**Industry:** Chemicals

**Annual Sales (Mil):** \$50.6 Million (USD)

**Total Employees:** 80,945

**Supported Countries:** United States

**Quote (already a pdf):**

"BASF AG as an organization has standardized on SAP. When we acquire companies, we work with them to move to our standard enterprise software platform. This process could have been costly for us, maintaining both environments simultaneously, but with TomorrowNow we were able to lower our migration costs and ensure a smooth transition." –Pieter Schoehuijs, Global IT Director, BASF Catalysts LLC

**Support Summary:**

BASF has a program in place for all its acquired organizations to move to its standard enterprise software application, which is SAP. After a recent acquisition, the company was in the process of migrating the new acquisition's J.D. Edwards and PeopleSoft applications to SAP but did not want to incur the costs of maintaining multiple environments during the process. BASF took advantage of the incentives available through the SAP Safe Passage Program and used TomorrowNow Support Services to continue support and maintenance at much lower costs.

**About the Client:**

BASF is the world's leading chemical company with customers in more than 170 countries, about 150 production sites worldwide and approximately 95,000 employees. Headquartered in Ludwigshafen, Germany, where the company operates the world's largest integrated chemical complex, the BASF Group comprises more than 160 subsidiaries and affiliates. The BASF portfolio comprises: Chemicals, Plastics, Performance Products, Agricultural Products, Fine Chemicals and Crude Oil and Natural Gas.

In 2005, BASF posted sales of Euro 42.7 billion and income before special items of approximately Euro 6.1 billion. We help our customers to be more successful through intelligent system solutions and high-quality products. Through new technologies we can tap into additional market opportunities. We conduct our business in accordance with the principles of sustainable development.
