none of the subpoenaed information is relevant to the Illinois action.¹ As explained, the relevancy of domain names registered by defendants Chorzepa and Gubman for non-party entities is not at issue because defendant CIA lacks standing to move to quash the subpoena of those documents. With respect to the requests for domain names registered on defendant's behalf, defendant argues that plaintiff already has

D

25

 ¹ Plaintiff contends that defendant does not have standing to challenge the subpoenas
 on the grounds of relevancy and overbreadth, under Rule 26, Fed. R. Civ. P. Because we
 conclude that the requested documents are relevant and the subpoenas not overly broad, we
 need not reach this issue.

information about fifty-two allegedly infringing domain names, and the other information
 sought is not relevant. Plaintiff counters that each registered domain name that is identical
 or confusingly similar to a distinctive mark is relevant, and it is entitled to discovery that is
 reasonably calculated to lead to such domain names.

5 We agree that the requests are reasonably calculated to lead to the discovery of 6 admissible evidence of unlawful domain name registration. The requests seek lists of all 7 domain names registered by or on behalf of defendants, based on defendants' names and 8 email addresses. While plaintiff is already aware of fifty-two domain names allegedly 9 registered unlawfully, the requests may reveal additional domain names that could also be 10 actionable. Therefore, the information requested is relevant.

11

E

12 Defendant argues that the subpoenas are overly broad. We disagree. The request for 13 all domain names registered by defendant allows plaintiff (through review by counsel) to 14 determine which domain names may be registered unlawfully. The production of this 15 information by third parties Go Daddy and Domains by Proxy, rather than by defendant, 16 ensures completeness and accuracy at a minimal cost. While the requested lists may reveal 17 domain names not similar to plaintiff's mark, those domain names may be relevant if they 18 infringe on other entities' marks, thereby demonstrating a pattern of unlawful conduct. See 19 15 U.S.C. § 1125 (d)(1)(B)(i)(VIII) (in determining bad faith intent in action for cyberpiracy, 20 court may consider defendant's registration of multiple domain names identical or 21 confusingly similar to marks of others). Because the requests are tailored to allow plaintiff's 22 counsel to review all domain names for actionable activity as well as evidence of a pattern 23 of misconduct, the subpoenas are not overly broad.

24

IV

Therefore, IT IS ORDERED GRANTING defendant's motion to open a
miscellaneous case (doc. 1). IT IS FURTHER ORDERED DENYING defendant CIA's
motion to quash plaintiff's subpoena duces tecum issued to Go Daddy, Inc. (doc. 2) and
defendant's motion to quash plaintiff's subpoena duces tecum issued to Domains by Proxy,

Inc. (doc. 3). DATED this 8th day of March, 2011. Frederick J. Martone Frederick J. Martone United States District Judge - 6 -
