Be the entertainment superstore that's open 24 hours a day, 7 days a week. Now be one that delivers anything you want, anytime you want, instantly. With the [iTunes Store](#), you can build a collection of digital music, movies, TV shows, games, audiobooks, and podcasts from the comfort of your computer. Everything you buy, you own forever. And you can give as good as you get with iTunes gifts.

**Play it.**  
Turn your CDs into digital files by importing them into [iTunes](#). Then organize your collection — including everything you've purchased from the iTunes Store — into playlists perfect for burning. Since all your music and video lives on your computer, you can play it (or stream it to your home stereo) at the touch of a button. Or flip through all your cover art until you find exactly what you want.

**Bring it.**  
Sync your iPod? Everything on iTunes. The moment you connect your iPod to your computer, iTunes starts to sync your music and more, automatically. Once it does, you can get a closer look at the contents of your iPod, courtesy of a new summary in iTunes. And if you've got iTunes purchases you'd like to move from one computer to another, iTunes syncs in reverse, too. Move your iPod back to any authorized computer.
