

EXHIBIT B

PART 4

one or more categories from three tiers 12, 14, and 16, and one of the copyright-status categories 17, and by utilizing a keyword search. A graphical user interface, such as is shown in Fig. 3, may be provided. The user may select one or more categories from each of one, two, or three of the category tiers 12, 14, and 16, and from one or none of the copyright-status categories 17, or from none of tiers 12, 14, and 16 and from one of the copyright-status categories 17, and may or may not use the keyword search function. For convenience, as is well known in the art, when an icon is selected, its appearance may change such that it is emphasized, such as by highlighting.

The user may select, from first tier 12, the category of Commerce 18, the category of Information 20, or both categories 18 and 20. The categories may be conveniently represented on the user's screen by an indicium, for example, as is preferred: "\$" for Commerce 18 and "i" for Information 20. If the user selects "\$," the search will be restricted to only those Web pages that are categorized as Commerce 18. This will include all pages in the Commerce category 18 as well as the subcategory that is both Commerce 18 and Information 20. Pages only in the Information category 20, and not also in Commerce 18, will automatically be excluded. If the user selects "i," the search will be restricted to only those Web pages that are categorized as Information 20. This will include all pages in Information category 20 as well as the subcategory that is both Information 20 and Commerce 18. Pages only in the Commerce category 18, and not also in Information 20, will automatically be excluded. If the user selects both "\$" and "i," as shown in Fig. 4, the search will be restricted to only those Web pages that are categorized as both Commerce 18 and Information 20. Only subcategory 56 of Commerce and Information will be searched. Pages only in Commerce 18 and pages only in Information 20 will be excluded. If none of the categories of first tier 12 are selected, the search results will include Web pages of both categories and the subcategory and will not be narrowed based on whether the page is involved in transacting business or

providing information.

The user next may select one or more categories from second tier 14: Government 22, Medical 24, Education & Social Science 26, News 28, Sports & Recreation 30, History 32, Science & Technology 34, Arts & Humanities 36, Finance & Business 38, Reference 40, Explicit 42, and Other 44. As shown in Fig. 3, each of these twelve categories may be conveniently represented on the user's screen by a different indicium, for example, as is preferred: a flag for Government, a caduceus for Medical, a mortarboard for Education & Social Science, a satellite dish for News, a bicycle for Sports & Recreation, a pyramid for History, a microscope for Science & Technology, an artist's palette for Arts & Humanities, a briefcase for Financial, a book for Reference, an "X" for Explicit (pornographic or sexually-explicit material), and a "?" for Other. A list of sample topics included in each category may be provided to the user who may view the list by, for example, clicking on the icon for the category. The twelve subject matter categories and their corresponding topics are shown in Figs. 5, 6, and 7. If none of the categories are selected, the search results will include Web pages of all twelve categories and will not be narrowed based on the subject matter contained in the page.

Next, the user may select one or more categories from third tier 16: Visual 46, Audio 48, Multimedia 50, Text-only 52, and Communication 54. As shown in Fig. 3, each of the five categories may be conveniently represented on the user's screen by a different indicium, for example, as is preferred: an eye for Visual, an ear for Audio, a lightning bolt for Multimedia, a text page for Text-only, and a mouth for Communication. If no selection is made from this tier, the results from the search will include Web pages that are associated with file-types of text, visual, audio, multimedia, and communications and will not be narrowed based on the types of files contained on the page.

Then, the user may select one of the copyright-status categories 17: Public Domain, Fair Use Only, Use with Attribution, and Permission of Copyright Owner

Needed. As shown in Fig. 3, each of the four categories may be represented on the user's screen by a different indicium, such as a two-numeral indicium as is shown. If none of the categories are selected, the search results will include Web pages of all four categories and will not be narrowed based on the copyright-status of the material on the page.

5 Combining categories restricts the search results to only the relevant categories and subcategories. The greater the number of categories chosen, the more refined the search and the greater the number of pages that are excluded from the search. When the user selects several categories, the user does not get results from each of those categories, but only from the subcategory that is created from the combination of the selected categories.

10 Combining categories acts as a filtering process, eliminating irrelevant material from the search and from subsequent results. This method allows the user to exclude unwanted material, such as pornography, which is contained in Explicit category 42.

15 The user may next enter a keyword 58, which can be a single word or multiple words. The keyword search can be formulated by using either Boolean logic terms or natural language.

20 For example, a searcher who wanted to find information on sports-related knee injuries that could be used with the permission of the copyright owner would make the selections shown in Fig. 8. By selecting the combination of the Information, Medical, and Sports & Recreation categories, as well as the category that contains Permission of Copyright Owner Needed, the search and subsequent search results will be limited to the subcategory shown in Fig. 9 and will not include pages and sites from the larger Information, Medical, Sports & Recreation, and Permission of Copyright Owner Needed categories that are not contained within the much smaller subcategory.

25 After making the selections, the user initiates the search. The indicia for the categories selected and the keyword preferably remain visible on the user's screen during the search.

After a user initiates a category-limited search, existing technologies known in the art will allow an identification to be made of all pages that have been assigned to all of the categories to which the search was limited. This may be accomplished by a search engine reviewing a database corresponding to a subcategory that is equal to the combination of categories selected by the user. If the search has been limited using keyword, an identification is made of all pages containing the keyword. If the search is both category-limited and keyword-limited, an identification is made of all pages that have been assigned to all of the categories to which the search was category-limited, which also contain the keyword.

Searchers will also be able to make use of the categorization code by treating the categorization label as a keyword element in combination with actual keywords. For instance, by treating the categorization label "ingovi" as a keyword and combining it with the keyword "Pentagon," using the Boolean qualifier "AND" to search "ingovi" AND "Pentagon," the searcher would receive results from the subcategory created by the combination of the Information, Government, and Visual categories that also contain the keyword "Pentagon."

Existing technologies known in the art will allow all sites identified by the search to be reported as search results to the user, by network address, such as a Web page's "uniform resource locator" (URL), so that the user can access any identified page. Other information, such as the first line, may also be reported. For each site reported, the results may show all of the indicia corresponding to all of the categories to which that page had been assigned.

Searches for pornographic sites will be handled in the same manner as other searches with one exception: The Explicit category is not combinable with any other second tier category. Also, search engines can be instructed to exclude from the search results pages contained in the Explicit category if desired by the user. The user is also

provided with the option to exclude the indicium for the Explicit category from the user interface. This will serve two purposes. It will eliminate the category from search use and it will also remove any indication alluding to the access of pornographic or sexually explicit material. Other types of sexually explicit material, such as medical studies and scientific research, and material related to pornography such as governmental initiatives and news, may be accessed through the other categories of second tier 14 using "pornography" as a keyword.

The foregoing detailed disclosure of the inventive method is considered as only illustrative of the preferred embodiments of, and not a limitation upon the scope of, the invention. Those skilled in the art will envision many other variations of the method disclosed that nevertheless fall within the scope of the following claims. Alternative uses for this inventive method may later be realized. Accordingly, the scope of the invention should be determined with reference to the appended claims and not by the examples that have been given.

CLAIMS

1. A method of categorizing a network page, comprising the steps of:
 - a. providing a list of categories; and,
 - b. providing the opportunity to assign a page to one or more of a plurality of
5 said categories.

2. The method of Claim 1, wherein said categories include a category for pages
involved in transacting business and a category for pages involved in providing
information.
10

3. The method of Claim 1, wherein said categories include a plurality of categories
based on subject matter.

4. The method of Claim 3, wherein said categories comprise categories related to
government, medical, education and social science, news, sports and recreation,
15 history, science and technology, arts and humanities, finance and business,
reference, explicit, and other.

5. The method of Claim 1, wherein said categories include a plurality of categories
based on the type of files associated with a page.
20

6. The method of Claim 5, wherein said categories comprise visual, audio,
multimedia, text-only, and communication.

- 25 7. The method of Claim 1, wherein said categories include a plurality of categories
based on the copyright status of material on a page.

8. The method of Claim 7, wherein said categories comprise categories related to public domain, fair use only, use with attribution, and permission of copyright owner needed.
- 5 9. The method of Claim 1, wherein said categories include:
- a. a category for pages involved in transacting business and a category for pages involved in providing information; and
 - b. a plurality of categories based on subject matter.
- 10 10. The method of Claim 1, wherein said categories include:
- a. a category for pages involved in transacting business and a category for pages involved in providing information; and
 - b. a plurality of categories based on the type of files associated with a page.
- 15 11. The method of Claim 1, wherein said categories include:
- a. a category for pages involved in transacting business and a category for pages involved in providing information; and
 - b. a plurality of categories based on the copyright status of the material on a page.
- 20
12. The method of Claim 1, wherein said categories include:
- a. a category for pages involved in transacting business and a category for pages involved in providing information;
 - b. a plurality of categories based on subject matter; and
 - 25 c. a plurality of categories based on the copyright status of the material on a page.

13. The method of Claim 1, wherein said categories include:
- a. a plurality of categories based on subject matter; and
 - b. a plurality of categories based on the type of files associated with a page.
- 5 14. The method of Claim 1, wherein said categories include:
- a. a plurality of categories based on subject matter; and
 - b. a plurality of categories based on the copyright status of the material on a page.
- 10 15. The method of Claim 1, wherein said categories include:
- a. a plurality of categories based on subject matter;
 - b. a plurality of categories based on the type of files associated with a page; and
 - c. a plurality of categories based on the copyright status of the material on a page.
- 15
16. The method of Claim 1, wherein said categories include:
- a. a plurality of categories based on the type of files associated with a page; and
 - 20 b. a plurality of categories based on the copyright status of the material on a page.
17. The method of Claim 1, wherein said categories include:
- a. a category for pages involved in transacting business and a category for pages involved in providing information;
 - 25 b. a plurality of categories based on subject matter;

- c. a plurality of categories based on the type of files associated with a page;
and,
- d. a plurality of categories based on the copyright status of the material on a page.

5

18. The method of Claim 1, further comprising the step of providing an indicium for each of said categories.

10

19. The method of Claim 18, wherein said indicium comprises an icon.

20. The method of Claim 18, wherein said indicium comprises two letters.

15

21. The method of Claim 1, further comprising the step of providing a categorization code that can be used to label a page with a categorization label that indicates the categories to which the page is assigned.

22. The method of Claim 21, wherein said categorization code comprises an indicium for each of said categories.

20

23. The method of Claim 22, wherein said indicium comprises two letters.

24. The method of Claim 22, wherein said categorization label includes the indicia for each category to which a page is assigned.

25

25. The method of Claim 21, wherein said categorization label denotes the level of importance of the categories to which a page is assigned.

26. The method of Claim 25, wherein said categorization label is recognizable by a search engine.
27. The method of Claim 21, wherein said categorization label further includes an identifier to indicate that said label is part of said categorization code.
28. The method of Claim 21, wherein said categorization label can be made to apply to an entire Web site.
29. The method of Claim 21, further comprising the step of making said categorization label recognizable by a search engine.
30. The method of Claim 1, further comprising the step of making said categories to which a page is assigned recognizable by a search engine.
31. The method of Claim 1, wherein said list of categories is provided on a graphical user interface.
32. A method for categorizing a network page, comprising the steps of:
- a. providing a list of categories; and
 - b. providing a categorization code that can be used to label a page with a categorization label that indicates the categories to which the page is assigned.
33. A method for searching for and locating information on a network, comprising the steps of:
- a. providing an opportunity to limit the search to one or more of a plurality of

categories, wherein the categories are pages involved in transacting business, pages involved in providing information, and pages involved in both transacting business and providing information; and

- 5 b. providing an opportunity to limit the search to one or more of a plurality of subject matter categories.

34. A method for searching for and locating information on a network, comprising the steps of:

- 10 a. providing an opportunity to limit the search to one or more of a plurality of categories, wherein the categories are pages involved in transacting business, pages involved in providing information, and pages involved in both transacting business and providing information; and
- b. providing an opportunity to limit the search to one or more of a plurality of categories based on the type of files associated with a page.

15 35. A method for searching for and locating information on a network, comprising the steps of:

- 20 a. providing an opportunity to limit the search to one or more of a plurality of categories, wherein the categories are pages involved in transacting business, pages involved in providing information, and pages involved in both transacting business and providing information; and
- b. providing an opportunity to limit the search to one or more of a plurality of categories based on the copyright status of the material on a page.

25 36. A method for searching for and locating information on a network, comprising the steps of:

- 5
- a. providing an opportunity to limit the search to one or more of a plurality of categories, wherein the categories are pages involved in transacting business, pages involved in providing information, and pages involved in both transacting business and providing information; and
 - b. providing an opportunity to limit the search by keyword.
- 10
37. A method for searching for and locating information on a network, comprising the steps of:
- a. providing an opportunity to limit the search to one or more of a plurality of subject matter categories; and
 - b. providing an opportunity to limit the search to one or more of a plurality of categories based on the type of files associated with a page.
- 15
38. A method for searching for and locating information on a network, comprising the steps of:
- a. providing an opportunity to limit the search to one or more of a plurality of subject matter categories; and
 - b. providing an opportunity to limit the search to one of a plurality of categories based on the copyright status of the material on a page.
- 20
39. A method for searching for and locating information on a network, comprising the steps of:
- a. providing an opportunity to limit the search to one or more of a plurality of subject matter categories; and
 - b. providing an opportunity to limit the search by keyword.
- 25

40. A method for searching for and locating information on a network, comprising the steps of:
- a. providing an opportunity to limit the search to one of a plurality of categories based on the copyright status of the material on a page; and
 - 5 b. providing an opportunity to limit the search by keyword.
41. A method for searching for and locating information on a network, comprising the steps of:
- a. providing an opportunity to limit the search to one or more of a plurality of categories, wherein the categories are pages involved in transacting business, pages involved in providing information, and pages involved in both transacting business and providing information;
 - 10 b. providing an opportunity to limit the search to one or more of a plurality of subject matter categories;
 - 15 c. providing an opportunity to limit the search to one or more of a plurality of categories based on the type of files associated with a page;
 - d. providing an opportunity to limit the search to one of a plurality of categories based on the copyright status of the material on a page; and,
 - e. providing an opportunity to limit the search by keyword.
 - 20
42. The method of Claim 41, further comprising the step of providing a graphical user interface indicating said subject matter categories.
43. The method of Claim 42, in which said graphical user interface does not include
- 25 an indication of a category related to pornography.

44. The method of Claim 42, wherein the opportunity to limit the search by category is exercised by a user selecting an indicium corresponding to each such category.
- 5 45. The method of Claim 41, wherein the step of providing an opportunity to limit the search to one or more of a plurality of subject matter categories further comprises the step of providing a separate subject matter category for pornographic material.
- 10 46. The method of Claim 41, wherein the step of providing an opportunity to limit the search to one or more of a plurality of subject matter categories further comprises the step of providing an opportunity to limit the search to categories other than a category for pornographic material.
- 15 47. The method of Claim 41, wherein said subject matter categories comprise categories related to government, medical, education and social science, news, sports and recreation, history, science and technology, arts and humanities, finance and business, referenced, explicit, and other.
- 20 48. The method of Claim 41, wherein said file-type categories comprise visual, audio, multimedia, text-only, and communications.
49. The method of Claim 41, wherein said copyright-status categories comprise categories related to public domain, fair use only, use with attribution, and permission of copyright owner needed.
- 25 50. The method of Claim 41, further comprising the step of identifying pages that have been assigned to all of the categories to which the search was limited.

ABSTRACT OF THE DISCLOSURE

The invention includes a method for categorizing pages on a network, including the steps of providing a list of categories and providing the opportunity to assign a page to one or more categories. The categories include pages involved in transacting business, pages
5 involved in or providing information, subject matter categories, file-type categories, and copyright-status categories. The method also includes a categorization code that can be used to label a page with a categorization label indicating the categories to which the page is assigned. The invention also includes a method for searching for information on a network. The steps include providing an opportunity to limit a search to categories
10 including commerce and information, subject matter, file type, and copyright status, and providing an opportunity to limit the search by keyword.

1. Fee Transmittal Form (e.g., PTO/SB/17)
(Submit an original and a duplicate for fee processing)
 2. Applicant claims small entity status.
See 37 CFR 1.27.
 3. Specification [Total Pages
(preferred arrangement set forth below)
 - Descriptive title of the invention
 - Cross Reference to Related Applications
 - Statement Regarding Fed sponsored R & D
 - Reference to sequence listing, a table, or a computer program listing appendix
 - Background of the Invention
 - Brief Summary of the Invention
 - Brief Description of the Drawings (if filed)
 - Detailed Description
 - Claim(s)
 - Abstract of the Disclosure
 4. Drawing(s) (35 U.S.C. 113) [Total Sheets - 5. Oath or Declaration [Total Pages - a. Newly executed (original or copy)
 - b. Copy from a prior application (37 CFR 1.63 (d))
(for continuation/divisional with Box 18 completed)
 - i. **DELETION OF INVENTOR(S)**
 Signed statement attached deleting inventor(s) named in the prior application, see 37 CFR 1.63(d)(2) and 1.33(b).
6. Application Data Sheet. See 37 CFR 1.76

7. CD-ROM or CD-R in duplicate, large table or Computer Program (Appendix)
8. Nucleotide and/or Amino Acid Sequence Submission (if applicable, all necessary)
 - a. Computer Readable Form (CRF)
 - b. Specification Sequence Listing on:
 - i. CD-ROM or CD-R (2 copies); or
 - ii. paper
 - c. Statements verifying identity of above copies
