Subject: RE: Third Party Risk

I think it is Sales Support Representative - may be the last person engaged?

Subject: Third Party Risk

Attached is the latest third party risk analysis. Highlights are as follows:

- FY07 YTD losses are 2.29% of the contract base compared to 1.62% at this point in FY06
- January losses are currently at \$2.4M (majority of that amount is Merck at \$1.4M)
- Q3 total loss in FY06 was \$5.4M. Q2 FY06 loss to date is \$5.2M. (Merck and Abitibi make up \$2.9M of that loss)
- Enterprise still leads the losses in terms of dollars, although the Q2 losses are very high in JDE products once again due to losses of Merck and Abitibi
- Tomorrow Now continues to be aggressive in the mid market. They are currently offering a "beta" program where a customer does not sign up for support, but has the ability to log a call into their call center and into Oracle. They then encourage the customer to compare the two.
- Losses have been managed very close to FY06 levels. Although we are seeing Tomorrow Now engaged with more customers, the sales teams have been strong in managing attrition and selling the value of apps unlimited and lifetime support.

Let me know if you have questions.

Regards,
Rick
