## Executive Summary

### Actions Taken

- Corporate Finance was directed by the Executive Board to contact TomorrowNow, Inc. a third party maintenance provider of PeopleSoft and JDE maintenance and support.
- We met with the CEO, President and CFO of TomorrowNow last week to gain an understanding of the TomorrowNow operations.
- We have held preliminary negotiations with the Company and believe an offer of USD\$10 million would be accepted.

### Conclusions

- Our market research shows that TomorrowNow is the only meaningful North American provider of third party PeopleSoft maintenance services
- A TomorrowNow acquisition brings a short time to market advantage and a public relations win.
- TomorrowNow is a leader in a very small and new field.
- An acquisition by SAP would create a good level of market disruption and may force a reaction by Oracle (including likely legal action).
- It is unclear how support fits into SAP's overall plan to drive Peoplesoft customers to SAP applications, (we have made recommendations on Slide 8 as to how the TomorrowNow skill sets, support model and customer base may fit into a full service SAP maintenance, support and migration organization).

THE BEST-RUN BUSINESSES RUN SAP

# TomorrowNow, Inc. : Company Overview

## Operations

### Support Model

- TomorrowNow offers a limited support policy covering legislative/regulatory updates and "critical issue" fixes to small end user bases in less complex environments
- Support fees are 50% of the PeopleSoft support price (9 to 10% of license fees)
- TomorrowNow's sales model focuses on identifying customers with mature and stable systems, primarily PSFT 7.x customers, with a very limited history with PSFT 8.x customers (a much more complex solution)
- Pitched as "insurance policy" support - provide the basic support to keep existing systems current, low level of interaction, depth of knowledge of customers when engagement occurs (which is not frequent)
- Leading edge customers (i.e. Schwab) are not the type of customer TomorrowNow can service, average deal sizes are \$50,000, (reflecting initial customer license fees of approximately \$1 million)

### Method of Delivery

- Access to Peoplesoft system is based on a DEMO system non-production copy (install with environment characteristics like customer) which works for stable environments (will not work for newer version or recently implemented modules)
- TomorrowNow functions as an independent contractor under the customer license agreement, the liability of providing system access is pushed onto the Peoplesoft customer

THE BEST-RUN BUSINESSES RUN SAP

# SWOT Acquisition Analysis

## Strengths

- Very short time to market for offering and announcing service offering
- "No frills" model makes sense for a segment of customers
- This company has two years of experience building a maintenance and support model
- Targeting stable and mature PSFT releases and limiting the complexity of the service, appears to be a successful model

## Weaknesses

- Customers have been offered 10 year support terms, discouraging upgrade
- Solely focused on U.S./Canada market
- JD Edwards support practice is just starting
- TomorrowNow has limited experience supporting PSFT 8.x customers
- The bulk of TomorrowNow personnel are outside Austin, Texas
- The TomorrowNow model is not unique - a similar model could be replicated by another company

## Opportunities

- Oracle's deal assumptions are challenged by this support model - losing support revenue stream forces actions or reactions and is a distraction
- Oracle's legal challenges to TomorrowNow's ability to provide derivative works/support will require Oracle to also sue its customers - a difficult situation for Oracle
- There is a level of critical mass with expertise delivering a no frill support model, but scaling is heavily reliant of adding new headcount

## Threats

- The access rights to the Peoplesoft software is very likely to be challenged by Oracle and past operating issues may be a serious liability if Oracle challenges (i.e., offsite production copies and the form of delivery of regulatory updates may be subject to Oracle challenge)
- The "no frills"/lower cost model is at odds with SAP's maintenance model - this conflict will create issues among PSFT and SAP customers
- Its unclear if a "no frills" model is appealing to the broad PSFT customer base or the PSFT customer base that are most successfully converted to SAP

# Acquisition Structure, Due Diligence and Indemnities

## Acquisition Structure

SAP America acquires 100% of the stock of TomorrowNow, Inc., for cash, subject to representations and warranties of the stockholders and appropriate indemnities

*SAP will leave the Texas corporation in existence as a liability shield for any potential claims*

## Due Diligence

All offers would be non-binding and subject to complete due diligence, areas of primary concern and focus include:

### Legal

A full and complete assessment of the legality of the service model and the method of delivery by internal and external counsel.

### Financial

A full assessment of the financial results, accounting practices and internal controls, including an financial integration assessment and Sarbanes-Oxley internal control and reporting issues.

### HR

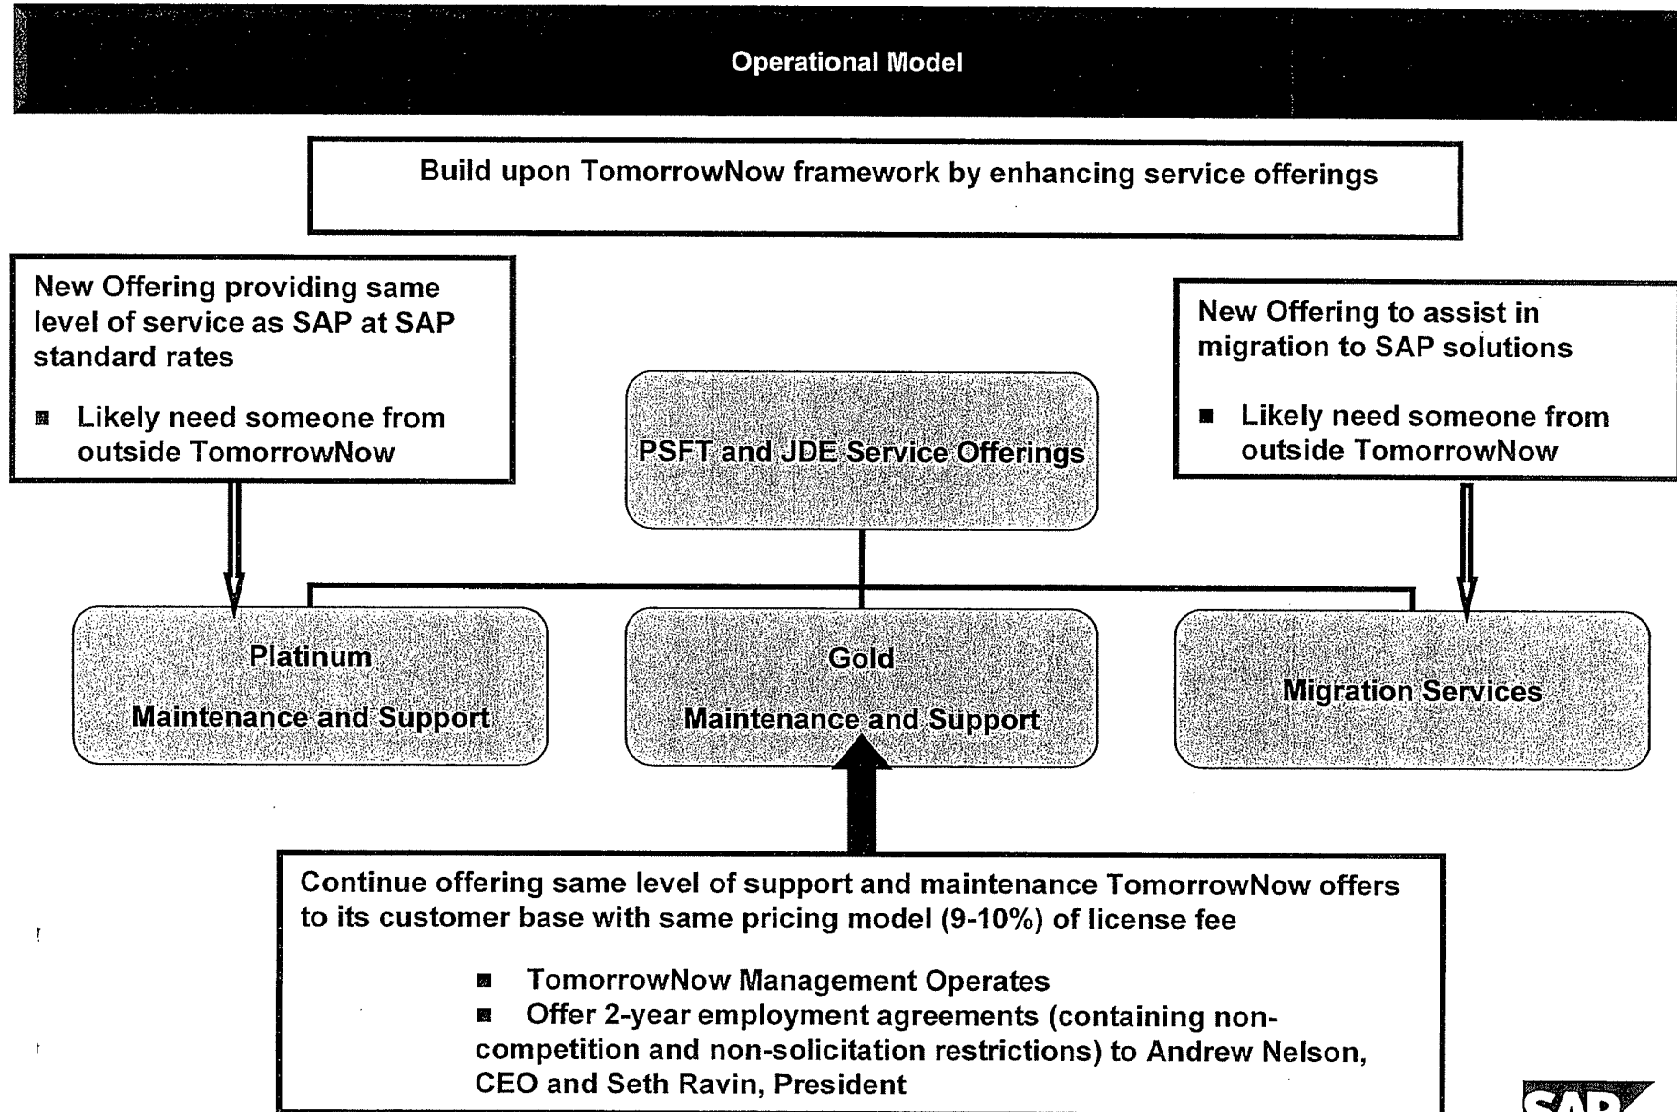

A full assessment of the skills, salaries and benefits offered by the Company.

THE BEST-RUN BUSINESSES RUN SAP

# Potential Operational Structure

THE BEST-RUN BUSINESSES RUN SAP

## Conclusions

- TomorrowNow is a leader in a very new and small field
- TomorrowNow brings a short time to market advantage and a PR win
- The TomorrowNow management team is not sophisticated and we do not recommend they operate a full service PSFT/JDE service organization. In the near term the TomorrowNow model and organization should be utilized to create a 2nd tier level service PSFT/JDE support organization.
- An acquisition by SAP would create a good level of market disruption and force a reaction by Oracle
- Should further consider:
  - ◆ The issues of legal liability, the public relations impact of any litigation, and the likely cost around defending the right to provide PeopleSoft support.

### Authorization Request

- *Extend a Non-Binding Offer, subject to complete due diligence, to acquire TomorrowNow, Inc. for between USD\$10 million*
- *Engage external legal and financial advisors to begin due diligence process*
