	100,000	22,000.00	Processor	1

Term licensing available for all Oracle Products. The list price for a term license is based on a specific percentage of the perpetual license price. Annual license fees are available from 1 to 5 years: 1 year - 20% off list; 2 year - 32% off list; 3 year - 50% off list; 4 year - 60% off list and 5 year - 70% off list. Support for all term licenses is 22% of the perpetual fee. Exception: support fees for the Collaboration Suite are 35% of perpetual license fees.

- ¹ Licensing by Named User Plus, the minimum is 10 Named User Plus licenses per Processor.
- ² Enterprise Edition Options & Enterprise Managers must match the number of licenses of the associated Oracle Database Enterprise Edition. In addition, a minimum of 25 Named User Plus licenses per Processor must be met. Associated Database is defined as the database(s) which is (are) being managed by the option.
- ³ Application Adapters are available for: PeopleSoft, SAP, Siebel & JD Edwards.
- ⁴ Mainframe and TP-Monitor Adapters are available for: CICS, IMS/DB, IMS/TM, VSAM, BeanConnect and Tuxedo.
- ⁵ Oracle Database Standard Edition can only be licensed on servers that have a maximum capacity of 4 single core processors. For multicore chips, the maximum number of cores per server is determined by multiplying the core processor licensing factors (as contained in the processor definition) by the number of cores. The result must be less than or equal to 4 and the total number of cores must be less than or equal to 8. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses.
- Additionally, it may be licensed on a single cluster of servers supporting up to a maximum of four single-core processors per cluster (2 2-way nodes, 4 1-way nodes, and 1 1-way and 1 3-way). For multicore chips, the maximum number of cores per cluster is determined by multiplying the core processor licensing factors (as contained in the processor definition) by the number of cores. The result must be less than or equal to 4 and the total number of cores in the cluster must be less than or equal to 8.
- ⁶ 2, 3, 4 and 5-Year Term Licenses are not available for Collaboration products. Customers must purchase Software Updates when purchasing Product Support. On Demand for Collaboration products is optional for customers purchasing Collaboration product licenses. Customers must purchase Software Updates and Product Support when purchasing On Demand. E-Business Discount Schedule applies to License, Software Updates, and Product Support fees. On Demand Discount Schedule applies to On Demand for Collaboration products. On Demand for this product is on Controlled Availability and requires approval. Please refer to the Approval Matrix on <http://esource.oracle.com> for more information. If you are an Oracle partner, please contact your Oracle PRN Representative for additional information.
- ⁸ If licensing by Named User Plus, the minimum is 25 Named User Plus licenses per Processor.
- ⁹ Personal Edition provides a maximum of one Named User Plus per database.
- ¹⁰ Oracle Standard Edition One may only be licensed on servers that have a maximum capacity of 2 single core processors. For multicore chips, the maximum number of cores per server is determined by multiplying the core processor licensing factors (as contained in the processor definition) by the number of cores. The result must be less than or equal to 2 and the total number of cores must be less than or equal to 4. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses.
- ¹¹ Internet Application Server Managers must match the number of licenses of the associated Internet Application Server (excluding TopLink and Application Development Framework, for which these Manager Packs cannot be licensed). An associated Internet Application Server is defined as the Internet Application Server(s) which is (are) being managed by the option.
- ¹² Java Edition, Standard Edition One and Standard Edition Options must match the number of licenses of the associated Oracle Internet Application Server Edition. Associated Application Server is defined as the application server(s) which is (are) being managed by the option.
- ¹³ This product is on Controlled Availability and requires approval. Please refer to the Approval Matrix on <http://esource.oracle.com> for more information. If you are an Oracle partner, please contact your Oracle PRN Representative for additional information.
- ¹⁴ For the purpose of licensing Healthcare Transaction Use, only the processors on which SAS Enterprise Edition software program are installed and/or running are counted for the purpose of determining the number of processors required to license this program. For the purpose of licensing Customer Data Hub, only the processors on which Oracle Database Enterprise Edition and this program are running in production are counted for the purpose of determining the number of licenses required to license this program.
- ¹⁵ Internet Application Server Enterprise Edition Options must match the number of licenses of the associated Internet Application Server. Associated Application Server is defined as the application server(s) which is (are) being managed by the option.
- ¹⁶ Internet Application Server Standard Edition One may only be licensed on servers that have a maximum capacity of 2 single core processors. For multicore chips, the maximum number of cores per server is determined by multiplying the core processor licensing factors (as contained in the processor definition) times the number of cores. The result must be less than or equal to 2 and the total number of cores must be less than or equal to 4. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses.
- ²³ Application Development Framework requires a runtime license. This can be purchased via TopLink and Application Development Framework or Java Edition.
- ²⁴ XML Publisher is also licensable via the per employee metric. The price is 40.00 USA (Dollar) per employee when licensed as a standalone product and 30.00 USA (Dollar) per employee when licensed as an option to the Application Server Enterprise Edition.
- ²⁵ The Named User Plus Minimum does not apply if the program is installed on a one processor machine that allows for a maximum of one user per program.
- ²⁶ Plug-in available for BEA WebLogic, IBM WebSphere, Microsoft Active Directory, Microsoft .NET, Microsoft Internet Information Services (IIS), Microsoft ISA Server, Microsoft Commerce Server, Microsoft BizTalk Server.
- ²⁷ Plug-in available for F5 Load Balancers, Juniper Netscreen Firewall, Check Point Firewall.
- ²⁸ Plug-in available for NetApp Filers, EMC NS Series NAS.
- ²⁹ Connectors are not available at this time.
- ³⁰ The number of Options licenses must match to the number of licenses of the parent product.
- ³¹ If licensing by Named User Plus, the minimum is 25 Named User Plus licenses per Processor.
- ³² Rdb Server Options must match the number of licenses of the associated database.
- ³³ TRACE may also be licensed with CODASYL DBMS.
- ³⁴ Oracle connectors supported via SQL*Net for Rdb for use across Oracle & Rdb Servers.
- ³⁵ CDD/R Runtime is an unlimited use license for applications requiring CDD/R deployment licenses.
- ³⁶ Following is the list of available Identity Manager Connectors: Database User Management, Database Applications Table, Microsoft Active Directory, Oracle Internet Directory, Novell eDirectory, Sun Java System Directory, Oracle e-Business, PeopleSoft Enterprise Applications, SAP Enterprise Applications, Microsoft Exchange, Novell Groupwise, Microsoft Windows, UNIX, RSA Authentication Manager, RSA ClearTrust, IBM Lotus Notes/Domino, SAP Enterprise Portal, Siebel Enterprise Applications, IBM RACF, CA ACF2, CA Top Secret, BMC Remedy User Management.
- ³⁷ Plug-in available for IBM DB2, Microsoft SQL Server.
- ³⁸ Secure Enterprise Search may also be licensed on per employee metric. The minimums for employee licensing is 200 employee licenses. The price is \$30 USA Dollar per employee. When licensing by named user plus metric, the minimums are 100 Named User Plus licenses.
- ³⁹ The Business Intelligence Standard Edition One product is a fixed price bundle for \$25k. You are permitted to have a maximum of 50 users. For the purpose of licensing this product, you are required to purchase 50 Named User Plus licenses, which is a fixed licensing requirement. The minimums cannot be waived. It is a 25k fixed price package. It may only be licensed on servers that have a maximum capacity of 2 single core processors. For multicore chips, the maximum number of cores per server is determined by multiplying the core processor licensing factors (as contained in the processor definition) by the number of cores. The result must be less than or equal to 2 and the total number of cores must be less than or equal to 4.
- ⁴⁰ The minimums for this product are 50 Named User Plus licenses. The number of options licenses must match the number of licenses of the Standard Business Intelligence Server Enterprise Edition.
- ⁴¹ WebLogic Runtime Connectors are only licensable with Oracle Database Enterprise Edition. WebLogic Builder Connectors are available for: PeopleSoft, Oracle E-Business Suite, and SAP. The Connector licenses do not need to match to the Database Enterprise Edition licenses.
- ⁴² The Oracle Database Life RDBMS (also known as "Clients") are free of charge for licensing purposes.

	Subscription	Licensing Metric	Frequency	Minimum
Oracle Education Subscription				
Learning Subscription	48	Named User	Yearly	\$5,000.00

All the minimums the customer must license a number of Named Users and Months that are equal to 5,000 USA (Dollar)

Terminals only available for all Oracle Products. The list prices for a term license is based on a specific percentage of the perpetual license price. Annual term licenses are available from 1 to 5 years: 1 year 20% off list, 2 year 30% off list, 3 year 40% off list, 4 year 50% off list and 5 year 70% off list. Support for all term licenses is 22% of the perpetual list price. Support fees for the Collaboration Suite are 22% net perpetual license list.

- ¹ An option must be licensed at the same level (or greater than) as its parent. Example: number of Flow Manufacturing users = number of Discrete Manufacturing users. If the parent has multiple metrics, the option must be licensed at the same level as its parent for each metric. Example: number of Advanced Pricing users = number of Order Management users AND number of Advanced Pricing Electronic Order Lines = number of Order Management Electronic Order Lines.
- ² Primary Usage: is defined as each User of the following applications: Financials, Discrete Manufacturing, Process Manufacturing, Project Costing and Purchasing. Each such User is counted only once based on primary usage. You must specify how many Users you are licensing for each application. Primary Usage of one of the applications listed above provides the User with the right to use any or all of the other application programs listed above for which you are licensed. Primary Usage does not provide you with the right to use other application programs including the extensions or options to the application programs listed above.
- ³ Order Management is licensed based upon the number of application users AND the number of order lines entered from any source other than those entered by licensed Order Management Users. Order Management User licenses are required for all individuals who are using Order Management. In addition, any order that is entered electronically into Order Management must be licensed using the Electronic Order Line metric. This applies to order lines originating in iStore, Quoting, EDI/XML transactions, legacy applications or any other source. (Order Lines entered manually by the licensed Order Management users are covered under the Order Management User license)
- ⁴ For the purpose of licensing this program (except Healthcare Transaction Base and Customer Data Hub), only the processors on which iAS Standard Edition and/or Enterprise Edition and this program are running are counted for the purpose of determining the number of processors required to license this program.
For the purpose of licensing Healthcare Transaction Base, only the processors on which iAS Enterprise Edition and this program are installed and/or running are counted for the purpose of determining the number of processors required to license this program. For the purpose of licensing Customer Data Hub, only the processors on which Oracle Database Enterprise Edition and this program are running in production are counted for the determining the number of licenses required to license this program.
- ⁵ The number of Applications Users for Tutor for Applications must match the number of Application Users of each Application for which the customer is using Tutor. If the application is licensed with a metric based on all the individuals in an organization, i.e., Person, Employee, then everyone in the LOB or organization must be licensed using the Self Service Tutor for Applications. If the application is licensed with any other metric, i.e., Purchase Line, Order Line, then the number of Application Users for Tutor for Applications must match the number of Application Users that the customer would have licensed for the application, had this metric been available.
- ⁶ Configurator can be licensed by Application User OR by Processor. If licensing by Application User, then the actual users accessing Configurator must be counted. If the user population accessing Configurator is uncountable, then the Processor metric must be used.
- ⁷ If licensed with Clinical, the total number of application users and application read-only users of Therapeutic Management System must match the number of application users of Clinical. If licensed separately, the minimum of application users for Therapeutic Management System is 1, the minimum of application read-only users is 5.
- ⁸ Customers must pay for both the module and the subscription/workstation fee.
- ⁹ Separate Remote Data Capture licenses are required for remote site-based data entry. In-house entry users require Critical licenses. Remote Data Capture is licensed by Application User when the amount of data volume cannot be estimated, or if it is more cost effective.
- ¹⁰ If the customer is running Activity Based Management in conjunction with a 3rd party Financials application, and not Oracle Financials, then licenses of Oracle Financials are not required.
- ¹¹ The customer is required to maintain Professional User 2003 licenses for at least 10% of the employee population.
The official source for the total company employee population is the company's annual report for publicly held companies. For private firms, this information must be verified in writing by a person who is authorized to make such a representation on the firm's behalf.
- A company may not license the E-Business Suite 2003 at the division level, unless it has wholly owned subsidiaries. Links of Business, Departments, and Organizations within a company are not eligible for the E-Business Suite 2003 pricing regardless of whether they meet the minimum licensing requirements.
- If a company's employee population grows by 10% or more and the company is no longer meeting the minimum license requirements, the company will need to purchase incremental user licenses to satisfy the 10% requirement.
- Once minimums are satisfied, they are not required to be met in subsequent purchases.
- ¹² Customers who licensed Oracle applications under the E-Business Suite pricing model can continue to purchase licenses per pages 5 and 6 of the March 7, 2003 price list. This rule applies also to customers who do not have a price hold.
- ¹³ If Managed Assets are \$10 billion or less, the price per SM in Managed Assets is 2,000. If Managed Assets are greater than \$10 billion, the price per SM in Managed Assets for the first 10,000 licenses is 2,000, and the price per SM in Managed Assets for each additional license is 1,000.
- ¹⁴ This product is on Controlled Availability and requires approval. Please refer to the Approval Matrix on <http://resource.oraclecorp.com> for more information. If you are an Oracle partner, please contact your Oracle PRN Representative for additional information.
- ¹⁵ Where Inventory Management is licensed across multiple plants or warehouses, the Inventory Management options (Mobile Supply Chain Applications, Warehouse Management, Transportation) can be licensed individually for each plant/warehouse. Within each plant/warehouse using the Inventory option, the option must be licensed at the same user count as Inventory Management or the actual user count, whichever is greater.
- ¹⁶ Where Discrete Manufacturing is licensed across multiple plants, the Discrete Manufacturing options (Mobile Supply Chain Applications, etc.) can be licensed individually for each plant. Within each plant using the Manufacturing option, the option must be licensed at the same user count as Discrete Manufacturing or the actual user count, whichever is greater.
- ¹⁷ Where Projects is licensed across many lines of business, the Project Billing option to Project Costing can be licensed individually for each line of business using the Oracle Projects solution. Within each line of business using the Project Billing option, the option must be licensed at the same user count as Project Costing.
- ¹⁸ 2, 3, 4, and 5-Year Term Licenses are not available for Collaboration products. Customers must purchase Software Updates when purchasing Product Support. On Demand for Collaboration products is optional for customers purchasing Collaboration product licenses. Customers must purchase Software Updates and Product Support when purchasing On Demand. E-Business Discount Schedule applies to License, Software Updates, and Product Support fees. On Demand Discount Schedule applies to On Demand for Collaboration products. On Demand for this product is on Controlled Availability and requires approval. Please refer to the Approval Matrix on <http://resource.oraclecorp.com> for more information. If you are an Oracle partner, please contact your Oracle PRN Representative for additional information.
- ¹⁹ Where Process Manufacturing is licensed across multiple plants, the Process Manufacturing options (Mobile Supply Chain Applications, etc.) can be licensed individually for each plant. Within each plant using the Manufacturing option, the option must be licensed at the same user count as Process Manufacturing or the actual user count, whichever is greater.
- ²⁰ Sales Contracts Application User licenses are required for all contract administrators, legal staff, order administrators and sales personnel who manage the contracts library or author contracts.
- ²¹ When licensing User Productivity Kit, you must license at least one UPK Developer and either UPK Users or L2K Employees.
- ²² Term Licenses are not available for User Productivity Kit.

DEFINITIONS

Named User Plus: is defined as an individual authorized by you to use the programs which are installed on a single server or multiple servers, regardless of whether the individual is actively using the programs at any given time. A non human operated device will be counted as a named user plus in addition to all individuals authorized to use the programs, if such devices can access the programs. If multiplexing hardware or software (e.g., a TP monitor or a web server product) is used, this number must be measured at the multiplexing front end. Automated batching of data from computer to computer is permitted. You are responsible for ensuring that the named user plus per processor minimums are maintained for the programs contained in the user minimum table in the licensing rules section; the minimums table provides for the minimum number of named users plus required and actual users must be licensed.

Processor: shall be defined as all processors where the Oracle programs are installed and/or running. Programs licensed on a Processor basis may be accessed by your internal users (including agents and contractors) and by your third party users. For the purposes of counting the number of processors which require licensing, for a Sun UltraSPARC T1 processor with 4, 6 or 8 cores at 1.0 gigahertz or 6 cores at 1.2 gigahertz for only those servers specified on the Sun Server Table which can be accessed at <http://oracle.com/contracts>, "n" cores shall be determined by multiplying the total number of cores by a core processor licensing factor of .25. For the purposes of counting the number of processors which require licensing for AMD and Intel multicore chips, "n" cores shall be determined by multiplying the total number of cores by a core processor licensing factor of .50. For the purposes of counting the number of processors which require licensing for all hardware platforms not otherwise specified in this section, a multicore chip with "n" cores shall be determined by multiplying "n" cores by a core processor licensing factor of .75. All cores on all multicore chips for each licensed program for each factor listed below are to be aggregated before multiplying by the appropriate core processor licensing factor and all fractions of a number are to be rounded up to the next whole number. Notwithstanding the above, when licensing Oracle Standard Edition One or Standard Edition programs on servers with a maximum of 1 processor with 1 or 2 cores, only 1 processor shall be counted.

For example, a Sun UltraSPARC T1 based server installed and/or running the program on 6 cores would require 2 processor licenses (6 multiplied by a core processor licensing factor of .25 equals 1.50 which is then rounded up to the next whole number which is 2). An Intel or AMD based server installed and/or running the program on 7 cores would require 4 processor licenses (7 multiplied by a core processor licensing factor of .50 equals 3.50 which is then rounded up to the next whole number which is 4). Two multicore servers, for hardware platforms not specified above, installed and/or running the program on 10 cores would require 8 processor licenses (10 multiplied by a core processor licensing factor of .75 equals 7.50 which is then rounded up to the next whole number which is 8).

For the Healthcare Transaction Base program, only the processors on which Internet Application Server Enterprise Edition and this program are installed and/or running are counted for the purpose of determining the number of licenses required. For the iSupport, iStore and Configurator programs, only the processors on which Internet Application Server (Standard Edition and/or Enterprise Edition) and the licensed program are running are counted for the purpose of determining the number of licenses required for the licensed program; under these licenses you may also install and/or run the licensed program on the processors where a licensed Oracle Database (Standard Edition and/or Enterprise Edition) is installed and/or running. With respect to the Customer Data Hub program, only processors on which both Oracle Database Enterprise Edition and the Customer Data Hub program are running in parallel shall be counted.

Professional User 2003: is defined as an individual authorized by you to use the application programs which are installed on a single server or multiple servers, regardless of whether or not the individual is actively using the programs at any given time. Professional Users 2003 are allowed to manually enter orders directly into the programs but any orders entered electronically into Oracle Management from other sources must be licensed separately.

Professional User 2003 - External: is defined as an individual, who is not your employee, contractor or outsourcer, authorized by you to use the application programs which are installed on a single server or multiple servers, regardless of whether or not the individual is actively using the programs at any given time. Professional Users 2003 - External are allowed to manually enter orders directly into the programs but any orders entered electronically into Oracle Management from other sources must be licensed separately.

Application User, Field Sales User, Financials User, Inventory/Shipping User, Marketing User, Manufacturing User, Purchasing User, TeleSales User, Enterprise Asset Management (EAM) User: is defined as an individual authorized by you to use the applicable licensed application programs which are installed on a single server or on multiple servers regardless of whether the individual is actively using the programs at any given time. If you license the Self Service Work Request option in conjunction with EAM, you are required to maintain licenses for the equivalent number of EAM Users licensed and you are granted unlimited access to initiate work requests, view work request status and view scheduled completion date for your entire employee population.

Application Read-Only User: is defined as an individual authorized by you to run only queries or reports against the Application program for which you have also acquired non read-only licenses.

Collaboration Program User: is defined as an individual authorized by you to use the programs which are installed on a single server or on multiple servers regardless of whether the individual is actively using the programs at any given time. For the purposes of counting and licensing the number of Real-Time Collaboration Users, a Collaboration Program User within your company is defined as a user able to initiate, or host, a web conference and also participate in a web conference; all participants in the web conference external to your company and attending a web conference are not required to be licensed.

Annual Transaction Volume: is defined as the U.S. dollar denominated total value of all purchase orders transacted and all auctions conducted through the Oracle Exchange Platform by you and others during the applicable year of the Oracle Exchange Platform license regardless of whether any such auction results in a purchase order; provided that an auction resulting in a purchase order shall only be counted against the Annual Transaction Volume once.

Beacon: is defined as each target that is deployed and managed by the program that measures the response time of remote software or hardware interfaces by communicating with those interfaces over protocols, api's or programmatic interactions and measuring the total time elapsed between the initiation of communication and completion of the associated response from the remote interface.

Case Report Form (CRF) Page: is defined as the "electronic equivalent" of what would be the total number of physical paper pages initiated remotely by the Program (measured explicitly in the Program as Received Data Collection Instruments) during a 12-month period. You may not exceed the licensed number of CRF pages during any 12-month period unless you acquire additional CRF pages licenses from us.

Compensated Individual: is defined as an individual whose compensation or compensation calculations are generated by the programs. The term Compensated Individual includes, but is not limited to, your employees, contractors, retirees, and any other Persons.

Computer: is defined as the computer on which the programs are installed. A Computer license allows you to use the licensed program on a single specified computer.

Connector: is defined as each connector connecting the software product with an external product. A unique connector is required for each distinct product with which the software product is required to interface.

Warehouse Builder Connector: is defined as a software product that connects an Oracle database where the Oracle Warehouse Builder code is deployed, to an external product (e.g., SAP). A unique connector is required for each distinct external product for which the Oracle database is required to interface.

Cost of Goods Sold: is defined as the total cost of inventory that a company has sold during their fiscal year. If Cost of Goods Sold is unknown to you then Cost of Goods Sold shall be equal to 75% of total company revenue.

Electronic Order Line: is defined as the total number of distinct electronic order lines entered electronically into the Oracle Order Management application from any source (not manually entered by license Order Management Users, Professional Users 2003, or Professional Users 2003 External) during a 12-month period. This includes order lines originating as external EDI/KM transactions and/or sourced from other Oracle and non-Oracle applications. You may not exceed the licensed number of order lines during any 12-month period.

Employee: is defined as an active employee of yours. (note: The value of these applications is determined by the size of the active employee population and not the number of actual users. Therefore, all of your active employees must be included in your order when licensing these applications.)

Employee User: is defined as an individual authorized by you to use the application programs which are installed on a single server or multiple servers, regardless of whether or not the individual is actively using the programs at any given time. Your human resource personnel that require access to the Oracle Self Service Human Resources program may not be licensed as Employee Users, but must be licensed as Professional Users. Additionally, your technical support personnel that require access to the Oracle iSupport program may not be licensed as Employee Users, but must be licensed as Professional Users.

Entry: is defined as a unique item (e.g., object, person, entity or item of information) stored within the programs. Replicated entries stored within the program on multiple servers are counted as a single entry.

Expense Report: is defined as the total number of expense reports processed by the iExpenses during a 12-month period. You may not exceed the licensed number of expense reports during any 12-month period.

Federated Link: is defined as a one-to-one pairing between a source domain and a destination domain. A source domain is the point of origin for a request. A destination domain contains the resources that users in the source domains want to access. One source domain might have many pairings with different destination domains and one destination domain might have many pairings with different source domains. Each and every pairing is a federated link.

Field Technician: is defined as an engineer, technician, representative, or other person who is dispatched by you, including the dispatcher, to the field using the programs.

FTE Student: is defined as any full-time student enrolled in your institution, limited to 25% of all FTE student. The definition of "full-time" and "part-time" is based on your policies for student classification. If the number of FTE Students is a fraction, that number shall be rounded to the nearest whole number for purposes of license quantity requirements.

Hosted Named User: is defined as an individual authorized by you to access the hosted service, regardless of whether the individual is actively accessing the hosted service at any given time.

Invoice Line: is defined as the total number of invoice line items processed by the program during a 12 month period. You may not exceed the licensed number of Invoice Lines during any 12 month period unless you acquire additional Invoice Line licenses from us.

Module: is defined as each production database running the programs.

Network Device: is defined as the hardware and/or software whose primary purpose is to route and control communications between computers or computer networks. Examples of network devices include but are not limited to routers, firewalls and network load balancers.

Non-Employee User - External: is defined as an individual, who is not your employee, contractor or outsourcer, authorized by you to use the application programs which are installed on a single server or multiple servers, regardless of whether or not the individual is actively using the programs at any given time.

Order Management User: is defined as an individual authorized by you to use the applicable licensed application programs which are installed on a single server or on multiple servers regardless of whether the individual is actively using the programs at any given time. Order Management Users are allowed to manually enter orders directly into the programs but any orders entered electronically from other sources must be licensed separately.

Partner Organization: is defined as an external third party business entity that provides value-added services in marketing and selling your products. Depending upon the type of industry, partner organizations play different roles and are recognized by different names such as reseller, distributor, agent, dealer or broker.

Person: is defined as your employee or contractor who is actively working on behalf of your organization or a former employee who has one or more benefit plans managed by the system or continues to be paid through the system. For Time and Labor, a person is defined as an employee or contractor whose time or labor (piece work) or absences are managed by the system. For Project Resource Management, a person is defined as an individual who is scheduled on a project. For Internet Time, a person is defined as an individual who is charging time to a project via the application. The total number of licenses needed is to be based on the peak number of part-time and full-time people whose records are recorded in the system.

Ported Number: is defined as the telephone number that end users retain as they change from one service provider to another. This telephone number originally resides on a telephone switch and is moved into the responsibility of another telephone switch.

RosettaNet Partner Interface Processes® (PIPs®): are defined as business processes between trading partners. Preconfigured system-to-system XML-based dialogs for the relevant E-Business Suite Applications are provided. Each preconfigured PIP includes a business document with the vocabulary and a business process with the choreography of the message dialog.

Service Order Lines: is defined as the total number of service order entry line items processed by the program during a 12 month period. Multiple service order entry line items may be entered as part of an individual customer service order or quote. You may not exceed the licensed number of Service Order Lines during any 12 month period unless you acquire additional Service Order Line Licenses from us.

Subscriber: is defined as (a) a working telephone number for all wireline devices; (b) a portable handset or paging device that has been activated by you for wireless communications and paging; (c) a residential drop or a nonresidential device serviced by a cable provider; or (d) a line connected utility meter. The total number of Subscribers is equal to the aggregate of all types of Subscribers. If your business is not defined in the primary definition of Subscriber above, Subscriber is defined as each \$10,000 increment of your gross annual revenue as reported to the SDC in your annual report or the equivalent accounting or reporting document.

Bullet: is defined as all functional software components described in the product documentation.

Tape Drive: Tape drives are defined as mechanical devices used to sequentially write, read and restore data from magnetic tape media. Typically used, but not limited to, data protection and archival purposes, tape drives are deployed either as a standalone unit(s) or housed within a robotic tape library. Examples of tape drive include but are not limited to, Linear Tape Open (LTO), Digital Linear Tape (DLT), Advanced Intelligent Tape (AIT), Quarter-Inch Cartridge (QIC), Digital Audio Tape (DAT) and 8mm optical tape.

Terabyte: is defined as a kilobyte of computer storage space used by a storage tier equal to one trillion bytes.

Test: is defined as each unit of interaction with a software or hardware interface for which the total time elapsed between the initiation of communication and the completion of the resulting response is measured. A test may run on its own or be set up in conjunction with additional tests so that there are multiple units of interaction. Each unit of interaction must be counted as a Test. Execution of a test or set of tests multiple times does not require additional tests. Examples of tests include but are not limited to: An http-get for a URL, icmp-echo for an IP address and sql-execute for a database.

Trainee: is defined as an employee, contractor, student or other person who is being recorded by the program.

UPK Developer: is defined as an individual authorized by you to use the programs which are installed on a single server or multiple servers, regardless of whether the individual is actively using the programs at any given time. UPK Developers may create, modify, view and interact with simulations and documentation.

UPK Employee: is defined as an active employee of yours. (note: The value of these applications is determined by the size of the active employee population and not the number of actual users. Therefore, all of your active employees must be included in your order when licensing these applications). UPK Employees may view and interact with simulations and documentation but may not create or modify simulations or documentation.

UPK User: is defined as an individual authorized by you to use the programs which are installed on a single server or multiple servers, regardless of whether the individual is actively using the programs at any given time. UPK Users may view and interact with simulations and documentation but may not create or modify simulations or documentation.

Workstation: is defined as the client computer from which the programs are being accessed, regardless of where the programs are installed.

SW Freight Under Management: is defined as one million U.S. dollars of the total transportation value of tendered orders for all shipments for a given calendar year during the term of the license. FUM shall include the combined total of actual freight purchased by you, plus the cost of freight for shipments managed by you (e.g., you are not purchasing transportation services on behalf of your clients but are providing transportation management services for your clients). Freight that is paid by a third party shall also be included in the FUM total (e.g., inbound shipments from suppliers to you with freight terms of prepaid).

SM in Revenue: is defined as one million United States dollars in all income (interest income and non interest income) before adjustments for expenses and taxes generated by You during a fiscal year.

SM in Managed Assets: is defined as one million U.S. dollars of the following total: (1) Book value of investment in capital leases, direct financing leases and other finance leases, including residuals, whether owned or managed for others, active on the program; plus (2) Book value of assets on operating leases, whether owned or managed for others, active on the program; plus (3) Book value of loans, notes, conditional sales contracts and other receivables, owned or managed for others, active on the program; plus (4) Book value of non-earning assets, owned or managed for others, which were previously leased and active on the program, including assets from term terminated leases and repossessed assets; plus (5) Original cost of assets underlying leases and loans originated and active on the program, then sold within the previous 12 months.

GENERAL LICENSING RULES

TERM DESIGNATION

If your Program License does not specify a term, the Program license is perpetual and shall continue unless terminated as otherwise provided in the Agreement.

5 Year Term: A Program license specifying a 5 Year Term shall commence on the Effective Date of the order and shall continue for a period of 5 years. At the end of the 5 Year Term the Program license shall terminate automatically.

4 Year Term: A Program license specifying a 4 Year Term shall commence on the Effective Date of the order and shall continue for a period of 4 years. At the end of the 4 Year Term the Program license shall terminate automatically.

3 Year Term: A Program license specifying a 3 Year Term shall commence on the Effective Date of the order and shall continue for a period of 3 years. At the end of the 3 Year Term the Program license shall terminate automatically.

2 Year Term: A Program license specifying a 2 Year Term shall commence on the Effective Date of the order and shall continue for a period of 2 years. At the end of the 2 Year Term the Program license shall terminate automatically.

1 Year Term: A Program license specifying a 1 Year Term shall commence on the Effective Date of the order and shall continue for a period of 1 year. At the end of the 1 Year Term the Program license shall terminate automatically.

ORACLE SUPPORT SERVICES

Oracle Support Services (OSS) offers the following programs: Software Update License & Support to provide customers with the right to Oracle product upgrades and 24x7 support of all Oracle products, and Oracle Advanced Customer Support for a menu of additional services designed to provide an enhanced level of support. Services may vary by country. For availability, contact your local Support Sales representative. For a complete description of Oracle Support Services programs, refer to the Sales Support website at <http://www.oracle.com/Support>

Software Update License & Support

Software Updates License & Support provides customers with the right to product upgrades and 24x7 technical support, and is available for five years from the release date of the product. Product upgrades include upgraded versions of software, maintenance releases and patches. Customers receive direct access to Oracle experts for product-specific questions about installing and operating Oracle software. Web based support is provided via OracleMetaLink. Features of MetaLink include proactive notifications, customized home pages, technical libraries and forums, product life-cycle information, a bug database, and the ability to log technical assistance requests.

Support Renewals

Prices shown in this price list are annual fees that apply to both perpetual and term licenses for first year support only. The price of a technical support renewal for Software Update License & Support is the technical support fees paid for the same licenses in the prior year, increased by the appropriate renewal adjustment. Oracle uses two different renewal adjustments, the Inflationary Adjustment Rate (IAR) and the License Renewal Adjustment (LRA). Support for all licenses is adjusted by the greater of the LRA or the IAR. In all cases, any valid technical support can included in a license agreement or ordering document that governs the licenses, limits the renewal adjustment. For more information on renewal adjustments, contact your Support Sales representative.

Advanced Customer Support

Advanced Customer Support is designed to provide an enhanced level of support to Oracle customers. Advanced Customer Support services include, flexible support solutions built to meet the customer's specific business requirements. Advanced Customer Support customers have the flexibility to purchase standard or custom standard services with specific offerings to provide a full solution.

Contact your local Support Sales representative for Advanced Customer Support information and pricing.

Incident Server Support Packages

Incident Server Support Packages provide incident-based web support for the following limited product sets:

- Oracle Database Server Support Package (2,000 USA (Dollar) for 10 incidents on one server):
 - Oracle Database Enterprise Edition, Oracle Database Standard Edition, Standard Edition One, Partitioning, Real Application Clusters
- Oracle Application Server Support Package (1,000 USA (Dollar) for 10 incidents on one server)
 - Internet Application Server Enterprise Edition, Internet Application Server Standard Edition, Internet Application Server Java Edition

With the purchase of Incident Server Support Packages, customers receive access to OracleMetaLink, which provides 24x7 web-based technical support, including web-based Technical Assistance Requests.

JDeveloper Support

JDeveloper Support is a 24x7 support service that provides direct access to Oracle experts for product-specific questions about installing and operating Oracle JDeveloper. Web based support is provided via OracleMetaLink. Features of MetaLink include proactive notifications, customized home pages, technical libraries and forums, product life-cycle information, a bug database, and the ability to log technical assistance requests. JDeveloper Support is priced at 218.90 USA (Dollar) per Named User Plus per annum. Price applies to first year support only. JDeveloper Support is available only for the free version of JDeveloper downloaded from OTN after Jun 28, 2005. All standard Oracle support policies, as outlined in the Technical Support Policies, are applicable to JDeveloper purchased before this date.

Customer Support Services Policies and Definitions

The complete policy can be found in the Technical Support Policies at <http://www.oracle.com/support>

Extended Support

Customers with current Software Updates, License & Support can support their product for a further 3 years, past the initial 5 years from the general availability date of the product, by purchasing Extended Support. Extended Support fees are applied to the desupported Oracle programs only. Extended Support fees consist of the prior year's fee for Software Updates & Support, plus the applicable renewal adjustment, plus an additional fee based on the year. Additional fees are as follows:

- Year 6 after product release: 10% of current year's Software Update License & Support
- Year 7 after product release: 20% of current year's Software Update License & Support
- Year 8 after product release: 20% of current year's Software Update License & Support

Extended Support offers the following:

- Updates, fixes and security alerts
- Tax, legal and regulatory updates
- Upgrade scripts
- Technical support
- Major product and technology releases

Sustaining Support

Sustaining Support offered in years 9 and beyond provides technical support—i.e., access to Oracle's online and call-center support—and rights to future products for as long the customer is purchasing support. Sustaining support is charged as per renewal pricing, found in the "Support Renewals" section above.

Sustaining Support provides:

- Technical Support
- Access to Metalink/Customer Connection
- Major product and technology releases
- Pre-existing fixes

ORACLE ON DEMAND

Oracle offers complete application, database, and hardware management services, which can help lower a customer's IT maintenance costs and increase support resolution time.

Administration Services

Administration Services are system administration, application technology management and monitoring activities provided remotely by Oracle for licensed Oracle programs. Administration Services are contracted on yearly terms; the billing is annual in advance.

Customers purchasing E-Business Suite On Demand must meet the minimum annual net fees for Administration Services of \$90,000 and minimum monthly net fees of \$7,500. Customers purchasing Technology On Demand must meet the minimum annual net fees for Administration Services \$45,000 and minimum monthly net fees of \$4,000. Customers purchasing Collaboration Suite On Demand must meet the minimum annual net fees for Administration Services \$48,000 and minimum monthly net fees of \$4,000.

Computer and Administration Services

Computer Services must be sold together with Administration Services. Computer and Administration Services are system administration, application technology management, and monitoring activities for licensed Oracle programs that are provided by Oracle from a data center hosting facility to which the customer has remote applications access. Computer and Administration Services are contracted on yearly terms; the billing is annual in advance.

Customers purchasing E-Business Suite On Demand must meet the minimum annual net fees for Computer & Administration Services of \$131,000 and minimum monthly net fees of \$11,250. Customers purchasing Technology On Demand must meet the minimum annual net fees for Computer & Administration Services of \$72,000 and minimum monthly net fees of \$6,000. Customers purchasing Collaboration Suite On Demand must meet the minimum annual net fees for Computer & Administration Services of \$72,000 and minimum monthly net fees of \$6,000.

Customers purchasing PeopleSoft On Demand must meet the minimum annual net fees for Computer and Administration Services of \$300,000 USA (Dollar) for the first PeopleSoft pillar and minimum monthly net fees of \$25,000 USA (Dollar) for the first PeopleSoft pillar plus an additional fee of \$150,000 for each additional PeopleSoft pillar.

Customers purchasing Siebel On Demand must meet the minimum annual net fees for Computer and Administration Services of \$250,000 USA (Dollar) for each Siebel CRM Vertical and minimum monthly net fees of \$25,000 USA (Dollar) for each Siebel CRM vertical.
