15 UNITED STATES DISTRICT COURT
 16 NORTHERN DISTRICT OF CALIFORNIA
 17 SAN FRANCISCO DIVISION

18 ORACLE AMERICA, INC.,
 19 Plaintiff,
 20 v.
 21 GOOGLE INC.,
 22 Defendant.

Case No. 3:10-cv-03561 WHA
**GOOGLE'S STATEMENT REGARDING
 TRIAL EXHIBIT 610.1**
 Dept.: Courtroom 8, 19th Floor
 Judge: Hon. William Alsup

1 **I. The trial record contains no evidence about the meaning of the term “Specification”**
2 **in TX 610.1, other than the implied definition in its title.**

3 The Court has asked about the term “Specification,” and specifically about whether the
4 term “Specification,” as used in TX 610.1, is defined. *See* RT 2672:3-12. Other than the implied
5 definition at the top of the document, which suggests that the term “Specification” means either
6 “Specification: JAVA 2 PLATFORM STANDARD EDITION DEVELOPMENT KIT 5.0
7 Specification” or perhaps “JAVA 2 PLATFORM STANDARD EDITION DEVELOPMENT KIT
8 5.0 Specification,” there is no definition of the term “Specification” in the document itself.

9 The title indicates that the “Specification” that is referred to throughout TX 610.1 is the
10 specification for the *J2SE Development Kit*—which would include not only API packages but
11 also a virtual machine, a compiler and the other elements of the development environment,
12 including a runtime. This definition would be consistent with and would help explain the
13 inclusion in the agreement of not only a copyright license but also a patent license (*see* TX 610.1
14 (second paragraph) (referring to “any applicable copyrights or patent rights”)).

15 The trial testimony about this document does not suggest a better or different definition.
16 Mr. Kurian identified this exhibit as a “specification license” for the “Java 2 Platform Standard
17 Edition *Development Kit* 5.0 specification.” RT 370:10-17 (emphasis added). He testified to his
18 understanding of the rights granted to and obligations accepted by licensees, but did not define
19 the “specification” to which the rights and obligations pertain. *See* RT 371:7-381:25. Mr.
20 McNealy also testified about TX 610.1, claiming that it “looks like” a license to “use the Java 2
21 Standard Edition *development* specification.” RT 2052:6-22 (emphasis added). He testified
22 about his understanding of what a “specification” is, but did not further explain what particular
23 specification is being referenced in the exhibit. *See* RT 2052:23-2053:16. In fact, Mr. McNealy
24 testified that he was “not quite sure specifically” to what TX 610.1 pertained. *See* RT 2053:17-
25 2054:10. He then testified only to his general understanding of specification licenses at Sun, and
26 not about TX 610.1 in particular. RT 2054:21-2056:13. There is no other testimony in the record
27 about TX 610.1.
28

1 **II. The evidence in the trial record about TX 610.2 suggests that the term**
2 **“Specification” in TX 610.1 refers to the specification for the entire development kit,**
3 **not just the APIs.**

4 Dr. Reinhold testified that TX 610.2 is “a DVD containing an electronic copy of the Java
5 5—the JDK documentation.” RT 672:16-18. He further testified that the DVD “includes the API
6 specification for Java 5,” RT 682:18-19, but did not testify that the DVD is *limited* to the API
7 specification. Mr. Lee, Professor Mitchell, Mr. Bornstein and Professor Astrachan were also
8 questioned about TX 610.2 RT 1168:21-1176:3 (Lee); RT 1247:1-1253:25, 2279:13-2280:6
9 (Mitchell); RT 1836:15-1839:8 (Bornstein); RT 2217:19-2221:10 (Astrachan). None of these
10 witnesses were asked any questions about any license pertaining to the material in TX 610.2.

11 Trial Exhibit 610.2 contains over 200 megabytes of data, including information and
12 documentation about the Java language, the Java virtual machine, development tools such as the
13 Java Virtual Machine Tool Interface, the Java Platform Debugger Architecture, the Java compiler
14 and the Javadoc Tool. *See* TX 610.2. In short, as suggested above, the term “Specification” as
15 used in TX 610.1 appears to refer to documentation for far more than just the 166 J2SE API
16 packages. Finally, the more than 200 megabytes of data in TX 610.2 includes a file named
17 “/docs/relnotes/license.html,” which appears to be the same as TX 610.1. However, there is no
18 testimony in the record about this electronic file, and thus no evidence that the license pertains to
19 anything other than the entirety of the materials that comprise TX 610.2.

20 **III. There is no evidence that anyone at Google ever saw the Sun “specification license.”**

21 As noted above, only two witnesses—Messrs. Kurian and McNealy—were questioned
22 about TX 610.1. Neither of them is or was a Google employee. Two former Google employees,
23 Messrs. Lee and Bornstein, were questioned about TX 610.2, but neither was asked whether he
24 had ever seen the license file that is part of that exhibit. Two Google witnesses were asked about
25 specification licenses generally: Mr. Bloch testified that he didn’t “know what a specification
26 license is,” and Dr. Schmidt was also unfamiliar with the term. RT 829:1 (Bloch); RT 1558:25-
27 1559:4 (Schmidt) (“Q. Do you know whether or not—you know that one of the kinds of licenses
28 that Sun offered was a specification license; did you know that? A. Again, I’m not familiar with
the specific Sun licenses that were available.”). In short, there is *no evidence* that anyone at

Google ever saw TX 610.1.¹

Dated: May 2, 2012

KEKER & VAN NEST LLP

GOOGLE INC.

¹ Mr. Cizek did identify a “Sun Community Source License” entered into between Sun and Danger. *See* RT 1061:3-8. The document was signed on behalf of Danger by Henry Nothhart. *See* TX 1026 at 15. There was no testimony that any Danger employee who later became a Google employee ever saw this document. The document is very different from TX 610.1. *Compare* TX 1026 with TX 610.1. Finally, although TX 1026 does include the term “Specifications,” that term is defined to mean “specifications for the Technology and other documentation, as designated on the Technology Download Site” TX 1026 at 18. Technology, in turn, is defined to mean “Java 2 Micro Edition” (i.e., not the Java 2 Standard Edition that is referenced in TX 610.1). *See id.* at 18, 19. Thus, even assuming former Danger employees who now are at Google ever saw TX 1026—and there is no evidence to support such an assumption—that has no bearing on the meaning or possible relevance of TX 610.1.
