Case No. 06-CV-00019 MHP

**STIPULATION AND [PROPOSED]  
SUPPLEMENTAL PROTECTIVE  
ORDER REGARDING DISCLOSURE  
OF CONFIDENTIAL SOURCE CODE**

Complaint filed: January 4, 2006  
Trial Date: February 26, 2006

Hon. Marilyn Hall Patel

28 STIPULATION AND SUPPLEMENTAL  
PROTECTIVE ORDER REGARDING  
DISCLOSURE OF CONFIDENTIAL SOURCE

Case No. 06-CV-00019 MHP

1 The parties hereby stipulate to and submit the following proposed Supplemental  
2 Protective Order governing disclosure and discovery of confidential source code (“Supplemental  
3 Order”) as a supplement to the protective order previously stipulated to by the parties in this case  
4 and filed with the Court (“Protective Order”). The following provisions shall apply, in addition to  
5 the provisions of the Protective Order, to any discovery material that constitutes or includes  
6 confidential, proprietary and/or trade secret source code:  
7

8 1. As used herein, the term “source code” means computer instructions and data  
9 definitions expressed in a form suitable for input to an assembler, compiler, other translator or  
10 other data processing module.

11 2. Discovery Material designated as “CONFIDENTIAL COUNSEL’S EYES  
12 ONLY” that constitutes or includes confidential, proprietary and/or trade secret source code may  
13 be designated as “CONFIDENTIAL COUNSEL’S EYES ONLY – SOURCE CODE” and  
14 thereby made subject to the provisions of this Supplemental Order.  
15

16 3. Except as set forth in this paragraph, Apple agrees to produce for inspection in  
17 discovery the complete source code for the accused products described in Burst’s Disclosure of  
18 Asserted Claims and Preliminary Infringement Contentions and accompanying charts served on  
19 Apple on May 22, 2006, and Burst’s Errata Sheet for same served on Apple on May 22, 2006 (the  
20 “Accused Products”), in accordance with the terms in this Supplemental Order. Apple does not  
21 agree to produce for inspection source code used to implement its DRM scheme. Apple will only  
22 produce for inspection third party confidential materials pursuant to the procedures set forth in  
23 paragraph 25 of the Protective Order. Apple will not produce source code that is not in its  
24 possession, custody, or control.  
25

26 4. All source code that is produced shall be made available for inspection in native  
27 searchable electronic format within two business days of receiving written (including email)

1 notice from the Receiving Party. Apple will make its source code available for inspection at the  
2 Seattle office of Heller Ehrman (or such other location as may be mutually agreed by the parties),  
3 and Burst.com will make its source code available for inspection at the Palo Alto office of its  
4 outside counsel, Carr & Farrell. Apple will make available its source code between the hours of  
5 8:00 a.m. and 6:00 p.m. on weekdays and on weekends by request. The Receiving Party may  
6 inspect the electronic copy of the source code as many times or days as reasonably necessary for  
7 preparation of its case. A list of names of persons who may view the source code will be  
8 provided to the Producing Party in conjunction with the written (including email) notice  
9 requesting inspection. The Receiving Party shall maintain a daily log of the names of persons  
10 who enter the locked room to view the source code and when they enter and depart. The  
11 Producing Party shall be entitled to have a person observe all entrances and exits from the source  
12 code viewing room, and to a copy of the log. The Producing Party shall make available a laser  
13 printer with commercially reasonable printing speeds (*i.e.*, with a minimum rating of 20 pages per  
14 minute) for on-site printing during inspection of the code. The Producing Party shall Bates  
15 number, copy, and label "CONFIDENTIAL COUNSEL'S EYES ONLY – SOURCE CODE" any  
16 pages printed by the Receiving Party and shall provide one copy set of such pages to the  
17 Receiving Party and shall retain one copy set. The Producing Party shall provide such copies to  
18 the Receiving Party as soon as possible, and shall make a good faith effort to provide such copies  
19 to the Receiving Party within no more than two business days of the inspection, taking into  
20 consideration (1) the fact that Apple's counsel, Weil Gotshal and Manges, is located in Silicon  
21 Valley, not Seattle, (2) the volume of printed pages, (3) the notice and time of day of the request,  
22 and (4) the availability of qualified support personnel. To expedite delivery of the copies, if the  
23 Producing Party is unable to provide the labeled copies on the day of the inspection, the  
24 Producing Party shall provide such copies via overnight courier or hand delivery. The printed  
25  
26  
27  
28

1 pages shall constitute part of the source code produced by the Producing Party in this action. The  
2 Receiving Party, at its discretion and in addition to on-site printing, may designate reasonable  
3 portions of the code to be printed by the Producing Party (such designations must be made by  
4 reference to specific file names and specific start and stop points in the code within a file). The  
5 Producing Party shall produce such designated portions of the source code in a paper format as  
6 soon as possible, and shall make a good faith effort to do so within no more than two business  
7 days of the request, and shall deliver it directly to the Receiving Party's outside counsel of record  
8 via hand delivery or overnight courier. All such printed portions of source code shall include a  
9 complete file name or reference sufficient to identify the particular type and version of source  
10 code it reflects, and line numbers if they are contained as part of the code.

11  
12  
13 5. All source code will be made available by the Producing Party to the Receiving  
14 Party's outside counsel and/or experts in a private room on a computer without Internet access or  
15 network access to other computers, other than as provided in this Supplemental Order and Exhibit  
16 A hereto, and without interference from or observation by the Producing Party or its counsel or  
17 agents (except that the entrances and exits from the source code viewing room may be observed).  
18 The Receiving Party's outside counsel and/or experts shall be entitled to take notes relating to the  
19 source code but may not copy the source code into the notes. The Receiving Party's outside  
20 counsel and/or experts shall be entitled to bring and use software tools stored on read-only media  
21 for viewing and searching source code. Because the computer to be used for viewing the source  
22 code will be in a lock box, the CD or DVD containing these software tools must be provided in  
23 advance of the inspection and must be left in the lockbox as reasonably necessary. In addition,  
24 Apple Computer, Inc. shall provide hardware, equipment, and basic software that enables  
25 Burst.com, Inc.'s outside counsel and/or experts to read, review, and search the source code on  
26 the appropriate platform, and shall also provide hardware, equipment, and software that allows  
27  
28

1 Burst.com Inc.'s outside counsel and/or experts to test the operation of the products  
2 corresponding to that source code in the same room in which the source code is produced for  
3 inspection. The specific hardware, equipment, software, and documentation to be provided by  
4 Apple Computer, Inc. at the Seattle offices of Heller Ehrman (or the other location(s) as may be  
5 mutually agreed by the parties) for examination by Burst.com, Inc.'s counsel of record and/or  
6 experts is further described in Exhibit A hereto. Burst.com Inc.'s experts may provide and have  
7 in the same room in which the source code is produced for inspection a computer running the  
8 Windows operating system in order to test any products designed to run on or with that operating  
9 system.  
10

11 6. The parties' stipulation to this order is made without prejudice to either party's  
12 right to request from the other party, or to seek an order from the Court that would require,  
13 additional or different arrangements for viewing, analyzing, compiling, building, installing,  
14 running, or de-installing source code in the future. In particular, Burst reserves its right to  
15 request, or to seek an order from the Court to require, that Apple provide additional or different  
16 hardware, equipment, software, and/or documentation, in the room in which source code is  
17 provided, as needed to analyze, compile, build, install, run, and de-install the source code.  
18

19 7. Other than as provided in this Supplemental Order, the Receiving Party will not  
20 copy, remove, transmit, or otherwise transfer any source code outside or away from the computer  
21 in which the source code is provided for inspection under Paragraph 5.  
22

23 8. The Receiving Party's outside counsel of record and designated expert shall  
24 maintain and store any paper copies of the source code at their offices in a manner that prevents  
25 duplication of or unauthorized access to the source code, including, without limitation, storing the  
26 source code in a locked room or cabinet at all times when it is not in use.  
27  
28

1           9.       The Receiving Party's outside counsel of record may make one paper copy of any  
2 source code printed pursuant to Paragraph 4 above for its designated expert, but shall not make  
3 additional paper copies other than copies attached to court filings or to be used in depositions.  
4 All paper copies shall be securely destroyed if they are no longer in use (e.g. at the conclusion of  
5 a deposition). Copies of source code that are marked as deposition exhibits shall not be provided  
6 to the Court Reporter or attached to deposition transcripts; rather, the deposition record will  
7 identify the exhibit by its production numbers. Except as provided in this paragraph or in  
8 Paragraph 4 above, the Receiving Party may not create electronic images, or any other images, of  
9 the source code from the paper copy for use in any manner (e.g., may not scan the source code to  
10 a PDF, or photograph the code). The Receiving Party may create an electronic copy or image of  
11 selected portions of the source code only when reasonably necessary to accomplish any filing  
12 with the Court or to serve any pleadings or other papers on any other party (including expert  
13 reports). Images or copies of source code shall not be included in correspondence between the  
14 parties (references to production numbers shall be used instead), and shall be omitted from  
15 pleadings and other papers whenever possible. In addition, the Receiving Party may create up to  
16 two electronic copies of the paper copy of the source code for its internal work-product use, but  
17 no more than one in each of the law firms representing the Receiving Party. The Receiving Party  
18 may create an electronic copy or image of a selected portion of the source code exceeding five  
19 printed pages of code in a single document only when the electronic copy has been encrypted  
20 using commercially reasonable encryption software including password protection. The  
21 communication and/or disclosure of electronic versions of the source code shall at all times be  
22 limited to individuals who are authorized to see source code under the provisions of this  
23 Protective Order. The Receiving Party shall maintain a log of all electronic and paper copies of  
24 source code in its possession or in the possession of its retained consultants, including the names  
25

of the recipients of any electronic or paper copies and the locations where the copies are stored. Additionally, all electronic copies must be labeled "CONFIDENTIAL COUNSEL'S EYES ONLY – SOURCE CODE".

10. The Receiving Party's outside counsel may only provide access to the source code to individuals specified in Paragraph 7 of the Protective Order.

11. The parties may arrange, by mutual agreement, for the production and inspection of source code under terms that are less restrictive than those contained in this Supplemental Order without further order of the Court.

DATED: October , 2006 SO ORDERED:

**EXHIBIT A**

Pursuant to Paragraph 5 of the Supplemental Order, the parties further agree that Apple Computer, Inc., shall provide the following hardware, equipment, software, and documentation in addition to the source code in native electronic form for all of the Accused Products at the Seattle offices of Heller Ehrman (or such other location as may be mutually agreed by the parties) for counsel of record and/or authorized experts for Burst.com, Inc. to search, read, and inspect the source code:

1. Hardware, equipment, software, and documentation for inspecting source code and for running and testing the Accused Products:

a. One Dual Processor Mac mini computer with a 19" or larger display, substantial and sufficient RAM, sufficient internal disk space, and sufficient software to store, view, and search the source code;

b. Two Dual Processor Mac computers, networked together, with sufficient processors, memory, storage capacity, and software for installing, running, and testing the Accused Products as they exist out of the box or in the form that they operate or run as intended;

c. Mac OS X installation disks for each major release (10.0 through 10.4) of the workstation and server versions of Apple's operating system that are sufficient for restoring the computers to the state they are in when received by a user; and

d. Any relevant and discoverable Apple documentation, or documents produced by Apple in this case, that Burst specifically identifies and requests to be present.

2. Accused Products:

a. Each accused software product as received by a user on installable media or, in the case of accused software that is not provided to individual users (e.g., the iTunes Music Store) in the form that such software is actually operated or run by Apple or other companies or

1 service providers. All major versions of each accused software product (i.e. where the first digit  
2 in the version number changes, or where the product has been adapted to run on a different  
3 operating system or platform) will be produced, and the parties will meet and confer about  
4 whether the production of additional versions is necessary;

5  
6 b. One of each model of iPod device (including all current models and past  
7 models, unless Apple does not have a past model within its possession, custody or control);

8 c. Any operating system drivers or support code required for interfacing with  
9 each such iPod model; and

10 d. Any other equipment, hardware, or software that the parties agree or the  
11 Court finds are needed or required to observe, test, analyze, or determine the operations and  
12 functions of any of the accused products.
