Doc. 198 Att. 17 Case 3:02-cv-01991-JSW Document 198-18 Filed 07/15/2004 Page 1 of 9

EXHIBIT K (CONT.)

| 1 | Q. Rather than doing it by reference to the |
|----|---|
| 2 | patent, can you just describe for me in terms of |
| 3 | functionality or features what it was that you understood |
| 4 | was new prior to the time that you filed the patent |
| 5 | application? |
| 6 | MS. THAYER: Just to clarify, are you asking him, |
| 7 | like, down to code level and that sort of thing? |
| 8 | MS. DURIE: No, absolutely not. Just categories. |
| 9 | MS. THAYER: Okay. |
| 10 | BY THE WITNESS: |
| 11 | A. The code was different. The implementation |
| 12 | was different. The system after the beta system at some |
| 13 | point began acquiring features that we now refer to as |
| 14 | the Direct Traffic Center, which allowed on-line account |
| 15 | management by advertisers. Just a whole lot of things. |
| 16 | BY MS. DURIE: |
| 17 | Q. So, on-line account management by advertisers. |
| 18 | I'm looking for sort of broad categories of things like |
| 19 | that that were different feature sets that you understood |
| 20 | had not been present in the prior system but were present |
| 21 | in the system that was accessible to you on the web at |
| 22 | the time you filed the patent application. |
| 23 | Other than on-line account management by |
| 24 | advertisers, what other categories of features can you |

| 1 | think of? |
|----|---|
| 2 | A. As I say, I was told that the entire |
| 3 | implementation was different. The beta system was |
| 4 | written in one way in one type of language. And as I |
| 5 | understand it the public launch of the system, which I |
| 6 | thought was around or about on or about June 1st, |
| 7 | 1998, was just a different structural system, different |
| 8 | coding, different software, different architecture. |
| 9 | Q. Okay. From the leaving aside the issues |
| 10 | about a different code base, a different software, from |
| 11 | the perspective of a user of the system can you identify |
| 12 | for me any other additional features that you understood |
| 13 | had been added since the beta system other than the |
| 14 | on-line account management by advertisers that you've |
| 15 | identified? |
| 16 | MS. THAYER: Objection. Vague as to "user." |
| 17 | BY MS. DURIE: |
| 18 | Q. Well, actually a user could be either a |
| 19 | searcher or an advertiser. |
| 20 | A. The only things I could think of would be |
| 21 | without seeing screen shots or operating the two systems |
| 22 | in those two time frames and noting the differences, as I |
| 23 | sit here, for recollection I have to always come back to |
| 24 | focus on what was claimed in the patent because that was |

| 1 | my focus. To a great extent I didn't need to know the |
|-----|---|
| 2 | commercial operation of the GoTo system in the middle of |
| 3 | 1999 or later. |
| 4 | So, and as you know, a patent infringement |
| 5 | focuses on an invention which may or may not in whole or |
| 6 | in part correspond to a commercial embodiment. So, I'm |
| 7 | having difficulty with that question for at least that |
| 8 | reason. |
| 9 | Q. Okay. Fair enough. Well, I guess let |
| 10 | me I just want to is there anything that you can |
| 11 | remember strike that. |
| 12 | Are there any feature sets that you can |
| 13 | remember that had been added to the GoTo system since the |
| 1.4 | precritical date beta version other than the on-line |
| 15 | account management by advertisers, and keeping in mind |
| 16 | that you've already referenced that the code base in the |
| 17 | software was different? |
| 18 | A. A couple of comments. First of all, again |
| 19 | you're asking me the differences between two systems. |
| 20 | And I explained to you why I have woefully imperfect |
| 21 | knowledge of the systems at this point in time as to the |
| 22 | feature set of the the 1999 version. I just don't |
| 23 | have that recollection. |
| 24 | At the time I knew a lot about the beta |
| | |

| 1 | system. But now you're asking me to compare it to |
|----|---|
| 2 | something I don't recall very well. And as far as |
| 3 | feature sets, I don't know what you mean by that. |
| 4 | DTC, the Direct Traffic Center, encompasses a |
| 5 | whole lot of features. So, I just refer to that broadly |
| 6 | as DTC. |
| 7 | Q. Okay. Can you then tell me what give me |
| 8 | examples of some of the features within the Direct |
| 9 | Traffic Center that you recall being present in the |
| 10 | system that you looked at on-line in early 1999, but not |
| 11 | being present in the beta system from prior to the |
| 12 | critical date? |
| 13 | A. I can't bring up in my mind a picture of |
| 14 | actually going on the GoTo website in 1999 to see what an |
| 15 | advertiser would see. In that regard my knowledge |
| 16 | primarily, if not entirely, would be based on what's in |
| 17 | the patent application. |
| 18 | Q. Okay. So, is it fair to say that other than |
| 19 | saying sort of generally that features associated with |
| 20 | direct traffic management had been added and were not |
| 21 | present in the precritical date system, you can't be more |
| 22 | specific about particular features that had been added |
| 23 | after 1998 into the GoTo system in 1999? |
| 24 | A. Features were being added all the time on a |

| l | |
|----|---|
| 1 | weekly basis. And as I sit here today, I don't have a |
| 2 | specific identification for you of those features |
| 3 | Q. Okay. |
| 4 | A that a user would see. |
| 5 | Q. You mentioned something about needing to sort |
| 6 | of operate the beta system next to the system as it |
| 7 | existed in 1999. Did you ever see the beta system in |
| 8 | operation? |
| 9 | MS. THAYER: Objection. Vague. |
| 10 | BY THE WITNESS: |
| 11 | A. I did not see the beta system in operation |
| 12 | during its original time frame of existence. |
| 13 | BY MS. DURIE: |
| 14 | Q. Did you see the beta system in operation |
| 15 | thereafter? |
| 16 | A. I may have. I don't recall. |
| 17 | Q. Do you have any recollection as to when that |
| 18 | would have been? |
| 19 | A. No. |
| 20 | Q. Okay. At the time you had initial discussions |
| 21 | about filing a patent application for GoTo, was there any |
| 22 | discussion about a deadline by when such a patent |
| 23 | application must be filed? |
| 24 | MS. THAYER: Can I have that read back? |
| | |

| 1 | A. I just mentioned to you that depending on the |
|----|---|
| 2 | circumstances, and to get background, which may include |
| 3 | prior art, an attorney typically on occasion can do this |
| 4 | sort of background on-line search. |
| 5 | Q. And I guess my question was leaving aside an |
| 6 | attorney who's conducting a search for purposes of |
| 7 | educating themselves and getting a background in the |
| 8 | area, would you instruct an attorney working under your |
| 9 | supervision to perform a prior art search in order to |
| 10 | uncover potentially relevant prior art for disclosure to |
| 11 | the Patent and Trademark Office in the absence of an |
| 12 | explicit request from the client that we do that? |
| 13 | A. You're not talking about outside searchers, |
| 14 | without client authorization. I can't recall having |
| 15 | directed an attorney to do that kind of search themselves |
| 16 | and not through an outside searcher and without client |
| 17 | authorization for the specific purpose you mentioned. |
| 18 | Q. Okay. And I take it that you never employ an |
| 19 | outside searcher without first being instructed by your |
| 20 | client to do so? |
| 21 | A. I can't recall using an outside searcher |
| 22 | without having had client authorization to do so. |
| 23 | Q. Okay. Do you know the scope of any prior art |
| 24 | search that was conducted in the case of the '361 patent? |
| | |

| 1 | A. In general, yes. |
|----|--|
| 2 | Q. Okay. What was done? |
| 3 | MS. THAYER: You can communicate results. You |
| 4 | should not communicate attorney-client communications in |
| 5 | responding. |
| 6 | BY THE WITNESS: |
| 7 | A. One universe of potential prior art was |
| 8 | documentation I obtained as part of my initial |
| 9 | investigation that we've discussed. |
| 10 | Another universe of prior art would have been |
| 11 | prior art we gathered specifically with the idea in mind |
| 12 | that we're gathering prior art to submit to the Patent |
| 13 | Office in connection with this patent application. |
| 14 | Another group of prior art would have been |
| 15 | prior art generated by an outside searcher. |
| 16 | And then during prosecution I believe |
| 17 | additional prior art was cited to the Patent Office or |
| 18 | cited by the Examiner. |
| 19 | BY MS. DURIE: |
| 20 | Q. Okay. Let's' take you to those things in |
| 21 | turn. |
| 22 | The documentation that you gathered as part of |
| 23 | your initial investigation, can you describe for me |
| 24 | generally what that documentation was? |
| | |

| - The state of the | A. I received a number of documents. That would |
|--|---|
| 2 | include at least articles of various kinds, I believe |
| 3 | some press releases. I can't immediately think of other |
| 4 | documentation that I gathered for that initial |
| 5 | investigation that I would put in the category of |
| 6 | potential prior art. |
| 7 | Q. Did you have any source code? |
| 8 | A. I'm sorry? |
| 9 | Q. Source code. |
| 10 | A. For my investigation initially? |
| 11 | Q. Yes. Category 1, documents you gathered as |
| 12 | part of your initial investigation. |
| 13 | A. I don't recall. |
| 1.4 | Q. Did you have any technical drawings? |
| 15 | A. I can't recall. |
| 16 | Q. Did you have any screen shots? |
| 17 | A. I can't recall. |
| 18 | Q. Did you have any examples of search result |
| 19 | lists? |
| 20 | A. I can't recall. |
| 21 | Q. To your knowledge did you have a comprehensive |
| 22 | set of the GoTo press releases that related to the |
| 23 | pre-May 28th, 1998 system? |
| 24 | A. For my initial investigation? |
| | |
