RE: Urgent steps for transition to TomorrowNow
support services

Hi Wade,

Please, call me Debra as I anticipate a close relationship with the folks at TomorrowNow. We have already entered into a contract agreement with TN. Our Oracle support for the HR, BenAdmin and Payroll applications will end September 29, 2006 so hopefully we have plenty of time to get these tasks completed. First let me give you my access to Customer Connection, you will see that we have very few cases or solutions - actually PS never did give us any solutions. ;-)

dg2006	Password

I would like to plan a conference call next week sometime so we can make sure that all our bases are covered. Also, I have already given Oracle notification of our intent not to renew the support contract and as I expected I have not heard anything from them.

I look forward to working with you and your team.

Debra Garrett

Subject: Urgent steps for transition to TomorrowNow support services

Hello Miss Garrett,

Spencer Phillips informed me that you will be entering a support contract with TomorrowNow, and that your PeopleSoft Maintenance end date is approaching quickly. We are all very excited to start working with your team. Compiled below is the "checklist" of activities to help you prepare for your new TomorrowNow services.

This list should be executed upon prior (if possible) to giving notice to PeopleSoft that you will be changing service providers. These activities are:

- 1) **Provide Customer Connection ID**
- 2) **Place software order**
- 3) **Complete and return the Pre-install Questionnaire.**

1) **PROVIDE CUSTOMER CONNECTION ID:** Your Customer Connection id's will become invalid after you go off maintenance, so you should let your team know to make a point of downloading any documents / information that they use regularly (doc, updates & fixes, white papers, solutions, roadmaps, upgrade scripts, and documentation, etc.). Please send a Customer Connection ID that we may use. We will download all Updates & Fixes for your product release, Platform information, as well as a large portion of the Solutions, and will continue to do so through the end of your PeopleSoft support period. Even after you go off maintenance, we'll be able to make available to you any of these Updates & Fixes, Platform information, and Solutions posted up to your maintenance end date that we are storing on your behalf.

2) **PLACE SOFTWARE ORDER:** We suggest someone on your team call PeopleSoft Customer Care and indicate that you have been requested by your management team and/or audit staff to compile a master archive of all software. Provide a deadline of at least 1 month prior to your transition to TomorrowNow. You need to explicitly tell them you need to place a high-priority (e.g. P1) order for all software available and licensed to State Baker Botts LLP, so Baker Botts LLP may leverage this licensed software and/or all licensed 3rd party applications in the future. As you probably understand, PeopleSoft may groan a little about this more comprehensive software order request. However this is your right and request and it must be honored. It is very important for a smooth transition that you make sure that you have complete and current copies of all the software and appropriate license codes ahead of time to ensure you are covered and have received the full value from your prior PeopleSoft investments.

It may not align with PeopleSoft's business wishes, but it is nevertheless very important to your company and management to have this archive of full new copies of the software. It is critical to us that this be completed before leaving maintenance with PeopleSoft. This is your right and their contractual obligation to you, so stand firm if they complain about the extra work! Note that in PeopleSoft language, you should request this as a "P1" - their highest priority - or they will not make this in time for you to verify you received everything in working order before you go off support. By requesting this immediately and placing it as an urgent request, you can provide us time to review the CDs and confirm they have not missed anything.

Please have your technical staff verify the list below -- a double check is always a good idea. Our primary contact who can help with any detailed questions related to this activity is:

George Lester

Enterprise Technology Support Manager
TomorrowNow, Inc.
george_lester@tomorrownow.com
(704) 895-6965

What to Specifically Request / Order from PeopleSoft:

1. All licensed PeopleSoft and 3rd Party software and documentation to build PeopleSoft HCM 8.8 SP1 for your SQL Server database environment on the latest available PeopleTools release certified to work with this application software
2. All licensed PeopleSoft and 3rd Party software and documentation to build PeopleSoft HCM 8.9 for your SQL Server database environment on the latest available PeopleTools release certified to work with this application software
3. The latest version of PeopleTools 8.4x
4. Your current version(s) of PeopleTools

Feel free to provide them with our address as a new "company" location since we will need to use these CDs to create a demo environment on your behalf here. It's fine if you have them send them to you and then forward them to us, but having them send them directly to us will save you money and all of us a few days of time. Once we have created the environment here, we will ship all the CDs on to you, in the same state in which we received them. We will also include a packing list with detailed info on every CD we received and returned to you. Here is the address to use:

Baker Botts LLP
Attn: Install Team
1716 Briarcrest Drive
Suite 400
Bryan, TX 77802
(979) 595-1306

3) COMPLETE AND RETURN PRE-INSTALL QUESTIONNAIRE: To maximize the benefit of our bundle testing and issue replication we want to setup your TomorrowNow support environment to match your current production architecture. We also install the environment on your OS/database platform and release levels to help identify and correct any platform specific issues that may arise. Please complete the brief Financials pre-install questionnaire for each product, and return it to George Lester.

Please let me know if you have any questions. We look forward to serving you.

Best wishes,

Wade Walden
