UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF CALIFORNIA

CONSERVATION CONGRESS,

 Plaintiff,

 v.

UNITED STATES FOREST SERVICE,
UNITED STATES FISH AND
WILDLIFE SERVICE,

 Defendants,

 &

TRINITY RIVER LUMBER COMPANY,

 Defendant
 Intervenor.

No. 2:13-cv-1977-JAM-DB

**ORDER DENYING PLAINTIFF'S MOTION
FOR STAY PENDING APPEAL**

Conservation Congress ("Plaintiff") seeks to enjoin commencement of the Smokey Project while its lawsuit remains pending on appeal. For the reasons set forth below, Plaintiff's motion is denied.¹

¹ This motion was determined to be suitable for decision without oral argument. E.D. Cal. L.R. 230(g). The hearing was scheduled for August 7, 2018.

1 I. BACKGROUND

2 On February 17, 2017, this Court ruled on the parties'
3 cross-motions for summary judgment. The Court ruled in favor of
4 Conservation Congress on two of its claims, finding that the
5 United States Forest Service failed to take a "hard look" and
6 failed to develop a reasonable range of alternatives in its
7 analysis of the Smokey Project. See Order Re Plaintiff's Motion
8 and Defendants' Cross Motion for Summary Judgment, ECF No. 121.
9 The Court granted Defendants' cross motion for summary judgment
10 on Plaintiff's remaining claims. Id. Following a round of
11 supplemental briefing, the Court issued its Final Judgment, in
12 which it remanded the NEPA analysis to the United States Forest
13 Service to cure the violations identified in the summary judgment
14 order and enjoined the removal of any trees with 20 inches dbh or
15 greater in implementing the Smokey Project. Final Judgment, ECF
16 No. 142. In December of 2017, Defendants moved to amend the
17 judgment (to dissolve the injunction) on the grounds that the
18 supplemental analysis had been completed. ECF No. 162. The
19 Court granted the motion and dissolved the injunction on March 2,
20 2018. ECF No. 171.

21 II. OPINION

22 A. Legal Standard

23 Although Plaintiff frames its motion to the Court as a
24 request for a "stay" pending appeal, Plaintiff is asking the
25 Court to enter an injunction pending appeal. See Nken v. Holder,
26 556 U.S. 418, 428-29 (2009) ("A stay 'simply suspend[s] judicial
27 alteration of the status quo,' while injunctive relief 'grants
28 judicial intervention that has been withheld by lower courts.'")

1 (citation omitted). Federal Rule of Civil Procedure 62(c) makes
2 available an injunction pending appeal. A motion for injunction
3 pending appeal is governed by a legal standard like that for a
4 preliminary injunction. Conservation Congress v. U.S. Forest
5 Service, 803 F. Supp. 2d 1126, 1129 (E.D. Cal. 2011). Therefore,
6 to obtain an injunction pending appeal, Plaintiff must establish
7 it "is likely to succeed on the merits, that [it] is likely to
8 suffer irreparable harm in the absence of [] relief, that the
9 balance of equities tips in [its] favor, and that an injunction
10 is in the public interest." See Winter v. Nat. Res. Def.
11 Council, Inc., 555 U.S. 7, 20 (2008). Alternatively, Plaintiff
12 may obtain injunctive relief if it shows that there are serious
13 questions going to the merits, the balance of the hardships tip
14 sharply in Plaintiff's favor, and the other two Winter's factors
15 are satisfied. See Alliance for the Wild Rockies v. Pena, 865
16 F.3d 1211, 1217 (9th Cir. 2017).

17 B. Analysis

18 1. Merits

19 The Court has carefully evaluated Plaintiff's challenges to
20 the USFS's and FWS's analyses and conclusions related to the
21 Smokey Project at each stage of this litigation. Its detailed
22 analysis of these claims is set forth in its Order Re Plaintiff's
23 Motion and Defendants' Cross Motion for Summary Judgment, ECF No.
24 121, Final Judgment, ECF No. 142, and Order Granting Defendants'
25 Motion to Amend the Judgment and Dissolve the Injunction, ECF No.
26 162. Plaintiff has not identified any critical errors in the
27 Court's findings or analysis that would cause the Court to
28 question the validity of the conclusions it has already drawn.

1 See Mot. at 9-20. The Court therefore does not find Plaintiff is
2 likely to succeed on the merits of its claims.

3 At most, the issues Plaintiff reiterates in its motion might
4 raise serious questions going to the merits. However, because
5 the equitable factors in this case weigh against granting the
6 extraordinary relief requested, the Court need not make a finding
7 on these challenges.

8 2. Irreparable Harm

9 The Court previously entered a limited injunction in this
10 case after finding that the procedural harm Plaintiff suffered—
11 namely, the agency's failure to address or consider a large
12 diameter cap during its NEPA analysis—coupled with the permanent
13 removal of trees that might otherwise be protected by such a cap
14 consisted irreparable harm. Final Judgment at 4-5. As
15 Defendants and Intervenor point out, the Court found USFS's
16 supplemental NEPA process ameliorated the procedural harm. See
17 Def. Opp'n at 7; Int. Opp'n at 17-18; Order Granting Defendants'
18 Motion to Amend the Judgment and Dissolve the Injunction at 22.
19 The Court reiterates that finding here: the USFS's additional
20 post-judgment analysis cured the identified procedural harm.

21 Plaintiff's motion therefore turns on irreparable harm to
22 the environment, specifically as it relates to the Northern
23 Spotted Owl. Plaintiff need not demonstrate a threat of
24 extinction to the species to meet its burden. Nat'l Wildlife
25 Fed'n v. Nat'l Marine Fisheries Serv., 886 F.3d 803, 819 (9th
26 Cir. 2018). But, "irreparable injury requires harm 'significant'
27 to the 'overall population.'" Defs. of Wildlife v. Salazar, 812
28 F. Supp. 2d 1205, 1210 (D. Mont. 2009); see Pac. Coast Fed'n of

1 Fishermen's Ass'ns v. Gutierrez, 606 F. Supp. 2d 1195, 1254 n. 12
2 (E.D. Cal. 2008) ("Other district courts have issued injunctive
3 relief where an agency action would cause harm to a small number
4 of individual species' members, but always under circumstances in
5 which the loss of those individuals would be significant for the
6 species as a whole.").

7 Through its cited evidence, Plaintiff has shown a
8 possibility of harm to several NSOs that live in Smokey Project
9 area. However, in the face of competing evidence, the Court
10 cannot conclude that the stated harm is irreparable. Further,
11 Plaintiff has not shown a likelihood of irreparable harm to the
12 species. Although an extinction level threat is not necessary to
13 warrant relief, the harm inflicted must still befall the species
14 and not only individual members.

15 3. Balance of Equities and Public Interest

16 To obtain injunctive relief, Plaintiff must establish that
17 the balance of the equities and public interest weigh in favor of
18 granting such relief. Where, as here, Plaintiff has not shown a
19 likelihood of success on the merits, Plaintiff must establish
20 serious questions going to the merits and that the balance of the
21 equities tip sharply in Plaintiff's favor. See Alliance for the
22 Wild Rockies v. Pena, 865 F.3d at 1217.

23 Plaintiff does not address these two factors in its moving
24 papers. It mentions, in passing, that there is a "strong public
25 interest in the preservation of the little remaining late
26 successional and old growth forest habitat in northwestern
27 forests and the lack of any countervailing non-monetary interest
28 in the immediate harvest of commercial timber in the Smokey

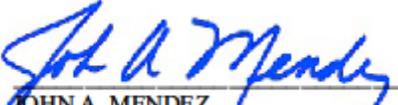

1 Project area.” See Mot. at 22. This cursory treatment of these
2 equitable factors fails to address the overarching aim of the
3 project: reducing the risk of fire hazards and restoring forest
4 stands in the Smokey Project area. Because of this deficiency,
5 as well as the arguments and evidence cited in the two
6 Oppositions, the Court does not find that the equitable factors
7 weigh in favor of granting relief. Plaintiff has not shown it is
8 entitled to the extraordinary relief it seeks.

9 III. ORDER

10 For the reasons set forth above, the Court DENIES
11 Plaintiff’s Motion for Stay Pending Appeal.

12 IT IS SO ORDERED.

13 Dated: August 16, 2018
