 LITIGATION

CASE NO. CV-10-1811-RS

**[PROPOSED] STIPULATED ORDER  
 REGARDING DOCUMENT  
 PRODUCTION PROTOCOL**

19  
 20  
 21  
 22  
 23  
 24  
 25  
 26  
 27  
 28

1           1.       **Applicability.** This document production protocol shall apply prospectively to the  
2 production of documents existing in hard-copy form or in electronic form in this action by  
3 Plaintiffs or defendant Sony Computer Entertainment America LLC (“SCEA”) This Order shall  
4 apply to this matter and to all related actions that will be originally filed in, transferred to, or  
5 removed to this Court and consolidated with this matter.

6           2.       **General Format of Production.** All documents that originally existed in either  
7 hard-copy or native electronic form that are produced in these proceedings shall be produced in  
8 electronic image form in the manner provided herein, and shall carry Bates stamp numbers and,  
9 where appropriate, confidentiality designations, in a manner that does not obscure any writing or  
10 image on the original document. Each document’s electronic image shall convey the same  
11 information and image as the original document. Documents that present imaging or formatting  
12 problems shall be promptly identified and the parties shall meet and confer to attempt to resolve  
13 the problems. Notwithstanding the foregoing, by mutual agreement in a writing signed by the  
14 parties, the parties may agree to modify the production format without approval by the Court.

15           3.       **Production Media.** The parties shall produce documents on CD-ROM, DVD,  
16 external hard drive (with standard PC compatible interface), or such other readily accessible  
17 computer or electronic media as the parties may hereafter agree upon (the “Production Media”).  
18 Each piece of Production Media shall identify a production number corresponding to the  
19 production “wave” the documents on the Production Media are associated with (e.g., “SCEA001”;  
20 “SCEA002”), as well as the volume of the material in that production wave (e.g., “-001”; “-002”).  
21 For example, if the first production wave by either party comprises document images on three  
22 hard drives, that party shall label each hard drive in the following manner: “SCEA001-001”;  
23 “SCEA001-002”; “SCEA001-003.” Additional information that shall be identified on the  
24 physical Production Media shall include: (1) text referencing that it was produced in this matter,  
25 (2) the production date, and (3) the Bates Number range(s) of the materials contained on the  
26 Production Media.

27           4.       **Cooperation.** The parties shall meet and confer and cooperate to facilitate the  
28 import and use of the produced materials with commercially available document management or

1 litigation support software. All requests to meet and confer pursuant to this order shall conclude  
2 within fourteen days of the requesting party's initial request.

3           5.     **Production Format Of Electronically Stored Information.** Except as set forth  
4 herein or by subsequent agreement or order, all electronically stored documents shall be produced  
5 in Tagged Image File format ("TIFF"), single page, Group IV TIFF, black and white at 300 x 300  
6 dpi resolution. If a color image is produced in black and white, the receiving party may request  
7 the producing party to produce the original, color image. After receiving such a request for color  
8 production, the parties will meet and confer on a reasonable and cost-effective means of  
9 providing the requested documents. The production format shall conform to the following  
10 requirements:

11           a.     The image file names shall match the Bates number assigned to the image  
12 (for example: SCEA0000001.TIF).

13           b.     Documents shall carry Bates numbers and confidentiality designations as  
14 set forth in Paragraph 2, above.

15           c.     Load files: The parties shall produce documents, data and information  
16 either on hard drives, DVDs or CDs, depending on the size of the production, in the following  
17 folders:

18           i.     Images folder - Single-page TIFF - Group IV Black & White

19           ii.    OPT folder - Pathing to the single-page TIFFs

20           iii.   DAT folder

21           -     Metadata fields set forth below

22           -     Relative pathing to OCR

23           -     Relative pathing to natives (if producing any natives)

24           iv.    OCR folder

25           -     Extracted text/OCR - document level text files – ANSI format

26           -     Relative pathing to text files in DAT (example: \OCR\001\INV00001.txt)

27           -     The extracted text/OCR shall be Unicode compliant in foreign language  
28 documents.

          d.     The metadata fields to be provided in the DAT folder shall be as follows:

          • BEGBates

          • CC

          • MODIFIEDDATE

1 Section 6 below. The parties shall meet and confer to the extent the production of documents in  
2 TIFF eliminates the production of relevant information or affects whether the document is in  
3 usable form, and any nonprivileged relevant information will be thereafter produced in a mutually  
4 agreeable and usable form per the parties' meet and confer agreements. The burden of  
5 demonstrating that it is burdensome to produce a document in native format is on the producing  
6 party.

7 **6. Production Format Of Hard Copy Documents.**

8 a. All hard copy documents shall be produced as single-page "TIFFs," shall  
9 be scanned at industry standard resolution and shall reflect, without visual degradation, the full  
10 and complete information contained on the original document.

11 b. All TIFF images shall be produced with associated OCR text and  
12 DAT and OPT load files. The DAT load file shall contain the Objective Coding Fields referenced  
13 below. The OPT load file will contain pathing to the Single Page TIFF images.

14 c. Each page image file shall be named with the unique Bates Number of  
15 the page of the document in the case of single-page TIFFs, followed by the extension ".TIF." In  
16 the event the Bates Number contains a symbol and/or character that cannot be included in a file  
17 name, the symbol and/or character will be omitted from the file name.

18 d. In scanning paper documents, distinct documents shall not be merged into  
19 a single record, and single documents shall not be split into multiple records (i.e., paper  
20 documents should be logically unitized).

21 e. Parent-child relationships (the association between an attachment and its  
22 parent document) shall be preserved.

23 f. At least the following objective coding fields should be provided for  
24 all hard copy documents:

- 25 i. Beginning Bates Number
- 26 ii. Ending Bates Number
- 27 iii. Beginning Attachment Number
- 28 iv. Ending Attachment Number
