14 Attorneys for Defendant
 15 GOOGLE INC.

16 **UNITED STATES DISTRICT COURT**
 17 **NORTHERN DISTRICT OF CALIFORNIA**
 18 **SAN FRANCISCO DIVISION**

19 ORACLE AMERICA, INC.
 20 Plaintiff,
 21 v.
 22 GOOGLE INC.
 23 Defendant.

Case No. 3:10-cv-03561-WHA
 Honorable Judge William Alsup
**DEFENDANT GOOGLE INC.’S
 RESPONSES TO PLAINTIFF’S
 INTERROGATORIES, SET FOUR**

1 Pursuant to Rule 33 of the Federal Rules of Civil Procedure, Defendant Google Inc.
2 (“Google”), through its attorneys, responds to *Plaintiff’s Interrogatories to Defendant Google*
3 *Inc., Set Four* (“Plaintiff’s Fourth Interrogatories”), served by plaintiff Oracle America, Inc.
4 (“Plaintiff” or “Oracle”) on June 29, 2011, as follows.

5 **GENERAL OBJECTIONS**

6 1. Google responds generally that its investigations of the facts relevant to this
7 litigation are ongoing. Google’s responses herein are given without prejudice to Google’s right
8 to amend or supplement in accordance with Rule 26(e) of the Federal Rules of Civil Procedure,
9 the Civil Local Rules, the Court’s Supplemental Order to Order Setting Initial Case Management
10 Conference, any applicable Standing Orders, and the Case Management Order entered by the
11 Court.

12 2. Google generally objects to Plaintiff’s Fourth Interrogatories, and the “Definitions
13 and Instructions” related thereto, to the extent they are inconsistent with or impose obligations
14 beyond those required by the Federal Rules of Civil Procedure, the Civil Local Rules, the Patent
15 Local Rules, the Court’s Supplemental Order to Order Setting Initial Case Management
16 Conference, any applicable Standing Orders, and the Case Management Order entered by the
17 Court. In responding to each Interrogatory, Google will respond as required under Rule 33 of the
18 Federal Rules of Civil Procedure.

19 3. Google generally objects to Oracle’s definition of “Java Platform” on the grounds
20 that the definition is overbroad and misleading to the extent it purports to include “the Java
21 programming language,” as to which Oracle does not own proprietary rights. When used in
22 Google’s responses, the phrase “Java Platform” shall not include “the Java programming
23 language” and, without acknowledging or agreeing that Oracle owns any proprietary rights in
24 any elements thereof, shall have the meaning ascribed to that phrase in paragraph 9 of Oracle’s
25 Amended Complaint, namely “a bundle of related programs, specifications, reference
26 implementations, and developer tools and resources that allow a user to deploy applications
27 written in the Java programming language on servers, desktops, mobile devices, and other
28 devices,” including but not limited to the Java compiler, the Java Virtual Machine, the Java

1 Development Kit, the Java Runtime Environment, the Just-In-Time compiler, Java class
2 libraries, Java application programming interfaces, and Java specifications and reference
3 implementations.

4 4. Google generally objects to Oracle’s definition of “Android” as vague,
5 ambiguous, overly broad, unduly burdensome, and not reasonably calculated to lead to the
6 discovery of admissible evidence to the extent it includes “related public or proprietary source
7 code, executable code, and documentation.”

8 5. Google generally objects to Plaintiff’s Fourth Interrogatories to the extent (a) they
9 are not reasonably calculated to lead to the discovery of admissible evidence that is relevant to
10 any claim or defense of any party; (b) they are unreasonably cumulative or duplicative; (c) they
11 seek information that is obtainable from some other source that is more convenient, less
12 burdensome, or less expensive; or (d) the burden or expense of the proposed discovery
13 outweighs any likely benefit.

14 6. Google generally objects to Plaintiff’s Fourth Interrogatories to the extent they
15 seek information, documents, and/or things protected from discovery by the attorney-client
16 privilege, the work product doctrine, the common-interest privilege, and/or any other applicable
17 privilege, immunity, or protection. Nothing contained in Google’s responses is intended to be, or
18 in any way shall be deemed, a waiver of any such applicable privilege or doctrine.

19 7. Google generally objects to Plaintiff’s Fourth Interrogatories to the extent they
20 request information, documents, and/or things not within the possession, custody, or control of
21 Google, that are as readily available to Plaintiff as to Google, or that are otherwise in the
22 possession of Plaintiff, on the grounds that such requests are unduly burdensome.

23 8. Google generally objects to Plaintiff’s Fourth Interrogatories on the grounds that
24 they seek confidential, proprietary records or that they invade the privacy of individuals who are
25 not parties to this litigation.

26 9. Google objects that Oracle has already exhausted its exceeded its allowable
27 number of Interrogatories because it propounded Interrogatories No. 3 through 16, which Google
28 treated as containing two distinct sub-parts. Oracle stated in writing that it was seeking a total of

1 42 distinct interrogatories with those numbered 3 through 16, seeking “Google’s factual and
2 legal bases for its defense known to it as of October 4, 2010, November 10, 2010, and now.”
3 (January 12, 2011 Letter, Jacobs to Weingaertner.) Notwithstanding the foregoing and the fact
4 that reading each interrogatory as two separate interrogatories exceeds the limits of Rule 33,
5 Google responded with respect to when it filed its operative pleading in the case, namely *Google*
6 *Inc.’s Answer to Plaintiff’s Amended Complaint for Patent and Copyright Infringement and*
7 *Amended Counterclaims* on November 10, 2010 (Doc. #51) (“Answer and Counterclaims”), as
8 well as its bases for its defenses generally, subject to Google’s general objection that discovery
9 has just begun, and Google is still developing its defenses. In view of the Court’s admonition
10 that “no enlargements of the limitations on discovery in the Federal Rules of Civil Procedure will
11 be allowed until after counsel have demonstrated that they will behave reasonably in the
12 discovery already authorized,” Google objects to what Oracle has labeled as Interrogatory Nos.
13 20-25 as being improperly served without seeking permission from the Court to enlarge the
14 scope of discovery. Google expressly reserves its right to move for a protective order on
15 Interrogatory Nos. 20-25 and any response herein is not a waiver of that right.

16 10. Google incorporates by reference these General Objections into the specific
17 objections and responses set forth below. While Google may repeat a General Objection for
18 emphasis or some other reason, the failure to specifically refer to any General Objection does not
19 constitute a waiver of any sort. Moreover, subject to the requirements of Rule 33 of the Federal
20 Rules, Google reserves the right to alter or amend its objections and responses set forth herein as
21 additional facts are ascertained and analyzed.

22 11. Google has conducted a reasonable inquiry sufficient to comply with any
23 obligations with respect to these Interrogatories and makes no representation that these responses
24 include an exhaustive list of all facts responsive and relevant to these Interrogatories.

25 12. Google remains willing to meet and confer with respect to any of its objections to
26 assist Plaintiff in clarifying or narrowing the scope of the requested discovery, and reserves the
27 right to move for a protective order if agreement cannot be reached.

28

1 part due to industry demand for an NDK by application developers), which allows developers to
2 write code for Android applications in a programming language other than Java that can be
3 compiled to machine code and natively executed by Android-based devices.

4 With respect to the copyrights-in-suit, the allegedly copied elements are not
5 copyrightable, and thus Google's implementation is a non-infringing alternative. Moreover, to
6 the extent that the accused Android API packages incorporate or were derived from Apache
7 Harmony API libraries, Google's use of those libraries is licensed under the Apache 2.0 open
8 source license, and is thus a non-infringing alternative. Likewise, to the extent that the accused
9 Android API packages incorporate or were derived from other third party API libraries, Google's
10 use of those libraries is licensed under open source licenses, and is thus a non-infringing
11 alternative. Google also independently developed its own Android API packages, and thus those
12 are a non-infringing alternative. (*See, e.g.*, Rough Transcript of the July 22, 2011 Deposition of
13 Dan Bornstein at 171-178.)

14 Google further states that to the extent this Interrogatory seeks information that is more
15 properly the subject matter of expert testimony, it will be addressed in Google's non-
16 infringement expert reports.

17 Pursuant to Fed. R. Civ. P. 33(d), Google incorporates by reference the documents and
18 deposition testimony cited in this Interrogatory response.

19 **INTERROGATORY NO. 21:**

20 Identify and describe in detail each modification made by third parties to the allegedly-
21 infringing portions of Android source code and documentation identified by Oracle's copyright
22 and patent infringement contentions, including the author of, date of, and basis for each such
23 modification.

24 **RESPONSE TO INTERROGATORY NO. 21:**

25 In addition to its General Objections, Google objects to this Interrogatory as vague and
26 ambiguous by reason of its use of the phrases "third parties," "allegedly-infringing portions,
27 "documentation," "identified by Oracle's copyright and patent infringement contentions," "basis
28 for each such modification," and as to the term "Android" as defined by Plaintiff. Google also

1 objects to this Interrogatory to the extent that it seeks information protected by the attorney-client
2 privilege, the work-product doctrine, the common-interest privilege, and/or any other applicable
3 privilege, immunity, or protection. Google also objects to this Interrogatory on the grounds that
4 it seeks a legal conclusion or an expert opinion. Google further objects to this Interrogatory to
5 the extent that it seeks information that is the confidential information of, or proprietary to, or the
6 trade secret of, a third party and to the extent that it seeks information based on the subjective
7 beliefs or opinions of third parties. Google further objects to this Interrogatory as overly broad
8 and unduly burdensome to the extent that it is not reasonably calculated to lead to the discovery
9 of admissible information. Google also objects to this Interrogatory to the extent that it seeks
10 information not within Google's possession, custody or control, to the extent that it is not limited
11 to Google, and to the extent that it seeks information not kept in the ordinary course of Google's
12 business.

13 Subject to the foregoing objections and the General Objections, without waiver or
14 limitation thereof, Google states that it has no direct, specific knowledge with regard to how
15 third parties modify the accused Android source code and documentation. Google releases
16 Android source code to the public under the open source Apache License, Version 2.0. Any
17 third party may freely modify Android source code subject to the terms of this license.

18 **INTERROGATORY NO. 22:**

19 Describe in detail the steps that Google and Android device manufacturers perform to
20 retrieve, port, load, install, test, and/or execute Android on Android devices, including without
21 limitation the person or entity that performs each step and the physical location where each step
22 is performed.

23 **RESPONSE TO INTERROGATORY NO. 22:**

24 In addition to its General Objections, Google objects to this Interrogatory as vague and
25 ambiguous by reason of its use of the phrases "Android device manufacturers," "retrieve,"
26 "port," "load," "install," "test," "execute," "Android devices," "the physical location where each
27 step is performed," and as to the term "Android" as defined by Plaintiff. Google further objects
28 to this Interrogatory to the extent that it seeks information that is the confidential information of,
