16 When counsel submit their briefs this Thursday, each side should also file a separate  
17 pleading setting forth proposed non-argumentative findings of fact regarding the 37 APIs as they  
18 relate to the issue of the copyrightability of their structure, selection, and organization. Please  
19 limit the proposed findings to 300 words in total and break the findings into short, numbered  
20 items. The judge will use these as a guide for listening to the evidence to see what has been  
21 proven or not, among other possible uses. Please make sure that the proposed findings, if  
22 adopted, would be sufficient under the law to sustain a judgment in your favor.
