Having read documents 478 and 480, it appears to the Court that this dispute is not capable of informal resolution. **IT IS THEREFORE ORDERED** that plaintiffs have leave to file a motion to compel production of the disputed documents. Plaintiffs' motion should address such issues as who holds the privilege with respect to these documents and whether the director defendants are in a position to waive any corporate privilege. In their opposition, the director defendants should address why the bar proposed in paragraph one of plaintiffs' letter is not a satisfactory resolution.
