UNITED STATES DISTRICT COURT  
CENTRAL DISTRICT OF CALIFORNIA  
SOUTHERN DIVISION

CLEAN ENERGY,	)	SA CV 08-746 AHS (RNBx)
	)	
Plaintiff,	)	
	)	
v.	)	FINDINGS OF FACT AND
	)	CONCLUSIONS OF LAW IN SUPPORT
APPLIED LNG TECHNOLOGIES,	)	OF ORDER DENYING PLAINTIFF'S
USA, LLC., et al.,	)	MOTION FOR PRELIMINARY
	)	INJUNCTION; ORDER DENYING
	)	PLAINTIFF'S MOTION FOR
Defendants.	)	PRELIMINARY INJUNCTION
_____	)	

I.

PROCEDURAL BACKGROUND

The above motion for preliminary injunction (the "Motion") was heard on August 4, 2008, and the Court, having considered the papers in support of the Motion filed by Plaintiff Clean Energy ("Plaintiff" or "Clean Energy"), the declarations and exhibits submitted therewith and the reply papers, the opposition papers submitted by Applied LNG Technologies USA, LLC ("Defendant" or "ALT"), and the declarations, exhibits, and objections submitted therewith, and all pleadings on file in connection with this motion, the Court makes the following

1 findings of fact and conclusions of law.

2 **II.**

3 **FINDINGS OF FACT**

4 **A. Contractual Relationship**

5 1. Clean Energy and ALT are competitors in the  
6 business of producing and distributing Liquefied Methane/Natural  
7 Gas ("LMG"). Declaration of Mitchell W. Pratt ("Pratt Decl."), ¶  
8 2; Declaration of Kevin Markey ("Markey Decl."), ¶ 4; and  
9 Defendant's Memorandum of Points and Authorities in Opposition to  
10 Plaintiff's Motion for Preliminary Injunction ("Defendant's  
11 Memorandum"), p. 2, ll. 20-2.

12 2. LMG is used principally by municipalities to power  
13 their fleets of buses and other vehicles that run on natural gas.  
14 Pratt Decl., ¶ 2; Markey Decl., ¶ 4.

15 3. Clean Energy "manufactures some of its own LMG,  
16 but purchases the majority of its LMG from other third-party  
17 producers." Plaintiff's Memorandum of Points and Authorities in  
18 Support of its Motion for Preliminary Injunction ("Plaintiff's  
19 Memorandum"), p. 4, ll. 19-20.

20 4. Clean Energy manufactures LMG at its own  
21 liquefaction plant in Houston, Texas. That plant, known as the  
22 Pickens Plant, is capable of producing up to 35 million gallons  
23 of LMG per year (95,000 gallons per day). Clean Energy's Form  
24 S-3 Registration Statement filed July 11, 2008 (Exhibit A, p. 10  
25 to Defendant's Request for Judicial Notice).

26 5. Clean Energy is in the process of building another  
27 liquefaction plant in California. Counsel for Clean Energy  
28 represented at the hearing held on August 4, 2008, that the new

1 plant is located approximately one hundred (100) miles from Los  
2 Angeles. The plant, which is expected to be operational in the  
3 fall of 2008, initially will be capable of producing up to 60  
4 million gallons of LMG per year (164,000 gallons per day), and  
5 will be expandable to 90 million gallons (246,000 gallons per  
6 day). Clean Energy's Form S-3 Registration Statement filed July  
7 11, 2008 (Exhibit A, p. 10 to Defendant's Request for Judicial  
8 Notice).

9           6. By agreement effective as of May 15, 2007, Clean  
10 Energy contracted with ALT for ALT to provide LMG to Clean  
11 Energy. Markey Decl., ¶ 5 and Exhibit A thereto.

12           7. A second agreement, effective January 1, 2008, is  
13 substantially identical to the first. Pratt Decl., Exhibit A  
14 thereto ("Agreement").

15           8. Clean Energy characterizes the Agreement as a  
16 "take-or-pay" contract. Clean Energy's 10-K (Exhibit D, p. 139  
17 to Defendant's Request for Judicial Notice).

18           9. Under the agreements, ALT was to supply and Clean  
19 Energy was to purchase 20,000 gallons per day of LMG on weekdays  
20 and Saturdays. Agreement § 3.1. The point of delivery for all  
21 LMG was ALT's plant located in Topock, Arizona. Agreement,  
22 Article IV, § 4.4 and Article VI, § 6.1. The LMG is delivered  
23 into trailers that each hold 10,000 gallons per trailer. Markey  
24 Decl., ¶ 5; Clean Energy's 10-K (Exhibit D, p. 61 to Defendant's  
25 Request for Judicial Notice).

26           10. The price of LMG under the agreements was not  
27 fixed. Rather, it fluctuates based on published "Prices of Spot  
28 Gas Delivered to Pipelines." Agreement, p. 37 (attachment

1 "Exhibit A" to Agreement).

2 11. The agreements provide for the sale and delivery  
3 of LMG "As Available FOB Topock Plant" and anticipates supply  
4 disruptions due to "non-scheduled plant shut down or production  
5 problems." Agreement, Article I(d), Article III, § 3.1 and  
6 Article IV, § 4.5, pp. 25-26.

7 12. Under the agreements, Clean Energy was to schedule  
8 the "pick up" of LMG on a weekly basis.

9 By the Close of Business each Thursday,  
10 Buyer [Clean Energy] will provide Seller  
11 [ALT] with a pick up schedule . . . for  
12 each day of the following week.

13 Agreement, Article VI, § 6.2, p. 27.

14 13. The agreements required ALT to render via e-mail  
15 an invoice to Clean Energy for each load of LMG delivered.  
16 Agreement, Article VII, § 7.1, p. 28. Payment for LMG was due  
17 "[w]ithin twenty (20) days of receipt of an invoice." Agreement,  
18 Article VII, § 7.2, p. 28.

19 14. The agreements expressly condition a party's  
20 obligation to perform on the other party's full performance of  
21 all of its obligations.

22 15.8 Full Performance Required.

23 Performance of any duty imposed on  
24 either party by this Agreement is  
25 conditioned on the other party's full  
26 performance of all duties imposed on it  
27 in this Agreement.

28 Agreement, Article XV, § 15.8, p. 34.

1           15. Under the agreements, Clean Energy and ALT  
2 contracted to exclude liability for consequential and incidental  
3 damages resulting from a breach:

4                   11.3 No Liability for Consequential  
5                   Damages. Neither party shall be liable  
6                   to the other for special, incidental,  
7                   punitive indirect or consequential  
8                   damages, under any circumstances,  
9                   including without limitation,  
10                   consequential damages caused or arising  
11                   out of, in whole or in part, any  
12                   negligent act or omission or related  
13                   strict liability.

14 Agreement, Article XI, § 11.3, p 31.

15           16. The agreements may be amended and any waiver by  
16 either or both parties of the time for performing any act under  
17 the Agreement shall not constitute a waiver of the time for  
18 performing any other act or an identical act required to be  
19 performed at a later time. Agreement, Article XV, §§ 15.1,  
20 15.14, pp. 33, 35.

21           17. The agreements are to be interpreted in accordance  
22 with the laws of the State of Texas. Agreement, Article XV, §  
23 15.2, p. 33. The provisions of the agreements are not to be  
24 construed "for or against any party based upon any attribution to  
25 such party as the source of the language in question."  
26 Agreement, Article XV, §15.10, p. 34.

27 //

28 //

1 **B. Course of Dealings between the Parties during**  
2 **Contractual Relationship**

3 18. It is undisputed that the parties' course of  
4 dealings deviated from the terms of their agreements.  
5 Plaintiff's Reply Memorandum of Points and Authorities in Support  
6 of its Motion for Preliminary Injunction ("Plaintiff's Reply  
7 Memorandum."), p. 4.

8 19. Clean Energy never provided a weekly schedule of  
9 pick ups. Declaration of Christa Peila ("Peila Decl."), ¶¶ 11-12  
10 (the citation is to the paragraph numbers as they appear in the  
11 Peila Decl.; the numbering, however, is erroneous). At most, it  
12 provided 24 hours advance notice. Powers Decl., ¶ 3.

13 20. A spreadsheet of all of the loads delivered since  
14 the inception of the parties' agreements indicates that there  
15 were many days on which Clean Energy did not take delivery of two  
16 loads of LMG (i.e., 20,000 gallons). On some days, it received  
17 no loads, and on others, it received a single delivery.  
18 Likewise, there were days when it received three or even four  
19 loads. Markey Decl., Exhibit B.

20 21. No documents or records of Clean Energy contradict  
21 ALT's spreadsheet.

22 22. Clean Energy generally did not pay for LMG within  
23 the twenty-day payment terms provided in the agreements. Markey  
24 Decl., ¶ 8 and Exhibit B thereto.

25 23. On at least two occasions, ALT complained to Clean  
26 Energy respecting unpaid invoices. Supplemental Declaration of  
27 Kevin Markey ("Markey Suppl. Decl.") ¶¶ 4, 6.

28 24. Clean Energy currently is delinquent on invoices

1 totaling \$180,861.48. Markey Decl., ¶ 8. Clean Energy does not  
2 deny that the invoices are in arrears and affirmatively states  
3 that it deliberately is withholding payment because ALT is not  
4 delivering 20,000 gallons of LMG per day. Powers Decl., ¶ 6.

5 **C. Clean Energy's Demand that Full Daily Deliveries be**  
6 **Restored and the City of Phoenix Contract**

7 25. By letter dated May 2, 2008, Clean Energy's Senior  
8 Vice President, Engineering, Operations and Public Affairs,  
9 Mitchell W. Pratt ("Pratt"), wrote to ALT's Vice President of  
10 Operations and Interim Chief Executive Officer, Kevin Markey.  
11 Pratt acknowledged that there had been "interruptions to our  
12 contracted quantities" of LMG and stated that Clean Energy "now  
13 must have the full daily deliveries restored." Pratt Decl.,  
14 Exhibit B thereto.

15 26. ALT responded by letter dated May 20, 2008. Pratt  
16 Decl., Exhibit C thereto. In the letter, ALT stated that it was  
17 experiencing maintenance issues including "water tower  
18 replacement, cold box leaks, main compressor seal replacement,  
19 gas regeneration compressor replacement as well as other sundry  
20 items." Id.

21 27. The timing of Clean Energy's demand to have "full  
22 daily deliveries restored" coincides with the "rebidding" of a  
23 contract to supply 45,000 gallons of LMG per day to the City of  
24 Phoenix. Declaration of James Harger ("Harger Decl."), ¶ 2.

25 28. After ALT secured the contract to supply the City  
26 of Phoenix, Clean Energy challenged the award by letter to the  
27 City of Phoenix dated June 18, 2008. Markey Decl., ¶ 11; Harger  
28 Decl., Exhibit E thereto. In the letter, Clean Energy contended

1 that ALT did not have the "demonstrated ability" to deliver LMG  
2 in adequate quantity pursuant to the contract. Harger Decl.,  
3 Exhibit E thereto.

4 29. Clean Energy's challenge to the awarding of the  
5 contract with the City of Phoenix to ALT was partially  
6 successful. One third of the contract (15,000 gallons) was taken  
7 from ALT and restored to Clean Energy. Harger Decl., ¶ 3; Markey  
8 Decl., ¶ 11.

9 30. Performance under of the contract to supply LMG to  
10 the City of Phoenix began on July 7, 2008. Harger Decl., ¶ 2.  
11 The very next day, July 8, 2008, Clean Energy commenced this  
12 action and filed its motion for mandatory injunctive relief.

13 **D. Clean Energy's Alleged Damages**

14 31. Based on the non-delivery of LMG, Clean Energy  
15 claims damages of \$2,046,046 over the remaining term of the  
16 parties' agreement. Powers Decl., ¶ 7.

17 32. Of the amount claimed, Clean Energy concedes that  
18 nearly 90% (\$1,801,800) is ascribed to transportation costs.  
19 Powers Decl., ¶ 7.

20 33. Clean Energy also concedes that ALT is entitled to  
21 a setoff because the price of fuel from suppliers other than ALT  
22 is likely to be lower than the price charged by ALT. Powers  
23 Decl., ¶ 7.

24 34. Although Clean Energy's Assistant Vice President,  
25 Operations, Joseph Brian Powers, presents calculations of Clean  
26 Energy's alleged damages as part of his declaration, he fails to  
27 provide details or documentary evidence to support his figures.  
28 No particulars are offered respecting the source of the

1 replacement LMG or the actual distances and costs attendant to  
2 its transportation. Powers Decl., ¶ 7.

3 **E. ALT'S Financial Condition**

4 35. Clean Energy's conclusions respecting the  
5 financial condition of ALT and its ability to pay damages in the  
6 event of a judgment against it are based entirely on public  
7 filings made with the Securities and Exchange Commission (the  
8 "SEC"). Plaintiff's Request for Judicial Notice.

9 36. The public filings indicate that, as a result of a  
10 corporate restructuring completed in July 2008, ALT was acquired  
11 by PNG Ventures, Inc. Markey Decl., ¶ 13; Form 8-K of PNG  
12 Ventures, Inc. dated June 30, 2008 (Exhibit I to Plaintiff's  
13 Supplemental Request for Judicial Notice). In connection with  
14 the transaction, ALT did not assume any of the obligations of its  
15 former parent, Earth Biofuels, Inc. and is not liable for that  
16 company's obligations. Markey Decl., ¶ 13.

17 37. ALT benefitted by the corporate restructuring in  
18 that it enabled ALT to expand its credit facilities. Markey  
19 Decl., ¶ 13. According to Clean Energy, the restructuring  
20 infused ALT with \$2.1 million in cash. Plaintiff's Reply  
21 Memorandum, p. 8, ll. 21-23, p. 9, ll. 1-6.

22 38. Public filings respecting Earth Biofuels, Inc. and  
23 PNG Ventures, Inc. were available to Clean Energy when it  
24 negotiated and entered into the agreements with ALT for the  
25 supply of LMG. Those filings disclosed each company's financial  
26 condition and contained "going concern qualifications" of the  
27 kind on which Clean Energy now seeks to rely.

28 39. ALT asserts it is able to meet all of its current

1 financial obligations as they become due and has not exhausted  
2 its available lines of credit. It also asserts that it is the  
3 beneficiary of valuable contracts, including the contract to  
4 supply the City of Phoenix with LMG, and that it has the ability  
5 to compensate Clean Energy for any damages by delivering LMG.  
6 Markey Decl., ¶¶ 14-15.

7 **III.**

8 **CONCLUSIONS OF LAW**

9 1. The purpose of a preliminary injunction is to  
10 preserve the relative positions of the parties until a trial on  
11 the merits can be held. Virgin Enters., Ltd. v. Virgin  
12 Petroleum, Inc., 2000 U.S. Dist. LEXIS 8100 (C.D. Cal. Jan. 19,  
13 2000) (citing Univ. of Texas v. Camenisch, 451 U.S. 390 (1981));  
14 see also Kentz v. Wrigley, 2006 U.S. Dist. LEXIS 82852 (E.D. Cal.  
15 Nov. 13, 2006) (same)).

16 2. "To obtain a preliminary injunction, plaintiffs  
17 are required to demonstrate '(1) a strong likelihood of success  
18 on the merits, (2) the possibility of irreparable injury to  
19 plaintiff[s] if preliminary relief is not granted, (3) a balance  
20 of hardships favoring the plaintiff[s], and (4) advancement of  
21 the public interest (in certain cases).'" Rodde v. Bonta, 357  
22 F.3d 988, 994 (9th Cir. 2004) quoting Johnson v. Cal. State Bd.  
23 of Accountancy, 72 F.3d 1427, 1430 (9th Cir. 1995) (citation and  
24 internal quotation marks omitted). Alternatively, injunctive  
25 relief may be granted where plaintiffs "demonstrate either a  
26 combination of probable success on the merits and the possibility  
27 of irreparable injury or that serious questions are raised and  
28 the balance of hardships tips sharply in [their] favor." Id.

1 (emphasis in original; citations and internal quotation marks  
2 omitted). "These two alternatives represent extremes of a single  
3 continuum, rather than two separate tests. . . ." Clear Channel  
4 Outdoor Inc. v. City of Los Angeles, 340 F.3d 810, 813 (9th Cir.  
5 2003) (internal citation and quotation marks omitted).

6 3. The party seeking a preliminary injunction has the  
7 burden of persuasion by a "clear showing" on each of the factors  
8 necessary to obtain the requested relief and also must not have  
9 an adequate remedy at law. See Mazurek v. Armstrong, 520 U.S.  
10 968, 972 (1997) ("It frequently is observed that a preliminary  
11 injunction is an extraordinary and drastic remedy, one that  
12 should not be granted unless the movant, by a clear showing,  
13 carries the burden of persuasion.") (internal quotations and  
14 citation omitted); see also Stanley v. Univ. of So. Cal., 13 F.3d  
15 1313 (9th Cir. 1994), (citing, Beacon Theatres, Inc. v. Westover,  
16 359 U.S. 500, 506-507 (1959)).

17 4. "When a mandatory preliminary injunction is  
18 requested, the district court should deny such relief 'unless the  
19 facts and law clearly favor the moving party.'" Stanley, 13 F.3d  
20 at 1320 (quoting Anderson v. U .S., 612 F.2d 1112, 1114 (9th Cir.  
21 1979)); see also Dahl v. HEM Pharmaceuticals Corp., 7 F.3d 1399,  
22 1403 (9th Cir. 1993) (noting that mandatory injunctions are  
23 "subject to a heightened scrutiny and should not be issued unless  
24 the facts and law clearly favor the moving party"). Such  
25 heightened scrutiny is reasonable given that unlike a preliminary  
26 injunction, a mandatory injunction "changes the position of the  
27 parties as opposed to preserving the status quo." San Diego  
28 Minutemen v. California Business Transp. and Housing Agency's

1 Dept. of Transp., 2008 WL 2781138, \*22 (S.D. Cal. Jun 27, 2008).

2 5. "[U]nless the facts and law clearly favor the  
3 moving party, a mandatory injunction will be denied." Anderson  
4 v. United States, 612 F.2d 1112, 1115 (9th Cir. 1979).

5 **A. Likelihood of Success on the Merits**

6 6. There is substantial evidence tending to show that  
7 Clean Energy has breached the contract it now seeks to enforce.

8 7. Under the law of the State of Texas, which the  
9 parties have designated as the law applicable to their agreement,  
10 "[i]t is elementary that a party to a contract who is himself in  
11 default cannot maintain a suit for its breach." Smith v. Fort,  
12 58 S.W. 2d 1080, 1081 (Tex. App. Amarillo 1933); see also  
13 Shuttuck v. Griffin, 44 Tex. 566, 567 (1876). "He must allege  
14 performance of the conditions it imposes upon him or a valid  
15 legal excuse for his failure to do so." Smith, 58 S.W. 2d at  
16 1081; see also Federal Sign Co. v. Ft. Worth Motors, Inc., 314  
17 S.W. 2d 878, 881 (Tex. App. Fort Worth 1958) ("[w]here one party  
18 seeks to enforce performance of a contract or to recover damages  
19 for a breach thereof, and the contract contains mutual covenants  
20 or requires him to do an act to entitle him to the action, he  
21 cannot maintain such action without alleging and proving  
22 performance or tender of performance on his part, unless such  
23 performance has been excused").

24 8. In addition to Texas law which requires that a  
25 plaintiff not be in breach, in Article XV, Section 15.8 of their  
26 agreement, the parties expressly made full performance a  
27 condition precedent to the other party's obligation to perform:

28 15.8 Full Performance Required.

1 Performance of any duty imposed on  
2 either party by this Agreement is  
3 conditioned on the other party's full  
4 performance of all duties imposed on it  
5 in this Agreement.

6 9. Clean Energy admittedly has not fully performed  
7 the parties' agreement in that it is withholding payment of at  
8 least \$180,861.

9 10. Clean Energy acknowledges a "course of dealings"  
10 that deviated from the express terms of the agreement. Under  
11 these circumstances, Clean Energy does not demonstrate a  
12 likelihood of success on the merits of its claim for breach of  
13 contract.

14 11. Clean Energy also fails to meet its burden as to  
15 damages because it has not provided details or documentary  
16 evidence so as to permit the Court to verify its calculations.  
17 The proof is insufficient. See Pratt Decl., ¶ 10; see also Texas  
18 Pipe Line Co. v. Hildreth, 225 S.W. 583, 584 (Tex. App. Dallas  
19 1920). ("The damages recoverable in any case must be susceptible  
20 of ascertainment with a reasonable degree of certainty, or, as  
21 the rule is sometimes stated, must be certain both in their  
22 nature and in respect to the cause from which they proceed.  
23 Therefore uncertain, contingent, or speculative damages cannot be  
24 recovered . . .").

25 12. Clean Energy's damage calculation reflects a  
26 comparison between the gallons delivered and the 20,000 gallon  
27 per day contract amount. Pratt Decl., ¶ 8. It does not account  
28 for occasions when ALT had legitimate grounds under the contract

1 to cancel delivery or for instances when Clean Energy did not  
2 schedule pick ups or refused to take delivery.

3 **B. Irreparable Harm**

4 13. It is well-established that "economic injury alone  
5 does not support a finding of irreparable harm, because such  
6 injury can be remedied by a damage award." Rent-A-Center, Inc.  
7 v. Canyon Television & Appliance Rental, Inc., 944 F.2d 597, 603  
8 (9th Cir.1991) (citing Los Angeles Mem'l Coliseum Comm'n v. Nat'l  
9 Football League, 634 F.2d 1197, 1201 (9th Cir. 1980)); see also  
10 Sampson v. Murray, 415 U.S. 61, 90 (1974) ("Mere injuries,  
11 however substantial, in terms of money, time and energy  
12 necessarily expended are not enough" to constitute irreparable  
13 injury) (quotation omitted)). However, economic injury may be  
14 the basis for injunctive relief "where the plaintiffs can  
15 establish that money damages will be an inadequate remedy due to  
16 impending insolvency of the defendant or that defendant has  
17 engaged in a pattern of secreting or dissipating assets to avoid  
18 judgment." In re Estate of Marcos, 25 F.3d 1467, 1480 (9th Cir.  
19 1994). In such cases, the law provides that injunctive relief is  
20 appropriate because of the risk that future remedies at law would  
21 become uncollectible and thus inadequate. Id.

22 14. Clean Energy concedes that it does not suffer from  
23 nor is it seeking relief for a traditional form of irreparable  
24 harm. Instead, Clean Energy bases its assertion of irreparable  
25 harm on ALT's alleged financial difficulties and its alleged  
26 inability to satisfy any judgment Clean Energy may be awarded.  
27 Clean Energy has not met its burden of persuasion.

28 15. If Clean Energy were ultimately to succeed on its

1 claim that ALT has breached the parties' agreement, damages  
2 typically provide a sufficient remedy.

3           16. Clean Energy does not prove that ALT cannot answer  
4 for any judgment that Clean Energy is likely to recover.  
5 Although the public filings on which Clean Energy attempts to  
6 rely contain warnings to potential investors, they do not  
7 establish that ALT cannot pay damages to Clean Energy in the  
8 event a breach of the agreement is established. Moreover, the  
9 filings indicate the completion of a corporate reorganization  
10 that has improved ALT's financial condition.

11 **C. Balance of Hardships and Public Interest**

12           17. The hardships do not balance in favor of issuing  
13 an injunction against ALT. The hardship faced by Clean Energy is  
14 merely one of damages resulting from the added expense of having  
15 to obtain LMG from other sources that may be at a greater  
16 distance than the ALT Topock plant. Clean Energy makes no claim  
17 that it cannot obtain replacement LMG from other suppliers and,  
18 consequently, there is no risk of Clean Energy being unable to  
19 supply its customers.

20           18. The 20,000 gallons per day provided for under the  
21 parties' agreement is only a small fraction of Clean Energy's  
22 business in LMG. The loss of LMG from ALT (which may only be  
23 temporary) will have only a minor impact on Clean Energy's  
24 operations.

25           19. Diminishing the impact of the loss of 20,000  
26 gallons per day is the new liquefaction plant that Clean Energy  
27 anticipates opening this fall. That facility initially will be  
28 capable of producing up to 164,000 gallons of LMG per day, more

1 than enough to offset the loss of LMG from ALT.

2           20. In contrast to the facilities of Clean Energy,  
3 ALT's operations are more modest. ALT operates a single  
4 liquefaction plant from which it attempts to supply its  
5 customers. If the Court were to order ALT to supply 20,000  
6 gallons per day to Clean Energy, ALT would not have sufficient  
7 LMG to supply its other customers.

8           21. The parties compete for the same consumers of LMG.  
9 To compel ALT to deliver LMG to Clean Energy may have drastic  
10 consequences to ALT's business.

11           22. Unlike the readily quantifiable damages that Clean  
12 Energy seeks to recover, the harm to ALT's business from the  
13 injunction will not be easily quantified or capable of proof.  
14 However, ALT risks irreparable harm by the issuance of the  
15 requested injunction.

16           23. When weighing whether to issue a preliminary  
17 injunction, the analysis "creates a continuum: the less certain  
18 the district court is of the likelihood of success on the merits,  
19 the more plaintiffs must convince the district court that the  
20 public interest and balance of hardships tip in their favor."  
21 Southwest Voter Registration Educ. Project v. Shelley, 344 F.3d  
22 914, 918 (9th Cir. 2003). Here, Clean Energy has not satisfied  
23 the Court that the hardships tip in its favor.

24           24. For purposes of this motion, the public's interest  
25 is in equipoise as to both parties.

26 **D. The Clean Hands Defense**

27           25. Since Clean Energy seeks equitable relief, it is  
28 appropriate for the Court to consider equitable defenses

1 including the defense of lack of clean hands. Precision  
2 Instrument Mfg. Co. v. Auto. Maint. Mach. Co., 324 U.S. 806  
3 (1945) (holding that the unclean hands doctrine "closes the doors  
4 of a court of equity to one tainted with inequitableness or bad  
5 faith relative to the matter in which he seeks relief, however  
6 improper may have been the behavior of the defendant"). Before  
7 Clean Energy receives equitable relief from the Court, it must  
8 demonstrate that it is worthy of such relief and that it has  
9 conducted its dealings in an equitable manner. Adler v. Federal  
10 Republic of Nig., 219 F.3d 869, 877 (9th Cir. 2000) (holding that  
11 "plaintiffs seeking equitable relief must have 'acted fairly and  
12 without fraud or deceit as to the controversy in issue'" (citing  
13 Ellenburg v. Brockway, Inc., 763 F.2d 1091, 1097 (9th Cir.  
14 1985)); see also Precision, 324 U.S. at 814 ("The equitable maxim  
15 [is] that 'he who comes into equity must come with clean  
16 hands.'").

17           26. The Court cannot at this time conclude that Clean  
18 Energy is worthy of the drastic relief of a mandatory preliminary  
19 injunction. Clean Energy did not adhere to the terms of the  
20 agreement and currently owes at least \$180,861 in overdue  
21 invoices to ALT.

22           27. Having found no clear and convincing evidence on  
23 the grounds stated above of Plaintiff's alleged risk of  
24 irreparable harm and having found that the balance of equities  
25 does not favor plaintiff, the Court declines to issue a  
26 preliminary injunction.

27 //

28 //

1 IV.

2 ORDER DENYING MOTION

3 Based on the foregoing findings of fact and conclusions  
4 of law, the Court denies Plaintiff's Motion for Preliminary  
5 Injunction.

6 The Clerk shall serve this order on counsel for all  
7 parties in this action.

8 IT IS SO ORDERED.

9 DATED: September 3, 2008.
