1 I. INTRODUCTION

2 Defendants misstate the facts, ignore the law, and seek extraordinary relief for
3 which there is no legal precedent. They ask the Court – *a year and a half before trial* – for an
4 order precluding Oracle from:

- 5 • continuing to produce evidence related to much of its lost profits damages;
- 6 • allowing its damages experts to rely on any such evidence in their expert
7 reports; and
- 8 • using that evidence at trial.

9 Motion at 1.

10 If successful, Defendants – despite their admitted and extensive infringement of
11 Oracle’s intellectual property – would prevent Oracle from recovering its full damages.
12 Consider three key examples: (1) Oracle would not be allowed to introduce evidence
13 concerning, or seek recovery of, discounts it was forced to give in response to Defendants’
14 extensive and ongoing infringement of Oracle’s intellectual property and interference with its
15 business; (2) it could not introduce evidence, nor seek damages, related to lost up-sell and cross-
16 sell opportunities for other Oracle products and services to the identified customers who went to
17 TomorrowNow and/or SAP; and (3) it would be precluded from seeking recovery of any of the
18 costs of the programs its executives attested Oracle entered into in part because of the unfair
19 competition from SAP-owned TomorrowNow.

20 This is merely the latest effort by Defendants to evade responsibility and make
21 recovery by Oracle as hard as possible; it follows a laundry list of obfuscation and obstacles,
22 including hiding SAP’s knowledge and involvement by refusing to produce SAP documents and
23 witnesses for months and months, trickling out terabytes of fundamental liability data
24 (incomplete to this day), and consistently refusing to extrapolate liability facts from the
25 mountains of evidence of their wrongdoing. In conjunction with their advertised August 26 early
26 summary judgment motion seeking to prevent Oracle from pursuing damages for Defendants’
27 vast infringement under a hypothetical license model, Defendants, by this motion, seek to wipe
28 out any possibility of having to fairly compensate Oracle for their years of extensive and

1 knowing bad acts.

2 Defendants seek this relief even though Oracle has been clear, from the
3 beginning, that it is seeking broad damages. Oracle's original initial disclosures, and every
4 iteration of its complaint and interrogatory responses, all have asserted that Oracle's lost profits
5 are associated not only with support, but also with lost up-sell and cross-sell opportunities for
6 new and different Oracle products, for both existing and potential customers. Moreover,
7 Oracle's supplemental initial disclosures – served *over six months* before the close of fact
8 discovery – identify in exhaustive detail each of the kinds of damages Defendants now want to
9 block. In fact, Oracle already has produced volumes of documents and extensive testimony on
10 the types of damages Defendants want to cut off prematurely, and is in the process of producing
11 more – as is its right under all applicable law. Defendants have had years to examine relevant
12 evidence already produced; if they are only now realizing the potential scope of these additional
13 damages, that is the consequence of their strategy.

14 Regardless, on the extended case schedule Defendants just stipulated to – in
15 which they insisted upon an extensive additional cushion for rebuttal expert analysis –
16 Defendants have over five months to examine any additional evidence, ample deposition time to
17 follow up on any of this material, followed by another three and a half months after *that* for their
18 damages expert to do his analysis. In addition, to the extent that any of Oracle's damages are
19 based on expert analysis, Oracle will, of course, provide that analysis and any expert work
20 product created in support on November 16, 2009, when it provides its expert reports.
21 Defendants will then have until February 26, 2010 to probe that analysis and prepare their own
22 expert response – and then until November 2010, nearly a year and a half from now, to prepare
23 for trial. On this record, Defendants suffer no prejudice. But there is more: Defendants'
24 exaggerated list of additional discovery and expert analysis largely dissipates because Oracle
25 does not intend to quantify much of the damage testimony that concerns Defendants.

26 Tellingly, Defendants cite no authority that supports the relief they seek at this
27 point in the proceedings. That Defendants' massive wrongdoing has resulted in potentially
28 massive damages claims – and that their damages experts, like Oracle's, have to process a lot of

1 information – provides no basis under the law for precluding Oracle from seeking its damages.
 2 Indeed, granting the request would be unprecedented and counter to the Federal Rule of Civil
 3 Procedure 37 standards articulated by Judge Patel in *Network Appliance, Inc. v. Bluearc Corp.*,
 4 2005 U.S. Dist. LEXIS 16726, at *9 (N.D. Cal. 2005), a remarkably analogous case that
 5 Defendants do not mention. By contrast, the few cases Defendants do cite either concern
 6 motions to compel supplemental initial disclosures regarding damages – relief Defendants do not
 7 seek – or to exclude damages evidence *at trial* that a party had not previously disclosed.

8 Finally, whether to impose the severe sanction of damages preclusion at trial is
 9 not a discovery determination for this Court; it is a ruling properly directed to Judge Hamilton, if
 10 and when, close to trial, Defendants satisfy the showing required under Rule 37.

11 Below, Oracle explains how both law and procedure bar this motion. It then
 12 shows how, on these facts and this record, Defendants have long known about these damages
 13 and have no basis for complaint. For all these reasons, Oracle respectfully requests the Court
 14 deny Defendants’ motion for sanctions and a protective order.

15 **II. DEFENDANTS SEEK UNPRECEDENTED RELIEF WITH**
 16 **INSUFFICIENT BASIS FROM THE WRONG COURT**

17 **A. The Trial Court Limits Available Damages and Precludes**
 18 **Evidence at Trial**

19 When Judge Hamilton withdrew Judge Jenkins’s reference of discovery disputes
 20 in this case to Judge Legge (Ret.), she expressly “refer[red] the parties to Magistrate Judge
 21 Laporte to oversee discovery and resolve discovery disputes.” Order Withdrawing Reference to
 22 Special Master and Referring Case to Magistrate Judge, Dkt. No. 78 (April 25, 2008) at 1:18-19.
 23 This motion is not a discovery dispute, but a request to terminate Oracle’s rights to seek
 24 damages. *Cf. e.g., Reynoso v. Constr. Protective Servs., Inc.*, 2008 U.S. App. LEXIS 19681 at
 25 *3, *6 (9th Cir. 2008) (noting trial court’s granting of defendants’ pre-trial motion in limine to
 26 exclude damages at trial where plaintiffs at no time prior to trial disclosed damages calculations
 27
 28

1 was “an evidentiary ruling[,]” “not a motion ‘relating to discovery pursuant to [Rules] 26-37.’”¹

2 If Defendants were moving for augmentation of Oracle’s Supplemental and
 3 Amended Initial Disclosures, that motion would more clearly be a discovery dispute properly
 4 before this Court. But that is not what Defendants seek. Indeed, it appears that the detail in
 5 Oracle’s May 22, 2009 amended disclosures prompted this sanctions request. Motion at 11-13.
 6 Oracle’s revision was exactly what Rule 26(e) contemplates – and Oracle’s compliance
 7 effectively precludes any complaint by Defendants. *See, e.g., City and County of San Francisco*
 8 *v. Tutor-Saliba Corp.*, 218 F.R.D. 219, 222 (N.D. Cal. 2003) (“So long as Plaintiffs timely fulfill
 9 their disclosure obligations, they will not be prejudiced for making initial disclosures that are
 10 revised.”). Regardless, as the case law cited below at Section II.B. confirms, when used to
 11 preclude damages evidence or theories at trial, the *trial court* invariably applies any sanctions
 12 under Rule 37(c).²

13 Defendants’ reliance on Rule 16(f)(1) is even more curious and inappropriate.

14 This Rule concerns sanctions available to the trial court if a party or its attorney:

- 15 (A) fails to appear at a scheduling or other pretrial conference;
 16 (B) is substantially unprepared to participate – or does not
 participate in good faith – in the conference; or
 17 (C) fails to obey a scheduling or other pretrial order.

18 Pre-trial conferences are not held before this Court, and Defendants offer no factual or legal basis
 19 for application of this Rule in connection with this motion.

20 _____
 21 ¹ That the *Reynoso* trial court ruled on defendants’ motion in limine by employing the sanctions
 22 available under Rule 37(c) does not change this situation into a discovery motion. Defendants’
 23 only case in support of this Court deciding this motion to preclude evidence at trial, *Hsieh v.*
 24 *Peake*, 2008 U.S. Dist. LEXIS 23649 (N.D. Cal. 2008), further confirms that Judge Hamilton
 believes dispositive motions are the province of the trial court, while discovery motions are to be
 25 decided by the discovery magistrate. She chides plaintiff for essentially trying to turn a Rule
 26 56(f) motion into either a Rule 37(c) motion or a motion to compel documents. *Id.* at *59-*60.
 Nothing in her observations about plaintiff’s improper efforts indicates that a Rule 37(c) motion
 to exclude evidence at trial is a discovery motion that should be decided by the discovery
 magistrate.

27 ² The reference in Rule 37(c)(1)(B) to the availability of instructions to the jury further confirms
 28 this.

1 **B. No Court Has Ever Precluded Use of Damages Evidence at**
2 **Trial at This Point in a Case**

3 Defendants provide no authority for the extraordinary remedy they now request.
4 The uncontradicted and extensive case law holds that exclusion of evidence under Rule 37 is a
5 severe remedy, only granted in extreme situations. “[O]n the menu of sanctions that a court may
6 select from in applying Rule 37, preclusion of evidence is among the most severe; indeed, under
7 certain circumstances, the imposition of preclusive sanctions may be tantamount to dismissal of a
8 plaintiff’s claims or entry of default judgment against a defendant.” *Network Appliance, Inc.*,
9 2005 U.S. Dist. LEXIS 16726 at *9, *11-12 (refusing Rule 37 request to exclude damages-
10 related evidence based on assertions of untimely production); *see also Tutor-Saliba*, 218 F.R.D.
11 at 220 (describing cases cited in support of evidence exclusion as “extreme situations in which
12 the defendant was either prejudiced by plaintiff’s conduct or entitled to summary judgment
13 because of lack of any supporting evidence.”).

14 Indeed, the *only* cases Defendants cite where damages evidence or expert
15 testimony has been excluded under Rule 37 are where the precluded party springs new evidence
16 or testimony on the other side *at or just before trial*. *See, e.g., Yeti by Molly Ltd. v. Deckers*
17 *Outdoor Corp.*, 259 F.3d 1101, 1105-1107 (9th Cir. 2001) (excluding testimony of damages
18 expert as sanction for failing to provide his expert report until almost two years after close of
19 discovery and 28 days before trial); *Reynoso*, 2008 U.S. App. LEXIS 19681 at *2 (granting at
20 pre-trial conference motion *in limine* to preclude damages theories and evidence at trial that had
21 never been disclosed); *Everflow Plumbing Co., Inc. v. Pacific Bell Directory*, 2005 U.S. Dist.
22 LEXIS 46822 (N.D. Cal. 2005) (Your Honor, sitting as trial judge, excluded damages testimony,
23 evidence, and calculations presented to opposing counsel for the first time four days before trial
24 and where, unlike here, plaintiff did not supplement initial damages disclosures 28 days before
25 the fact discovery cut-off as required by the Pretrial Order and Rule 26(e)(1), and also missed the

1 deadline for submission of trial exhibits).³

2 Moreover, even when not premature, requests under Rule 37(c) for evidence
3 preclusion, or even lesser sanctions, are regularly rejected on far more egregious facts than are
4 alleged here. *See, e.g., Primrose Operating Co., et al. v. Nat'l Am. Insur. Co.*, 382 F.3d 546,
5 563-64 (5th Cir. 2004) (upholding trial court's denial of Rule 37(c) motion to exclude testimony
6 of damages expert even where no expert report provided because another letter and the Pre-Trial
7 disclosure identified the expert and her expected testimony and plaintiff had elsewhere disclosed
8 the documents upon which expert then provided her damages opinion at trial); *U.S. v. Rapanos*,
9 376 F.3d 629, 644-45 (6th Cir. 2004), *vacated on other grounds*, 547 U.S. 715 (2006) (rejecting
10 request to preclude previously undisclosed damages calculations because "the failure to disclose
11 seems harmless as the Defendants were aware of the data used in the supplemental reports");
12 *Reiner v. Warren Resort Hotels, Inc.*, 2008 U.S. Dist. LEXIS 102047, at *26-29 (D. Mont. 2008)
13 (rejecting request for attorneys' fees and costs even where plaintiff did not reveal she was
14 seeking damages for an injury until after deposition and despite failing to produce relevant
15 medical documents and expert reports until after deposition, which she buried in hundreds of
16 pages of production provided only five days before a second deposition, finding her failures
17 "substantially justified or harmless" under Rule 37(c)(1)); *Pierce v. CVS Pharmacy, Inc.*, 2007
18 U.S. Dist. LEXIS 69006, at *11 (D. Ariz. 2007) (in evaluating a late disclosure of expert reports,
19 finding that any prejudice was cured because there was still time to address deficiencies); *The*
20 *Christensen Firm v. Chameleon Data Corp.*, 2006 U.S. Dist. LEXIS 79710, at *16 (W.D. Wash.

21 _____
22 ³ Defendants' only other cases do not apply. The court in *Cambridge Electronics Corp. v. MGA*
23 *Electronics, Inc.*, 227 F.R.D. 313, 324-25 (C.D. Cal. 2004), did not preclude plaintiff from
24 seeking damages. It precluded evidence in support of plaintiff's alter ego theory when that
25 evidence was presented for the first time after close of discovery and in opposition to a pending
26 summary judgment motion. Here, fact discovery will not close until December and Defendants'
27 experts' report is not due until the end of next February. What the Ninth Circuit deemed a
28 proper dismissal of plaintiff's claims in *Payne v. Exxon Corp.*, 121 F.3d 503, 505-508 (9th Cir.
1997), occurred only after plaintiff had repeatedly failed to comply with multiple court orders to
produce documents after defendants' multiple successful motions to compel, and after the trial
court gave plaintiff another chance to comply with the court's prior orders even after defendants
moved to dismiss. Defendants do not, and cannot, point to any such contempt of court orders by
Oracle.

1 2006) (refusing to dismiss damages claims on summary judgment even when plaintiff
 2 supplemented its initial damages disclosures only after summary judgment filed because the
 3 supplemental disclosure “was filed before the close of discovery” and defendants had never
 4 moved to compel what they were seeking to preclude); *Tracinda Corp. v. Daimler Chrysler AG*,
 5 362 F. Supp. 2d 487, 505-511 (D. Del. 2005) (internal citation omitted) (noting that “exclusion
 6 of critical evidence is an ‘extreme’ sanction” and rejecting various Rule 37(c) requests to
 7 preclude plaintiff’s damages expert’s purportedly new testimony and exhibits at trial, including
 8 because “the data underlying [the expert’s] testimony was either produced to [the other side]
 9 before trial or included in [opponent’s] own [expert’s] report. In these circumstances, the Court
 10 cannot conclude that [the expert’s] testimony unfairly surprised or prejudiced [the other side].”);
 11 *Semtech Corp. v. Royal Ins. Co. of Am.*, 2005 WL 6192906, at *3 (C.D. Cal. 2005) (denying a
 12 Rule 37(c) motion to exclude a supplemental report by a damages expert because, even if the
 13 trial stayed on its current date, defendant “ha[d] over ‘a month before trial and thus ha[s] ample
 14 time to prepare effective cross examination and consider possible witnesses to counter’ [the
 15 damages expert’s] opinions” and even if defendant had to re-depose the expert, “[t]his harm,
 16 however, would not warrant the extreme sanction of preclusion”).

17 As is apparent from this sampling of the relevant case law, Defendants’
 18 preclusion request, if granted, would be unprecedented.

19 **C. Defendants Do Not Satisfy the Prerequisites for the Severe
 20 Remedy They Now Seek**

21 The portion of Rule 37(c)(1) on which Defendants base their motion reads:

22 If a party fails to provide information or identify a witness as
 23 required by Rule 26(a) [re Initial Disclosure] or (e) [re
 24 Supplementing Initial Disclosures and Discovery Responses], the
 25 party is not allowed to use that information or witness to supply
 26 evidence on a motion, at a hearing, or at trial, unless the failure
 27 was substantially justified or is harmless. []

28 The express requirements in Rule 37 for imposing *any* of the listed sanctions is that Oracle failed
 to meet its initial or supplemental disclosure obligations – and that any such failure was not
 “substantially justified or is harmless.”

Further, in the context of a far more egregious series of complaints of discovery

1 failures,⁴ Judge Patel has held that “mere negligent conduct is insufficient to impose the severe
 2 penalty of exclusionary sanctions [under Rule 37], and a showing of bad faith is required.”
 3 *Network Appliance*, 2005 U.S. Dist. LEXIS 16726 at *9 (N.D.Cal. 2005) (citing *United States v.*
 4 *Sumitomo Mar. & Fire Ins. Co.*, 617 F.2d 1365, 1369 (9th Cir. 1980)). Defendants did not alert
 5 the Court to this authority – and do not remotely show bad faith by Oracle.

6 Judge Patel continues: “Moreover, ‘[e]xclusion sanctions based on alleged
 7 discovery violations are generally improper absent undue prejudice to the opposing side.”
 8 *Network Appliance*, 2005 U.S. Dist. LEXIS 16726 at *9 (quoting *Amersham Pharmacia Biotech,*
 9 *Inc. v. Perkin-Elmer Corp.*, 190 F.R.D. 644, 648 (N.D. Cal. 2000) (Infante, Mag. J.) (citing
 10 *Wendt v. Host Int’l, Inc.*, 125 F.3d 806, 814 (9th Cir. 1997)). Judge Patel further noted that the
 11 movant “bears the burden of presenting evidence that it suffered ‘undue prejudice’ as a result of
 12 [the complained of] failure to produce a subset of responsive documents” and that “[t]he
 13 touchstone of the prejudice inquiry is whether a discovery violation ‘threaten[s] to interfere with
 14 the rightful decision of the case’ or ‘impairs the moving party’s ability to go to trial.’” *Id.* at *9
 15 (quoting *Amersham*, 190 F.R.D. at 648 and *Wyle v. R.J. Reynolds Indus., Inc.*, 709 F.2d 585, 591
 16 (9th Cir. 1983)). As shown below, Defendants cannot show any such prejudice.

17 Finally, Judge Patel notes that “[d]elayed production of documents is rarely
 18 sufficient to meet this standard.” *Id.* at *9 (citing *Adriana Int’l Corp. v. Thoenen*, 913 F.2d 1406,
 19 1412 (9th Cir. 1990)). Judge Patel then found that, even assuming a showing of bad faith was
 20 not required, the moving party’s complaints “fall far short of meeting this high standard” because
 21 defendant “made a reasonable effort to respond to the court’s order to compel, producing the vast
 22 majority of responsive documents by the court-imposed deadline and promptly supplementing
 23 _____

24 ⁴ Plaintiff had moved to compel production of various documents related to defendants’ sales of
 25 allegedly infringing products. The court granted plaintiff’s motion and ordered production by a
 26 date certain. Defendants produced some documents on that date. After a subsequent deposition
 27 of a defendant Rule 30(b)(6) witness on damages, plaintiff requested additional damages-related
 28 documents, and defendant then produced over 15,000 pages of documents on the last day of fact
 discovery. *Network Appliance*, 2005 U.S. Dist. LEXIS 16726 at *3-4. Relying on Rule 37 and
 the court’s “inherent power,” plaintiff sought to preclude defendant from presenting a host of
 damages-related evidence at trial. *Id.* at *4.

1 those disclosures when requested to do so.” *Network Appliance*, 2005 U.S. Dist. LEXIS 16726
 2 at *9-10.

3 Defendants do not – and cannot – meet any part of this “high standard.” *Id.*

4 **1. Oracle Did Not Fail to Meet Its Damages Disclosure**
 5 **Obligations**

6 First, Defendants do not meet the fundamental prerequisite for their motion:
 7 showing Oracle has failed to meet its damages disclosure obligations. To the contrary, Oracle’s
 8 *candor* in its May 22, 2009 supplemental disclosures prompted this motion. Motion at 11-13;
 9 Clarke Decl. at ¶¶ 13-25. Oracle provided Defendants those detailed disclosures consistent with
 10 the then-in-place discovery amendment deadline, now *six months* before Oracle’s damages
 11 expert report is due and *more than six months* before this Court’s Order re Discovery Procedures
 12 requires final supplementation.⁵ See Section III below. Though Defendants do not move for
 13 further supplementation of Oracle’s initial damages disclosures, Oracle intends to provide one as
 14 to issues raised in Defendants’ motion after it evaluates the availability and contents of any
 15 additional evidence in support of its damages. It expects to be able to provide this further update
 16 by October 1 – *six weeks* before its damages expert report is due and *over three months* before
 17 fact discovery closes. House Decl.; ¶ 33.

18 Defendants do not, and cannot, point to any order compelling production that
 19 Oracle has violated. They do not, and cannot, establish that Oracle willfully withheld relevant,
 20 non-objectionable damages information or documents. As set forth in detail in Section III below,
 21

22 ⁵ Both sides served extensive Supplemental Initial Disclosures and extensive Revised Responses
 23 where changes to prior responses were “not otherwise made known to the other parties during
 24 the discovery process or in writing” on May 22, 2009 pursuant to Rule 26(e) and the Court’s
 25 May 2, 2008 Order Re Discovery Procedures that required such updates no later than 28 days
 26 before the scheduled close of fact discovery (then June 19, 2009, per the April 5, 2008 Case
 27 Management Order). Dkt. No. 83 at ¶ 4; Declaration of Holly A. House (“House Decl.”) ¶ 37.
 28 Thus, even under the prior schedule, Oracle’s supplementations were timely. Further, at that
 point, there was then pending the Parties’ joint motion to significantly extend the case schedule,
 as to which Judge Hamilton entered the stipulated order on June, 11, 2009. *Id.*; see also Motion
 for Extension of Time to Complete Discovery, Dkt. No. 203 (May 12, 2009); Stipulated Revised
 Case Management and Pretrial Order, Dkt. No. 325 (June 11, 2009).

1 and in even more detail in the accompanying House Declaration, Oracle also has disclosed in its
2 complaints, its written discovery responses, oral testimony, and massive document productions
3 both its damages theories and much of its damages support, including as to lost profits damages
4 other than for support revenue losses from TomorrowNow customers. *Id.* at ¶¶15-33, 36-39 &
5 Exs. A-D. While Oracle did revise its initial damages disclosures and interrogatory responses
6 regarding damages, *see* Section III.B.1 below, Oracle did not revise every written RFP response
7 to reflect additional productions, including the many non-custodial damages-related productions
8 Oracle has made in response to Defendants' targeted search requests. That is because Rule 26(e)
9 expressly permits avoidance of such make-work where, as here, the Parties are expressly aware
10 of not only the productions, but also the numerous meet and confers (both oral and written) and
11 other discovery process interactions relating to Oracle's various potential damages claims, as
12 well as the back-up documents and data produced in support of those claims. *See* Rule
13 26(e)(1)(A); *see also* House Decl., ¶¶4, 15-29. Moreover, Oracle is in the process of diligently
14 producing additional relevant damages documents, which it expects to complete well before its
15 damages expert report is due and fact discovery closes. House Decl., ¶¶30-31. Oracle more than
16 satisfied its discovery obligations here.

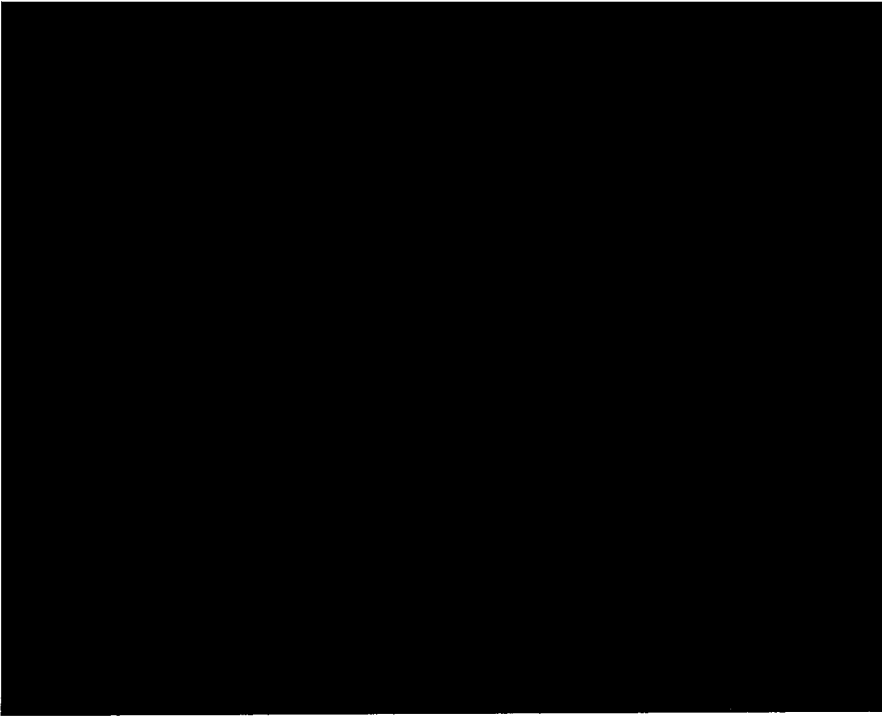

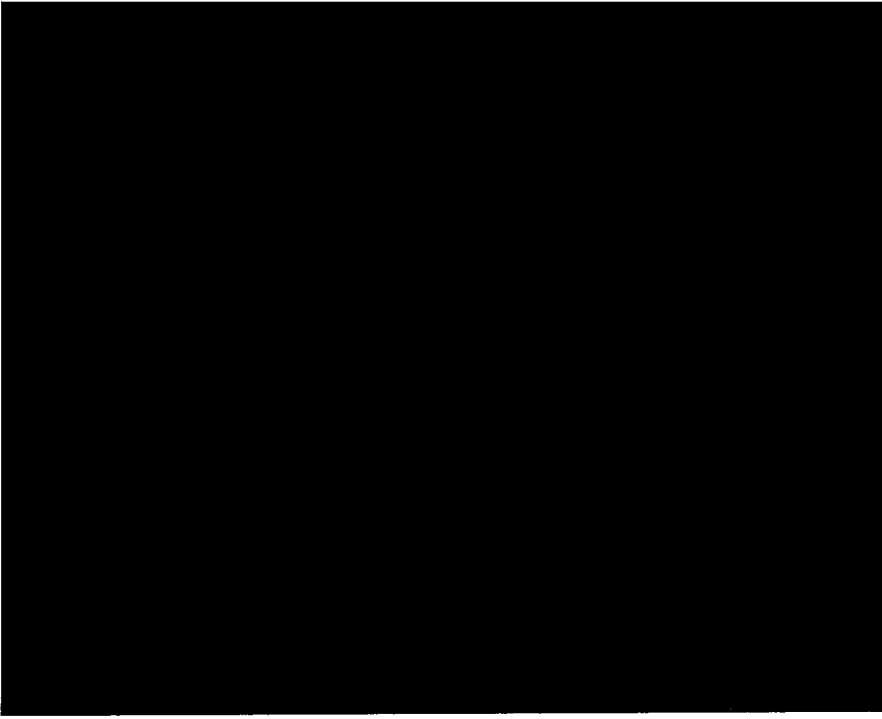

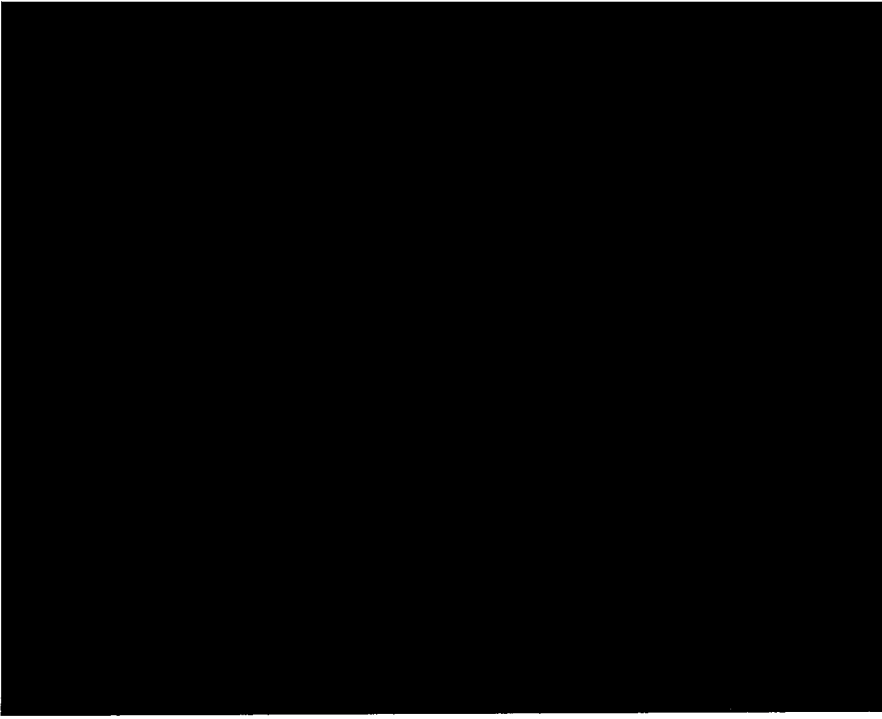

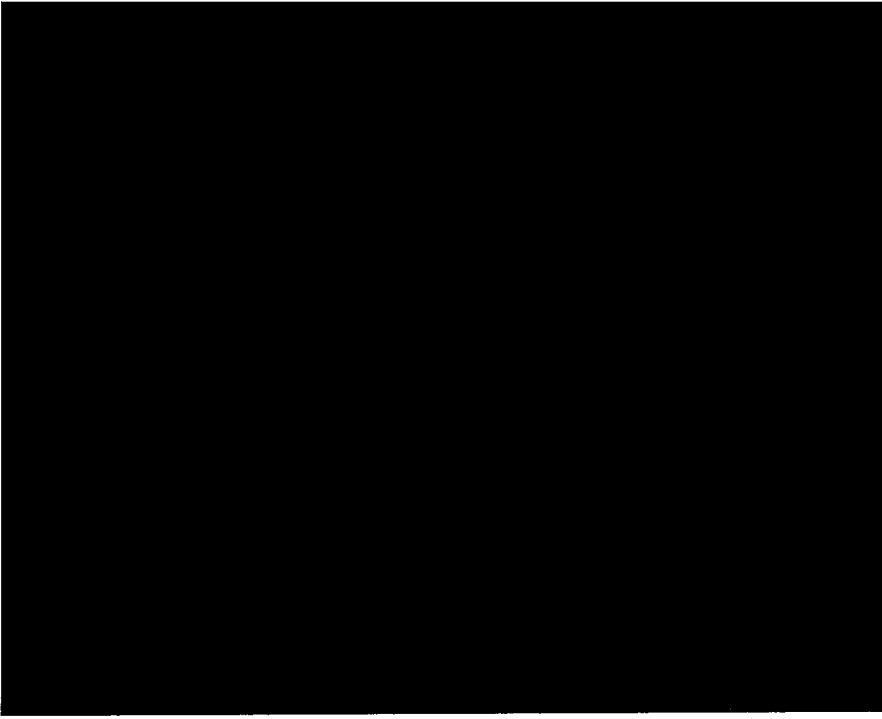

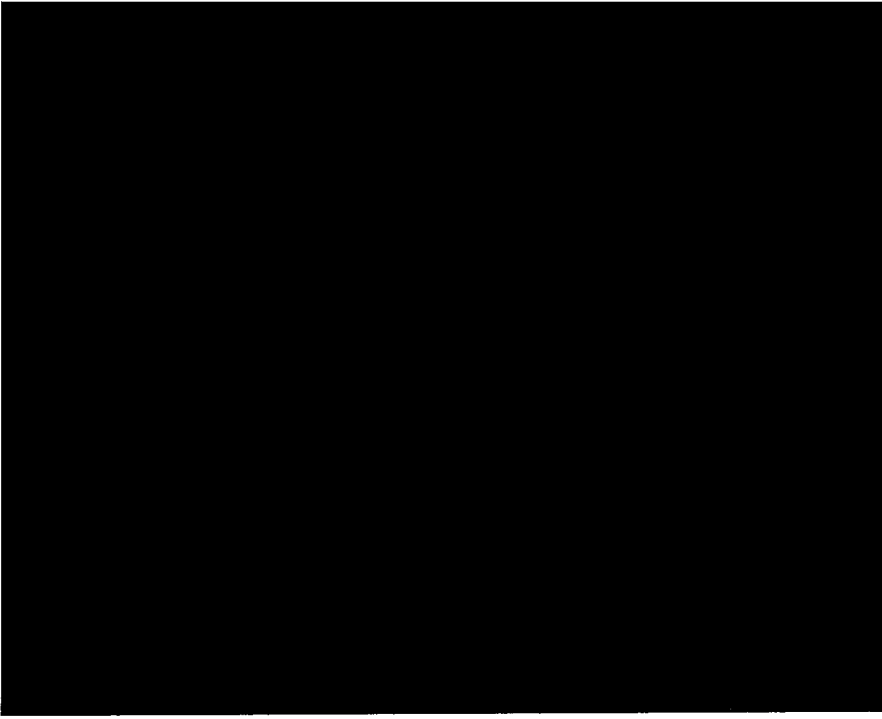

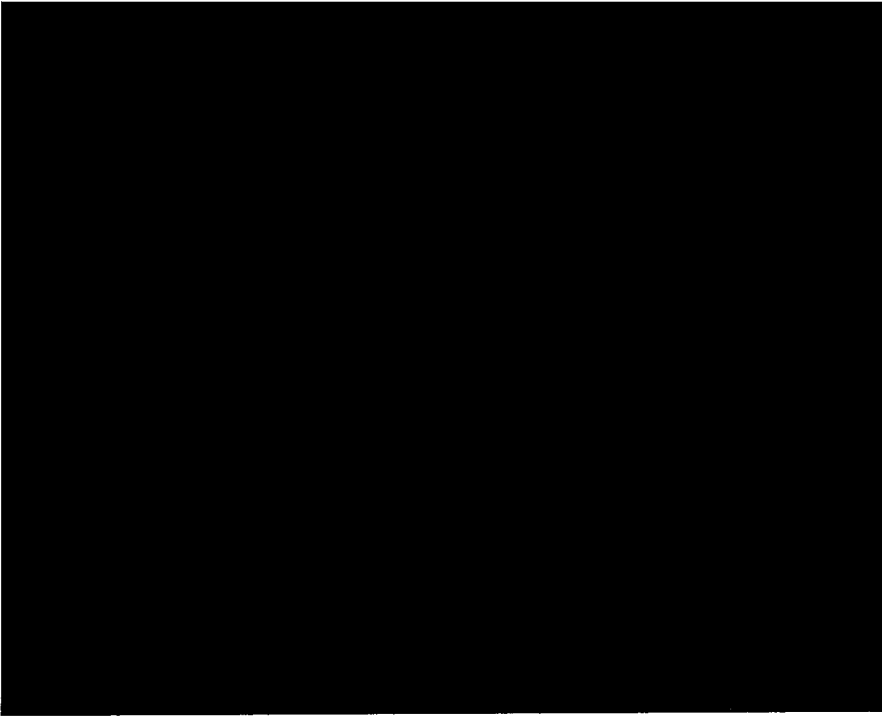

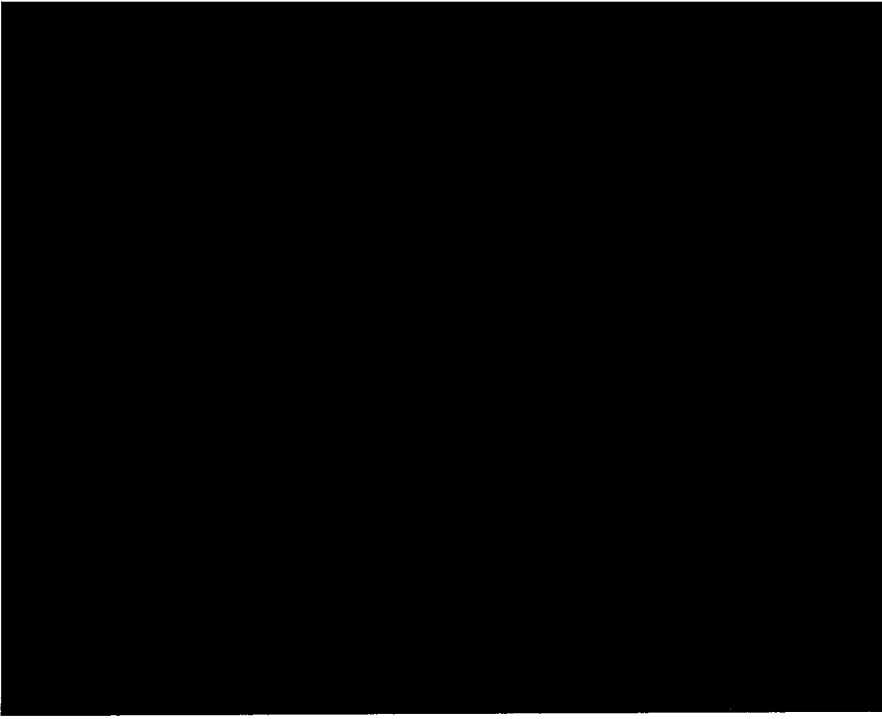

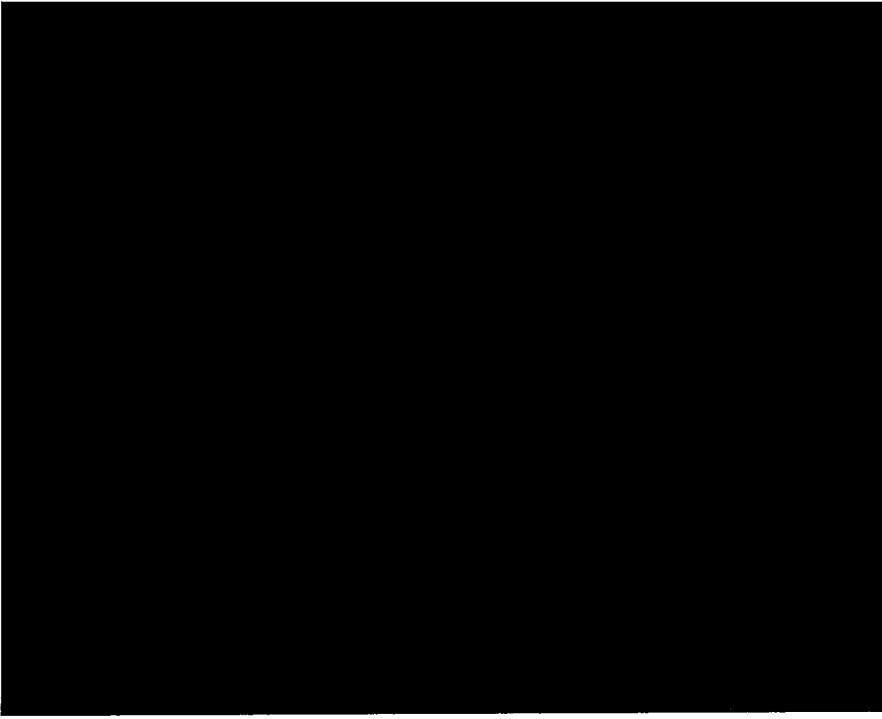

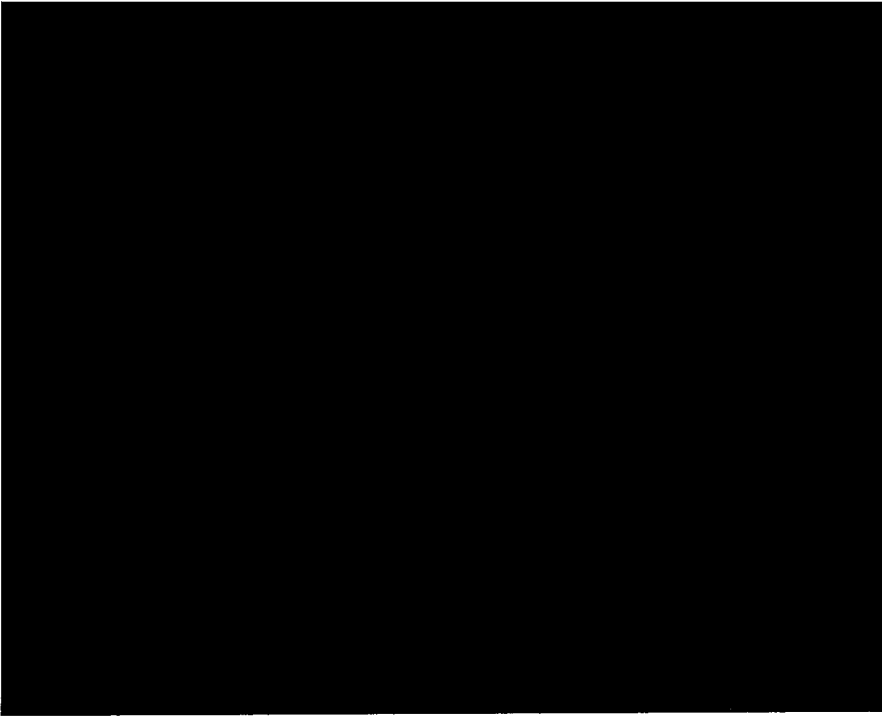

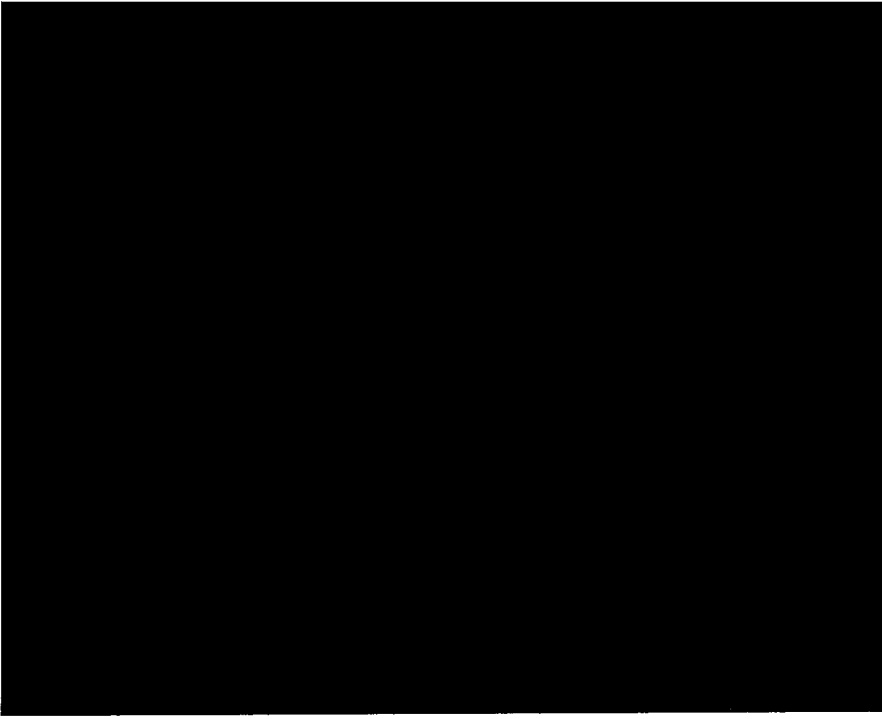

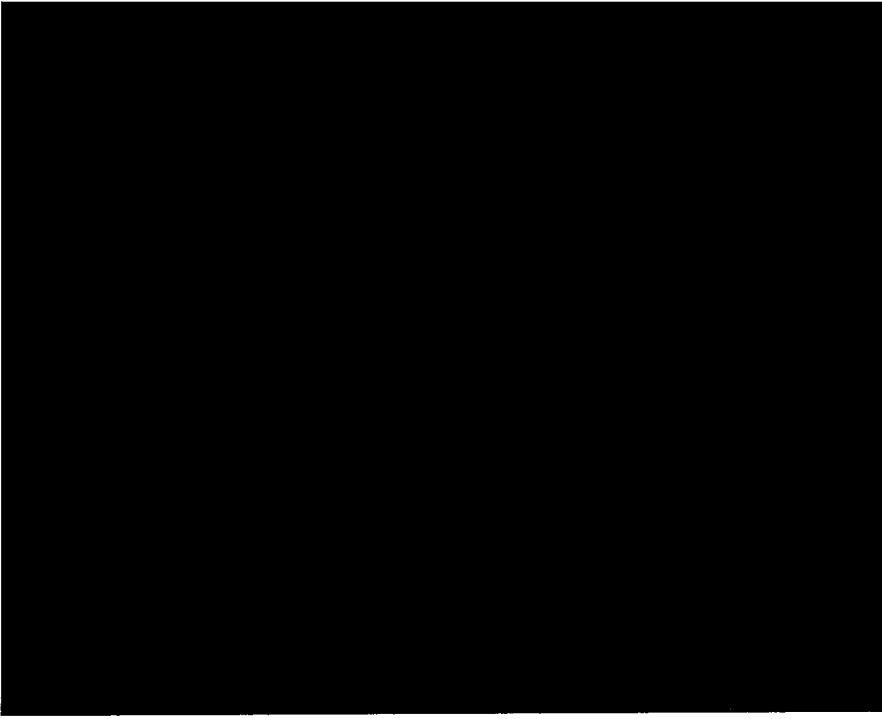

17 In short, the violation needed to trigger Rule 37 does not exist.

18 **2. Oracle's Damages Disclosure Schedule Is Justified and**
19 **Not in Bad Faith**

20 Even if Defendants could satisfy their Rule 37(c) burden of showing that Oracle's
21 Rule 26 damages disclosures are insufficient because Oracle has not yet produced all of its
22 damages documents – which they cannot – the pace of Oracle's production is justified. The
23 scope of the case, and breadth of the liability and damages that discovery continues to reveal,
24 have necessarily impacted Oracle's production of the documents in support of its eventual
25 damages computation. House Decl., ¶4. Oracle did not intentionally withhold any relevant
26 damages documents or other evidence, waiting to spring them on Defendants. *Id.* at ¶2. Indeed,
27 had Defendants taken the depositions of the Oracle executives they cite earlier than April and
28 May 2009 (as Oracle did in taking the SAP executives in 2008), Defendants would have learned

1 then about these witnesses' damages-related information and opinions. *Id.* at ¶28; ¶¶41-45 &
2 Exs. G-J. There is no bad faith on Oracle's part for Defendants to justify their sanctions request.
3 *Id.* at ¶2.

4 Moreover, much of Defendants' fear of vastly expanded damages claims (and
5 corresponding expansive analysis and documentation) is for naught. 

6 
7 
8 
9 
10 
11 
12 
13 
14 
15 
16  The financial
17 impact of TomorrowNow on Oracle in connection with Oracle's Lifetime Support and
18 Applications Unlimited programs is the subject of intense investigation and any relevant
19 materials are being gathered and produced, though final quantification of such impact will be the
20 province of Oracle's experts. House Decl., ¶31.⁶

21 Given that, to this day, Defendants still have not produced responses to
22 fundamental questions about what they did with Oracle's IP (on which Oracle, in contrast to
23 Defendants, has moved to compel, having sought stipulations before coming to the Court), and
24 that Defendants are still producing vast amounts of raw technical data and volumes of other
25

26 _____
27 ⁶ To be clear, Oracle does intend to introduce and rely on evidence of all its damages to put the
28 more limited damages it ultimately seeks (whether through lost profits or a hypothetical license)
in context. However, Oracle will not be quantifying all its damages in its lost profits case.

1 custodial and other documents, including about damages, their complaints of prejudicial delay
2 from Oracle’s production schedule are rather hard to accept. *See id.* ¶34. Regardless, and as it
3 has always intended, Oracle will produce any and all documents in support of its final damages
4 calculations prior to the close of fact discovery – and indeed, is striving to do so well before then.
5 *Id.* at ¶30.

6 **3. Oracle’s Damages Disclosure Schedule Is Harmless
Under All Authorities**

7 Finally, even if Oracle’s pace of damages document production were an adequate
8 failure to justify bringing a Rule 37(c) evidence preclusion motion (which, by all authorities, it is
9 not), under the same authorities, Defendants have not been so harmed as to justify precluding
10 Oracle from continuing to produce and use damages evidence in its damages expert’s report and
11 at trial. No case allows a defendant to preclude damages evidence simply because the breadth of
12 the damages makes analysis time-consuming, complex, and costly – particularly at this point in
13 the case. Rather, so long as Oracle properly discloses its damages expectations (as it has and
14 will refine even more by October and in its expert report), Rule 37(c) does not apply. *Cf. Tutor-*
15 *Saliba*, 218 F.R.D. at 220 (noting more detailed disclosure only due when “document production
16 has been substantially completed” and noting that “[s]o long as Plaintiffs timely fulfill their
17 disclosure obligations, they will not be prejudiced for making initial disclosures that are
18 revised.”). And, so long as Defendants are not “surprised” at trial by any of Oracle’s damages
19 theories or evidence (which they will not be, because Oracle’s initial and/or rebuttal damages
20 report(s) and testimony will be complete and clear), then they will have no future basis for a Rule
21 37(c)-based motion *in limine* to Judge Hamilton. *See Network Appliance*, 2005 U.S. Dist.
22 LEXIS 16726 at *11 (“[t]he touchstone of the prejudice inquiry under Rule 37 is whether a
23 discovery violation ‘threaten[s] to interfere with the rightful decision of the case’ or ‘impairs the
24 moving party’s ability to go to trial.’”). Nothing Defendants or their damages expert (wrongly)
25 surmise about what they may need to do to respond to Oracle’s damages experts shows that they

1 cannot and will not be ready to meet Oracle head-on at trial in November 2010.⁷ The only thing
 2 that would interfere with “the rightful decision of the case” is barring Oracle from seeking all the
 3 damages caused by Defendants’ admittedly vast and improper conduct.

4 Finally, Oracle and its damages experts do not begin to agree with Defendants’
 5 damages expert that all the documents he lists are necessary to any reasonable damages analysis
 6 – or that the possible fees that will be incurred are either necessary or accurate.⁸ The level of
 7 proof of damages that Defendants’ expert envisions is simply not required. “Where the fact of
 8 damages is certain, the amount of damages need not be calculated with absolute certainty. The
 9 law requires only that some reasonable basis of computation of damages be used, and the
 10 damages may be computed even if the result reached is an approximation....This is especially
 11 true where ...[it is] the wrongful acts of the defendant that have caused the other party to not
 12 realize a profit to which it is entitled.” *GHK Associates v. Mayer Group*, 224 Cal. App. 3d 856,
 13 873–874 (1990); *see also Forro Precision, Inc. v. Int’l Business Machines Corp.*, 673 F.2d 1045,
 14 1052 (9th Cir. 1982); *Stevens Linen Assocs. v. Mastercraft Corp.*, 656 F.2d 11, 14-15 (2d Cir.
 15 1981) (recognizing that some degree of speculation is appropriate in “establishing lost sales due
 16 to sales of an infringing product” in a copyright dispute). For instance, lost profits “may be
 17 ascertained with reasonable certainty from the working experience of the business, from the past
 18 volume of business, and other proven data relevant to the probable future sales.” *Piscetelli v.*
 19 *Freidenberg*, 87 Cal. App. 4th 953, 989 (2001); *accord Shade Foods, Inc. v. Innovative Prods.*

20 _____
 21 ⁷ Even if that were the case, Defendants would, at most, be entitled to make that argument to
 22 Judge Hamilton, most likely on a motion to modify and extend the case schedule.

23 ⁸ For instance, the level of general ledger detail Defendants’ expert says will be required is
 24 hugely burdensome and, ultimately, unlikely to add significant value beyond information in other
 25 produced financial documents, much of the material cited as relevant is from the public domain
 26 or has already been produced, and much of it relates to quantifications Oracle’s damages experts
 27 are not performing. *See Meyer Decl.*, ¶¶ 10-17. Moreover, it is shocking that Defendants’
 28 damages experts have already billed over *twice* what Oracle’s damages experts have billed to
 date, *id.* at ¶6, fn. 3 – and it is hard to believe they would need to, or even could, spend \$5
 million more in the time left before their rebuttal report is due. But, again, that Defendants have
 hired expensive experts who are performing extensive analysis is no basis for evidence
 preclusion.

1 *Sales & Marketing, Inc.*, 78 Cal. App. 4th 847, 890 (2000). And the customer-by-customer proof
 2 Defendants' damages expert says is needed simply is not required by law. *Cf. Morlife, Inc. v.*
 3 *Perry*, 56 Cal. App. 4th 1514, 1527 (1997) (assertion "that solicitation could only be established
 4 by direct evidence on customer-by -customer basis. . . is unfounded in either law or logic" and
 5 inference from sample of customers and other evidence was wholly appropriate).

6 Moreover, the work that Defendants complain they need to do on this volume of
 7 financial information to analyze it pales in comparison to the terabytes of data that they have
 8 produced, and the mountains more that they have *yet* to produce, regarding their theft,
 9 infringement, and further use of Oracle's software and support materials, all of which Oracle will
 10 need to analyze due to Defendants' refusal to stipulate to any extrapolation. House Decl., ¶34.

11 Nonetheless, if Defendants think they need more documents to complete their
 12 damages analysis now, they can and should narrow their requests, meet and confer with Oracle
 13 about what they really need, and, if Oracle refuses, move to compel with a proper showing so
 14 Oracle can appropriately respond and the Court can strike the proper balance. Compelling
 15 production if Oracle refuses to produce such documents is the remedy that would be potentially
 16 available to Defendants at this point – not an order precluding Oracle's ability to introduce
 17 damages evidence or damages theories at a trial not scheduled to begin for another *year and a*
 18 *half*.

19 In sum, Defendants have come to the wrong Court, at the wrong time, and without
 20 making the necessary showing for the drastic, unprecedented relief they seek.

21 **III. THE FACTS DO NOT JUSTIFY SANCTIONS, EVEN IF THE LAW** 22 **ALLOWED THEM**

23 In addition to having no support in case law, Defendants' motion is undercut by
 24 the reality of this case's history. The actual record set forth below shows ample, consistent
 25 revelation by Oracle of its damages claims and evidence, as well as no prejudice to Defendants –
 26 particularly on the expanded case schedule the Parties jointly sought and secured.

27 **A. Key Dates in the Current Case Schedule**

28 By agreement and stipulation, the Parties jointly moved for and were granted

1 significant extensions to deadlines relevant to Defendants' motion:

- 2 • The fact discovery cut-off is now December 4, 2009, which is also the
3 deadline to supplement and/or correct all disclosures and discovery responses;
- 4 • Motions to compel can be filed up to December 11, 2009;
- 5 • Initial experts' reports are due on November 16, 2009;
- 6 • Expert rebuttal reports are due February 26, 2010;
- 7 • Expert discovery does not close until April 23, 2010; and
- 8 • Trial commences November 1, 2010.

9 *See* Stipulated Revised Case Management and Pretrial Order, Dkt. No. 325 (June 11, 2009).

10 Nothing in that order limits the type of additional discovery that can be produced by any Party.

11 *Id.* Indeed, the only restrictions on the stipulated expanded discovery relate to the additional

12 discovery Oracle can seek for its Siebel and post-litigation claims. *Id.* at 2:23-3:17; 3:27-4:14.

13 Moreover, two of the critical conditions Defendants insisted on as part of this revised schedule,

14 are the receipt of initial expert reports even before fact discovery concludes, and a cushion of

15 three and a half months for their experts to analyze and respond to those initial reports (almost

16 double the time in the prior pretrial schedule). House Decl., ¶35. The only reason for

17 demanding this extra time was because Defendants well understood the scope of damages and

18 analysis required in this case – and said so repeatedly during the weeks of negotiation leading to

19 the jointly-requested extension filing. *Id.*

20 Defendants also successfully sought and received the opportunity to make an

21 early summary judgment motion seeking to exclude Oracle's right to seek damages under a

22 hypothetical license damages model. Stipulated Revised Case Management and Pretrial Order,

23 Dkt. No. 325 (June 11, 2009) at 1:11. While Oracle does not believe that motion will be

24 successful, if it is, that would mean that Oracle's damages would be restricted in large part to lost

25 profits – much of which Defendants ask the Court to exclude by this motion. That potential only

26 highlights the impropriety of this motion at this time.

27

28

1 **B. Oracle Has Repeatedly Disclosed Its Intention to Seek, and**
 2 **Support For, Lost Profits Damages**

3 This case has evolved and expanded as discovery has revealed ever more
 4 improper activity and knowledge by Defendants. As is normal in large cases, the types and
 5 breadth of Oracle's damages have also emerged as internal investigation, production of volumes
 6 of documents, and questioning of numerous Oracle witnesses have exposed the many ways that
 7 Defendants' actions have harmed Oracle. These will be honed even more in the detailed expert
 8 reports that Oracle will provide in November. *See* House Decl. ¶¶4, 28-29, 35; *see also, e.g.,*
 9 *Tutor-Saliba*, 218 F.R.D. at 221 (recognizing that damages disclosures evolve over the course of
 10 complex litigation and also recognizing "disclosing a precise figure for damages without a
 11 method of calculation may be sufficient where other evidence is developed *e.g.* in the context of
 12 a preliminary hearing, and it is appropriate to defer further specification to *e.g.* development of
 13 expert testimony.").

14 Regardless of the natural evolution of the case, Defendants are wrong to assert
 15 that Oracle limited its "lost profits claim . . . to support revenue from customers allegedly lost to
 16 TN," "insisted that damages discovery would be limited "to support revenue from customers
 17 allegedly lost to TomorrowNow," or ever "refused to provide discovery on any other customers,
 18 on license revenue, or on any product not supported by TN." Motion at 2. Indeed, as late as
 19 May 19, 2009, *Defendants claimed the opposite* – not only had Oracle not limited its damages,
 20 they complained, but further that "Oracle has yet to articulate a damages theory...." Joint
 21 Discovery Conference Statement, Dkt. No. 312 (May 19, 2009) at 8:21-23. Neither extreme
 22 (and contradictory) position is accurate. Oracle describes below some of the many sources of
 23 damages information, relevant to the damages Defendants now seek to exclude, that Oracle has
 24 provided to date, as well as its plans for ongoing production and supplementation before the
 25 December 4, 2009 fact discovery cut off.

26 **1. Oracle's Pleadings and Disclosures Always Made It**
 27 **Clear That Its Damages Go Beyond Lost Support**
 28 **Revenue**

Complaints. As far back as its March 22, 2007 initial complaint, Oracle stated:

1 “As a direct and proximate result of Defendants’ actions, Oracle has suffered economic harm,
 2 including, but not limited to, *loss of profits from sales or licenses to current and potential*
 3 *customers of Oracle support services and software programs.*” Dkt. No. 1 at ¶¶ 106, 116
 4 (emphasis added). Oracle reiterated that, among other harms, it suffered lost profits for both
 5 current and potential customers for both support and license sales in its June 1, 2007 First
 6 Amended Complaint. Dkt. No. 31 at ¶¶ 92, 137. Over and over – in its July 28, 2008 Second
 7 Amended Complaint, Dkt. No. 132 at ¶¶ 140, 144, in its October 8, 2008 Third Amended
 8 Complaint, Dkt. No. 182 at ¶¶ 141, 145, 191-192, and in recently-filed versions of its Fourth
 9 Amended Complaint, Dkt. No. 348, ¶¶ 148, 152, 197, 207, and 217 and Dkt No. 352 at ¶¶ 145,
 10 149, 163, 194, 204 and 214 – Oracle put Defendants on notice of these types of damages.

11 ***Initial Disclosures.*** Early on, in its August 16, 2007 Initial Disclosures, Oracle
 12 described its categories of damages from its preliminary investigation: “Lost profits; Lost or
 13 harmed prior, existing and potential customer relationships; Monies to be restored to Oracle due
 14 to Defendants’ unfair business practices; Lost goodwill and reputation.” House Decl., ¶36 & Ex.
 15 A at 8:13-9:6. Nowhere did Oracle limit these categories to support revenues for lost customers,
 16 as Defendants wrongly assert. Motion at 3; see House Decl., ¶36 & Ex. A at 8:13-9:6. Oracle
 17 noted, reasonably, that damages categories would be further determined through discovery and
 18 that a more detailed analysis would be premature so early in the case. House Decl., ¶36 & Ex. A
 19 at 8:13-9:6.⁹

20 Oracle made good on its promise to provide a more detailed analysis, including
 21 seven pages under Computation of Damages in its timely May 22, 2009 revised disclosures. *See*
 22 House Decl., ¶37 & Ex. B. It explicitly included several categories of harm that Defendants now
 23 seek to preclude:

24 • “Lost, diminished or delayed current and prospective customer revenues and
 25 _____

26 ⁹ Indeed, until Judge Hamilton withdrew the reference to Judge Legge as Special Master in April
 27 2008, detailed damages discovery had expressly been ordered to follow liability discovery.
 28 Order Withdrawing Reference to Special Master and Referring Case to Magistrate Judge for
 Discovery Purposes, Dkt. No. 78 (April 25, 2008); House Decl., ¶2.

1 profits, including as it relates to support and maintenance and software
2 applications licensing;

- 3 • Harmed current and prospective customer relationships, even where they did
4 not result in a loss of a customer support contract or software licensing; . . .
- 5 • The host of other damages attested to by Oracle witnesses, including, e.g.,
6 Juergen Rottler, such as the abandonment of existing PeopleSoft customer
7 contract step up renewal price escalations, the early adoption and generous
8 terms of Oracle's Lifetime Support and Applications Unlimited programs and
9 additional spends on customer support enhancements.”

10 House Decl., Ex. B at pp. 44-45. The disclosures did not end there. Oracle also
11 noted its damages analysis would encompass “the lost profits associated with support customers
12 who left [Oracle] for [Defendants], service-related discounts required to compete against
13 [Defendants], and lost license sales and license discounts associated with competition with
14 [Defendants].” *Id.* at p. 47. Oracle then pointed Defendants to where they specifically could
15 find evidence of these damages in produced materials, including in Defendants’ own reports,
16 both Parties’ customer contracts and related files, both Parties’ customer financial reports,
17 Oracle’s At Risk reports and TN win-back spreadsheets, Oracle’s support renewal cancellations
18 and license win/loss documents, and Oracle’s pricing exceptions for support and licenses
19 requested and approved to compete with TN and Safe Passage. *Id.* at pp. 47-48. And Oracle did
20 not stop *there* – it also explained it would provide additional expert work analysis and
21 accompanying back-up on the purchasing history of its PeopleSoft and JDE customer base post-
22 acquisition.¹⁰ *Id.*

23 **2. Oracle Consistently Stated and Explained Its Kinds of**
24 **Damages in Discovery Responses**

25 Defendants have never had to rely solely on Oracle’s descriptions of its damages
26 in its complaints and initial disclosures, however, because Oracle has also explained them, in
27 detail, in its discovery responses. Oracle provides a sampling here.

28 ***Oracle’s Interrogatory Responses.*** For example, Oracle responded, no fewer

29 ¹⁰ The analysis is expert work product, not pre-existing Oracle documentation. House Decl.,
30 ¶32; ; Meyer Decl. n.12. As much as Defendants might like to have it now, it is not due until
31 November 16, 2009, and they will have until February 26, 2010 before they have to rebut it. *See*
32 Section III.A, above.

1 than three times, to an interrogatory asking how Oracle believed it had been damaged, including
 2 the bases for any belief that Oracle had “lost any customer as a result of any activity in the
 3 Complaint.”¹¹ Because Defendants asked here only about *lost* customers, Oracle specifically
 4 referenced its lost customer documents in each of the three responses to this Interrogatory. *See*
 5 House Decl., Ex. C at 23:12-24:19; 25:14-26:10. But Oracle went further, and in both its initial
 6 and most recent response, also disclosed the very types of other lost profits damages Defendants
 7 now seek to exclude. *Id.*, Ex. C at 22:22-23 (Oracle suffered “loss of profits from sales or
 8 licenses to current and potential customers of Oracle support services and software programs”);
 9 at 24:20-25:13 (incorporating damages testimony by specific Oracle witnesses about the very
 10 damages Defendants now seek to exclude, as well as Oracle’s other relevant interrogatory
 11 responses, above-described initial disclosures, and testimony showing how Defendants’
 12 marketing tactics and reliance on TomorrowNow’s corrupt business model “cause[d] Oracle’s
 13 customers to question the value of Oracle’s service offerings and/or their products’ future,”
 14 which “altered those customers’ perception of the value of Oracle’s service and which delayed
 15 customers’ purchases, spurred them to unreasonable negotiations with Oracle and/or lured
 16 Oracle’s customers to TN and/or SAP.”).

17 As another example, in responding to interrogatories that sought descriptions of
 18 the harm Oracle had suffered from Defendants’ alleged misconduct – which Defendants did not
 19 even serve until February 19, 2009 – Oracle again provided significant detail about the damages
 20 Defendants now seek to exclude. House Decl. ¶39 & Ex. D. In each response, Oracle provided
 21 a long bullet list of harm, including as the *first two items* the exact types of lost profits damages
 22 Defendants now seek to exclude:

- 23 • “Lost, diminished or delayed current and prospective customer revenues and
 24 profits, including as it relates to support and maintenance and software

25
 26 ¹¹ Oracle first responded to that interrogatory on September 14, 2007, then provided a
 27 supplemental response on October 26, 2007 and a second supplemental response on May 22,
 28 2009. House Decl., ¶38 & Ex. C thereto.

1 applications licensing;

- 2 • Harmed current and prospective customer relationships, even though they did not result in a loss of customer support contract or software licensing;. . .”

3 House Ex. D at 14:4-10 (Resp. to Interrog. 25).¹² Notably, Oracle served these responses *before*
4 the deposition testimony of its executives that Defendants now claim prompted some sort of shift
5 in Oracle’s damages theories. Motion at 2:13-17. The reality is that Oracle disclosed its
6 damages categories well before Defendants, two years into the case, finally got around to
7 deposing Oracle’s key executives.

8 **Oracle’s Document Production.** There is more. Defendants have served, and
9 Oracle has responded to, numerous RFPs and targeted search requests¹³ seeking extensive

10 _____
11 ¹² For similar responses, see House Decl. Ex. D at 19:1-7 (Resp. to Interrog. 30); 35:18-24 (Resp.
12 to Interrog. 41); at 45:9-15 (Resp. to Interrog. 45); at 54:24-55:2 (Resp. to Interrog. 49); at
13 64:10-16 (Resp. to Interrog. 53); at 73:20-26 (Resp. to Interrog. 57); at 77:7-13 (Resp. to
14 Interrog. 61); at 88:2-8 (Resp. to Interrog. 65); at 92:21-28 (Resp. to Interrog. 69); at 97:11-17
15 (Resp. to Interrog. 73); at 107:20-25 (Resp. to Interrog. 76); 110:19-25 (Resp. to Interrog. 78);
16 113:26-114:4 (Resp. to Interrog. 81); 118:18-24 (Resp. to Interrog. 85); 123:11-17 (Resp. to
17 Interrog. 89); 128:9-15 (Resp. to Interrog. 93).

18 ¹³ On June 24, 2008, Defendants identified in the Joint Discovery Conference Statement seven
19 targeted searches, including one for “financial information.” Joint Discovery Conference
20 Statement, Dkt No. 102 (June 24, 2008), at 17:25-26. Defendants reiterated this request in an
21 email to Oracle on July 16, 2008, House Decl., ¶40 & Ex. E, then updated and expanded the
22 scope of their seven targeted searches, including describing their financial targeted search as
23 follows:

24 **“Financial information.** This would include several kinds of documents responsive to
25 RFP Nos. 65 through 73, No. 79, and No. 107, including the eight categories of reports,
26 analyses, and central repository type documents listed in Jason McDonell’s June 2 letter
27 to Geoff Howard. It would also include similar types of documents responsive to RFP
28 Nos. 85 (support and development resources for PS and JDE products) and Nos. 111
through 113 (relating to ongoing support revenue).”

House Decl., Ex. E at 1 (emphasis in original). The parties met and conferred extensively about
the scope and number of each side’s financial targeted searches. *See, e.g.*, Joint Discovery
Conference Statement, Dkt No. 178. (October 3, 2008) at 5:14-23 (Oracle’s proposed
compromise noted that “any such agreement would be mutual, such that the financial documents,
which Defendants sought from Oracle in their initial proposed targeted search requests and the
subsequent related meet and confer, shall also count as three targeted searches.”). At that time,
Defendants did not dispute that they had served such targeted search requests. Oracle began and
continued to produce documents in response to Defendants’ financial targeted search, “including
the mutual exchange of customer specific financial reports. . . .” Joint Discovery Conference
Statement, Dkt. No. 219 (November 18, 2008) at 3:4-7. Although the Parties are continuing to
meet and confer on how to count the targeted searches from both sides, that debate does not

(Footnote Continued on Next Page.)

1 financial information. In their Motion, Defendants cite Oracle's formal responses and objections
 2 to certain early RFPs to try to show that Oracle has not produced necessary information to
 3 support all its lost profits damages. But they do not, and cannot, dispute that Oracle has
 4 produced complete customer contractual histories for PeopleSoft and JDE products and, where
 5 possible, summary reports for every customer Defendants deem relevant on their ever-changing
 6 lost customer list.¹⁴ House Decl. ¶¶5-14. Moreover, as set forth below and as Defendants are
 7 well aware, Oracle has produced documents far beyond those described in its initial formal RFP
 8 responses. As Oracle has informed Defendants, and as the law confirms, it is not necessary to
 9 supplement formal responses if, as here, that additional or corrective information has been made
 10 known to the other parties during the discovery process or in writing.¹⁵ Oracle did both, and has
 11 produced and continues to produce the responsive financial information itself.

12 For example, Oracle has and will continue to produce:

- 13 • The summary customer reports that Oracle ran on the list of (now 83)

14 _____
 (Footnote Continued from Previous Page.)

15 change the existence of mutual requests for wide-ranging financial documents and data, nor
 16 Oracle's expansive responsive financial document productions that resulted from these requests
 17 and the related meet and confer. *See* House Decl. ¶¶15-27 (detailing some of the financial
 document productions provided by Oracle).

18 ¹⁴ Though Defendants complain about Oracle's purported delay in nailing down relevant
 19 customer specifics, their list of customers for whom they seek to restrict Oracle's lost profits
 damages has changed multiple times, and substantially, over the course of discovery – including
 as recently as July 15, 2009, the day *after* they filed this motion. House Decl., ¶13.

20 ¹⁵ *See* House Decl., ¶41 & Ex. F, May 22, 2009 letter from Zac Alinder to Elaine Wallace at
 21 pp.1-2 (noting that Fed. R. Civ. Proc. 26(e)(1)(A) only requires supplementation/amendment of
 22 written discovery "if the additional or corrective information has not otherwise been made
 23 known to the other parties during the discovery process or in writing" and explaining that "the
 24 substantial discovery that Oracle has produced in the form of not only written discovery
 25 responses, but also in the numerous depositions that have been taken, the hundreds of thousands
 26 of pages of documents produced, the changed positions taken in the innumerable meet and
 27 confer sessions (and written met and confer letters) conducted during the discovery process, and
 28 in the many motions to compel and discovery hearings through the discovery process have all
 made Defendants sufficiently aware of additional or corrective information regarding many
 discovery responses. . . . In short, the substantial discovery related to the issues identified in
 your letters, including (a) license revenues, (b) non-TN-specific customers, and (c) sales of other
 products has put those issues squarely within the case. No formal supplementation is required
 under the Federal Rules for these responses because they have 'otherwise been made known to
 [you] during the discovery process or in writing.'" Fed. R. Civ. P. 26(e)(1)(A).")

1 customers Defendants claim are relevant. Those reports contain entire
 2 license purchase histories, where available – not just those customers’
 3 licenses of JDE or PeopleSoft applications. House Decl., ¶14; *see also*
 4 Joint Discovery Conference Statement, Dkt. No. 219 (November 18,
 2008) at 3:4-7 (noting inclusion of mutual production of customer-specific
 financial reports as part the Parties’ targeted searches).

- 5 • Evidence on customer up-sell and cross-sell expectations and the bases for
 6 them, including for the customers it was acquiring from PeopleSoft – just
 7 the sort of customers lost to Defendants as a result of their bad acts.
 8 House Decl., ¶27. For instance, Oracle has produced documentation of
 9 how it valued the PeopleSoft acquisition, including operating models,
 10 planning models, margin summaries and value estimations containing just
 11 such expectations and their underlying assumptions. *Id.*
- 12 • Financial reports showing how the purchasing history of the acquired
 13 PeopleSoft customer base compares to that of customers acquired in other
 14 Oracle acquisitions. *Id.*
- 15 • Years and years’ worth of quarterly and other regular financial reports
 16 showing Oracle’s actual revenues for new licenses, software license
 17 updates and product support, advanced product support, on demand,
 18 education, and consulting (*i.e.*, not just JDE or PS support revenues) as
 19 well as detailed board packages, subsidiary performance measure reports,
 20 product revenue reporting packages, executive briefing documents and
 21 budgets with financial results and projections on all products and on both
 22 support and license sales. *See id.* at ¶¶24-27.
- 23 • Pricing lists, pricing policies, and pricing calculators for Oracle and
 24 PeopleSoft – none of which were restricted to only support or just JDE or
 25 PeopleSoft products. *Id.* at ¶27.
- 26 • Product profitability analyses which include revenue trends, development
 27 costs and margin summaries for all Oracle products. *Id.* at ¶¶24, 26-27.
- 28 • And, as Oracle revealed in its Amended and Supplemental Initial
 Disclosures, its experts are undertaking an analysis of the buying histories
 of the PeopleSoft, JDE and Siebel customer base that will be provided
 (along with backup) in their report and will provide additional support for
 Oracle’s lost up-sell and cross-sell profits claims for those customers on
 Defendants’ list of lost customers, as well as materials relating to
 abandonment of contractual support fee uplift rights. *See id.* at ¶32.

On this clear and consistent record of production, there is no basis for Defendants to seek to bar
 Oracle’s right to seek damages for those lost sales.

As for customers not on Defendants’ list of lost customers, Oracle has produced
 customer-specific documents for those it was able to keep by discounting support. A detailed list
 including Bates numbers and dates of production is in Oracle’s accompanying declaration.

House Decl., ¶¶17-22. It shows, among other things, that Oracle produced detailed emails about

1 its TomorrowNow-based service discount requests from the support discount approvals database,
 2 OSSInfo, as far back as July 31, 2008. *Id.*, ¶17. These emails provide both the identity of
 3 customers who received discounts and the amount of the discount. *Id.* In addition to emails
 4 about service based discounts, Oracle has also produced numerous executive approvals, approval
 5 forms, executive summaries, and deal summaries relating to service discounts. *Id.* Defendants
 6 clearly already knew about these discount approvals, because they asked Oracle witnesses about
 7 the process and used specific examples at deposition. *Id.* Moreover, Oracle has kept
 8 Defendants apprised of additional productions. *See* House Decl., ¶¶15-22 & Ex. B.¹⁶ In
 9 addition, and as Defendants acknowledge, Oracle also informed them at their June 25, 2009 meet
 10 and confer that it was in the process of collecting and producing the contracts for those
 11 customers to whom Oracle discounted support in response to TomorrowNow, a number it
 12 estimated at 50. Motion at 19, n.12; *see also* House Decl., ¶18.¹⁷ Oracle has already produced
 13 the contractual back-up for thirty-nine customers that received such discounts; it will continue to
 14 produce, on a rolling basis, the remainder of such customer backup materials, along with any
 15 relevant additional OSSInfo emails, and expects to complete this production by September 30,

16

17

18 ¹⁶ *See, e.g.*, Oracle's May 22, 2009 Letter to Defendants, House Decl., Ex. F at p.3, explaining:
 19 "Finally, Oracle confirms that additional license sales damages materials will be produced in
 20 conjunction with Defendants' May 15, 2009 request for additional custodial productions, *e.g.*,
 21 from Keith Block and Rich Allison. In addition, Oracle will evaluate the completeness of those
 22 productions, and if necessary, search for and produce non-privileged, non-duplicative, license
 23 pricing exception information related to TomorrowNow or Safe Passage that can be located
 following a reasonable and centralized search (*e.g.*, from a source comparable to OSSInfo). In
 conjunction with its damages analysis, Oracle will also produce an analysis of the purchasing
 history of its PeopleSoft and J.D. Edwards customer base post-acquisition, along with any
 supporting evidence."

24 ¹⁷ Defendants assert that the search terms were restricted by customer names and that this has
 25 somehow adversely impacted their production from Oracle. Motion at 2. Not so. Customer-
 26 specific productions and reports have been and, with Defendants' ever-changing list (*see* n.14,
 27 above) and the addition of discounted customers, continue to be one-off, intensive manual
 searches and productions, not the products of search terms. House Decl., ¶18. And it is the
 search term "TomorrowNow" that helped locate the names of those customers that received
 support discounts in Oracle's OSSInfo database. *Id.*

28

1 2009. House Decl., ¶18.¹⁸

2 **Oracle's Witnesses.** Finally, there has been extensive Oracle deposition
 3 testimony on damages, including explicit testimony on the types of damages Defendants seek to
 4 exclude. Again, a more comprehensive list is contained in the accompanying House Declaration.
 5 *Id.* at ¶¶28-29 & Exs. G-J. That Defendants solicited this type of testimony only in the spring
 6 and summer of 2009 was their choice; they cannot use their own strategic decisions regarding the
 7 order of depositions as a basis for barring the damages described in detail in that testimony.
 8 Moreover, Oracle has and continues to produce additional documents that support that testimony.
 9 *Id.* at ¶¶ 30-33.¹⁹

10 **C. Since Being Rejected By Judge Legge, Defendants Have Never**
 11 **Moved to Compel What They Now Seek to Exclude**

12 Oracle's satisfactory production is further confirmed by the fact that, even though
 13 Defendants threatened to move to compel additional financial documents relevant to damages in
 14 nearly every discovery conference statement filed, Oracle has met and conferred with
 15 Defendants each time and satisfied their requests. House Decl. ¶ 2. As a result, Defendants
 16 never did file any of their threatened motions to compel financial documents with this Court.²⁰

17 ¹⁸ Though Defendants profess not to understand this production, it is actually very simple. *See*
 18 House Decl., ¶19.

19 ¹⁹ Oracle and its damages experts dispute that Defendants' damages expert needs all the
 20 categories of documents he asserts in his declaration. *See* Meyer Decl. and Section II above. Of
 21 course, if Defendants truly believe they need something, they can move to compel it. Indeed,
 22 many courts deem that a virtual prerequisite to any subsequent successful Rule 37(c) pre-trial
 23 exclusion request. *Cf. The Christensen Firm v. Chameleon Data Corp.*, 2006 U.S. Dist. LEXIS
 24 79710, *17 (W.D. Wash. 2006) (refusing to dismiss damages claims on summary judgment even
 25 because the supplemental disclosure "was filed before the close of discovery" and defendants
 26 had never moved to compel what they were seeking to preclude) (*quoting Compana, LLC v.*
 27 *Aetna, Inc.*, 2006 U.S. Dist. LEXIS 29028 (W.D. Wash. 2006): "[D]efendant never propounded
 28 any written discovery requests or filed a timely motion to compel. Instead, it now seeks the most
 severe sanction, exclusion of all evidence, without pursuing other methods for obtaining the
 documents.").

²⁰ *Compare* Joint Discovery Conference Statement, Dkt. No. 178 (filed October 3, 2008) at 12:7-
 17 (describing anticipated motion to compel financial and damages related documents) *with* Joint
 Discovery Conference Statement, Dkt. No. 219 (filed November 18, 2008), at 8:21-9:16
 (dropping anticipated motion to compel financial and damages related documents from
 Defendants' list).

1 Indeed, their concurrently-pending motion to compel is the *first and only* motion to compel by
2 Defendants (other than the early motion denied by Judge Legge) that even touches on any of the
3 categories of damages documents their expert claims to need – and Oracle has already produced
4 and/or agreed to produce documents sufficient to make that part of the motion moot. *Id.*
5 Moreover, Defendants themselves told the Court a motion to compel would be forthcoming if
6 they were not satisfied with Oracle’s supplementation. Joint Discovery Conference Statement,
7 Dkt. No. 312 (May 19, 2009) at 15:12-21. It is certainly a leap to seek to exclude claims based
8 on what Defendants have never sought to compel.

9 **IV. CONCLUSION**

10 It is worth stepping back and considering what sanctions Defendants seek by their
11 motion. Issue preclusion, in this case preclusion of most categories of damages sought by
12 Oracle, is draconian relief. It blocks any examination of the facts, any application of the law,
13 and any effort to reach a just result. It hides the merits for alleged reasons that have nothing to
14 do with those merits. The remarkable sanctions sought here cannot occur unless Defendants
15 meet all elements of the “high standard” required by the law on a record that is compelling.
16 There is no basis for such sanctions here. Oracle should be allowed to complete its discovery
17 responses and the issue of damages joined on the merits. Defendants’ Rule 37 motion for
18 damages evidence preclusion must be denied.
