Financial Information Provided by TomorrowNow Management

Operations

Support Model

- TomorrowNow offers a limited support policy covering legislative/regulatory updates and "critical issue" fixes to small end user bases in less complex environments

- Support fees are 50% of the PeopleSoft support price (9 to 10% of license fees)

- TomorrowNow's sales model focuses on identifying customers with mature and stable systems, primarily PSFT 7.x customers, with a very limited history with PSFT 8.x customers (a much more complex solution)

- Pitched as "insurance policy" support - provide the basic support to keep existing systems current, low level of interaction, depth of knowledge of customers when engagement occurs (which is not frequent)

- Leading edge customers (i.e. Schwab) are not the type of customer TomorrowNow can service, average deal sizes are $50,000, (reflecting initial customer license fees of approximately $1 million)

Method of Delivery

- Access to Peoplesoft system is based on a DEMO system non-production copy (install with environment characteristics like customer) which works for stable environments (will not work for newer version or recently implemented modules)

- TomorrowNow functions as an independent contractor under the customer license agreement, the liability of providing system access is pushed onto the Peoplesoft customer

S
- Very short time to market for offering and announcing service offering
- No frills model makes sense for a segment of customers
- This company has two years of experience building a maintenance and support model
- Targeting stable and mature PSFT releases and limiting the complexity of the service appears to be a successful model

W
- Management is not sophisticated
- Customers have been referred to vest support terms discouraging upgrade
- Solely focused on U.S./Canada market
- JD Edwards support practice is just starting; TomorrowNow has limited experience supporting PSFT Jx customers
- The bulk of TomorrowNow personnel are outside Austin, Texas
- The TomorrowNow model is not unique – a similar model could be replicated by another company

O
- Oracle's deal assumptions are challenged by this support model, losing support revenue stream forces Oracle's reactions as a distraction
- Oracle's legal challenges to TomorrowNow's ability to provide derivative works support will require Oracle to also serve its customers, a difficult situation for Oracle
- There is a level of critical mass with expertise delivering a no frill support model, but scaling is heavily reliant of adding new headcount

T
- The access rights to the PeopleSoft software is very likely to be challenged by Oracle and is a ongoing issue may be a serious liability if Oracle challenges (i.e. offsite production copies, and the form of delivery of regulatory updates may be subject to Oracle challenge)
- This "no frills/lower cost" model is at odds with SAP's maintenance model, this conflict will create issues among PSFT and SAP customers
- Its unclear if a "no frills" model is appealing to the broad PSFT customer base or the PSFT customer base that are most successfully converted to SAP
