16 **UNITED STATES DISTRICT COURT**  
 17 **NORTHERN DISTRICT OF CALIFORNIA**  
 18 **SAN FRANCISCO DIVISION**

19 ORACLE AMERICA, INC.  
 20 Plaintiff,  
 21 v.  
 22 GOOGLE INC.  
 23 Defendant.

Case No. 3:10-cv-03561-WHA  
 Honorable Judge William Alsup  
**GOOGLE’S MEMORANDUM IN  
 OPPOSITION TO ORACLE’S MOTION  
 TO DEFER PHASE THREE**

1  
2 Until yesterday, Oracle had been unyieldingly persistent in urging that its copyright  
3 claims, based on its registrations for the entire Java platform, were in fact thirteen separate  
4 copyright claims, each based on a separate “work as a whole.”<sup>1</sup> Oracle was successful in its  
5 arguments and got what it wanted. As Oracle requested, the Court submitted Oracle’s multiple  
6 infringement claims to the jury based on Oracle’s having taken scissors to its work and having  
7 isolated the smaller units that would maximize its chances of proving its claims. Each of the  
8 claims was based on a different, specifically-defined “work as a whole” – thirteen of them in all.

9 Now, in another about-face, Oracle argues that its copyright claim has collapsed back  
10 into “a single claim,” pleaded in “a single count” of its Amended Complaint. Dkt. 1126 at 1, 3.  
11 To avoid trying to prove damages based on the limited infringement results to date and unwilling  
12 to accept that statutory damages are its sole available remedy for those results, Oracle engages in  
13 double-speak. In its five-page motion, Oracle first argues that the infringements based on nine  
14 lines of code and eight test files that have never appeared on handsets relate to “distinct elements  
15 of the Java platform.” Dkt. 1126 at 2. On the next page, however, Oracle asserts that the  
16 damages as to those elements “are not separate” from any damages that may later be awarded in  
17 the event Oracle prevails in the future on the as yet unresolved SSO infringement claim. Dkt.  
18 1126 at 3.

19 Oracle cannot have it both ways. The issues relating to the nine files – the nine “works”  
20 that form the basis of the infringement findings favorable to Oracle – cannot at the same time be  
21 both “distinct” and “not separate” from the SSO issues.<sup>2</sup> Oracle argues that the jury “found  
22 infringement” on rangeCheck (from a single J2SE file, Arrays.java) but did not find infringement  
23

---

24 <sup>1</sup> See, e.g., Oracle’s March 9 Copyright Brief (Dkt. 780) at 1 (“The copyrighted works at  
25 issue are (a) 37 Java API design specifications and implementations and (b) 11 Java software  
26 code files.”), 3 (identifying eleven individual code files), 13-14 (arguing that individual code  
27 files were relevant “works as a whole”).

28 <sup>2</sup> “Distinct” means “distinguishable to the eye or the mind as discrete; *separate*.” See  
Merriam-Webster Online Dictionary, at [www.merriam-webster.com](http://www.merriam-webster.com) (emphasis added). See also  
Dictionary.com, at [dictionary.reference.com](http://dictionary.reference.com) (“distinct” means “distinguished as being not the  
same; not identical; separate.”).

1 on the test files (or the documentation) or resolve all issues relating to the SSO – all of which  
2 were submitted to the jury in phase one as separate issues relating to “distinct elements of the  
3 Java platform.” Dkt. 1126 at 2-3; *see also* Dkt. 1089 at 2 (jury verdict deciding issues of  
4 “infringement” as to documentation and allegedly copied code and comments). In view of the  
5 Court’s order granting Oracle JMOL on the test files (Dkt. 1123), the liability issues as to both  
6 rangeCheck and the test files have been resolved. Those claims are ripe for a damages  
7 determination.<sup>3</sup>

8 Having made its bed, Oracle must now lie in it. Oracle’s claims based on the nine files  
9 can only be treated for damages purposes as separate from the other claims that were submitted  
10 to the jury. Those other claims – both (a) the ones that Oracle has lost on (the claims relating to  
11 the documentation that was the subject of Question 2 of the verdict and the files with “copied”  
12 comments that were the subject of Question 3.C), and (b) the one that remains to be decided (the  
13 SSO claim that was the subject of Question 1) – were, at Oracle’s request, based on other  
14 “works.”<sup>4</sup> As a result, the claims that have been decided and the one that remains unresolved  
15 are not based on the same “set of facts.” *Compare Liberty Mut. Ins. Co. v. Wetzel*, 424 U.S. 737,  
16 743 (1976) (finding interlocutory order on liability not final or appealable under 28 U.S.C.  
17 § 1291 when claim “advanced a single legal theory which was applied to only one set of facts”  
18 and relief had not been decided).

19 Nor does citation to case law under Rule 42 regarding bifurcation help Oracle. The Ninth  
20 Circuit has often confirmed that Rule 42(b) “confers broad discretion upon the district court.”  
21 *Hangartner v. Provident Life and Accident Ins. Co.*, 373 F.3d 998, 1021 (9th Cir. 2004) (quoting  
22

---

23 <sup>3</sup> The rangeCheck and test file claims are therefore unlike the SSO claim, as to which  
24 findings disposing of both Oracle’s claim and Google’s intertwined fair use defense have not  
25 been made and as to which a new trial is therefore needed on both issues. *See* Google Motion  
For New Trial, Dkt. 1105.

26 <sup>4</sup> With the exception of the nine lines of rangeCheck code, there is no overlap between the  
27 “works” that form the basis of the infringement findings favorable to Oracle and the “work” that  
28 is the subject of the unresolved SSO claim. Although rangeCheck is a nine-line private method  
in code that implements an element of an accused API package, the unresolved SSO claim is  
based on elements of the packages other than the implementing code.

1 *Zivkovic v. S. Cal. Edison Co.*, 302 F.3d 1080 (9th Cir. 2002)). The Court has exercised this  
2 discretion in this case by ordering the three-phase trial. The most prudent course is to remain  
3 consistent with that decision and permit the current jury to complete as much work as possible in  
4 resolving all damages issues that are ripe for decision and can properly be decided now. Those  
5 issues include all damages issues relating to rangeCheck and the test files, and any patent  
6 damage issues that may be appropriate once the jury has reached its phase two verdict. The  
7 current jury is familiar with rangeCheck and the test files, and it would complicate unnecessarily  
8 the work of any future jury that needs to be empanelled to decide the SSO claim if that jury had  
9 to also decide the separate damages issues relating to rangeCheck and the test files. Judicial  
10 economy and principles of sound trial management counsel strongly in favor of not disturbing  
11 the current trial plan.<sup>5</sup>

12 In support of its motion, Oracle repeats the same flawed argument it has made in support  
13 of its un-election of statutory damages and its quixotic pursuit of an award of profits for the  
14 rangeCheck method and the eight test files. Oracle argues that if phase three is not deferred, two  
15 different juries will need to “determine the amount of Google’s Android revenues.” Dkt. 1126 at  
16 1; *see also id.* at 4 (“juries would have to start with the amount of Android revenues”; each trial  
17 would require proof of “Google’s Android revenues”).

18 For the reasons set forth in Google’s motion for summary judgment on copyright  
19 damages, filed on May 12, 2012 (Dkt. 1125), Oracle cannot begin any quest for profits based on  
20 rangeCheck and the test files with “Google’s Android revenues”; Oracle cannot prove any causal  
21 connection between the infringements that have been found and any revenue whatsoever; and  
22 Oracle has never disclosed any such damages theory. The theory is therefore not only legally  
23 baseless, it comes too late – as a last-ditch afterthought at best. It certainly cannot form the basis  
24

---

25 <sup>5</sup> Proceeding with phase three as to rangeCheck and the test files is also appropriate in  
26 view of the possibility that the SSO claim may never be retried, either as a result of a ruling by  
27 the Court on the copyrightability issues and/or an appeal of such a ruling that makes a retrial  
28 unnecessary. Empanelling a second jury at some time in the future to decide only damages as to  
rangeCheck and the test files would be contrary to judicial economy – to say the least. *See*  
Fed.R.Civ.P 42(b) (separate trials proper for “convenience” and “to expedite and economize”).

1 for deferring decision by the jury or the Court on the damages, if any, to which Oracle is entitled  
2 as a result of the limited infringements it has proven to date. And under the scenario posed by  
3 Oracle, the different juries would in fact be determining *different* issues, namely the current jury  
4 would need to determine the amount of profits (if any) attributable to the use of rangeCheck and  
5 the test files, while the second future jury would need to determine the amount of profits (if any)  
6 attributable to use of the SSO of the API packages.

7 Finally, Oracle argues that it would be prejudicial to have the jury that found no liability  
8 on the test files now be told to consider damages as to those files. Dkt. 1126 at 5-6. This  
9 concern can easily be addressed through the Court’s instructions to the jury on statutory  
10 damages. “Juries are presumed to follow the court’s instructions.” *Aguilar v. Alexander*, 125  
11 F.3d 815, 820 (9th Cir. 1997) (citing *Richardson v. Marsh*, 481 U.S. 200, 211, 107 S. Ct. 1702,  
12 95 L. Ed. 2d 176 (1987)); *see also Jules Jordan Video, Inc. v. 144942 Canada Inc.*, 617 F.3d  
13 1146 (9th Cir. 2010) (“There is a strong presumption that juries follow curative instructions. *See*  
14 *Doe ex. rel. Rudy-Glanzer v. Glanzer*, 232 F.3d 1258, 1270 (9th Cir. 2000).”).

15 But if Oracle finds that still too risky, it could join Google in waiving the right to have the  
16 jury decide the damages for the eight test files and rangeCheck and agree to have these issues  
17 tried to the Court.

18 For all of the foregoing reasons, Oracle’s motion to defer phase three should be denied.
