UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

DANIEL VILLALPANDO, et al.,
Plaintiffs,
v.
EXEL DIRECT INC., et al.,
Defendants.

Case No. 12-cv-04137-JCS

**ORDER RE CROSS MOTIONS FOR
SUMMARY JUDGMENT**

Re: Dkt. Nos. 175, 176

I. INTRODUCTION

Plaintiffs in this case are delivery drivers who assert wage and hour claims against Defendants Exel Direct Inc. (n/k/a MXD Group, Inc.), DPWN Holdings (USA), Inc. and Deutsche Beteiligungen Holding GmbH (collectively, “Exel”) based on their alleged misclassification as independent contractors rather than employees. Plaintiffs bring a Motion for Summary Judgment and/or Summary Adjudication of Defendants’ Independent Contractor Defense (“Plaintiffs’ Motion”). Defendants, in turn, bring a Motion for Summary Judgment (“Defendants’ Motion”) seeking dismissal of Plaintiffs’ claims on a variety of grounds, including federal preemption. The Court held a hearing on the motions of Friday, August 14, 2015 at 2:00 pm. The parties filed supplemental briefs on August 21, 2015. The parties have consented to the jurisdiction of the undersigned United States magistrate judge pursuant to 28 U.S.C. § 636(c). For the reasons stated below, Defendants’ Motion is GRANTED in part and DENIED in part. Plaintiffs’ Motion is GRANTED.

II. BACKGROUND

A. Procedural Background

This action was initiated on June 14, 2012 in the Superior Court of Alameda County,

1 California. Defendants removed the action to federal court on August 6, 2012 under the Class
2 Action Fairness Act (“CAFA”), 28 U.S.C. § 1332(d). The case was subsequently related to
3 *Shekur v. Exel Direct Inc.*, Case No. C-13-3091 KAW, *see* Docket No. 49, and the plaintiffs in the
4 two related actions filed a Consolidated First Amended Complaint (“CFAC”) on October 28,
5 2013.¹

6 On March 23, 2014, the Court granted in part and denied in part Defendants’ motion to
7 dismiss, dismissing Claims Seven, Eight and Thirteen on the basis that there was no private right
8 of action as to those claims. *See* Docket No. 122 (“March 28, 2014 Order”). The Court rejected
9 Defendants’ arguments that: 1) Plaintiffs’ claims were insufficiently pled under Rule 8 of the
10 Federal Rules of Civil Procedure because they did not plead specific facts as to each of the named
11 defendants; 2) Plaintiffs’ meal and rest break claims were preempted under the Federal Aviation
12 Administration Authorization Act of 1994 (“FAAAA”); and 3) Plaintiffs’ claim under California’s
13 Private Attorneys General Act (“PAGA”) were insufficiently pled because they did not allege
14 facts showing that the requirements of Rule 23 of the Federal Rules of Civil Procedure were met.
15 With respect to Exel’s federal preemption argument, the Court found that the allegations in the
16 complaint were not sufficient to establish preemption but left open the possibility that Exel might
17 be able to demonstrate preemption at a later stage of the case, when a factual record had been
18 developed as to the actual or likely effects of meal and rest break requirements on the motor
19 carrier industry. *Id.* at 20-21 & n. 9.

20 On November 20, 2014, the Court granted Plaintiffs’ Motion for Class Certification,
21 certifying a class of drivers who have “personally provided delivery services” for Exel since June
22 14, 2008 and excluding any individuals who signed the Independent Truckman’s Agreement with
23 Exel but “provided delivery services exclusively through the use of hired second drivers and who
24 . . . *never* personally made deliveries for Exel.” Docket No. 150 at 34-35 (emphasis in original).

25
26
27

28 ¹ The allegations and claims in the CFAC are summarized, in detail, in the Court’s March 28,
2014 Order and therefore the Court does not repeat them here.

1 **B. Defendants’ Summary Judgment Motion**

2 **1. Motion**

3 In Defendants’ Motion, Exel challenges Plaintiffs’ claims on numerous grounds. First,
4 Exel seeks summary judgment as to all of Plaintiffs’ claims on the grounds that they are subject to
5 federal preemption under the FAAAA. *Id.* at 4. In particular, Exel contends Plaintiffs’ claims
6 seek to impose a state obligation that cannot be avoided by contract and that relates to a motor
7 carrier’s prices, routes or services with respect to the transportation of property because by seeking
8 reclassification as employees rather than independent contractors, they are interfering with the
9 financial arrangements between Exel and the class. *Id.* at 5-6. Such an attempt, it argues, is
10 “inconsistent with the [FAAAA’s] deregulatory purpose, since it imposes one system for those
11 that the market might develop.” *Id.* at 6 (quoting *S.C. Johnson & Son, Inc. v. Transp. Corp. of*
12 *Am., Inc.*, 697 F.3d 544, 552 (7th Cir. 2012)). Further, Exel asserts, because the contractual
13 arrangement between Exel and its drivers relates to “the manner and the financial terms upon
14 which they agreed “to effectuate the ‘transportation of property’ under Exel’s motor carrier
15 authority,” Plaintiffs’ claims concern a motor carrier’s “transportation of property” for the
16 purposes of preemption. *Id.* (citing *Mass. Delivery Ass’n v. Coakley*, 769 F.3d 11, 23 (1st Cir.
17 2014)). A finding of preemption is further required, according to Exel, because there is no right to
18 contract out of California’s classification standards. *Id.* at 6-7 (citing *Ruiz v. Affinity Logistics,*
19 *Corp.*, 667 F.3d 1318 (9th Cir. 2012)). Nor do the express exceptions to FAAAA preemption
20 apply, Exel asserts. *Id.* at 7-8. Finally, Exel argues, the Ninth Circuit’s decision in *Californians*
21 *for Safe & Competitive Dump Truck Transp. v. Mendonca*, 152 F.3d 1184 (9th Cir. 1998) does not
22 stand for a contrary result because it involved the application of a prevailing wage law to
23 employees and therefore did not require the defendant to alter the way in which it provided
24 transportation services. *Id.* at 8-10.

25 Second, Exel argues that Claim Two, for failure to pay overtime in violation of California
26 Labor Code sections 510 and 1198, fails even if Plaintiffs were employees because, under
27 California Code of Regulations title 8, section 11090(3)(L)(1), those provisions do not provide
28 coverage to employees whose hours of service (“HOS”) are regulated by the United States

1 Department of Transportation (“DOT”). *Id.* at 10-13. According to Exel, this exemption (“the
2 California Exemption”) applies because the DOT regulates hours of service for commercial motor
3 vehicle drivers operating in interstate commerce. *Id.* at 11 (citing 49 C.F.R. §§ 395.1, 390.5). As
4 Plaintiffs allege that they were commercial vehicle drivers and the Court has already found that
5 Exel is a motor carrier, the only remaining question is whether Plaintiffs transported goods in
6 interstate commerce, Exel contends. *Id.* at 11.

7 Exel argues that Plaintiffs meet the interstate commerce requirement as well because
8 “numerous class members . . . picked up goods in California and delivered them outside the state.”
9 *Id.* at 12 (citing Declaration of James H. Hanson in Support of Defendants’ Motion for Summary
10 Judgment (“Hanson Motion Decl.”), Ex. 3 (Declaration of Jason Moll² (“Moll Decl.”)), Ex. 7
11 (Moll Depo.) at 138-39 (testifying that drivers operating out of Oakland hub make deliveries to
12 Nevada and that drivers for Crate & Barrel in Tracy, California make deliveries to Nevada), Ex. 8
13 (Deposition of Lazaro Padilla (“Padilla Depo.”) at 101 (testifying that driver made deliveries in
14 California and Nevada)).

15 In addition, Exel contends, “class members picking-up and delivering goods entirely
16 within California likewise satisfy the interstate commerce requirement given the goods transported
17 are part of ‘a practical continuity of movement from the manufacturers or suppliers [outside] the
18 state, through a warehouse and on to customers whose orders or contracts are being filled.’” *Id.* at
19 12 (quoting *Klitzke v. Steiner Corp.*, 110 F.3d 1465, 1469 (9th Cir. 1997) (quoting *Walling v.*
20 *Jacksonville Paper Co.*, 317 U.S. 564, 569 (1943))). Exel points to evidence regarding deliveries
21 within California for Sears, Williams-Sonoma and Crate & Barrel to show that the drivers are “on
22 the final leg of the freight’s interstate voyage.” *Id.* (citing *Ruiz v. Affinity Logistics Corp.*, 2006
23 WL 3712942, at *3 (S.D. Cal. Nov. 9, 2006)). In particular, Exel offers declarations of Blanca
24 Reynoso,³ Thomas Moonan⁴ and Pat Gottman,⁵ who describe the supply chains for Sears,

25

26 ² Moll is an MXD Group, Inc. (“MXD”) manager with oversight of “the California network
27 locations in Ontario, California and Oakland, California that serve as the hubs for the logistics
28 services MXD provides to multiple retail customers in California, such as Crate & Barrel, Office
29 Depot, JC Penney, Williams-Sonoma and Restoration Hardware.” Hanson Motion Decl., Ex. 3
(Moll Decl.) ¶ 3. MXD was formerly known as Exel Direct, Inc. *Id.* ¶ 2.

³ Reynoso is Region Manager for Delivery, West, for Innovel Solutions, Inc. f/k/a Sears Logistics

1 Williams-Sonoma and Crate & Barrel, respectively. *See* Hanson Motion Decl., Ex. 4 (Reynoso
2 Decl.), Ex. 5 (Moonan Decl.) & Ex. 6 (Gottman Decl.).

3 Reynolds states as to the Sears inventory chain, that “[i]nventory, consisting primarily of
4 appliances and patio furniture, is transported from a variety of vendors across the United States
5 and abroad” to distribution centers in California “based on sales forecasts or key promotional
6 events that will drive customer demand or on customer orders for specialized items.” Hanson
7 Decl., Ex. 4 (Reynoso Decl.) ¶ 3. Once specific orders are placed for the inventory, they are sent
8 on to MDOs for delivery to the customers. *Id.* She also states that inventory is tracked as it
9 moves from the vendor to the consumer, that “[t]he products are shipped into California packaged
10 and ready for delivery to the consumer,” and that Sears maintains “title to the inventory while it is
11 being transported and is ultimately responsible for the transportation charges.” *Id.* ¶¶ 7-8.

12 Moonan states as to the Williams-Sonoma inventory chain that Williams-Sonoma furniture
13 is manufactured throughout the United States and worldwide and transported to distribution
14 centers, including distribution centers in California, based on “the anticipated customer needs in
15 the region covered by each distribution center and on special purchase orders from customers.”
16 Hanson Decl., Ex. 5 (Moonan Decl.) ¶ 4. “Once a customer order is placed, the furniture to fulfill
17 the order is transported” to hubs “where it is unboxed and, if necessary, assembled for final
18 delivery to Williams-Sonoma’s customers by Exel contractors.” *Id.* ¶ 5. According to Moonan,
19 Williams-Sonoma “tracks the furniture as it moves from the point of manufacture to the
20 customer,” “maintains title to the furniture while it is being transported and is ultimately
21

22 Services, Inc. and has oversight responsibility for 29 Market Delivery Operations (“MDOs”) in the
23 Western states, including MDOs in California. Hanson Motion Decl., Ex. 4 (Reynoso Decl.) ¶ 1.
24 She has held that position since 2014; before that, she worked for almost 20 years for Innoval in
25 other positions in the “distribution and or home/delivery area.” *Id.* ¶ 2.

26 ⁴ Moonan is Vice President of Regional Operations (“VPRO”) for Williams-Sonoma for the
27 Western and Central United States and is responsible for “the logistics, warehousing, distribution
28 and delivery of home furnishings from the distribution centers to the end customers in California
and elsewhere in the United States.” Hanson Motion Decl., Ex. 5 (Moonan Decl.) ¶ 1. He has held
that position since September 2014; before that he held management positions with oversight over
Williams-Sonoma’s West Coast Distribution Center (“DC”) in City of Industry, California and
over various Williams-Sonoma home delivery hubs (“HDHs”). *Id.* ¶ 2.

⁵ Gottman is Global Transportation Manager for Euromarket Designs, Inc. d/b/a Crate & Barrel
and manages Crate & Barrel’s home delivery distribution network in California and other states.
Hanson Motion Decl., Ex. 6 (Gottman Decl.) ¶ 1.

1 responsible for the transportation charges.” *Id.* ¶¶ 5-6.

2 Gottman describes the Crate & Barrel distribution chain. Hanson Decl., Ex. 6 (Gottman
3 Decl.). He states that Exel primarily delivers furniture for Crate & Barrel but that it sometimes
4 delivers houseware products as well. *Id.* ¶ 3. These products are manufactured all over the world
5 and are shipped to distribution centers (“DCs”) in California. *Id.* Gottman states that the majority
6 of the products it ships to the California DCs “are either earmarked to fulfill an existing customer
7 order or kept as stock on hand at the California DCs on a short-term basis, based on a forecast of
8 sales of customers serviced by the California DCs.” *Id.* ¶ 4. Crate & Barrel tracks the products as
9 they move from the point of manufacture and maintains title to the products while they are being
10 transported and is ultimately responsible for the transportation charges, according to Gottman. *Id.*
11 ¶¶ 5-6.

12 Third, Exel contends Claim Three, for failure to pay all wages earned in violation of
13 Sections 201, 202, 204 and 221-223, fails because: 1) there is no private right of action under
14 Sections 204 and 223; 2) Sections 222 and 22.5 are inapplicable; and 3) Section 221 only
15 prohibits employers from collecting or receiving from employees any part of wages the employer
16 has already paid the employee. Defendants’ Motion at 13-14. According to Defendants, Plaintiffs
17 do not allege Exel improperly collected and received wages they had already been paid; rather,
18 “they allege Exel never paid them for certain activities in the first place.” *Id.* at 14. At best,
19 Defendants contend, “this claim is nothing more than an iteration of Plaintiffs’ minimum wage
20 claim.” *Id.*

21 Fourth, Exel argues that Plaintiffs’ meal and rest break claims, Claims Four and Five, are
22 preempted by the DOT’s HOS regulations, namely, the regulation that requires that drivers cease
23 all work and go off duty no more than 14 hours after they start their day, regardless of the amount
24 of time they have taken for breaks during the day. *Id.* at 15 (citing 49 C.F.R. § 395.3(a)(1)(2)).
25 According to Exel, California’s meal and rest break laws conflict with this requirement, and thus
26 are preempted, because they “set a firm maximum on hours worked different from the maximum
27 set by federal law.” *Id.* at 15-16 (quoting *Pac. Merch. Shipping Ass’n v. Aubry*, 918 F.2d 1409,
28 1416-17 (9th Cir. 1990), *cert. denied*, 504 U.S. 979 (1992)). Therefore, Defendants assert, these

1 claims are barred under the doctrine of implied preemption. *Id.*

2 Fifth, Exel argues that Claims Ten, Eleven and Twelve fail because it has a good faith
3 belief that the class members are properly classified as independent contractors. *Id.* at 16-19.
4 According to Exel, penalties on Claim Ten, for failure to keep accurate payroll records under
5 California Labor Code sections 1174 and 1174.5, and on Claim Twelve, for waiting time penalties
6 under Labor Code section 203, are available only when there is evidence of a “willful” violation.
7 *Id.* at 16 (citing *Dalton v. Lee Publ’ns, Inc.*, 2011 WL 1045107, at *4-6 (S.D. Cal. Mar. 22,
8 2011)). Similarly, Exel asserts, recovery under California Labor Code section 226 requires a
9 “knowing and intentional” failure to provide employees with accurate wage statements. *Id.*
10 Because there is a good-faith dispute as to whether Plaintiffs are properly classified as independent
11 contractors, these requirements are not met, Exel argues. *Id.* at 17 (citing Cal. Code Regs. tit. 8, §
12 13520; *Dalton*, 2011 WL 1045107, at *5-6; *Hurst v. Buczek Enters., Inc.*, 870 F. Supp. 2d 810,
13 829 (N.D. Cal. 2012)). In a footnote, Exel asserts that Claim Ten also fails because there is no
14 private right of action to obtain damages under California Labor Code section 1174. *Id.* at 16 n.
15 17.

16 Sixth, Exel argues that Plaintiffs cannot recover vehicle lease payments on Claim Nine,
17 which seeks reimbursement for business expenses under California Labor Code section 2802 -
18 even if they prevail on their misclassification claim - because “although the costs of operating a
19 motor vehicle in the course of employment may be covered under Section 2802, the costs of
20 furnishing the vehicle *itself* are not.” *Id.* at 19 (emphasis in original) (citing *DLSE Interpretive*
21 *Bulletin No. 84-7* (Jan. 8, 1985); *DLSE Opinion Ltr. 1991.02.25-1* (Feb. 25, 1991); *DLSE Opinion*
22 *Ltr. 1994.08.14* (Aug. 14, 1994); *DLSE Opinion Ltr. 1998.11.05* (Nov. 5, 1998); *Estrada v. FedEx*
23 *Ground Package System, Inc.*, 154 Cal. App. 4th 1, 21-25 (2007)). According to Exel, this is
24 because employers in the delivery industry in California can require as a condition of employment
25 that drivers, at their own expense, must purchase or lease a truck that meets the employer’s
26 specifications. *Id.*

27 Finally, Exel argues that Plaintiffs do not have standing to seek injunctive relief under
28 California’s Unfair Competition Law (“UCL”) because Plaintiffs “no longer have any working

1 relationship with Exel.” *Id.* at 19-20 (citing *Richards v. Ernst & Young LLP*, No. C-08-4988 JF,
2 2010 WL 682314, at *3 (N.D. Cal. Feb. 24, 2010)).

3 **2. Opposition**

4 In their Opposition brief, Plaintiffs reject Exel’s FAAAA preemption argument,
5 contending Exel is “rehash[ing] issues that have already been decided” in this action and ignoring
6 the Ninth Circuit’s “decisive pronouncement [in *Dilts v. Penske Logistics, LLC*, 769 F.3d 637 (9th
7 Cir. 2014)] that generally applicable wage laws do not ‘bind’ motor carriers to specific prices,
8 routes, or services, and thus are not preempted under the FAAAA.” Plaintiffs’ Opposition at 1.
9 According to Plaintiffs, Defendants are simply arguing that they “should not have to follow
10 California wage and hour law because doing so would require them to change their policies and
11 practices.” *Id.* at 2. That is not the law, Plaintiffs assert, as such an approach would permit
12 companies to “defend an illegal policy with the circular argument that it would need to change that
13 very policy in order to comply with the law.” *Id.* at 2, 5-11. Plaintiffs also reject as a “red-
14 herring” Defendants’ argument that Exel would have to reclassify its workers to comply with the
15 law. *Id.* This same argument has already been rejected, Plaintiffs contend. *Id.* at 2-3 (citing
16 *Robles v. Comtrak Logistics, Inc.*, No. C-13-00161 JAM, 2014 WL 7335316, at *5 (E.D. Cal. Dec.
17 19, 2014); *People ex rel. Harris v. Pac. Anchor Transp., Inc.*, 59 Cal. 4th 772, 784-86 (2014)).

18 Plaintiffs also reject Exel’s arguments challenging specific claims. First, as to Exel’s
19 assertion that Plaintiffs’ overtime claim is barred by the California Exemption for deliveries made
20 in interstate commerce, Plaintiffs argue that there are triable issues of fact that preclude summary
21 judgment on this issue. *Id.* at 3, 11-18. This exemption is construed narrowly, Plaintiffs assert,
22 and it is the employer who bears the burden of showing that it applies. *Id.* at 11. Further, the
23 interstate nature of deliveries is “fundamentally a factual” question, Plaintiffs contend. *Id.* at 12.
24 Defendants cannot meet their burden on summary judgment, Plaintiffs assert, because they have
25 admitted the focus of their business in California is local. *Id.* at 12-13 (citing Declaration of
26 Nathan Piller in Opposition to Defendants’ Motion for Summary Judgment (“Piller Opposition
27 Decl.”), Ex. 4 (Deposition of Henry Capotosto (“Capotosto Depo.”)) at 73-74 (testifying that most
28 Exel deliveries are within 150 miles of where the drivers are based), Ex. 5 (Deposition of Jason

1 Moll (“Moll Depo.”)) at 138-140 (testifying that with respect to deliveries out of Exel’s Oakland
2 hub, approximately 2.5% by volume, or 5% by routes, cross state lines). In addition, Plaintiffs
3 assert, Exel cannot meet its burden under the exception for deliveries where there is “practical
4 continuity of movement” across state lines. *Id.* at 12.

5 According to Plaintiffs, a delivery is considered interstate under the “continuity of
6 movement” requirement only where the shipper had a “fixed persisting transportation intent at the
7 time of shipment,” which is evaluated under a seven-factor test (the “I.C.C. Test”). *Id.* at 13
8 (citing *S. Pac. Transp. Co. v. I.C.C.*, 565 F.2d 615, 617 (9th Cir. 1977); I.C.C. Policy Statement,
9 1992 WL 122949, at *2)). The I.C.C. test is not met, according to Plaintiffs, where “a company
10 places orders with an out-of-state vendor, with delivery to the company’s intrastate warehouse for
11 future delivery to customers yet to be identified.” *Id.* (quoting *Watkins v. Ameripride Servs.*, 375
12 F.3d 821 (9th Cir. 2004)). Here, Plaintiffs contend, the declarations offered by Exel indicate that
13 the end-users were not known at the time products were shipped from out-of-state to one of Exel’s
14 California warehouses and therefore, Exel is not entitled to summary judgment on this issue. *Id.* at
15 13-14 (citing Hanson Motion Decl., Ex. 4 (Reynoso Decl.) ¶¶ 3-5, Ex. 5 (Moonan Decl.) ¶ 4, Ex. 6
16 (Gottman Decl.) ¶ 4; Piller Opposition Decl., Ex. 6 (Deposition of Blanca Reynoso (“Reynoso
17 Depo.”) at 40-42, 56, 64).

18 In addition, Plaintiffs argue, the declarations offered by Exel also raise fact questions as to
19 many of the factors of the I.C.C. Test, such as whether a company’s sales forecasts, if used to
20 show “practical continuity of movement” have a factual basis, whether any processing or
21 substantial product modification occurs at the warehouse, whether “modern systems allow
22 tracking and documentation of most, if not all, of the shipments coming in and going out of the
23 warehouse, and whether the merchandises is subject to the shipper’s control and direction to the
24 subsequent transportation once it reaches the intrastate warehouse. *Id.* at 14-16 (citing Hanson
25 Decl., Ex. 5 (Moonan Decl.) ¶ 3 (stating that merchandise is “unboxed and, if necessary,
26 assembled” at the warehouse before it is sent on to customers); Piller Opposition Decl., Ex. 6
27 (Reynoso Depo.) at 57, 59 (testifying that “deluxing” is sometimes performed at the warehouse to
28 meet customer needs, which could include installing a side-vent in a dryer that came with the vent

1 in the back, or switching the door on a refrigerator so the handle is on the left rather than the
2 right)).

3 Plaintiffs also filed a supplemental brief after they had had an opportunity to depose
4 Moonan and Gottman on the interstate commerce issue. *See* Plaintiffs’ Supplemental
5 Memorandum of Points and Authorities in Opposition to Defendants’ Motion For Summary
6 Judgment (“Plaintiffs’ Supp. Opp.”). In the supplemental brief, Plaintiffs point to deposition
7 testimony indicating that most of the Williams-Sonoma and Crate & Barrel goods that are shipped
8 to California are for “future delivery to customers yet identified.” Plaintiffs’ Supplemental
9 Memorandum of Points and Authorities in Opposition to Defendants’ Motion For Summary
10 Judgment (“Plaintiffs’ Supp. Opp.”) at 2-3 (citing Declaration of Nathan Piller in Support of
11 Plaintiffs’ Supplemental Memorandum of Points and Authorities in Opposition to Defendants’
12 Motion for Summary Judgment (“Piller Supp. Opp. Decl.”), Ex. 1 (Moonan Depo.) at 20-21, 37-
13 38, Ex. 2 (Gottman Depo.) at 25-26). Plaintiffs also point to testimony by Moonan and Gottman
14 indicating that they could not provide a “factual basis” for the sales forecasts on which shipments
15 to California are based. Plaintiffs’ Supp. Opp. at 3 (citing Piller Supp. Opp. Decl., Ex. 1 (Moonan
16 Depo.) at 48, Ex. 2 (Gottman Depo.) at 27). Plaintiffs also assert in their supplemental brief that
17 “[t]he very small minority of deliveries that crossed state lines raises at most a manageable
18 damages issue.” *Id.* at 2 (citing *Butler v. Sears, Roebuck and Co.*, 727 F.3d 796, 801-02 (7th Cir.
19 2013)).

20 In the alternative, even if the Court finds that the evidence is insufficient to demonstrate
21 the existence of a factual dispute on the interstate commerce question, Plaintiffs assert that
22 summary judgment should be denied on this issue under Rule 56(f) because Exel did not provide
23 Plaintiffs with reasonable notice and opportunity to respond. *Id.* at 17-18. In particular, Plaintiffs
24 argue the Exel failed to produce any documents responsive to Plaintiffs’ request for production of
25 documents directly relevant to the interstate commerce issue and have not cooperated in producing
26 witnesses - including Jason Moll - for deposition. *Id.* at 17.

27 Plaintiffs also reject Exel’s assertion that their meal and rest break claims fail because they
28 are preempted by the DOT Hours of Service regulations, arguing that the Ninth Circuit in *Dilts* -

1 and this Court - have held that California’s meal and rest break laws are not preempted by the
2 FAAAA. *Id.* at 18-19. Plaintiffs further assert that Exel’s new preemption argument, while
3 “cosmetically different” from the preemption argument it made at an earlier stage of this case (to
4 the extent it is now based on a theory of implied preemption) is essentially the same as its previous
5 argument, namely, “that California’s meal and rest break laws are preempted because they reduce
6 the amount of service that Defendants can provide.” *Id.* at 19. Plaintiffs assert that Exel’s
7 argument is “muddled” and that it does not make clear which category of implied preemption it is
8 asserting - impossibility or obstacle preemption. *Id.* In either event, Plaintiffs contend, Exel has
9 not demonstrated that either theory applies because there is no evidence it would be impossible for
10 Exel to comply with both the DOT Hours of Service regulations and the state meal and rest break
11 laws and it also has not demonstrated that these laws are an obstacle to the objectives of Congress
12 in establishing the DOT Hours of Service regulations. *Id.* at 20.

13 With respect to Exel’s assertion that it should prevail as to Claims Ten, Eleven and Twelve
14 because of its good faith belief that its drivers are properly classified, Plaintiffs argue that Exel has
15 “overstated the degree of intentionality necessary to show violations of Labor Code sections 203,
16 226 and 1174.5.” *Id.* Further, Exel’s knowledge and intent are factual questions that cannot be
17 resolved on summary judgment, Plaintiffs argue. *Id.* at 21 (citing *Lopez v. United Parcel Serv.*
18 *Inc.*, No. C-08-5396 SI, 2010 WL 728205, at *9 (N.D. Cal. Mar. 1, 2010)). Plaintiffs also cite
19 evidence relating to the decision made by Exel senior management in 2007 to reclassify its
20 employees as independent contractors, which Plaintiffs contend creates triable issues of fact as to
21 Exel’s intentions and good faith with respect to the independent contractor classification. *Id.* at
22 21-22.

23 Plaintiffs argue that Exel is wrong in characterizing Claim Three, for failure to pay for all
24 time work, as merely an “iteration of their minimum wage claim.” *Id.* at 22-23. According to
25 Plaintiffs, they are properly seeking straight time compensation for non-hauling activities that are
26 not covered by the piece rates Exel pays its drivers for deliveries. *Id.* They note that the Court has
27 already found, in this action, that a claim under Labor Code Section 221 is a claim for unpaid
28 wages. *Id.* at 22 (citing 2014 WL 1338297, at *18). Plaintiffs argue further that even if the piece

1 rates paid by Exel would, if averaged over all working hours, exceed the minimum wage, this
2 would not be a defense to their claim. *Id.* at 23 (citing *Gonzales v. Downtown LA Motors, LP*, 215
3 Cal. App. 4th 36, 49 (2013)).

4 With respect to Exel’s request for summary judgment that reimbursement for vehicle lease
5 and rental payments is not available, Plaintiffs argue that the Court should wait until after the
6 misclassification question has been resolved to decide this issue, as did Judge Conti in a similar
7 case. *Id.* at 23 (citing *Smith v. Cardinal Logistics Mgmt. Corp.*, No. C-07-2104 SC, 2009 WL
8 2588879, at *5 (N.D. Cal. Aug. 19, 2009)).

9 Finally, to the extent Defendants contend Plaintiffs do not have standing to pursue
10 injunctive relief against Exel, Plaintiffs argue that they should be permitted to substitute into the
11 case a new class representative with standing. *Id.* at 23-24. Plaintiffs note that although named
12 plaintiffs Villalpando and Shekur are not currently employed by Exel, many class members do
13 currently work for Exel and could represent the class as to the request for injunctive relief. *Id.*

14 **3. Reply**

15 In their Reply, Defendants reject Plaintiffs’ arguments regarding preemption. They argue
16 that the Ninth Circuit’s recent decision in *Dilts* is distinguishable because the claims in that case
17 were brought by employee drivers. Defendants’ Reply at 3. Exel also argues that whether the
18 Ninth Circuit applied a “binds to” analysis in *Dilts* is irrelevant because the Supreme Court has
19 held that the form of the law at issue does not have any bearing on whether it is preempted. Exel
20 further asserts that it is not seeking to be excused from the requirements of California wage laws
21 but rather, is arguing that “Plaintiffs may not use a state law claim to reclassify them as employees
22 ‘when market forces have prompted [Exel] to adopt an independent contractor model.’” *Id.* at 3-4
23 (quoting *Mass. Delivery Ass’n v. Coakley*, No. 10-cv-11521, 2015 WL 4111413 (D. Mass. July 8,
24 2015)).

25 Exel contends the state court’s decision in *Harris*, cited by Plaintiffs in their Opposition
26 brief in support of the assertion that the FAAAA does not preempt state law misclassification
27 claims, is not binding on this court and that in any event, the defendant in that case conceded that
28 the effect of the unfair competition law at issue in that case on carriers’ prices, routes and services

1 was “remote.” *Id.* at 4 (citing *People ex rel. Harris v. Pac. Anchor Transp., Inc.*, 59 Cal. 4th 772
2 (2014)). Defendants argue that Plaintiffs’ reliance on *Robles v. Comtrak Logistics, Inc.*, No. 11-
3 11094, 2013 WL 3353776 (D. Mass. July 3, 2013), is also unavailing because the court in that
4 case relied on *Harris* and on a Massachusetts district court decision, *Schwann v. FedEx Ground*
5 *Package Sys., Inc.*, that was withdrawn and reversed after the First Circuit’s decision in *Mass.*
6 *Delivery Ass’n v. Coakley*, 769 F.3d 11 (1st Cir. 2014). *Id.* at 4-5.

7 Exel rejects Plaintiffs’ assertion that there are “triable issues of fact as to whether
8 Defendants would need to reclassify their drivers to comply with the law.” *Id.* at 5. This
9 argument is inconsistent with Plaintiffs’ assertion in their own summary judgment motion that
10 reclassification is required as a matter of law, it contends. *Id.* at 5. In fact, Exel argues, “there is
11 no difference between Plaintiffs’ claims and a ‘law requiring a company to classify its laborers as
12 employees as a condition of doing business.’” *Id.* at 6 (quoting Plaintiffs’ Opposition at 9).
13 Furthermore, Exel argues, the question of whether a motor carrier is *able* to comply with state law
14 is not relevant to whether that law is preempted by the FAAAA. *Id.* at 6-7.

15 On the question of whether the California Exemption applies to Plaintiffs’ overtime claim,
16 Exel argues that it has demonstrated “practical continuity of movement” across state lines based
17 on testimony by Exel’s customers that “they shipped product from out-of-state to California
18 pursuant to specific customer orders and based on forecasting of predictable customer demands.”
19 *Id.* at 9. According to Exel, “nothing more is required” and therefore, evidence that end customers
20 often are not ascertained at the time of shipment does not defeat summary judgment. *Id.* at 9. Nor
21 does the non-submittal of sales forecasts by Exel create a fact question, Exel asserts. *Id.*
22 According to Exel, it has established the shippers’ intent to move product in interstate commerce
23 based on projected customer demand and there is no evidence to establish a contrary intent. *Id.*
24 Nor is evidence that furniture was unpacked and assembled sufficient to “alter the product’s
25 interstate journey,” Exel argues. *Id.* at 10 (citing *Musarra v. Digital Dish, Inc.*, 454 F. Supp. 2d
26 692, 715-16 (S.D. Ohio Sept. 28, 2006); DOL Field Operations Handbook, § 24c02, 24d00).

27 Exel also argues that Plaintiffs are incorrect as to their assertion that the interstate
28 deliveries made by some class members are not sufficient to “wipe out all the overtime claims for

1 the entire class.” *Id.* at 10 (quoting Plaintiffs’ Opposition at 12 n. 4)). Even as to the drivers who
2 did not make interstate deliveries, Exel argues, the California Exemption applies because that
3 exemption applies to all drivers who could reasonably be *expected* to haul freight across interstate
4 lines. *Id.* (citing *Morris v. McComb*, 332 U.S. 422, 433-36 (1947); *Bishop v. Petro-Chemical*
5 *Transp., L.L.C.*, 582 F. Supp. 2d 1290, 1298 (E.D. Cal. 2008); *Resch v. Krapf’s Coaches Inc.*, 785
6 F.3d 869 (3d Cir. 2015)). Under the DOT regulations, DOT retains jurisdiction over any drivers
7 who could be called on to make interstate deliveries, Exel argues. *Id.* (citing 49 Fed. Reg. 37902-
8 02). Thus, the determination of when DOT rules apply is not based on a load-by-load analysis,
9 Exel asserts. *Id.* Further, Exel argues, the suggestion by Plaintiffs that the Court can address this
10 issue on a driver-by-driver basis as a matter of damages indicates that they no longer believe the
11 case should be certified. *Id.* Exel also rejects Plaintiffs’ assertion that it did not give them
12 sufficient notice of its intent to assert the California Exemption as a defense and argues that the
13 Court should not permit Plaintiffs to conduct further discovery on this issue under Rule 56(f). *Id.*
14 at 11-12.

15 Exel reiterates its assertion that Claim Three is merely a minimum wage claim, arguing
16 that California Labor Code section 221 does not extend to claims for compensation where an
17 employee was never paid in the first instance. *Id.* According to Exel, Plaintiffs “implicitly
18 recognize” that this claim doesn’t fall under section 221 to the extent they cite *Gonzales v.*
19 *Downtown LA Motors, LP*, 215 Cal. App. 4th 36 (2013). *Id.* The holding in *Gonzales*, Exel
20 asserts, “is based on an extensive analysis and application of *Armenta v. Osmose, Inc.*, 135 Cal.
21 App. 4th 314 (2005) - a minimum wage case decided under Cal. Lab. Code § 1194.” *Id.*

22 Exel argues again that Plaintiffs’ meal and rest break claims are preempted by the DOT
23 HOS because under California’s rules, a driver loses one hour and thirty minutes a day of work
24 time, thus setting a firm maximum number of hours of 12.5 hours, which is different from the
25 number of hours permitted under federal law of 14 hours. *Id.* at 13. According to Exel, neither
26 this Court nor the *Robles* court has reached a contrary result or indeed, even addressed this
27 preemption argument. *Id.*

28 With respect to Exel’s request for summary judgment on Claims Ten, Eleven and Twelve

1 based on its good faith belief that its drivers are properly classified, Exel argues that its deliberate
2 attempt to use an independent contractor business model is irrelevant because this does not show
3 that Exel had any intent to violate the law. *Id.* at 14.

4 As to Exel’s request for summary judgment on the unavailability of vehicle lease payments
5 under California Labor Code section 2802, Exel points out that Plaintiffs did not make any attempt
6 in their opposition to demonstrate that there are any material disputes of fact that would preclude
7 summary judgment on this issue. *Id.* Exel argues that there is no reason to delay adjudication of
8 this issue. *Id.* at 15.

9 **C. Plaintiffs’ Summary Judgment Motion**

10 **1. Motion**

11 Plaintiffs seek summary judgment on Exel’s first affirmative defense, that Plaintiffs’
12 claims fail because they are independent contractors. Plaintiffs’ Motion at 1. According to
13 Plaintiffs, the undisputed facts establish, as a matter of law, that they have been misclassified and
14 are instead employees. *Id.* Plaintiffs cite “Exel’s own contracts, written policies and manager
15 testimony,” which they contend show that Exel retains the right to exercise control over its drivers
16 with respect to the manner in which they perform their work, which is the test for determining
17 whether an individual is an employee or an independent contractor. *Id.* at 3 (citing *Ruiz v. Affinity*
18 *Logistics Corp.*, 754 F.3d 1093, 1100 (9th Cir. 2014); *Ayala v. Antelope Valley Newspapers, Inc.*,
19 59 Cal. 4th 522, 533 (2014)). The evidence offered by Plaintiffs in support of their request for
20 summary judgment is summarized below:⁶

21 Exel’s Motive for Classifying its Drivers as Independent Contractors: Plaintiffs contend
22 Exel adopted and maintained the independent contractor business model in order to cut costs. *Id.*
23 at 5. They cite the deposition testimony of Renee Albarano, Exel’s “person most knowledgeable,”
24 who testified that Exel shifted from an employee model to an independent contractor model in
25 2007 after conducting cost analyses comparing the “estimated financial delta” between the two

26 _____
27 ⁶ The Court notes that Plaintiffs’ Motion in several instances references the wrong exhibit
28 numbers for the evidence cited. They have also provided incorrect page numbers for some
quotations. The Court has corrected these clerical errors by replacing the cited page and exhibit
numbers with the correct numbers.

1 models and concluding the latter was more profitable. *Id.* (citing Declaration of Nathan Piller in
2 Support of Plaintiffs’ Motion for Summary Judgment and/or Summary Adjudication of
3 Defendants’ Independent Contractor Defense (“Piller Motion Decl.”), Ex. 5 (October 29, 2013
4 deposition of Renee Albarano (“Albarano Depo. I”) at 240-44). Albarano further testified that a
5 2007 analysis concluded that the cost of running a truck under the independent contractor model
6 as compared to the employee model saved approximately \$23,000 per truck. *Id.* (citing Piller
7 Motion Decl., Ex. 6 (May 12, 2015 deposition of Renee Albarano (“Albarano Depo. II”) at 50-51).

8 At the same time, Plaintiffs contend, drivers’ compensation dropped significantly with the
9 adoption of the independent contractor model. *Id.* Plaintiffs point to a 2006 presentation by
10 Albarano (or someone on her team) reflecting that in that year, the average annual salary for
11 Exel’s drivers (many of whom were classified as employees) was \$52,238. *Id.* (citing Piller
12 Motion Decl., Ex. 49 (“Network Driver Pay”) at 3). A sampling of Class Member IRS Schedule C
13 1040 Forms showing profits and losses from business for subsequent years (between 2008 and
14 2011), when Exel had adopted the independent contractor model, shows that drivers typically took
15 home less than \$25,000 per year, after expenses, despite working 14-hour days, 5-6 days a week.
16 *Id.* (citing Piller Motion Decl., Exs. 51-59).

17 Negotiation of Pay Rate and Other Terms of Employment: Plaintiffs assert Exel presents
18 the job terms and pay rates to its drivers on a take-it-or-leave-it basis. *Id.* at 5-6. Plaintiffs point to
19 the deposition testimony of a senior Exel manager, Gregory Smigelsky, testifying that during the
20 relevant period Exel mainly recruited individuals rather than companies, and to Albarano’s
21 deposition testimony that Exel presents the Independent Truckman’s Agreement (“ITA”) to these
22 individuals without offering them any opportunity to negotiate specific terms of the contract. *Id.*
23 (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 83, Ex. 7 (Smigelsky Depo.) at 113, Ex. 8
24 (ITA)). Similarly, Cristina de la Rosa, an Exel recruiter, testified that drivers get paid a flat rate
25 for each stop and that the rate is non-negotiable. Piller Motion Decl., Ex. 9 (De La Rosa Depo.)
26 at 24-25, 40. Plaintiffs also cite the testimony of class member Victoriano Molina, who testified
27 that drivers were given a rate sheet listing the amount paid per stop, that drivers were not
28 permitted to negotiate as to the rates, and that at least twice a year the rates were reduced.

1 Plaintiffs’ Motion at 6 (citing Piller Motion Decl., Ex. 10 (Molina Depo.) at 79).

2 Exel’s Right to Terminate or Transfer Drivers: Plaintiffs contend Exel retains the right to
3 terminate or transfer drivers without cause and to terminate any driver for violating any of its rules
4 and instructions. *Id.* It cites testimony by Smigelsky, Albarano and Moll that Exel maintains
5 standards as to customer service, safety and appearance and that Exel can terminate drivers who
6 fail to meet these standards. *Id.* (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 233
7 (testifying that Exel has minimum qualifications for drivers, independent contractors and helpers
8 that exceed the minimum legal requirements and apply to all drivers and helpers), Ex. 7
9 (Smigelsky Depo.) at 66, 78-79 (testifying that if drivers do not comply with Exel “standards of
10 quality or excellence,” including appearance, customer service, delivery and safety standards, Exel
11 retains the right to terminate them), Ex. 14 (Moll Depo.) at 145-46⁷ (testifying that drivers had to
12 be approved by Exel to drive a truck).

13 The right to terminate and transfer drivers is also contained in the ITA, Plaintiffs assert.⁸
14 *Id.* at 7 (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 83), Ex. 8 (ITA)). Plaintiffs also
15 cite the testimony of De La Rosa that general managers at different work sites routinely call each
16 other when they are short of drivers and ask if they can borrow a driver from another site for the
17 day. *Id.* (citing Piller Motion Decl., Ex. 9 (De La Rosa Depo.) at 22, 24).

18 The right to terminate drivers for failure to follow Exel’s standards is also contained in
19 Exel’s Transportation Safety & Regulatory Compliance Manual (“Compliance Manual”),
20

21 ⁷ Although Plaintiffs cite page 145 of the Moll deposition transcript, that page was not included in
22 the cited exhibit, Exhibit 14. Page 146, however, which was included in the exhibit, includes
23 testimony that no individual could drive a truck unless approved by Exel.

⁸ Paragraph 3 of the ITA provides, in relevant part, as follows:

24 **Termination.** This Agreement may be terminated at any time: . . .
25 (c) without cause upon either party giving the other sixty (60) days
26 written notice of termination; or (d) with cause upon the breach of
27 this Agreement by either of the parties. Upon any termination
28 without cause under Subsection (c), CONTRACTOR, at the
COMPANY’S option, may be transferred to another location then
being served by the COMPANY. Failure of CONTRACTOR to
comply with the transfer, shall constitute a breach of this agreement.

Piller Motion Decl., Ex. 3 (ITA), ¶ 3.

1 Plaintiffs assert. *Id.* (citing Piller Motion Decl., Ex. 15 (Compliance Manual) at EDV000303⁹
2 (“Contractors who fail to comply with the provisions of this manual are subject to termination of
3 their Agreement”) and EDV000309 (“violation [of the provisions adopted by Exel to ensure safe
4 operations] may result in the termination of the [Equipment Lease Agreement] and the ITA
5 executed with Exel”). Plaintiffs also cite evidence relating to Exel’s Driver Safety Accountability
6 Program, under which drivers were charged for accidents that were considered “preventable,” a
7 standard that was higher than legal liability. *Id.* (citing Piller Motion Decl., Ex. 14 (Moll Depo.) at
8 150-151, Ex. 16 (Exel Direct Driver Safety Accountability) at EDV000286 (stating that
9 “Preventability is a higher standard than Legal Liability”).

10 Exel’s Provision of Customers: Plaintiffs point to evidence that Exel provides its drivers
11 with customers. *Id.* at 7-8 (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at 196 (testifying
12 that Exel provides drivers with customers so drivers do not need to sell their services to clients),
13 Ex. 17 (“Realistic Preview of Business Opportunity”) at 5 (“With a small financial investment on
14 your part you are revenue producing and have 100% of your customers the first day that you are in
15 business”), Ex. 18 (deposition testimony of recruiter Maria Iniguez-Quintero) at 89 (“we will have
16 the client customers for” the drivers). Plaintiffs also offer evidence that the drivers are not
17 permitted to negotiate directly with these customers as to any of the terms of the service they
18 provide, including routes, delivery windows, or terms of payment or service; rather, these
19 requirements are dictated by the terms of the agreements between Exel and the customers who use
20 Exel’s delivery services. *Id.* at 8 (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 81-82).

21 Exel’s Assignment of Delivery Routes: Plaintiffs contend it is undisputed that Exel has the
22 discretion to determine which routes are assigned to which drivers and that it determines the time
23 windows for each stop. *Id.* at 8 (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 102-03
24 (testifying that Exel puts together the overall routes, namely, the stops and time windows, while
25 the driver “determines the specific streets and roads to take in order to meet those time windows),
26 Ex. 11 (Villalpando Depo.) at 177 (testifying that drivers have no choice as to their routes), Ex.

27 _____
28 ⁹ Although Exel cites page EDV000304 in its brief, the quoted language is found at page
EDV000303.

1 19 (excerpt of deposition of class member Juan J. Saravia) at 52 (testifying that Exel came up with
2 his routes during the night and sent them to his phone)). Plaintiffs contend that while the drivers
3 usually are permitted to decide which streets and highways to get from one stop to the next on
4 their routes, sometimes they do not even have this discretion. *Id.* In support of this assertion,
5 Plaintiffs cite the deposition testimony of Jason Moll that Exel’s dispatchers sometimes provide
6 “turn-by-turn driving directions” when “the driver needs help” and testimony by Smigelsky that
7 drivers who “don’t deliver their assigned routes” may be terminated. *Id.* (citing Piller Motion
8 Decl., Ex. 7 (Smigelsky Depo.) at 88, Ex. 14 (Moll Depo.) at 107).

9 Exel’s Right of Exclusive Possession, Control and Use of Vehicles Until May 2015:

10 According to Plaintiffs, until May 2015, the Equipment Lease Equipment (“ELA”), which every
11 driver had to sign, provided that Exel would have “exclusive control” over the vehicles the drivers
12 used - a requirement under the Federal Motor Carrier Safety Regulations for motor carriers that
13 lease rather than purchase equipment for transportation. *Id.* at 8-9 (citing 49 C.F.R. §
14 376.12(c)(1),¹⁰ Ex. 20 (ELA)¹¹). Exel’s Compliance Manual also states that drivers’ vehicles are

15
16 ¹⁰ This subsection provides as follows:

17 (1) The lease shall provide that the authorized carrier lessee shall
18 have exclusive possession, control, and use of the equipment for the
19 duration of the lease. The lease shall further provide that the
authorized carrier lessee shall assume complete responsibility for the
operation of the equipment for the duration of the lease.

20 49 C.F.R. § 376.12(c)(1).

21 ¹¹ The ELA contains the following provision governing Exel’s use and control of the drivers’
vehicles:

22 **Control and Exclusive Use.** COMPANY shall have such
23 possession, control and use of the LEASED EQUIPMENT and its
24 operation as required by Title 49 C.F.R. Section 376.12(c)(1).
25 Notwithstanding the above, in performing services under this
26 Agreement, CONTRACTOR will direct the operation of the
27 LEASED EQUIPMENT in all respects and will determine the
28 means of performance including, but not limited to, such matters as
choice of any routes, points of service of equipment, rest stops, and
timing and scheduling in accordance with customer delivery
commitments. The parties intend to create an independent
contractor relationship and not an employer-employee relationship.

Piller Motion Decl., Ex. 20 (ELA) ¶ 11.

1 operated under its “authority and insurance” and that they are under Exel’s “care, custody and
2 control.” *Id.* at 9 (citing Piller Motion Decl., Ex. 15 (Compliance Manual) at EDV000302,
3 000304). Further, an addendum to the ELA acknowledges that Exel’s safety ratings by the
4 Federal Motor Carrier Safety Administration have “economic value” and provides for the payment
5 of “liquidated damages” by drivers to Exel where they are found to have committed violations in
6 connection with roadside inspections conducted by the FMCSA. *Id.* (citing Piller Motion Decl.,
7 Ex. 21 (Addendum to ELA)).

8 Exel’s Right to Retain Control Over Drivers’ Work Hours and Delivery Schedules:

9 Plaintiffs contend Exel retains control over the drivers’ work hours and delivery schedules,
10 including requiring that all drivers attend an early morning meeting at the beginning of the work
11 day and providing each driver with a manifest listing the stops and time windows for the day. *Id.*
12 at 9 (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 102-03, 107 (testifying that Exel
13 determines the stops and time windows for the drivers), 159-60 (testifying that all drivers must
14 attend morning “stand-up” meeting every day), Ex. 7 (Smigelsky Depo.) at 51 (testifying that Exel
15 expects drivers to make deliveries within time windows provided), Ex. 19 (Saravia Depo.) at 50
16 (testifying that he had to arrive at work at 5:30 a.m. to attend morning meeting that started at 6
17 a.m.)). According to Plaintiffs, Exel keeps statistics on the percentage of deliveries that are on-
18 time and gives positive or negative feedback to drivers as appropriate. *Id.* at 10 (citing Piller
19 Motion Decl., Ex. 14 (Moll Depo.) at 87-88). Further, Plaintiffs assert, Exel looks for drivers who
20 can work full-time and typically requires that its drivers work five to six (and sometimes seven)
21 days a week, between 10 and 12 hours a day. *Id.* (citing Piller Motion Decl., Ex. 7 (Smigelsky
22 Depo.) at 169, 192 (testifying that a typical work schedule is five to six, sometimes seven days per
23 week, usually 10-12 hours a day, and that Exel’s goal is to keep Exel drivers operating at full
24 capacity), Ex. 9 (De La Rosa Depo.) at 94 (testifying that Exel only looks for full-time drivers)).
25 According to Smigelsky, it is the “recommended practice” that drivers who would like to take a
26 day off speak with the local manager. *Id.* (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at
27 193-94. Plaintiffs offer testimony of class members that they work full weeks and long days and
28 that they often do not have time to take breaks, even to use the bathroom. *Id.* (citing Piller Motion

1 Decl., Exs. 10-11, 22-29 (Class Member Declarations and Deposition Testimony)). Plaintiffs also
2 point to Smigelsky’s deposition testimony that Exel has the discretion to terminate a driver who
3 asks to use a customer’s restroom. *Id.* (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at
4 103-04).

5 Exel’s Appearance Standards for Drivers and Vehicles: According to Plaintiffs, Exel
6 requires its drivers to comply with “appearance requirements” as to both their personal appearance
7 and the appearance of their trucks. *Id.* at 10-11. As to personal appearance, this includes wearing
8 a standard delivery uniform with the appropriate logo affixed to it, keeping the uniform clean, and
9 maintaining a neat bodily appearance. *Id.* (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at
10 210-211, 226 (testifying that Exel drivers must wear uniforms with logo and that Exel buys and
11 provides the uniforms to its drivers and deducts the cost from their pay), Ex. 7 (Smigelsky Depo.)
12 at 81-82 (testifying that Exel expects drivers to wear uniforms), Ex. 9 (De La Rosa Depo.) at 81
13 (testifying that drivers should be “neat and well-groomed” because they are “going to people’s
14 homes”), Ex. 18 (Iniguez-Quintero Depo.) at 81-82 (testifying that drivers are expected to have
15 “good hygiene” and be “presentable” to provide a good customer experience), Ex. 30 (Suggested
16 Tools List, describing Exel delivery uniform)).

17 As to the appearance of the truck, Plaintiffs cite evidence that Exel requires all trucks: 1)
18 be painted white; 2) carry placards with Exel’s name and logo on them, placed in specific
19 locations on the truck; 3) meet certain dimensional requirements; and 4) have certain interior
20 features. *Id.* at 11 (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 209-211 (describing
21 logo requirements for trucks), Ex. 7 (Smigelsky Depo.) at 218-219 (describing placard
22 requirements), Ex. 31 (Dalpino Depo) at 77 (testifying that as a recruiter he had to take pictures of
23 new drivers’ trucks and put them into the file to ensure that trucks met Exel’s appearance
24 requirements), Ex. 32 (Exel Standard Truck Requirements)).

25 Exel’s Requirements Governing Trucks, Tools and Devices: In addition to the Standard
26 Truck Requirements, Plaintiffs also point to requirements imposed on drivers mandating that
27 drivers use certain equipment and tools, including a particular type of cell phone to report
28 deliveries and communicate with management throughout the day and certain safety equipment

1 such as “cargo securement equipment.” *Id.* at 12 (citing Piller Motion Decl., Ex. 33 (Agreement
2 to Use Handheld Computer Device), Ex. 14 (Moll Depo.) at 58, 93 (testifying that Exel distributes
3 a certain type of phone that drivers are required to use to communicate with management), Ex. 15
4 (Compliance Manual) at EDV000317 (stating that all vehicles operated on behalf of Exel must
5 carry certain “DOT required equipment on board”), Ex. 30 (Suggested Tools List listing tools
6 drivers should have and specific tool supply companies)). In addition, Plaintiffs cite testimony
7 that Exel purchases certain types of equipment such as blankets, straps and packaging tape, which
8 it then charges back to the drivers. *Id.* (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at
9 200-01). Plaintiff Villalando testified that sometimes managers inspected his truck and if they
10 found the blankets were “dirty or smell” would give him a pack of blankets, without asking,
11 which he was later charged for. *Id.* (citing Piller Motion Decl., Ex. 11 (Villalando Depo.) at
12 198). Class member Molina testified that Exel provided equipment such as “blankets, tools, any
13 sort of safety equipment” to drivers and charged the expense back to them without seeking
14 authorization from the drivers. *Id.* (citing Piller Motion Decl., Ex. 10 (Molina Depo.) at 100).

15 Exel’s Compliance and Training Manuals Requiring that Work be Performed in a Specific
16 Manner: According to Plaintiffs, Exel’s Compliance Manuals, as well as other training materials,
17 “are replete with mandatory language, such as ‘required,’ ‘never’ and ‘must,’ rather than mere
18 recommendations or guidelines.” *Id.* at 12 (citing Piller Motion Decl., Ex. 14 (Moll Depo.) at 152
19 (testifying that when a new driver starts, Exel wants the driver to “go through the Safer Way
20 training”), Ex. 15 (Compliance Manual) at EDV000308 (“Every Contractor/driver is required to
21 maintain their qualification status as defined by 49 CFR § 391 and company policy”), EDV000320
22 (“After an accident, never accept or place blame on any person and do not sign anything”)
23 (“Drivers are expected to make deliveries in accordance with the expectations of our customers”)
24 (“Be courteous and cooperative with the homeowner. If Contractor/driver encounters any
25 problem, notify the dispatcher as soon as possible”), Ex. 34 (Exel Direct Driver Training: US
26 DOT Regulations) at EDV001561 (“Every driver must complete the Safer Way of Defensive
27 Driving Program”), Ex. 35 (The Exel Safer Way of Driving) at EDV000455 (instructions for
28 drivers at scene of accident including specific statement drivers should make if asked for comment

1 by member of news media)). According to Plaintiffs, the manuals contain “detailed procedures”
2 all drivers must follow, including rules relating to cell phone usage, how to fill out certain forms
3 and reports, various loading and delivery procedures and how to interact with customers.” *Id.*
4 (citing Piller Motion Decl., Ex. 15 (Compliance Manual) at EDV00309-11, EDV000320).

5 Exel’s Compliance and Safety Policies: Plaintiffs contend Exel has admitted its
6 compliance and safety policies go above and beyond legal requirements, citing Albarano’s
7 deposition testimony. *Id.* at 13 (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 233). As
8 an example, Plaintiffs point to Smigelsky’s testimony that Exel’s Driver Safety Accountability
9 Program is more protective than federal law, providing for disqualification of a driver under
10 certain circumstances where federal law would not provide for disqualification. *Id.* (citing Piller
11 Motion Decl., Ex. 7 (Smigelsky Depo.) at 236).

12 Exel’s Monitoring and Enforcement Activities: Plaintiffs contend Exel engages in
13 extensive monitoring and enforcement of the rules it requires drivers to follow. *Id.* It cites as an
14 example the daily stand-up meetings drivers are required to attend. *Id.* at 13-14 (citing Piller
15 Motion Decl., Ex. 5 (Albarano Depo. I) at 158-160, 165-66 (testify that attendance at stand-up
16 meetings is required and describing topics covered, including “reinforcing certain safety
17 guidelines”), Ex. 14 (Moll Depo.) at 68 (“And then we’ll have such topics as safety topics or on-
18 time delivery performance”). Plaintiffs also point to evidence that Exel’s managers supervise the
19 drivers and their helpers as they load their trucks and instruct them on loading procedures. *Id.* at
20 14 (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at 84, Ex. 31 (Dalpino Depo.) at 128).
21 Plaintiffs point to testimony that in addition to various evaluation forms and compliance checklists
22 that are completed by managers during the driver’s initial two-week orientation, managers also
23 sometimes conduct “ride-alongs” or “follow-alongs” where they observe the driver’s performance
24 and complete evaluation forms. *Id.* (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 177-
25 79, Ex. 7 (Smigelsky Depo.) at 143, Ex. 36 (Ride and Evaluation Document), Ex. 38 (Manager
26 Ride-A-Long Compliance Checklist)).

27 Plaintiffs also point to evidence that drivers are expected to report to management if they
28 are experiencing a delay or are unable to make deliveries in accordance with customer

1 expectations. *Id.* (citing Piller Motion Decl., Ex. 15 (Compliance Manual) at EDV000320). The
2 Compliance Manual also requires that if a customer refuses a shipment the driver must call Exel
3 immediately, and damage exceeding \$500 must be reported to Exel’s Risk Management
4 Department. *Id.* (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 45, 48 (testifying that if a
5 driver “has an issue making the delivery” the driver “calls the Exel Direct dispatch associate at the
6 local site”), Ex. 15 (Compliance Manual) at EDV000320-321). According to Plaintiffs, “[d]rivers
7 generally must resolve customer complaints regarding in-home damage by working with
8 representatives of Exel, rather than negotiating a resolution with the customer independently.” *Id.*
9 (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at 63-64 (testifying that drivers “can resolve
10 their own damages” but they should report to Exel that the damage has occurred and tell Exel if
11 the issue has been resolved)).

12 Plaintiffs also provide evidence regarding the computer program Exel uses to track its
13 drivers, in real time, to see whether they are on time in making their deliveries. *Id.* at 14-15.
14 According to Jason Moll, the system, called “Cheetah ServiceDesk,” works as follows:

15 There is a platform on their computer screen. If I can paint a picture
16 to you, it is a red/yellow/green scenario. Spreadsheet from top to
17 bottom where the drivers’ names are listed, and on the right from
18 left to right is how many deliveries they have for the day. And when
19 it is completed there is a dot on there, and it is green if they were
20 within their timeframe. It is yellow if they are getting close to being
21 late . . . and then it is red if the driver is outside his time frame. For
22 example, if it’s a 12:00 to 2:00 time, and it is 2:15, and the driver
23 hasn’t updated his Cheetah phone, by definition either he’s out of
24 range because the cellular service is out of range, or he’s late and
25 hasn’t updated it. So we have a problem, we need to start calling the
26 customer. That’s how they utilize it throughout the day.

22 *Id.* (citing Piller Motion Decl., Ex. 14 (Moll Depo.) at 93-94). Moll further testified that the data
23 from this system is used to generate reports, which are reviewed by managers and used to provide
24 feedback to drivers. *Id.* (citing Piller Motion Decl., Ex. 14 (Moll Depo.) at 88). Plaintiffs offer
25 testimony by Plaintiff Villalpando that when drivers are running late, dispatchers call them asking
26 why they are late and why they have not called in. *Id.* at 15 (citing Piller Decl., Ex. 11
27 (Villalpando Depo.) at 162-163).

28 Exel Customer Service Standards: According to Plaintiffs, Exel requires its drivers to meet

1 specific customer service standards, some originating from Exel’s clients and others developed by
2 Exel. *Id.* at 15-16 (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at 49 (testifying that
3 drivers are expected to abide by the policies of their accounts), Ex. 31 (Dalpino Depo.) at 76
4 (testifying that regardless of the retailer or account, there are customer service requirements
5 drivers need to follow), Ex. 40 (Exel’s Acceptance Requirements of Delivery Specialist) at
6 EDV009746 (stating that Exel provides “unmatched quality service” and promising to “exceed the
7 expectations of [Exel’s] client”). According to Smigelsky, Exel drivers are assigned
8 “professional development coordinators” during their orientation, who work with drivers on retail
9 client policy and interaction with customers. *Id.* at 16 (citing Piller Motion Decl., Ex. 7
10 (Smigelsky Depo.) at 13). Smigelsky testified that Exel provides drivers with instructions on how
11 to greet and interact with customers, how to avoid conduct that is culturally insensitive or has
12 sexual overtones, and provides scripts for various scenarios; it also provides training under the
13 Mother Jones Customer Service Program, which is a “universal program” about “how to treat
14 customers.” *Id.* (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at 98-100, 104-05, 148, Exs.
15 42-44 (scripts)). Professional development coordinators also review the results of surveys with
16 drivers to enhance their customer service skills. *Id.* (citing Piller Motion Decl., Ex. 7 (Smigelsky
17 Depo.) at 148, Ex. 31 (Dalpino Depo.) at 130-31 (testifying that the retailer or Exel conducts
18 surveys in the home and reviews the results with the driver)). According to Plaintiffs, Exel retains
19 the right to terminate drivers for receiving poor customer survey results. *Id.* at 17 (citing Piller
20 Motion Decl., Ex. 7 (Smigelsky Depo.) at 58-59 (testifying that not doing well on a client
21 scorecard can be a reason for terminating a driver’s contract)).

22 Exel Loading and Delivery Techniques: Plaintiffs offer evidence that Exel trains and
23 directs its drivers on their loading and delivery techniques, including where “their trucks must be
24 backed up at the loading dock, where they may pick up their manifests, where they should park
25 their trucks, where they should bring their returned merchandise, which dock to use, and how to
26 load merchandise onto the truck at the warehouse.” *Id.* (citing Piller Motion Decl., Ex. 31
27 (Dalpino Depo.) at 94-95, 121). Albarano testified that at some hub locations drivers would need
28 to learn specific skills, such as how to hook up a water line or install a washer or dryer or how to

1 install a crib. *Id.* (citing Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 35). According to
2 Plaintiffs, these procedures are “detailed in various mandatory training programs.” *Id.* at 17-18
3 (citing Piller Motion Decl., Ex. 34 (Exel Direct Driver Training: US DOT Regulations) at
4 EDV0001561 (stating that “[e]very driver must complete the Safer Way of Defensive Driving
5 Program”); Declaration of Joshua Konecky in Support of Plaintiffs’ Motion for Class
6 Certification, Ex. 14 (instructional DVDs: “The Safer Way of Protecting Floors” and “The Safer
7 Way of Preventing Water Damage”)).

8 Exel’s Policies and Practices Regarding Use of Helpers: According to Plaintiffs, “[i]t is
9 undisputed that Exel requires Class Members to have at least one helper.” *Id.* at 18 (citing Piller
10 Motion Decl., Ex. 14 (Moll Depo.) at 147-48 (testifying that while “[t]here are instances where [a
11 driver] will not need a helper,” “[d]rivers typically have helpers” and also that when drivers back
12 up, they are expected to have a spotter “which is typically the helper”), Ex. 39 (Capotosto Depo.)
13 at 46 (testifying that “[t]here are always two people on the truck. There is the driver and the
14 helper” and that this is Exel’s “operating practice”), Ex. 46 (Dalpino Depo. in *Villalpando v.*
15 *Transguard Ins. Co. of Am.* (“Transguard Depo.”)) at 104 (testifying that Villalpando had to hire a
16 helper)). Smigelski testified that the helpers “should be in the same apparel” as the driver, that is,
17 the Exel uniform. *Id.* (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at 161). Plaintiffs
18 further contend “Exel forbids helpers from driving the vehicles ‘unless they have been approved
19 by the company.’” *Id.* (citing Piller Motion Decl., Ex. 14 (Moll Depo.) at 146-147). Plaintiffs
20 also point to Smigelsky’s testimony that the management has the discretion to assign a helper to
21 another driver if the former driver has been terminated. *Id.* (citing Piller Motion Decl., Ex. 7
22 (Smigelsky Depo.) at 215). Plaintiffs note that the Compliance Manual warns that the contract of
23 a driver “who permits an unqualified driver or helper to operate in Exel service is subject to
24 immediate termination.” *Id.* (citing Piller Motion Decl., Ex. 15 (Compliance Manual) at
25 EDV000308). Plaintiffs also cite testimony by class members that “Exel often selected their
26 helpers or required them to terminate underperforming helpers.” *Id.* at 18 n. 11.

27 Exel’s Loans to Drivers and Collection of Debt: Plaintiffs asserts that Exel acts as “the
28 employer-lender and debt collector” because its drivers “struggle to make ends meet.” *Id.* at 19.

1 According to Plaintiffs, until June of 2013, Exel rented trucks on behalf of class members and
2 deducted the rental payments from their compensation. *Id.* (citing Piller Motion Decl., Ex. 5
3 (Albarano Depo. I) at 215 (testifying that prior to June 2013, Exel could “rent a vehicle . . . assign
4 it to the contractor and do deductions from . . . a contractor’s settlement, to pay for the rental”),
5 Ex. 12 (deposition of class member Pedro Navarro (“Navarro Depo.”) at 42 (testifying that he
6 didn’t have to pay for the truck because Exel was going to rent it for him), Ex. 47 (deposition of
7 class member Vladimir Marinov (“Marinov Depo.”)) at 44-45 (same)).

8 Plaintiffs present evidence that Exel provides “loans” to drivers for other expenses as well,
9 for example, to cover the upfront cost of repairs to their vehicles. *Id.* (citing Piller Motion Decl.,
10 Ex. 5 (Albarano Depo. I) at 224 (testifying that if a driver does not have the money to pay for
11 repairs upfront, Exel will provide a loan and then charge the cost back to the driver), Ex. 11
12 (Villalpando Depo.) at 93 (testifying that when he did not have the money to pay for the new tires
13 he needed for his truck, Exel advanced him the money for the tires and then took deductions from
14 his paycheck)). Plaintiffs also contend Exel “unilaterally settles customer damages claims directly
15 with the customer, and then deducts the payments from Drivers’ compensation without giving
16 them a choice in the matter.” *Id.* at 19-20 (citing Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at
17 65, Ex. 10 (Molina Depo.) at 102 (testifying that Exel took “shop fees” for damaged items out of
18 his pay without giving him an opportunity to assess the damage and determine whether it could be
19 repaired or to buy the item outright himself if it could not be repaired)). Finally, Plaintiffs point to
20 evidence that Exel “provides required items and services, such as uniforms, truck repairs,
21 insurance, and mandatory drug testing and physicals, directly to the Drivers, only to deduct the
22 costs from their compensation later.” *Id.* at 20 (citing Piller Motion Decl., Ex. 7 (Smigelsky
23 Depo.) at 65 (testifying that drivers are charged the cost of conducting required random drug
24 testing and biennial physicals), Ex. 8 (ITA) at EDV001684 (providing that drivers are responsible
25 for “all costs attendant to . . . operation and maintenance” of their vehicles and are “liable for loss
26 or damage to items intended for transport which are in [the driver’s] possession or under its
27
28

1 dominion and control”), Ex. 20 (ELA) at EDV0001637-38¹²).

2 Plaintiffs contend the undisputed facts are sufficient to establish, as a matter of law, that
 3 the class member drivers are employees rather than independent contractors. *Id.* at 20. As an
 4 initial matter, they note that the California Labor Code is a remedial statute that reflects the State’s
 5 strong public policy of protecting workers. *Id.* (citing *Murphy v. Kenneth Cole Prods., Inc.*, 40
 6 Cal. 4th 1094, 1103 (2007); *Ramirez v. Yosemite Water Co.*, 20 Cal. 4th 785, 794 (1999); *Lusardi*
 7 *Const. Co. v. Aubry*, 1 Cal. 4th 976, 985 (1992); *Thomas v. Home Depot USA, Inc.*, 527 F. Supp.
 8 2d 1003, 1010 (N.D. Cal. 2007); *Bureerong v. Uvawas*, 922 F. Supp. 1450, 1470 (C.D. Cal.
 9 1996)). According to Plaintiffs, California’s employee bond law and the Labor Code’s provisions
 10 requiring reimbursement of ordinary business expenses “are designed to protect employees from
 11 entering into exploitative lender-debtor relationships with their employers and acting as insurers of
 12 the company.” *Id.* (citing *Cal. State Rest. Ass’n. v. Whitlow*, 58 Cal. App. 3d 340, 347 (1976);
 13 *Nicholas Labs., LLC v. Chen*, 199 Cal. App. 4th 1240, 1247 (2011)). Similarly, California has a
 14 strong public policy in favor of strict enforcement of minimum wage and overtime laws, Plaintiffs
 15 contend. *Id.* at 21 (citing *Sav-On Drug Stores, Inc. v. Superior Court*, 34 Cal. 4th 319, 340
 16 (2004)). Meal and rest break laws also are designed to protect from substantial health and safety
 17 risks, Plaintiffs assert. *Id.* (citing *Kamar v. RadioShack Corp.*, 2008 WL 2229166, at *12 (C.D.
 18 Cal. May 15, 2008); *Lazarin v. Superior Court*, 188 Cal. App. 4th 1560, 1582-83 (2010)).
 19 According to Plaintiffs, the drivers in this case are just the “vulnerable low-wage workers these
 20 provisions were designed to protect.” *Id.*

21 Plaintiffs contend there is a presumption under California law that workers who have
 22 provided services for an employer are employees. *Id.* (citing *Narayan v. EGL, Inc.*, 616 F.3d 895,
 23 900 (9th Cir. 2010)). Because it is undisputed that Plaintiffs have performed services for Exel,
 24

25 ¹² The ELA provides that drivers must furnish their own insurance but may purchase company
 26 sponsored insurance coverage and have the charges deducted from their compensation. Piller
 27 Motion Decl., Ex. 20 (ELA) ¶ 6 & Ex. C. In addition, the ELA provides that certain items may be
 28 charged back to the driver. *Id.* ¶ 10 & Ex. D (listing specific charge-back items, including cost of
 company sponsored insurance, truck rentals and repairs, fines and citations, drug testing and
 background checks, vehicle washes, in-home damage to customer’s property, telephone, fuel,
 tires, merchandise claims, physical examinations, towing, delivery supplies and postage).

1 Plaintiffs assert, it is Exel’s burden to rebut that prima facie case of an employee relationship. *Id.*
2 The relevant test, according to Plaintiffs, is “whether the person to whom service is rendered has
3 the right to control the manner and means of accomplishing the result desired.” *Id.* at 22 (citing *S.*
4 *G. Borello & Sons, Inc. v. Dep’t of Indus. Relations*, 48 Cal. 3d 341, 350 (1989)). The focus of the
5 test, Plaintiffs assert, is how much control the hirer retains the right to exercise rather than how
6 much control the hirer actually exercises. *Id.* at 22-23 (citing *Ayala v. Antelope Valley*
7 *Newspapers, Inc.*, 59 Cal. 4th 522, 533 (2014)). Plaintiffs acknowledge that courts “also consider
8 several ‘secondary factors,’ but ‘[e]ven if one or two of the individual factors might suggest an
9 [independent contractor] relationship, summary judgment is nevertheless proper when . . . all the
10 factors weighed and considered as a whole establish . . . an [employment] and not an [independent
11 contractor relationship.]” *Id.* at 23 (quoting *Alexander v. FedEx Ground Package Sys., Inc.*, 765
12 F.3d 981, 988 (9th Cir. 2014)). Plaintiffs further assert that the right to terminate at will, without
13 cause, is strong evidence in support of an employment relationship. *Id.* (citing *Alexander*, 765
14 F.3d at 988). Plaintiffs argue that in order to defeat summary judgment on the misclassification
15 question, Exel must demonstrate that there is “a genuine dispute as to a fact material to the
16 question of whether it retained a right of control over the Drivers’ work.” *Id.* It is not sufficient,
17 they contend, to merely “alleg[e] that a few ‘secondary factors’ cut in its favor.” *Id.*

18 Plaintiffs argue that they are entitled to summary judgment that the drivers are
19 misclassified because the Ninth Circuit has reached the same conclusion in two cases involving
20 “highly analogous classes of delivery drivers,” in *Ruiz v. Affinity Logistics Corp.*, 754 F.3d 1093
21 (9th Cir. 2014) and *Alexander*, 765 F.3d 981 (9th Cir. 2014)). *Id.* According to Plaintiffs, these
22 cases stand for the proposition that “summary judgment for plaintiffs is appropriate where a
23 logistics company such as Exel retains the right to control its delivery drivers’ rate of pay,
24 appearance, route schedules, truck specifications, and hired help.” *Id.* at 24. Plaintiffs argue the
25 undisputed facts here are essentially the same as those in *Ruiz* and *Alexander* with respect to the
26 following facts:

- 27 • Exel’s drivers are required to sign the ITA and ELA as a condition of working for
28 the company and under these agreements, may be terminated without cause. *Id.* at

24.

- Exel’s written policies and training materials contain compulsory rules that are “not mere suggestions.” *Id.* at 25.
- Exel’s drivers are trained on how to follow “various detailed procedures, including how to maintain the appearance of the vehicles, stock proper tools, use their phones, how to load and unload merchandise, how to deliver particular items, and how to interact with customers.” *Id.*
- Exel requires its drivers to follow Exel’s rules regarding interactions with customers and third parties. *Id.* at 26.
- Exel monitors and supervises drivers to track their compliance with Exel’s rules. *Id.*
- Exel imposes specific requirements with respect to the appearance of drivers and their trucks. *Id.*
- Exel determines the routes drivers take and which drivers will be assigned to the particular routes.

All of these facts, Plaintiffs contend, support the conclusion that Exel’s policies, which give it significant control over the manner in which drivers perform their work, give rise to an employment relationship as a matter of law, as in *Alexander* and *Ruiz*. *Id.* at 27.

Plaintiffs further assert that although it is not necessary to consider the secondary factors in light of the control Exel exercises over the drivers, these factors also support a finding of an employment relationship. *Id.* at 27. In particular, Plaintiffs argue that: 1) “it is undisputed that the ITA gives Exel an unqualified right to terminate the Drivers at will”; 2) “it is undisputed that the Drivers’ work is integral to Exel’s regular business”; 3) “it is undisputed that the Drivers’ work did not require substantial skill”; 4) “it is undisputed that Exel and the Drivers did not contemplate an end to their relationship”; 5) “Exel subjected the Drivers to various methods of supervision”; 6) “though Exel paid the Drivers per delivery rather than by the hour, Exel unilaterally set the pay rate and determined the amount of stops”; and 7) “it is undisputed that Exel determined the tools and instrumentalities that the Drivers used to perform their job, even

1 providing many of them directly to the Drivers.” *Id.* at 27-28.

2 Plaintiffs reject the argument that Exel has made in the past that the “entrepreneurial
3 opportunities” it offers its drivers support the conclusion that they are properly classified as
4 independent contractors. *Id.* at 28-29. According to Plaintiffs, this same argument was rejected
5 by the Ninth Circuit in *Alexander*, where the court found that “[t]here is no indication that
6 California has replaced its longstanding right-to-control test with the new entrepreneurial-
7 opportunities test . . . entrepreneurial opportunities do not undermine a finding of employee
8 status.” *Id.* (citing *Alexander*, 765 F.3d at 994). Plaintiffs also reject Exel’s assertions during this
9 case that it is not an employer because any control it exercises over the drivers is a result of
10 regulatory requirements and the demands of its customers. *Id.* at 29-33. According to Plaintiffs, a
11 similar argument was rejected by the California Supreme Court in *Borello*, where the employer
12 argued that a contract between the defendant and its workers was not evidence of a right to control
13 because the defendant’s retail customers made the defendant adopt the contract. *Id.* at 29 (citing
14 48 Cal. 3d at 356-57). Plaintiffs also point to the Stipulated Dismissal of Exel’s retail customers
15 as defendants in this case, in which Exel stipulated that these customers do not exercise control
16 over its drivers and that the policies to which the drivers are subject or those of Exel. *Id.* (citing
17 Docket No. 140). Moreover, Exel asserts, *Ruiz* makes clear that the *Borello* test does not require
18 that an employer have *intended* to control its workers; what matters is only whether the employer
19 has the *right* to control its workers. *Id.* at 30. Thus, even if requirements imposed by Exel on its
20 drivers were adopted in order to comply with government regulations, they may still support a
21 finding that the workers are employees. *Id.* In any event, Plaintiffs assert, in this case it is
22 undisputed that Exel’s requirements exceed regulatory requirements. *Id.* Further, Plaintiffs
23 contend, “neither the Federal Government, nor Exel’s retail customers, ordered it to adopt an
24 independent contractor business model - Exel *chose* to do so.” *Id.* Many regulatory requirements
25 flow from this choice, such as the requirement under 49 C.F.R. § 376.12(c)(1) that Exel must have
26 “exclusive possession, control and use” of vehicles if it chooses to lease the vehicles its drivers
27 use. *Id.*

28 **2. Opposition**

1 Exel argues that summary judgment must be denied on the classification question because,
2 under *Borello*, courts must conduct a careful weighing of the evidence as to the twelve factors
3 identified in that case and Plaintiffs have relied on only one of the factors, the right to control.
4 Defendants' Opposition at 1. According to Exel, Plaintiffs have relied almost entirely upon the
5 similarities between the facts here and those in *Alexander* and *Ruiz*, but those cases did not find
6 "that every independent contractor who contracts with a motor carrier is an employee as a matter
7 of California law." *Id.* Further, the *Ruiz* case was not decided on summary judgment, Exel points
8 out, but rather, was decided after a three-day trial addressing factual issues related to the
9 classification issue. *Id.* at 1-2. Here, Exel asserts, the Court should deny summary judgment
10 because *Borello* requires consideration not only of the right to control but also the secondary
11 factors and there are material disputes of fact as to both the right to control and the secondary
12 factors. *Id.* at 2-5.

13 As a preliminary matter, Exel raises certain evidentiary objections to Plaintiffs' reliance on
14 the deposition testimony of Greg Smigelsky and James Dalpino, arguing that both testified that
15 they lacked personal knowledge of how Exel's California operations were run and the policies in
16 place during the applicable statute of limitations. *Id.* at 5-7.

17 Exel contends there is conflicting evidence as to its right to control the work of its drivers
18 and that there is also evidence relating to secondary factors under *Borello* that supports the
19 independent contractor classification. *Id.* at 8. First, Exel argues that the "right to control" inquiry
20 looks to the individual worker; therefore, Exel contends, "when an individual is not required to
21 perform the work personally, he cannot be misclassified as an employee." *Id.* (citing *Estrada v.*
22 *FedEx Ground Package Sys., Inc.*, 154 Cal. App. 4th 1 (2007); *Ayala v. Antelope Valley*
23 *Newspaper, Inc.*, 59 Cal. 4th 522, 548 (2014) (Baxter, J., concurring)). Here, Exel argues, the
24 evidence establishes that Plaintiffs were not contractually required to perform the services
25 personally *and* that many class members did not, in fact, perform delivery services for Exel
26 themselves, instead hiring others and operating multiple trucks to perform deliveries. *Id.*

27 Exel cites to the ITA and ELA, which require only that Plaintiffs "furnish whatever labor
28 is necessary to provide delivery services to [Exel's] customers." *Id.* (citing Declaration of James

1 H. Hanson in Support of Defendants’ Opposition to Motion for Summary Judgment and/or
2 Summary Adjudication of Defendants’ Independent Contractor Defense (“Hanson Opposition
3 Decl.”), Ex. C (Exhibit 2 to Deposition of Tafiti Shekur (Copies of ITA and ELA signed by
4 Shekur), Ex. D (Exhibit 3 to Deposition of Daniel Villalpando (Copy of ITA signed by
5 Villalpando)).¹³ Similarly, Exel asserts, these contracts “leave to Plaintiffs the responsibility for
6 ‘direc[ing] the operation of any equipment in all respects and . . .determin[ing] the means of
7 performance, including but not limited to such matters as choice of any routes, points of service of
8 equipment, rest stops and timing and scheduling of customer deliveries.’” *Id.*¹⁴

9 Exel also points to the testimony of three class members who testified that they operated
10 multiple trucks and hired others to operate them. *Id.* at 9-10. First, Exel points to the deposition
11 testimony of class Victoriano Molina, who testified that: 1) he started his hauling business in 2004
12 with one truck, one driver and one helper and later acquired a second truck and another driver and
13 helper; 2) when he started his business it was “generally low maintenance enough for [him] to
14 continue working full time in management on the side”; and 3) that he initially drove for Exel
15 about two months and later drove only when needed, for example when one of his hired drivers
16 was sick or he was waiting for a driver to go through Exel’s orientation and approval process. *Id.*
17 at 9 (citing Hanson Opposition Decl., Ex. E (Deposition of Victoriano Molina (“Molina Depo.”))
18 at 23-24, 28-29, 49-50).

19 Exel also cites the testimony of class member Byron Cifuentes, who testified that his
20 corporation, Cifuentes Trucking, has nine trucks, five of which make deliveries for a motor carrier
21 company called CEVA and four of which deliver for Exel. *Id.* (citing Hanson Opposition Decl.,
22

23 ¹³ Exel cites both the ITA ¶ 7 and the ELA ¶ 7 for the quoted language. In fact, this language
24 appears only in ¶ 7 of the ITA. Paragraph 7 of the ELA addresses insurance requirements.
25 Presumably, Exel intended to reference ¶ 8 of the ELA, which contains similar (but not identical)
26 language stating, “CONTRACTOR shall, at its own expense . . . furnish whatever labor is
27 necessary to operate the LEASED EQUIPMENT.”

28 ¹⁴ Again, Exel suggests that this language is found in both the ITA and the ITA at ¶ 9. In fact, it is
only found in the ITA. However, very similar language is found in the ELA at ¶ 11, which states
that “CONTRACTOR will direct the operation of the LEASED EQUIPMENT in all respects and
will determine the means of performance including, but not limited to, such matters as choice of
any routes, points of service of equipment, rest stops, and timing and scheduling in accordance
with customer delivery commitments.”

1 Ex. F (Deposition of Byron Cifuentes (“Cifuentes Depo.”)) at 14). Cifuentes testified that his
2 company provides delivery services for Exel in San Diego delivering Sears products, employing
3 five drivers and seven helpers at that location. Hanson Opposition Decl., Ex. F (Cifuentes Depo.)
4 at 11-12. Cifuentes testified that he personally operates a truck two or three days a week,
5 depending how busy things are. *Id.* at 14. On days that Cifuentes does not want to drive the truck
6 or needs to run personal errands, he assigns one of his employees to operate the truck. Hanson
7 Opposition Decl., Ex. F (Cifuentes Depo.) at 15.

8 Finally, Exel relies on the testimony of class member Edmundo Vega. Defendants’
9 Opposition at 9-10. Vega testified that his business, E & J Trucking, owns four trucks that
10 provide delivery services for Exel and sometimes leases a fifth when business is good. *Id.* (citing
11 Hanson Opposition Decl., Ex. G (Deposition of Edmundo Vega (“Vega Depo.”)) at 14-15). He
12 testified that he employs four drivers and four helpers and that when he hires drivers or helpers he
13 does so on the basis of referrals or because he knows the person. *Id.* (citing Hanson Opposition
14 Decl., Ex. G (Vega Depo.) at 19, 56). He testified that he manages the business and personally
15 drives a truck between three and six days a week, depending on the time of year and how busy
16 things are. *Id.* at 9-10 (citing Hanson Opposition Decl., Ex. G (Vega Depo.) at 20, 62-65).¹⁵

17 Exel also challenges Plaintiffs’ assertion that they “could not negotiate or request
18 additional compensation rates for their services.” *Id.* at 10. Exel cites the testimony of class
19 member Juan Mena that on one occasion, “all the contractors got together” and asked for better
20 pay; according to Mena, Exel “raised up the delivery fee a little bit” in response. *Id.* (citing
21 Hanson Opposition Decl., Ex. I (Deposition of Juan Mena (“Mena Depo.”)) at 62-63). Exel also
22 contends “Plaintiffs agreed that they would get higher rates for ‘special deliveries.’” *Id.* at 10-12
23 (citing Hanson Opposition Decl., Ex. G (Vega Depo.) at 14-15, 68-69 (testifying that when Exel
24 asks a driver to make a delivery that is out of the area, Exel and the driver negotiate a price), Ex. J
25 (Deposition of Asuncion Aguilera (“Aguilera Depo.”)) at 87 (testifying that he was once paid a
26

27 _____
28 ¹⁵ Exel also notes that one class member, Theodore Roumbanis, testified that he could hire another
driver to operate his truck so long as that person was approved by Exel. *Id.* at 10 (citing Hanson
Opposition Decl., Ex. H (Roumbanis Depo.) at 49).

1 higher rate of \$150 for a special delivery, though he did not negotiate with Exel to get that
2 amount)). As another example of negotiation of compensation by class members, Exel cites
3 testimony of Lazaro Padilla. *Id.* at 12. Padilla testified that he never negotiated about pay with
4 Exel but that when Exel failed to pay for the diesel fuel, which Exel was supposed to pay, he
5 would go to the manager’s office and try to get paid the full amount; he testified, “sometimes I get
6 paid, sometimes they don’t pay for . . . the diesel.” Hanson Opposition Decl., Ex. K (Deposition
7 of Lazaro Padilla (“Padilla Depo.”)) at 58-60.

8 Exel also points to the testimony of Barajas Montes that he sometimes asked for and
9 received “a little bit more” pay if he had to wait for a customer or return later to do a delivery.
10 Defendants’ Opposition at 12 (citing Hanson Opposition Decl., Ex. L (Deposition of Barajas
11 Montes (“Montes Depo.”)) at 52-53). Exel also presents a declaration by class member Charlie
12 Martinez, who states that during the “busy season” MXD “agrees to pay for [his] rental truck . . .
13 on top of whatever per-stop amount [he] receive[s].” *Id.* (citing Hanson Opposition Decl., Ex. M
14 (Declaration of Charlie Martinez (“Martinez Decl.”)) ¶ 5). According to Exel, another class
15 member, Mauricio Torres, also testified that when he was asked to make certain deliveries he
16 would request additional compensation and Exel would counter with another number, which he
17 would accept. *Id.* (citing Hanson Opposition Decl., Ex. N (Deposition of Mauricio Torres
18 (“Torres Depo.”)) at 33-34).¹⁶

19 Next, Exel argues that the testimony of Cifuentes, Molina and Torres directly contradicts
20 Plaintiffs’ assertion that they were “restricted to working for Exel and dependent on Exel for their
21 work.” *Id.* at 12-13 (citing Hanson Opposition Decl., Ex. E (Molina Depo.) at 35 (testifying that
22 he has accounts with “numerous brokers”), Ex. F (Cifuentes Depo.) at 38 (testifying that in
23 addition to providing services for Exel he also contracted with another company to provide
24 delivery services), Ex. N (Torres Depo.) at 6, 28 (testifying that his trucking company provided
25 delivery services for both Exel and Affinity)).

26

27 ¹⁶ Torres testified that “[t]his was like a game. . . . [I]t was practically not a negotiation. They
28 would just give me what they were going to give me.” Hanson Opposition Decl., Ex. N (Torres
Depo.) at 33.

1 Exel also rejects Plaintiffs’ assertion that they did not have control over their delivery
 2 routes. *Id.* at 13-14. It points to Cifuentes’s testimony that when a customer is not ready for a
 3 delivery and there is another customer nearby, the driver can call the next customer and ask if they
 4 can make that delivery first, without asking permission from Exel. *Id.* (citing Hanson Opposition
 5 Decl., Ex. F (Cifuentes Depo.) at 89, 91). In fact, Exel asserts, the testimony of many class
 6 members shows that “it was common practice to alter the delivery route.” *Id.* (citing Hanson
 7 Opposition Decl., Ex. N (Torres Depo.) at 46-47 (testifying that where he had to make two
 8 deliveries in same area but manifest had him making a delivery somewhere else between the first
 9 and second delivery, he called the customer to see if he could rearrange the order of the
 10 deliveries), Ex. O (Deposition of Miguel Jauregui (“Jauregui Depo.”)) at 56-60 (testifying that
 11 sometimes he adjusted the order of the stops if he thought the route was not good and the
 12 customers agreed and usually did not call in to Exel for permission to make the change), Ex. P
 13 (Marinov Depo.) at 36-37 (testifying that when he received his manifest in the morning he would
 14 call customers and try to come up with more efficient route and that was how he completed route
 15 earlier)). One class member cited by Exel also testified that he was required to make deliveries to
 16 stores as well as individuals and that there were no delivery windows for the deliveries to stores.
 17 *Id.* at 13-14 (citing Hanson Opposition Decl., Ex. Q (Deposition of Wayne Vivolo (“Vivolo
 18 Depo.”)) at 81).

19 Exel argues further that to the extent its requirements were based on federal law - such as
 20 the Federal Motor Safety Carrier Regulations requiring that a motor carrier retain “exclusive
 21 possession, control and use of the equipment for the duration of the lease” - these requirements are
 22 not indicative of an employer-employee relationship as a matter of law. *Id.* at 14 (citing *Amerigas*
 23 *Propane, L.P. v. Landstar Ranger, Inc.*, 184 Cal. App. 4th 981, 997 (2010); *Sw. Research Inst. v.*
 24 *Unemployment Ins. Appeals Bd.*, 81 Cal. App. 4th 705, 708-09 (2000); *Sahinovic v. Consol.*
 25 *Delivery & Logistics, Inc.*, No. C-02-04977 SBA, 2004 WL 5833528, at*7 (N.D. Cal. Sept. 13,
 26 2004); *Desimone v. Allstate Ins. Co.*, No. 96-03606 CW, 2000 WL 1811385, at *13 (N.D. Cal.
 27 Nov. 7, 2000)). Similarly, Exel argues, “[n]o case has held that compliance with customer
 28 expectations constitutes a putative employer’s control *as a matter of law.*” *Id.* (emphasis in

1 original).

2 Exel also argues that the evidence shows that Plaintiffs controlled their own work
3 schedules and hours, with some class members working only a few days a week and others
4 working five to six days a week. *Id.* at 15 (citing Hanson Opposition Decl., Ex. F (Cifuentes
5 Depo.) at 14-15 (testifying that the number of days per week he works varies), Ex. G (Vega
6 Depo.) at 61 (testifying that he takes a vacation about three times a year of no more than five
7 days), Ex. M (Martinez Decl.) ¶ 5 (stating that he can drive part-time because he has other
8 drivers), Ex. P (Marinov Depo.) at 72-73 (testifying that he doesn't usually take days off but once
9 he took a few months off to go to Russia without a problem), Ex. R (Albarano Depo.) at 64
10 (testifying that "[t]he independent contractors have the ability to determine what schedule they
11 would like to work, what their availability is").

12 Exel also contends class members "operated their own businesses" and that it was their
13 own decision, not Exel's as to whether to form a business. *Id.* at 15. As examples, they cite to the
14 testimony of several class members who established trucking business of their own that provide
15 delivery services to Exel. *Id.* at 15-16 (citing Hanson Opposition Decl., Ex. E (Molina Depo.) at
16 19-23, 50), Ex. F (Cifuentes Depo.) at 7-8, 14-16, 87-88, Ex. H (Rambounis Depo.) at 41, Ex. I
17 (Mena Depo.) at 23-26, 65, Ex. J (Aguilera Depo.) at 95-97, Ex. M (Martinez Decl.) ¶ 3).

18 Exel rejects Plaintiffs' assertion that it requires helpers and that it controls the selection of
19 drivers. *Id.* at 16-17. It points to the testimony of Cifuentes that when he hired drivers, "they
20 asked [him] for a job and [he] gave them a job." *Id.* (citing Hanson Opposition Decl., Ex. F
21 (Cifuentes Depo.) at 75). Exel also cites the testimony of Jason Moll that while Exel drivers
22 typically have helpers because many services (such as furniture delivery) require two people, there
23 are some routes where a driver does not need a helper. *Id.* (citing Hanson Opposition Decl., Ex. S
24 (Moll Depo.) at 147). According to Exel, "[t]he United States Department of Transportation sets
25 the qualification requirements for individuals who want to operate commercial motor vehicles."
26 *Id.* at 16 (citing 49 C.F.R. § 391.11). Exel further asserts, "Plaintiffs could use any driver they
27 wanted so long as the driver satisfied those federal qualifications." *Id.* at 17 (citing Hanson
28 Opposition Decl., Ex. G (Vega Depo.) at 60-61, Ex. H (Rambounis Depo.), Ex. O (Jauregui

1 Depo.) at 56, Ex. Q (Vivolo Decl.) ¶ 9).

2 In support of the independent contractor classification, Exel also points to evidence that
3 Plaintiffs provided their own tools. *Id.* at 17. In particular, Exel presents evidence that class
4 members purchased their own trucks rather than obtaining them from Exel. *Id.* (citing Hanson
5 Opposition Decl., Ex. E (Molina Depo.) at 40-41, 44-45, Ex. F (Cifuentes Depo.) at 14, 16, Ex. G
6 (Vega Depo.) at 16-18, Ex. I (Mena Depo.) at 32-33, Ex. J (Aguilera Depo.) at 33, Ex. N (Torres
7 Depo.) at 7, Ex. U (Deposition of Rogelio De La Fuente) at 17). Exel also points to testimony that
8 it did not tell its drivers where they should go to have maintenance on their trucks performed. *Id.*
9 at 17-18 (citing Hanson Opposition Decl., Ex. F (Cifuentes Depo.) at 95, Ex. G (Vega Depo.) at
10 41-42, Ex. K (Padilla Depo.) at 72, Ex. N (Torres Depo.) at 27). Nor did it dictate to its drivers
11 whether they would provide their own insurance or participate in group insurance available to Exel
12 contractors, Exel contends. *Id.* at 18 (citing Hanson Opposition Decl., Ex. G (Vega Depo.) at 36).

13 Another *Borello* factor that supports Exel’s classification of its drivers as independent
14 contractors, Exel asserts, is the fact that Exel pays by the job rather than on an hourly basis. *Id.* at
15 18. Exel rejects Plaintiffs’ assertion that Exel sets the rate, arguing that this is not the test and in
16 any event, the evidence shows that Exel sometimes pays its drivers a higher rate when requested,
17 as discussed above. *Id.*

18 Exel also contends it does not supervise Plaintiffs’ work, citing Albarano’s deposition
19 testimony that Exel does not “oversee the work that the contractors do throughout the day making
20 deliveries.” *Id.* (citing Hanson Opposition Decl., Ex. R (Albarano Depo.) at 252). Exel cites
21 testimony of a number of Plaintiffs that while making deliveries, they only communicated with
22 Exel when problems arose. *Id.* (citing Hanson Opposition Decl., Ex. F (Cifuentes Depo.) at 70,
23 Ex. G (Vega Depo.) at 95-96, Ex. V (Raymundo Depo.) at 55-57). Exel also rejects Plaintiffs’
24 reliance on evidence relating to ride-alongs and follow-alongs to establish an employment
25 relationship. *Id.* at 19. Exel cites Cifuentes’s testimony that he did not recall that he or his drivers
26 had ever experienced a ride-along and that he remembered only one follow-along, where an Exel
27 employee and a Sears employee followed him for one or two stops and asked him if everything
28 was going okay. *Id.* (citing Hanson Opposition Decl., Ex. F (Cifuentes Depo.) at 103-04).

1 According to Exel, this sort of limited oversight does not convert an independent contractor
2 relationship into an employer-employee relationship. *Id.* (citing *Beaumont-Jacques v. Farmer*
3 *Grp., Inc.*, 217 Cal. App. 4th 1138, 1143 (2013) (citing *McDonald v. Shell Oil*
4 *Co.*, 44 Cal. 2d 785 (1955)); *Lockett v. Allstate Ins. Co.*, 364 F. Supp. 2d 1368, 1377-78 (M.D. Ga.
5 2005) (citing *Desimone v. Allstate Ins. Co.*, No. C-96-03606 CW, 2000 WL 1811385, at *13 (N.D.
6 Cal. 2000)); *N. Am. Van Lines, Inc. v. NLRB*, 869 F.2d 596, 599 (D.C. Cir. 1989)).

7 Finally, Exel contends, the independent contractor classification is supported by evidence
8 that Plaintiffs have the opportunity for profit and loss - a fact they contend is relevant under
9 *Borello* even though California courts have not adopted the “economic realities” test that applies
10 under the FLSA. *Id.* at 19-20. According to Exel, “the import of this factor on the inquiry is
11 evident - an independent contractor can make decisions that will impact the amount of revenue
12 and profit he generates, whereas an employee cannot.” *Id.* at 20. The testimony of Plaintiffs
13 “demonstrates that Plaintiffs had precisely those freedoms and opportunities,” Exel contends,
14 pointing to the testimony of class members Cifuentes, Molina, Vega and Martinez discussed
15 above. *Id.*

16 In sum, Exel asserts there is conflicting evidence as to the right of control as well as the
17 secondary factors under *Borello* and therefore the Court should deny Plaintiffs’ request for
18 summary judgment that they are misclassified as independent contractors. *Id.* at 20-21.

19 3. Reply

20 In their Reply brief, Plaintiffs contend Exel has attempted to demonstrate a fact question as
21 to their classification based on how Exel *actually* exercises control over its drivers when the
22 applicable standard requires the Court to look to the amount of control Exel retains the *right* to
23 exercise. Plaintiffs’ Reply at 1 (citing *Ayala v. Antelope Valley Newspapers, Inc.*, 59 Cal. 4th 522,
24 533 (2014)). According to Plaintiffs, Exel’s “written policies, contracts and procedures . . . are
25 indisputably uniform across the Class, regardless of what differences or disputes there may be in
26 how Exel actually exercises its control” and therefore, the Court can decide the classification issue
27 on summary judgment. *Id.* In particular, Plaintiffs contend Exel has not demonstrated a material
28 dispute of fact that “Exel retains the right to: control the appearance of the Drivers; control the

1 appearance and specifications of their delivery vehicles; determine the customers, packages, and
2 time windows for the deliveries on the Drivers' routes; set the 'per stop' rate of pay; hold regular
3 morning meetings for the Drivers to attend with Exel management; conduct 'follow-alongs' to
4 monitor and evaluate Driver performance; terminate Drivers without cause; and distribute policy
5 and procedure manuals containing mandatory language, among other things." *Id.* These same
6 facts were sufficient to support a finding that drivers were misclassified in *Ruiz* and *Alexander*,
7 Plaintiffs contend. *Id.* Further, they support a finding under *Borello* that Plaintiffs are employees,
8 Plaintiffs assert. *Id.* at 3-6.

9 According to Plaintiffs, the Ninth Circuit's interpretation of state law in *Alexander* is
10 binding on this court and applies here, despite Exel's argument to the contrary. *Id.* at 6 (citing
11 *Pershing Park Villas Homeowners Ass'n v. United Pac. Ins. Co.*, 219 F.3d 895, 903 (9th Cir.
12 2000)). Plaintiffs further assert that the California Supreme Court's decision in *Ayala* shows that
13 the *Alexander* decision correctly interprets *Borello*. *Id.* Plaintiffs reject Exel's assertion that they
14 have ignored the secondary factors under *Borello* and argue that those factors do not change the
15 result. *Id.* at 6-8. Plaintiffs also argue that Exel has not demonstrated that there is a material
16 dispute of fact as to the right of control because, rather than addressing the policies and procedures
17 that give Exel the *right* to control the manner in which the class members perform their work, Exel
18 focuses on the testimony of what Plaintiffs call "happy campers" (Cifuentes, Torres, Mena and
19 Vega), who offer testimony that at best establishes fact questions as to how Exel *exercises* its
20 control. *Id.* at 8-11. Plaintiffs also contend that the "happy campers" are "outliers" and that even
21 they "balked at the suggestion that Exel permitted them an opportunity to negotiate pay rates." *Id.*
22 at 10.

23 Plaintiffs reject Exel's objection to their reliance on the Smigelsky testimony. *Id.* at 11.
24 According to Plaintiffs, Exel's objection is based on a mistaken belief that Smigelsky must have
25 personal knowledge of Exel's "operations on the ground" to testify as to the right of control
26 conferred by Exel's nationwide policies. *Id.* Plaintiffs contend that as a high-ranking manager,
27 Smigelsky is familiar with Exel's uniform policies applicable to its drivers, including in
28 California, and therefore, that he is qualified to testify as to those policies, regardless of whether

1 he is physically based in California. *Id.*¹⁷

2 Plaintiffs argue that Exel has also attempted to manufacture disputes by mischaracterizing
3 the testimony of its witnesses. *Id.* at 11. For example, it asserts, Exel’s Safety Director admitted
4 that Exel’s policy is that every driver must have at least one helper and Exel’s training materials
5 emphasize the importance of using a helper for safety reasons, but Exel now points to the
6 testimony of Jason Moll to suggest that Exel does *not* require its drivers to have helpers. *Id.* at 12
7 (citing Reply Declaration of Nathan Piller in Support of Plaintiffs’ Motion for Summary Judgment
8 and/or Summary Adjudication of Defendants’ Independent Contractor Defense (“Piller Reply
9 Decl.”), Ex. 14 (The Safer Way of Driving) at EDV000409 (backing accidents are “entirely
10 preventable” and are commonly caused by not using a spotter), Ex. 15 (Capotosto Depo.) at 46 (it
11 is an “operating practice” that “[t]here are always two people on the truck. There is the driver and
12 the helper.”)). Plaintiffs note that although Moll testified that helpers are not always used, he
13 testified that a helper *is* needed for furniture and appliance deliveries. *Id.* (citing Piller Reply
14 Decl., Ex. 8 (Moll Depo.) at 147). Further, Plaintiffs assert, Moll was not able to identify any
15 specific route or service that would not require a helper. *Id.* In addition, although Exel cited to
16 testimony by one class member, Wayne Vivolo, that he does not use a helper, Vivolo is
17 “inherently an outlier because he did not perform home deliveries.” *Id.* at 12 (citing Hanson
18 Opposition Decl., Ex. T (Vivolo Decl.) ¶¶ 4-5).

19 Similarly, Plaintiffs contend, Exel attempts to manufacture a dispute about whether it
20 supervises its drivers by citing testimony by Albarano that Exel does not “oversee the work that
21 the contractors do throughout the day making deliveries.” *Id.* Yet Albarano admitted in her
22 deposition that Exel *does* supervise drivers during the day with the use of ride-alongs, as well as
23 other monitoring or supervision practices. *Id.* at 12-13 (citing Piller Reply Decl., Ex. 2 (Albarano
24 Depo.) at 48-49, 52, 134-35, 178, 252).

25 Plaintiffs argue that the “happy camper” declarations should be discounted because
26 testimony elicited by current employees is inherently suspect. *Id.* at 13 (citing *Mevorah v. Wells*

27 _____
28 ¹⁷ Plaintiffs do not respond to Exel’s objection to the testimony of James Dalpino, a former Exel
recruiter who testified in his deposition that he had not worked for Exel since March 30, 2009.

1 *Fargo Home Mortg., Inc.*, No. C-05-01175 MHP, 2005 WL 4813532 (N.D. Cal. Nov. 17, 2005)).
2 Even if this testimony is taken at face value, however, it does not support a finding under *Borello*
3 that Plaintiffs are independent contractors, Plaintiffs assert. *Id.* These drivers testified that they
4 work part-time and take vacations, but neither is inconsistent with a finding that they are
5 employees, Plaintiffs assert. *Id.* (citing *Estrada v. FedEx Ground Package Sys., Inc.*, 154 Cal.
6 App. 4th 1, 14 (2007); *Dole v. Snell*, 875 F.2d 802, 806 (10th Cir. 1989)). Plaintiffs assert that
7 evidence that three class members out of 400 worked for other companies while employed by Exel
8 also does not undermine Plaintiffs’ position because “working two jobs is fully consistent with
9 employee status.” *Id.* Similarly, evidence that class members negotiated pay rates also does not
10 support a finding that they are independent contractors because “negotiation over pay rates is
11 commonplace in employment relationships.” *Id.* at 14 (citing *Saraff v. Standard Ins. Co.*, 102
12 F.3d 991, 993 (9th Cir. 1996)). Nor is the evidence that Plaintiffs can select their own second
13 drivers or helper relevant, Plaintiffs assert, given that it is undisputed that Exel has the right to
14 reject those drivers and helpers, just as in *Alexander* and *Ruiz*. *Id.*

15 Finally, Plaintiffs reject Exel’s assertion that its right of control is not indicative of an
16 employer-employee relationship because it is simply a reflection of requirements that arise from
17 customer needs and federal law. *Id.* at 15. According to Plaintiffs, the law on this point is not
18 unsettled, as Exel suggests, but rather, is well-established, holding that the employer’s *intent* as to
19 its exercise of control is not relevant to the classification question. *Id.* (citing *Borello*, 48 Cal. 3d
20 at 356-57; *Ruiz*, 754 F.3d at 1102 n. 5). In any event, Plaintiffs assert, Exel’s argument fails
21 because the evidence shows (and Exel has admitted) that its policies go beyond what is required
22 under federal law. *Id.*

23 **III. LEGAL STANDARD UNDER RULE 56**

24 Summary judgment on a claim or defense is appropriate “if the movant shows that there is
25 no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of
26 law.” Fed. R. Civ. P. 56(a). In order to prevail, a party moving for summary judgment must show
27 the absence of a genuine issue of material fact with respect to an essential element of the non-
28 moving party’s claim, or to a defense on which the non-moving party will bear the burden of

1 persuasion at trial. *Celotex Corp. v. Catrett*, 477 U.S. 317, 323 (1986). Once the movant has
2 made this showing, the burden then shifts to the party opposing summary judgment to designate
3 “specific facts showing there is a genuine issue for trial.” *Id.* On summary judgment, the court
4 draws all reasonable factual inferences in favor of the non-movant. *Scott v. Harris*, 550 U.S. 372,
5 378 (2007).

6 “If a nonmovant shows by affidavit or declaration that, for specified reasons, it cannot
7 present facts essential to justify its opposition, the court may . . . defer considering the motion”
8 and may also “allow time to obtain affidavits or declarations or to take discovery.” Fed. R. Civ. P.
9 56(d); *see also Tatum v. City & County of San Francisco*, 41 F.3d 1090, 1100 (9th Cir. 2006) (“A
10 party requesting a continuance pursuant to [Rule 56(d)] must identify by affidavit the specific facts
11 that further discovery would reveal, and explain why those facts would preclude summary
12 judgment”). The court may deny a request pursuant to Rule 56(d) where a party has failed
13 diligently to pursue discovery prior to summary judgment. *Mackey v. Pioneer Nat’l Bank*, 867
14 F.2d 520, 524 (9th Cir. 1989) (“A movant cannot complain if it fails diligently to pursue discovery
15 before summary judgment”).

16 **IV. DEFENDANT’S MOTION FOR SUMMARY JUDGMENT**

17 **A. Whether Plaintiffs’ Misclassification Claims are Preempted by the FAAAA**

18 In the Court’s March 28, 2014 Order, it rejected Exel’s argument that Plaintiffs’ meal and
19 rest break claims were preempted by the FAAAA but left open the possibility that at a later stage
20 of the case, when a factual record had been developed, Defendants might be able to establish that
21 California’s meal and rest break requirements would have an effect on Exel’s prices, routes or
22 services that is significant enough to give rise to preemption. March 28, 2015 Order at 21-22.
23 Now, Exel raises the issue of FAAAA preemption once again. It does not do so, however, based
24 on the evidence that has been obtained through discovery. Rather, it seeks another bite at the
25 apple, raising a theory of FAAAA preemption that it could (and should) have raised in its motion
26 to dismiss. Instead of arguing that the FAAAA preempts Plaintiffs’ meal and rest break claims
27 because meal and rest break laws reduce the amount of service a carrier can provide - a theory that
28 was rejected by the undersigned and also by the Ninth Circuit in *Dilts v. Penske Logistics, LLC*,

1 769 F.3d 637 (9th Cir. 2014) - Exel now argues that the FAAAA preempts *all* of Plaintiffs’
2 claims because Plaintiffs’ claims would require it to change its business model and reclassify its
3 drivers as employees. Even assuming that Exel has not waived this argument by failing to raise it
4 in its motion to dismiss, the Court finds its new theory of preemption unpersuasive.¹⁸

5 The FAAAA preemption clause preempts state laws and regulations “related to a price,
6 route, or service of any motor carrier . . . with respect to the transportation of property.” 49 U.S.C.
7 § 14501(c)(1). As the Court stated in its previous order, “[t]he FAAAA preemption clause was
8 intended to have a broad scope” but “it does not preempt state requirements that have only a
9 ‘tenuous, remote, or peripheral’ relationship to prices, routes or services.” March 28, 2014 Order
10 at 19 (citing *Morales v. TWA*, 505 U.S. 374, 383-84 (1992)). Further, the Supreme Court has
11 made clear that “it is not sufficient that a state law relates to the ‘price, route, or service’ of a
12 motor carrier in any capacity; the law must also concern a motor carrier’s ‘transportation of
13 property.’” *Dan’s City Used Cars, Inc. v. Pelkey*, 133 S. Ct. 1769, 1778-79 (2013) (quoting 163
14 N.H. 483, 490 (2012)).

15 The Supreme Court has held that “what is important . . . is the effect of a state law,
16 regulation or provision, not its form.” *Northwest, Inc. v. Ginsberg*, 134 S. Ct. 1422, 1430 (2014)
17 (holding that the Airline Deregulation Act, which contains a preemption clause that is identical to
18 the one in the FAAAA, can be undermined “just as surely by a state common-law rule as it can by
19 a state statute or regulation”). Nonetheless, the Ninth Circuit has found that in enacting the
20 FAAAA, “Congress did not intend to preempt generally applicable state transportation, safety,
21 welfare or business rules that do not otherwise regulate prices, routes, or services.” *Dilts v. Penske*
22 *Logistics, LLC*, 769 F.3d 637, 644 (9th Cir. 2014) (citing *Californians for Safe & Competitive*
23 *Dump Truck Transp. v. Mendonca* 152 F.3d 1184, 1187-89 (9th Cir. 1998)). Thus, in *Mendonca*,
24 the Ninth Circuit found that the FAAAA does not preempt a state’s prevailing wage law, while the
25 *Dilts* court held that the FAAAA does not preempt California’s meal and rest break laws. *Id.* at

26
27
28 ¹⁸ In its March 28, 2014 Order, the Court summarized the history of the FAAAA and provided an
overview of the authority relating to FAAAA preemption. See March 28, 2014 Order at 10-15.
Therefore, the Court does not repeat that discussion here.

1 644, 650. As the court in *Dilts* explained, “generally applicable background regulations that are
2 several steps removed from prices, routes or services, such as prevailing wage laws or safety
3 regulations, are not preempted even if employers must factor those provisions into their decisions
4 about the prices that they set, the routes that they use, or the services that they provide.” *Id.* at
5 646.

6 Exel, however, contends the claims asserted by Plaintiffs will have the effect of requiring
7 that Exel reclassify its drivers as employees - an issue that was not addressed in *Dilts* or *Mendonca*
8 because neither involved drivers who were classified as independent contractors. Therefore, it
9 asserts, the enforcement of California’s classification rules will alter the manner in which it
10 provides transportation services to its customers and impose the state’s own public policies or
11 theories of competition on the operation of a motor carrier - a result that is impermissible under
12 the FAAAA preemption clause. Exel points to *American Trucking Ass’n, Inc. City of Los*
13 *Angeles*, 559 F.3d 1046 (9th Cir. 2009) (“*ATA I*”) in support of its position. That case involved a
14 program that required companies seeking to provide drayage driving services at the Port of Los
15 Angeles to enter into a concession agreement under which the companies agreed to transition from
16 an independent contractor model to an employee business model. 559 F.3d at 1049-50. The court
17 granted a preliminary injunction preventing implementation of the program, finding that it was
18 “highly likely” that the independent contractor phase-out provision would be found preempted by
19 the FAAAA and noting that the program was an “extensive attempt to reshape and control the
20 economics of the drayage industry” of the Port of Los Angeles. *Id.* at 1055-56. Exel’s reliance on
21 *ATA I* is misplaced, however because Plaintiffs’ claims in this case (in contrast to the required
22 concession agreement in *ATA I*) do not *require* Exel to choose one business model over another.
23 Exel may use independent contractors or it may use employees; Plaintiffs simply seek to apply
24 generally applicable wage and hour laws based on the policy that Exel has chosen to apply with
25 respect to its drivers.

26 Both a federal district court and the California Supreme Court have reached the same
27 conclusion in cases that have addressed similar claims. *See Robles v. Comtrak Logistics, Inc.*,
28 2014 WL 7335316, at *5 (E.D. Cal. Dec. 19, 2014); *People ex rel. Harris v. Pac. Anchor Transp.*,

1 *Inc.*, 59 Cal. 4th 772, 784-86 (2014). In *Robles*, the plaintiff in a purported class action was a
 2 delivery driver who asserted wage and hour claims under California law against “a major provider
 3 of full dray truckload transportation services,” asserting that the defendant had misclassified its
 4 drivers as independent contractors to avoid its obligations under the California Labor Code and
 5 IWC Wage Orders. 2014 WL 7335316, at *1. The defendant brought a motion to dismiss,
 6 asserting the plaintiff’s claims were preempted by the FAAAA because, under *ATA I*, they would
 7 have the effect of requiring the defendant to reclassify its drivers as employees. *Id.* at *4. The
 8 court in *Robles* disagreed, finding that the law in *ATA I* was not analogous to the plaintiff’s claims
 9 in that case because the former *required* the motor carriers to cease using independent contractors
 10 whereas the latter merely sought to “hold [the defendant] accountable for its obligation to properly
 11 classify its drivers.” *Id.* The court held that the plaintiff’s claims were not preempted by the
 12 FAAAA, finding that this result “appropriately effectuated Congress’s purpose in passing the
 13 FAAA Act and avoid[ed] the perverse application of the law to circumvent basic labor
 14 protections.” *Id.* at *7.

15 In *Harris*, the State of California brought an action under California’s unfair competition
 16 law based on allegations that the defendant, a trucking company that employed drivers as
 17 independent contractors, had misclassified the drivers and thereby illegally lowered its cost of
 18 doing business by failing to meet certain employer requirements, including paying certain taxes,
 19 providing worker’s compensation and meeting the California minimum wage requirements. 59
 20 Cal. 4th at 776. The defendant asserted the State’s UCL claim was preempted by the FAAAA,
 21 arguing, *inter alia*, that the claim would “significantly affect motor carrier prices, routes, and
 22 services because its application will prevent their using independent contractors, potentially
 23 affecting their prices and services.” *Id.* at 785. The *Harris* court disagreed, finding that “[n]othing
 24 in the [State’s] UCL action would prevent defendants from using independent contractors.” *Id.*
 25 Rather, the State was simply asserting that the defendant must classify the drivers appropriately
 26 and comply with generally applicable labor and employment laws. *Id.*

27 Further, the *Harris* court found, such laws are not preempted by the FAAAA. *Id.* In
 28 support of this conclusion, the court pointed to the Supreme Court’s decision in *Dan’s City Used*

1 *Cars, Inc. v. Pelkey*, 133 S. Ct. 1769 (2013), in which the Court “observed that the ‘target at which
2 [Congress] aimed’ the FAAAA was ‘a State’s direct substitution of its own governmental
3 commands for competitive market forces in determining (to a significant degree) the services that
4 motor carriers will provide.’” *Id.* (quoting *Dan’s City*, 133 S.Ct. at 1780 (internal quotation
5 omitted)). The court in *Harris* went on to note that “*Dan’s City* emphasized the FAAAA limiting
6 phrase ‘with respect to the transportation of property,’ which strongly supports a finding that
7 California labor and insurance laws and regulations of general applicability are not preempted as
8 applied under the FAAAA, even if they form the basis of the [State’s] UCL action.” *Id.* at 786.

9 The undersigned finds the reasoning of *Harris* and *Robles* to be persuasive and Exel’s
10 efforts to distinguish those cases unavailing. Exel argues that the Court should not adopt the
11 reasoning of *Harris* for two reasons. First, it contends the defendant in that case “conceded that
12 the FAAAA did not preempt the laws underlying the state’s Unfair Competition claim because
13 their ‘effect[] on the carrier’s prices, routes and services is remote’” whereas Exel makes no such
14 concession. Defendant’s Reply at 4 (quoting *Harris*, 59 Cal. 4th at 785). Exel’s argument
15 mischaracterizes the *Harris* decision. The court in *Harris* noted that the defendant in that case
16 conceded that *some* of the underlying laws were ones of general application whose effects on
17 prices, routes and services were remote, but that the defendant did *not* concede this point as to
18 IWC No. 9, which governs minimum wage requirements in the transport industry. 59 Cal. 4th at
19 785. Nor did the defendant concede that the effect of the State’s UCL claim was too remote to
20 give rise to preemption; rather, it argued that the claim would affect prices and services by forcing
21 it to reclassify its workers (just as Exel argues here).

22 Second, Exel asserts the *Harris* court’s conclusion that a misclassification claim is not
23 preempted by the FAAAA has been “dispatch[ed]” by the First Circuit in *Massachusetts Delivery*
24 *Association v. Coakley*, 769 F.3d 11 (1st Cir. 2014). In that case, the First Circuit addressed
25 whether a provision of the Massachusetts Independent Contractor law that set forth a test for
26 independent contractor status was preempted by the FAAAA. One of the requirements of the law
27 was that an independent contractor had to be performing “outside the usual course of business of
28 the employer” - a requirement that abrogated the traditional common law control test that had been

1 followed in Massachusetts and which is also the test in California, as discussed below. 769 F.3d
 2 at 14-15; *see also Amero v. Townsend Oil Co.*, 25 Mass. L. Rptr. 115 at *2 (Super. Ct. Mass.
 3 2014) (explaining that prior to 2004, Massachusetts, like many other states, applied a multi-factor
 4 control test to determine whether a person was an employee or an independent contractor but that
 5 “[i]n 2004, G.L.C. 149 was amended to make it more difficult for employers to classify workers as
 6 independent contractors”). “The legislative purpose of [the law] [was] to protect employees from
 7 being deprived of the benefits enjoyed by employees through their misclassification as
 8 independent contractors.” 769 F.3d at 15 (internal quotations and citations omitted). The district
 9 court concluded that the effect of the law on “prices, routes, and services” was too remote and
 10 tenuous to give rise to preemption and that in any event, the law did not relate to the
 11 “transportation of property” as that phrase was construed in *Dan’s City. Mass. Delivery Ass’n v.*
 12 *Coakley*, No. 10-11521, 2013 WL 5441726, at * 9 (D. Mass. Sept. 26, 2013)).

13 The First Circuit disagreed with the trial court’s analysis, finding that it had misread *Dan’s*
 14 *City* as requiring that a law must “regulate” rather than “concern” a motor carrier’s transportation
 15 of property. 769 F.3d at 22. To the extent the Massachusetts law would force the plaintiffs to
 16 treat their drivers as employees, the court found, it could have an impact on the services the
 17 delivery companies provided, the prices charged and the routes taken, and therefore it “concerned”
 18 the transportation of property, the First Circuit found. *Id.* at 23. The court of appeals remanded
 19 the case to the trial court to address whether there was sufficient evidence to establish that the
 20 impact of the law on prices, routes and services was significant enough to give rise to preemption.
 21 *Id.* at 22-23 (declining to express a view on the sufficiency of the evidence on this issue and
 22 instructing district court to “address on remand whether this effect on delivery companies’ prices,
 23 routes, and services rises to the requisite level for FAAAA preemption”). It further instructed that
 24 empirical evidence is not required to establish preemption; instead, courts should consider the
 25 “statute’s ‘potential’ impact on carriers’ prices routes, and services.” *Id.* at 21 (citing *N.H Motor*
 26 *Transp. Ass’n v. Rowe*, 448 F.3d 66, 82 n. 14 (1st Cir. 2006)).

27 On remand, the district court found that the challenged Massachusetts law would have a
 28 significant impact on prices, routes, and services. *See Mass. Delivery Ass’n v. Healey*, No. 10-cv-

1 11521, 2015 WL 4111413 (D. Mass. July 8, 2015).¹⁹ In reaching this conclusion, the court relied
2 heavily on the fact that the delivery companies in that case provided “on-demand” delivery
3 services, providing “prompt, unscheduled deliveries” in response to customer needs. 2015 WL
4 4111413, at * 5. They accomplished this through the use of independent contractors who could
5 accept or reject a request for an on-demand delivery. *Id.* Under the new law, however, the
6 delivery companies would have to “retain employees who are on-call and must be compensated
7 for that time, which is different from [their] current business model.” *Id.* Because of the increased
8 cost, the court found, the companies would be forced to abandon their on-demand service if they
9 did not raise their prices. *Id.* The court concluded, “Massachusetts seeks to enforce a policy of
10 hiring employees when market forces have prompted delivery companies to adopt an independent
11 contractor model” and therefore, “[t]he law would have the effect of limiting a courier company to
12 the provision of scheduled service at the expense of on-demand deliveries.” *Id.* at *6.
13 Consequently, the court found that the law was preempted by the FAAAA. *Id.*

14 The Court concludes that the *MDA* cases do not support Exel’s preemption argument under
15 the circumstances here. The statutory provision at issue in those cases, in contrast to the general
16 wage and hour laws challenged here, changed the test for independent contractors vs. employees
17 in order to effectuate a policy of making it more difficult to qualify for independent contractor
18 status. To the extent the law was applied to motor carriers, it could be seen as an attempt by the
19 State to impose its own public policies or theories of competition on a motor carrier. *See Am.*
20 *Airlines v. Wolens*, 513 U.S. 219, 229 n. 5. In contrast, Plaintiffs here simply rely on California’s
21 well-established test for independent contractors to assert claims under general wage and hour
22 laws that the Ninth Circuit has already found are not preempted by the FAAAA in *Dilts* and
23 *Mendonca*.

24 The Court further finds that the facts here are distinguishable from those the *MDA* cases.
25 In the *MDA* cases, the delivery companies demonstrated a potential impact on prices, routes and
26

27 ¹⁹ The Court refers collectively to *Mass. Delivery Ass’n v. Coakley*, 769 F.3d 11 (1st Cir. 2014)
28 and *Mass. Delivery Ass’n v. Healey*, No. 10-cv-11521, 2015 WL 4111413 (D. Mass. July 8, 2015)
as “the *MDA* cases.”

1 services based on the fact that the on-demand deliveries they provided were unscheduled and
2 therefore required a “flexible workforce that does not need to be compensated while waiting for a
3 job.” 2015 WL 4111413, at *5. No comparable showing has been made here. To the contrary, it
4 appears to be undisputed that Exel, as a general practice, schedules deliveries in advance and
5 provides a list of stops that drivers must complete every day at morning meetings; there is no
6 suggestion (much less evidence) that Exel’s business model is based on the availability of drivers
7 who can make on-demand deliveries but who need not be compensated between those deliveries.

8 Finally, to the extent that the First Circuit’s holding in *MDA v. Coakley* is based on a
9 narrower reading of *Dan’s City* than was adopted by the courts in *Harris* and *Robles*, the Court
10 concludes that the broader reading adopted in the latter cases is more consistent with the decisions
11 of the Ninth Circuit and therefore declines to follow the approach that was taken by the First
12 Circuit in *MDA v. Coakley*.

13 The Court also concludes that many of the cases cited by Exel do not support its position.
14 Exel relies heavily on a Seventh Circuit case, *S.C. Johnson & Sons, Inc. v. Transport Corporation*
15 *of America*, which it contends stands for two propositions: 1) “that the FAAAA will not preempt a
16 state law that impacts the cost of the services a transportation company elects to provide” because
17 these laws affect only the cost of “inputs,” but that 2) the FAAAA does “preempt a plaintiff from
18 using a state law claim as a vehicle to change the terms of the ‘agreements the parties had
19 reached.’” Defendants’ Motion at 10 (citing *S.C. Johnson*, 697 F.3d at 557). In that case, the court
20 found that claims for fraudulent misrepresentation and conspiracy to commit fraud asserted against
21 defendant trucking companies were preempted by the FAAAA but that claims for bribery and
22 racketeering were not. *Id.* at 561.

23 As to the fraud claims, the court noted that “[s]tate consumer protection laws often contain
24 well-meaning provisions but widely varying paternalistic provisions designed to protect
25 consumers from the rigors of the market” and concluded that “Congress decided . . . in both the
26 ADA and the FAAAA that it did not want (nor did it want the states) to displace the market in this
27 way.” *Id.* at 557. On the other hand, the court found that the bribery and racketeering claims were
28 based on the type of background laws that may affect the price of inputs and thereby increase the

1 price of outputs but were “too tenuously related to the regulation of the rates, routes, and services
2 in the trucking industry to fall within the FAAAA preemption rule.” *Id.* at 559. Citing *Mendonca*
3 as an example, the court expressly likened these laws to “comparable state laws” such as minimum
4 wage laws, that “regulate . . . inputs [but] operate one or more steps away from the moment at
5 which the firm offers its customers a service for a particular price.” *Id.* at 558. According to the
6 court, “[n]o one thinks that the ADA or the FAAAA preempts these” laws. *Id.* The Court finds
7 nothing in *S.C. Johnson* that is inconsistent with its conclusion that the claims in this action are not
8 preempted. Rather, the claims in this case are just the sort that the *Johnson* court recognized are,
9 in general, not preempted.

10 Exel’s reliance on *DiFiore v. American Airlines, Inc.*, 646 F.3d 81 (1st Cir. 2011) is also
11 misplaced. In that case, airport baggage porters asserted that a \$2 charge for bags checked at the
12 curb adopted by American Airlines violated a state law governing tips. The airline, in turn,
13 asserted that the tips law was preempted by the Airline Deregulation Act. 646 F.3d at 84. The
14 court agreed, but in doing so, it expressly distinguished the tips law claim in that case from claims
15 such as prevailing wage claims, opining that the “Supreme Court would be unlikely . . . to free
16 airlines from most conventional common law claims for tort, for prevailing wage laws, and
17 ordinary taxes applicable to other businesses.” *Id.* at 87 (relying, in part, on the Ninth Circuit’s
18 holding in *Mendonca*, 152 F.3d at 1189). The court explained that the “dividing line turns on the
19 statutory language ‘related to price, routes, and services.’” *Id.* It stated, “[i]mportantly, the tips
20 law does more than simply regulate the employment relationship between the skycaps and the
21 airline; unlike the cited circuit cases, the tip law has a *direct connection* to air carrier prices and
22 services and can fairly be said to regulate both.” *Id.* at 87. The court found this direct connection
23 because the airline’s “conduct in arranging for transportation of bags at curbside into the airline
24 terminal en route to the loading facilities [was] itself a part of the ‘service’ referred to in the
25 federal statute, and the airline’s ‘price’ includes charges for ancillary services as well as the flight
26 itself.” *Id.* Here, on the other hand, there is no such direct connection between the wage and hour
27 laws invoked by Plaintiffs and Exel’s prices, routes, and services. If anything, the reasoning in
28 *DiFiore*, as in *S.C. Johnson*, supports Plaintiffs’ assertion that their claims are *not* preempted.

1 Another case cited by Exel, *Northwest, Inc. v. Ginsberg*, 134 S. Ct. 1442 (2014), also
2 involved a claim that was closely related to services, in contrast to the general wage laws at issue
3 in this case. There, the plaintiff asserted a breach of implied covenant of good faith and fair
4 dealing in connection with the airline’s termination of his frequent flyer account. 134 S. Ct. at
5 1427. The Court found that the frequent flyer program was related to both rates and services
6 because “the program awards mileage credits that can be redeemed for tickets and upgrades” and
7 also may give passengers “access to flights and to higher service categories.” *Id.* at 1431. It
8 further concluded that under Minnesota law, parties cannot contract out of the implied covenant
9 and therefore, the claim was preempted under the FAAAA. *Id.* at 1432. As the Ninth Circuit
10 explained in *Dilts*, the Court’s decision in *Ginsberg* illustrates the point that “[l]aws are more
11 likely to be preempted when they operate at the point where carriers provide services to customers
12 at specific prices.” 769 F.3d at 646 (citing *Ginsberg*, 134 S. Ct. at 1431). “On the other hand,”
13 the court explained, “generally applicable background regulations that are several steps removed
14 from prices, routes, or services, such as prevailing wage laws . . . , are not preempted, even if
15 employers must factor those provisions into their decisions about the prices they set, the routes
16 they use, or the services they provide.” *Id.*

17 In sum, the Court rejects Exel’s assertion that all of Plaintiffs’ claims are preempted
18 because they would have the effect of requiring it to adopt a business model based on the use of
19 employees. Exel may adopt whatever business model it wishes. What it cannot do is treat its
20 drivers as employees while avoiding California’s wage and hour rules by requiring its drivers to
21 enter into a contract that simply *calls* the drivers independent contractors. *See Ruiz v. Affinity*
22 *Logistics Corp.*, 754 F.3d 1093, 1101 (9th Cir. 2014) (noting that “the label that parties place on
23 their employment relationship ‘is not dispositive and will be ignored if their actual conduct
24 establishes a different relationship’” (quoting *Estrada v. FedEx Ground Package Sys.*, 154 Cal.
25 App. 4th 1, 10 (2007))).

26 **B. Whether Plaintiffs’ Overtime Claim (Claim Two) Fails Because it is Subject to the**
27 **California Exemption**

28 Exel asserts that Plaintiffs’ claim for overtime wages under California Labor Code sections

1 510, 515.5, 1194 and 1198 and IWC Wage Order No. 9 fails, as a matter of law, because their
2 hours of service are regulated by DOT and therefore, they are exempt from California’s overtime
3 law. The Court finds that there are fact questions that preclude summary judgment on this claim.

4 Under California Code of Regulations title 8, section 11090(3)(L)(1), employees whose
5 Hours of Service are regulated by the DOT are exempt from California’s overtime law. *See Cal.*
6 *Code Regs. tit. 8, § 11090(3)(L)(1)* (“The provisions of this section are not applicable to
7 employees whose hours of service are regulated by . . . The United States Department of
8 Transportation Code of Federal Regulations, Title 49, Sections 395.1 to 395.13, Hours of Service
9 of Drivers”). DOT regulates Hours of Service for commercial motor vehicle drivers operating in
10 interstate commerce. *See 49 C.F.R. § 390.5, 395.1*. It is undisputed that Plaintiffs are commercial
11 motor vehicle drivers. The parties disagree, however, as to whether the drivers operate in
12 interstate commerce.

13 The California Exemption is construed narrowly and the burden is on the employer to
14 prove it is entitled to the exemption. *See Klitzke v. Steiner Corp.*, 110 F.3d 1465, 1468 (9th Cir.
15 1997).²⁰ “Whether transportation is interstate or intrastate is determined by the essential character
16 of the commerce, manifested by shipper’s fixed and persisting transportation intent at the time of
17 the shipment, and is ascertained from all of the facts and circumstances surrounding the
18 transportation.” *S. Pac. Transp. Co. v. I.C.C.*, 565 F.2d 615, 617 (9th Cir. 1977). A driver
19 operates in interstate commerce not only when the driver actually transports goods across state
20 lines but also when there is a “practical continuity of movement from the manufacturers or
21 suppliers without the state, through [a] warehouse and on to customers whose prior orders or
22 contracts are being filled.” *Walling v. Jacksonville Paper Co.*, 317 U.S. 564, 567, 569 (1943).

23 To determine whether there is “practical continuity of movement,” courts look to a 1992
24 Interstate Commerce Commission policy statement, which sets forth seven factors that may be

25 _____
26 ²⁰ In determining whether an employee’s Hours of Service fall under the California Exemption,
27 court often look for guidance to a similar exemption under the FLSA, referred to as the Motor
28 Carrier Act (“MCA”) Exemption, which applies to “any employee with respect to whom the
Secretary of Transportation has power to establish qualifications and maximum hours of service.”
See Watkins v. Ameripride Services, 375 F.3d 821, 825 n. 2 (9th Cir. 2004) (quoting 29 U.S.C. §
213(b)(1)).

1 considered. *Ruiz v. Affinity Logistics Corp.*, No. C-05-2125 R(CAB), 2006 WL 3712942, at *4
2 (S.D. Cal. Nov. 9, 2006) (citing 8 I.C.C. 2d 470, 1992 WL 122949 (“1992 I.C.C. Policy
3 Statement”)). Those factors are as follows:

4 Factual basis for sales projections: Even where a shipper “does not know in advance the
5 ultimate destination of specific shipments,” the conclusion that it had a fixed and persistent intent
6 to have shipments continue in interstate commerce may be supported where the shipper “bases its
7 determination of its determination of the total volume to be shipped through the warehouse on
8 projections of customer demand that have some factual basis, rather than a plan to solicit future
9 sales within the State.” 1992 I.C.C. Policy Statement at *2.

10 Absence of processing or substantial product modification at the warehouse: Where “[n]o
11 processing or substantial product modification of substance occurs at the warehouse or distribution
12 center, this factor supports a finding of fixed and persistent intent, even if products are repackaged
13 or reconfigured at the warehouse.” *Id.*

14 Shipper’s control in the warehouse: A finding of fixed and persistent intent is supported
15 when, “[w]hile in the warehouse, the merchandise is subject to the shipper’s control and direction
16 as to the subsequent transportation.” *Id.*

17 System for tracking merchandise: A finding of fixed and persistent intent is supported
18 when “[m]odern systems allow tracking and documentation of most, if not all, of the shipments
19 coming in and going out of the warehouse or distribution center.” *Id.*

20 Shipper responsible for transportation charges: A finding of fixed and persistent intent is
21 supported where “[t]he shipper . . . must bear the ultimate payment for transportation charges even
22 if the warehouse or distribution center directly pays the transportation charges to the carrier.” *Id.*

23 Warehouse owned by the shipper: A finding of fixed and persistent intent is supported
24 where “[t]he warehouse utilized is owned by the shipper.” *Id.*

25 Storage in transit provision: A finding of fixed and persistent intent is supported where
26 “[t]he shipments move through the warehouse pursuant to a storage in transit tariff provision.” *Id.*

27 Further, the Supreme Court has held that DOT is authorized to regulate the Hours of
28 Service for all drivers employed by a carrier, even if the carrier’s involvement in interstate

1 commerce is minor, where the “interstate commerce trips [are] distributed generally throughout
2 the year and their performance [is] shared indiscriminately by the drivers and [is] mingled with the
3 performance of other like driving services rendered by them otherwise than in interstate
4 commerce.” *Morris v. McComb*, 332 U.S. 422, 433 (1947). Thus, in *Morris*, the Court found that
5 even though only 4% of a delivery company’s time and effort was engaged with interstate
6 commerce over the course of a year, all of the drivers who made deliveries for the company
7 (including some drivers who *never* made interstate deliveries) were subject to the authority of the
8 Interstate Commerce Commission (“I.C.C.”) (the predecessor of the Department of
9 Transportation). *Id.* at 433.

10 Based on *Morris*, the Ninth Circuit has held that in order for the MCA exemption to apply,
11 “a corporation need not have all of its drivers actually undertake trips across state lines, but rather,
12 all of its drivers must have a reasonable expectation that they will engage in interstate commerce.”
13 *Reich v. Am. Driver Serv., Inc.*, 33 F.3d 1153, 1158 (9th Cir. 1994); *see also Bishop v. Petro-*
14 *Chemical Transp., LLC*, 582 F. Supp. 2d 1290, 1298 (E.D. Cal. 2008) (“A driver is considered to
15 be driving in interstate commerce if the driver is called upon to drive in interstate commerce as
16 part of the driver’s regular employment, or, even if the driver has not personally driven in
17 interstate commerce, if, because of company policy and activity, the driver could reasonably be
18 expected to drive in interstate commerce”).

19 Finally, while *Morris* holds that the MCA Exemption applies even where only a small
20 percentage of a carrier’s deliveries are interstate, some courts have found that there is a *de minimis*
21 exception where less than 1% of deliveries are interstate deliveries. *See Turk v. Buffets, Inc.*, 940
22 F. Supp. 1255, 1261-62 (N.D. Ill. 1996) (citing *Kimball v. Goodyear Tire & Rubber Co.*, 504 F.
23 Supp. 544, 549 (E. D. Tex. 1980) (holding that truck drivers were not exempted from the overtime
24 provision where only 0.17% of trips were interstate); *Coleman v. Jiffy June Farms, Inc.*, 324 F.
25 Supp. 664, 670 (S. D. Ala. 1970), *aff’d*, 458 F.2d 1139 (5th Cir. 1971), *cert. denied*, 409 U.S. 948
26 (1972)). Courts that have found a *de minimis* exception cite to *Pyramid Motor Freight Corp. v.*
27 *Ispass*, in which the Supreme Court remanded with instructions that if the mere handling of freight
28 before loading formed a “trivial, casual or occasional a part of an employee’s activities,” and did

1 not affect the safety of operation, then the activity would not serve to bring the employees under
2 the MCA exception. 330 U.S. 695, 708 (1947).

3 Some courts have concluded that the *de minimis* exception may never be applied to drivers
4 because any amount interstate deliveries by a carrier, no matter how small, implicate safety. *See,*
5 *e.g., Turk*, 940 F. Supp. at 1261. The Ninth Circuit in *Reich v. American Driver Services*,
6 however, suggested that the *de minimis* requirement may be applicable to drivers, citing *Coleman*
7 *v. Jiffy June Farms, Inc.*, 324 F. Supp. 664 ((S.D. Ala. 1970) with approval. In *Coleman*, the court
8 held that the *de minimis* exception applied where interstate deliveries constituted only .23% of all
9 deliveries by the company. 324 F. Supp. at 666. At least one district court in this district has also
10 found, based in part on *American Driver Services*, that the *de minimis* exception may, under some
11 circumstances, apply to drivers. *See Veliz v. Cintas Corp.*, No. C-03-1180 RS, 2009 WL
12 1107702, at *8 (N.D. Cal. April 23, 2009) (declining to grant summary judgment on FLSA
13 overtime claim on the basis that there was a material dispute of fact as to whether *de minimis*
14 exception applied to drivers who claimed that proportion of interstate goods delivered was less
15 than one percent).

16 Turning to the facts here, the Court finds that there are material disputes of fact as to: 1)
17 the nature of the deliveries made by the class members, that is, whether the shippers of the
18 products delivered by the class members have a fixed and persistent intent that shipments continue
19 in interstate commerce; 2) whether the class members have a reasonable expectation that they will
20 engage in instate commerce; and 3) whether the interstate deliveries by the class members may be
21 *de minimis*.

22 As to the nature of the deliveries, there are fact questions relating to whether the products
23 shipped to California for delivery based on sales forecasts (rather than specific orders from
24 identified customers) were shipped with a fixed and persisting intent. While a fixed and persisting
25 intent does not *require* an intent that a product be delivered to a specific customer, *see Ruiz*, 2006
26 WL 3712942, at * 9, where shipments into the state are based on projections of *future* customer
27 orders, courts look to whether there is a factual basis for those projections as an indication of the
28 shipper's intent. Plaintiffs have pointed to testimony by Mr. Moonan (who stated in his

1 declaration that shipments by Williams-Sonoma are based on “anticipated customer needs in the
2 region”) that he did not have *any* specific knowledge of how sales projections are made. *See*
3 Hanson Motion Decl., Ex. 5 (Moonan Decl.) ¶ 4; Piller Supp. Opp. Decl., Ex. 1 (Moonan Depo.)
4 at 48. Similarly, Mr. Gottman (who stated that Crate & Barrel ships products to California “based
5 on a forecast of sales of customers” in the region) testified that he is “not familiar with sales
6 forecasts” and that it is “not something [he] pay[s] attention to.” *See* Hanson Motion Decl., Ex. 6
7 (Gottman Decl.); Piller Supp. Opp. Decl., Ex. 2 (Gottman Depo.) at 27. Defendants also have not
8 offered any other evidence showing how sales forecasts are made by these retailers. This is in
9 contrast to the facts of *Ruiz*, cited by Exel, where there was evidence that sales forecasts were
10 based on historical sales information provided by the individual retail stores and that they were
11 reviewed and adjusted on a weekly basis. 2006 WL 3712942, at *1, 5.

12 There is also evidence that some modifications are made to products shipped to California
13 by these retailers, in contrast to *Ruiz*, where there was no evidence of processing, repackaging or
14 product modification at the distribution centers where the products were store before being
15 delivered on to customers. *Id.* at * 6; Piller Opp. Decl., Ex. 6 (Reynoso Depo.) at 57-58
16 (describing “deluxing” products at the warehouse); Piller Supp. Opp. Decl., Ex. 2 (Gottman
17 Depo.) at 45 (describing assembly of furniture that occurs at the warehouse). And as to Crate &
18 Barrel, there is evidence that another factor - the ability to track products from shipment to
19 ultimate purchaser - is also lacking. *See* Piller Supp. Opp. Decl., Ex. 2 (Gottman Depo.) at 46.
20 Consequently, the Court does not find the undisputed evidence to be sufficient to establish, as a
21 matter of law, that deliveries by Exel drivers of these retailers’ products satisfies the continuity of
22 movement test.

23 Further, to the extent there is evidence that at least *some* of the products shipped by Exel
24 are either special orders (and thus satisfy the continuity of movement test) or are actually delivered
25 across state lines by Exel drivers, Exel has not demonstrated, as a matter of law, that on a class-
26 wide basis Plaintiffs could reasonably expect to be assigned one of these interstate deliveries.
27 Where a carrier “seeks application of the exemption to an entire class of employees throughout
28 their term of employment based on the limited interstate activities of a few,” “[t]he analysis is

1 necessarily fact-specific” and “focus[es] on the proportion of interstate-to-intrastate employee
2 activity, the method by which the carrier assigns the interstate activity to the pertinent class of
3 employees and the overall nature of the carrier’s business.” *Kosin v. Fredjo’s Enter.s, Ltd.*, No. 88
4 C 5924, 1989 WL 13175 (N. D. Ill. Feb. 14, 1989) (citing *Morris v. McComb*, 332 U.S. 422
5 (1947)). Here, Exel has not offered undisputed evidence showing that on a class-wide basis all of
6 the drivers, regardless of where they are based, could reasonably be expected to make deliveries in
7 interstate commerce.

8 Finally, although Exel has offered evidence (apparently undisputed) as to the percentage of
9 products shipped into California pursuant to special orders by three specific shippers - Crate &
10 Barrel, Williams-Sonoma and Sears - there is no evidence in the record establishing the percentage
11 of *all* deliveries performed by Exel drivers that are interstate in nature. As a consequence, the
12 Court cannot find, as a matter of law, that the *de minimis* exception is unavailable to Plaintiffs.

13 In sum, the Court finds that factual disputes preclude summary judgment on this claim.

14
15 **C. Whether Plaintiffs’ Claim for Failure to Pay for All Hours Worked (Claim Three)
Fails Because that Claim Merely Duplicates Plaintiffs’ Overtime Claim**

16 The parties’ dispute with respect to Claim Three comes down to whether under California
17 Labor Code section 221 Plaintiffs may seek straight time compensation for non-hauling activities
18 that are not covered by the piece rates Exel pays its drivers for deliveries. The Court concludes
19 that they may.²¹

20 Section 221 provides that “[i]t shall be unlawful for any employer to collect or receive
21 from an employee any part of wages theretofore paid by said employer to said employee.” Cal.
22 Lab. Code § 221. “Section 221 was enacted in order to prevent employers from utilizing secret
23 deductions or kickbacks to pay employees less than their stated wages.” *Finnegan v. Schrader*, 91

24
25 _____
26 ²¹ The Court notes that although it held in its March 28, 2014 Order that a claim under section 221
27 “is a claim for unpaid wages,” it did not address the argument made by Exel here, namely, that
28 section 221 only covers situations in which an employer has taken from an employee
compensation that it had previously paid to the employee. In the Court’s previous order, it was
addressing Exel’s argument that there was no private right of action under section 221. Having
failed to persuade the Court that the section 221 claim fails on that ground, Exel has now come up
with a new theory. This theory also has no merit.

1 Cal. App. 4th 572, 584 (2001). This provision is commonly invoked where an employer advances
 2 commissions to an employee that are contingent upon some future event and then seeks to recover
 3 the commissions when the event does not occur. *See, e.g., Harris v. Investor’s Bus. Daily, Inc.*,
 4 138 Cal. App. 4th 28, 41 (2006); *Hudgins v. Neiman Marcus Grp.*, 34 Cal. App. 4th 1109, 1117-
 5 25 (1995). It is not limited to that scenario, however. As the language in *Finnegan* suggests,
 6 California courts have also applied the provision to situations in which employers made unlawful
 7 *deductions* from employees’ pay, that is, where the employee seeks to recover pay that the
 8 individual did not receive “in the first instance” from the employer. *See Quillian v. Lion Oil Co.*,
 9 96 Cal. App. 3d 156 (1979). For example, in *Quillian*, the court found that a monthly “bonus”
 10 payment that was calculated so as to deduct cash and merchandise shortages violated Section 221;
 11 the employee did not receive payments that she had to return. Rather, she simply received a lower
 12 bonus amount. *Id.* at 158-59. Similarly, in *Kerr’s Catering Service v. Department of Industrial*
 13 *Relations*, the court found that deductions from employees’ wages based on shortages that were
 14 not due to employee negligence violated section 221. 57 Cal. 2d 319, 328 (1962).

15 In *Gonzalez v. Downtown LA Motors, LP*, the court applied section 221 to facts similar to
 16 the allegations here. In that case, automotive service technicians were paid on a piece-rate basis
 17 but were not paid for time spent waiting for repair work or on non-repair tasks. 215 Cal. App. 4th
 18 at 40. The plaintiffs challenged this practice under a number of provisions, including Labor Code
 19 sections 221, 222 and 223. *Id.* at 50. The employer rejected the plaintiffs’ reliance on these
 20 provisions, arguing that they were inapposite because it “did not collect or receive any previously
 21 paid wages from its employees, it does not have a collective bargaining agreement or any other
 22 agreement setting a wage rate higher than the minimum hourly wage, and it did not secretly pay a
 23 lower amount than promised to technicians.” *Id.* The court disagreed, reasoning as follows:

24 Labor Code sections 221, 222, and 223 govern an employer’s
 25 obligation to pay “wages,” a term that is defined to include piece-
 26 rate compensation as well as hourly pay. Averaging piece-rate
 27 wages over total hours worked results in underpayment of employee
 28 wages required “by contract” under Labor Code section 223, as well
 as an improper collection of wages paid to an employee under Labor
 Code section 221, as illustrated by the following example: a
 technician who works four piece-rate hours in a day at a rate of \$20
 per hour and who leaves the job site when that work is finished has

1 earned \$80 for four hours of work. A second technician who works
2 the same piece-rate hours at the same rate but who remains at the job
3 site for an additional four hours waiting for customers also earns \$80
4 for the day; however, averaging his piece-rate wages over the eight-
5 hour work day results in an average pay rate of \$10 per hour, a 50
percent discount from his promised \$20 per hour piece-rate. The
second technician forfeits to the employer the pay promised “by
statute” under Labor section 223 because if his piece-rate pay is
allocated only to piece-rate hours, he is not paid at all for his
nonproductive hours.

6 *Id.*

7 The Gonzalez court relied, in part, on *Armenta v. Osmose, Inc.*, 135 Cal. App. 4th 314, 323
8 (2005). In that case, in which employees sought to recover minimum wage for certain
9 uncompensated work, the court held that California labor law requires that minimum wage
10 violations be assessed with reference to each and every hour worked and thus, in contrast to
11 federal labor law, does not permit employers to average the total compensation paid over all hours
12 worked (whether paid or unpaid) to determine whether employers are meeting their minimum
13 wage obligations. 135 Cal. App. 4th at 323-24. Although the employees’ claim was asserted
14 under California Labor Code section 1194, the court in *Armenta* relied on section 221 in support
15 of its conclusion, reasoning as follows:

16 Sections 221, 222, and 223 articulate the principal that all hours
17 must be paid at the statutory or agreed rate and no part of this rate
18 may be used as a credit against a minimum wage obligation. For
19 example, section 221 provides: “It shall be unlawful for any
20 employer to collect or receive from an employee *any part of wages*
21 *theretofore paid by said employer to said employee.*” (Italics added.)
22 Section 222 provides: “It shall be unlawful, in case of any wage
23 agreement arrived at through collective bargaining, either willfully
24 or unlawfully or with intent to defraud an employee, a competitor, or
25 any other person, to withhold from said employee *any part of the*
26 *wage agreed upon.*” (Italics added.) Finally, section 223 provides:
27 “Where any statute or contract requires an employer to maintain the
28 designated wage scale, it shall be unlawful to secretly pay a lower
wage while purporting to pay the wage designated by statute or by
contract.” As the trial court noted, adopting the averaging method
advocated by respondents contravenes these code sections and
effectively reduces respondents’ contractual hourly rate. Federal law
provides no analogous provisions to sections 221-223.

135 Cal. App. 4th at 323.

In short, the Court finds no authority for Exel’s narrow reading of section 221. Even the
cases cited by Exel indicate that this section covers “deductions” and is not limited to situations
where an employer seeks to recover money already paid to the employee. Further, the reasoning

1 of both *Gonzales* and *Armenta* supports the conclusion that a practice of compensating individuals
2 on a piece-rate basis for certain activities while failing to compensate them for time spent on other
3 activities amounts to a deduction because the employer has effectively reduced the individual's
4 pay rate. Exel's request for summary judgment on Claim Three is therefore denied.

5
6 **D. Whether Plaintiffs' Meal and Rest Break Claims (Claims Four and Five) Are
Preempted by the DOT HOS Regulations**

7 Having failed to persuade the Court that Plaintiffs' meal and rest break claims are
8 preempted under the FAAAA, Exel now advances another theory, arguing that these claims are
9 preempted because California's meal and rest break laws conflict with a DOT regulation that
10 limits the total number of hours on duty, without regard to the amount of time taken for meal or
11 rest breaks, to fourteen hours. *See* 49 C.F.R. § 395.3. Exel has offered no explanation for its
12 failure to make this argument in its motion to dismiss, when it challenged Plaintiffs' meal and rest
13 break claims on the grounds of federal preemption. Even assuming this argument was not waived
14 by Exel's failure to bring it in its earlier motion, the Court finds that it fails on the merits.

15 "It is a familiar and well-established principle that the Supremacy Clause, U.S. Const., Art.
16 VI, cl. 2, invalidates state laws that 'interfere with, or are contrary to,' federal law." *Hillsborough*
17 *Cty., Fla. v. Automated Med. Labs., Inc.*, 471 U.S. 707, 712-13 (1985) (quoting *Gibbons v. Ogden*,
18 22 U.S. (9 Wheat.) 1, 211 (1824)). A law may be preempted where Congress has completely
19 displaced state regulation, under the doctrine of field preemption, or where it actually conflicts
20 with federal law. *Id.* Exel contends Plaintiffs' meal and rest break claims are preempted because
21 they actually conflict with federal law. An actual conflict may occur either when compliance with
22 both federal and state law is impossible or when "state law 'stands as an obstacle to the
23 accomplishment and execution of the full purposes and objectives of Congress.'" *Id.* (quoting
24 *Hines v. Davidowitz*, 312 U.S. 52, 67 (1941)). When addressing whether a state law that
25 "regulate[s] the employment relationship to protect resident workers" is preempted, however, the
26 court starts with the assumption "that the historic powers of the States were not to be superseded
27 by federal legislation unless that was the clear and manifest purpose of Congress." *Pac. Merch.*
28 *Shipping v. Aubry*, 918 F.2d 1409, 1415-16 (9th Cir. 1990).

The regulation cited by Exel states, in relevant part, as follows:

a) Except as otherwise provided in § 395.1, no motor carrier shall permit or require any driver used by it to drive a property-carrying commercial motor vehicle, nor shall any such driver drive a property-carrying commercial motor vehicle, regardless of the number of motor carriers using the driver’s services, unless the driver complies with the following requirements:

(1) Start of work shift. A driver may not drive without first taking 10 consecutive hours off duty;

(2) 14-hour period. A driver may drive only during a period of 14 consecutive hours after coming on duty following 10 consecutive hours off duty. The driver may not drive after the end of the 14-consecutive-hour period without first taking 10 consecutive hours off duty.

(3) Driving time and rest breaks.

(i) Driving time. A driver may drive a total of 11 hours during the 14-hour period specified in paragraph (a)(2) of this section.

(ii) Rest breaks. Except for drivers who qualify for either of the short-haul exceptions in § 395.1(e)(1) or (2), driving is not permitted if more than 8 hours have passed since the end of the driver's last off-duty or sleeper-berth period of at least 30 minutes.

49 C.F.R. § 395.3. Nothing in California’s meal and rest break laws, which Exel contends limits actual driving time to 12.5 hours, makes it impossible for drivers to comply with the federal regulation. To the contrary, the federal regulation imposes a *lower* limit on total permitted driving time than do the state laws challenged by Exel.

Similarly, Exel has not demonstrated that California’s meal and rest break laws stand as an “obstacle” to accomplishing Congress’s purpose as reflected in the DOT regulation. In particular, to the extent California’s meal and rest break requirements would prevent drivers from driving more than 12.5 hours in a single fourteen hour shift, that result does nothing to undercut Congress’s expressed intent, that is, to limit actual driving time to eleven hours in a shift. Of course, neither California meal and rest break laws nor the federal regulation impose any affirmative obligation to drive the maximum number of hours permitted under the regulation. Thus, even if the regulation did not include a limit on actual driving time permitted during a driver’s shift that is lower than the amount of hours these state laws would effectively allow a

1 driver to drive during a single shift, California’s meal and rest break laws would not undermine
2 Congress’s purpose as to the fourteen-hour limit.

3 The Ninth Circuit cases cited by Exel in support of preemption do not support a contrary
4 result. In *Agsalud v. Pony Express Courier Corp. of America*, the Ninth Circuit held that the
5 Federal Motor Carrier Act, which provided for a maximum work week of 60 hours, did not
6 preempt a state overtime law requiring employers to pay one and a half time for work in excess of
7 forty hours in a week. 833 F.2d 809 (9th Cir. 1987). The court rejected the carrier’s argument
8 that the state law conflicted with the federal requirement because it “did not show that [the State’s]
9 overtime pay statute has the same effect as a regulation setting a firm maximum on hours
10 worked.” *Id.* The court reasoned further, “[o]ne need not be an economist to realize that some
11 employers may continue to provide more than 40 hours of work even though an overtime premium
12 is required . . .” Similarly, in *Pacific Merchant Shipping Association v. Aubry*, the Ninth Circuit
13 rejected the arguments of a shipping company that California’s overtime law requiring payment of
14 overtime wages for work in excess of eight hours a day was preempted by the federal Shipping
15 Act, which imposes penalties where an employee is required to work more than nine hours a day
16 while in port or twelve hours a day while at sea. 918 F.2d at 1416-17. As in *Agsalud*, the court
17 found that because the state overtime law did not “have the effect of establishing a firm
18 maximum,” it did not conflict with the federal law. *Id.*

19 *Agsalud* and *Pacific Merchant* stand for the proposition that there is no actual conflict
20 between a federal law that imposes a limit on work hours and a state wage and hour law that
21 requires the payment of overtime wages for some of those hours but does not actually prohibit
22 employees from working up to the maximum established by federal law. The implication in those
23 cases is that a state law that actually capped the number of hours that could be worked at a level
24 lower than the federal maximum *might* be in conflict with federal law. As discussed above,
25 however, the federal regulation at issue here permits a lower number of driving hours than the
26 effective limit on driving time that results from enforcement of California’s meal and rest break
27 laws. Therefore, these cases do not support a finding of conflict preemption.

28 Accordingly, the Court rejects Exel’s assertion that Plaintiffs’ meal and rest break claims

1 are preempted.

2
3 **E. Whether Claims Ten, Eleven and Twelve Fail on the Basis of Exel’s Good-Faith
Belief that Plaintiffs are Properly Classified as Independent Contractors**

4 Exel argues it is entitled to summary judgment on Plaintiffs’ claims under California Labor
5 Code sections 203, 226, 1174 and 1174.5 because it has a good faith belief that it has properly
6 classified its drivers as independent contractors. The Court finds that Exel is entitled to summary
7 judgment on these claims.

8 California Labor Code section 203 provides that an employer may be subject to “waiting
9 time” penalties for failure to timely pay wages upon termination of employment, allowing the
10 employee to continue to accrue wages “from the due date thereof” for up to 30 days “until paid or
11 until an action therefor is commenced.” Cal. Lab. Code § 203(a). Penalties are assigned where an
12 employer “willfully fails to pay.” *Id.* (emphasis added). Similarly, section 1174.5 provides for
13 civil penalties where an employer “willfully fails to maintain” payroll records required under
14 section 1174. Section 226 provides for damages where there is a “knowing and intentional failure
15 by an employer” to provide accurate wage statements.

16 The willfulness requirement in section 203 is subject to a good faith defense under
17 California Code of Regulations Title 8, section 13250, which provides, in relevant part, as follows:

18 A willful failure to pay wages within the meaning of Labor Code
19 Section 203 occurs when an employer intentionally fails to pay
20 wages to an employee when those wages are due. However, a good
21 faith dispute that any wages are due will preclude imposition of
22 waiting time penalties under Section 203.

23 (a) Good Faith Dispute. A “good faith dispute” that any wages are
24 due occurs when an employer presents a defense, based in law or
25 fact which, if successful, would preclude any recover on the part of
26 the employee. The fact that a defense is ultimately unsuccessful will
27 not preclude a finding that a good faith dispute did exist. Defenses
28 presented which, under all the circumstances, are unsupported by
any evidence, are unreasonable, or are presented in bad faith, will
preclude a finding of a “good faith dispute.”

25 Cal. Code Regs. Tit. 8, § 13520; *see also Barnhill v. Robert Saunders & Co.*, 125 Cal. App. 3d 1,
26 8 (1981) (declining to impose penalties under California Labor Code section 203 on the basis of
27 uncertainty in the law and defendants’ good faith belief that it was acting lawfully when it took a
28 set-off for an employee’s wages for debts owed at the time of discharge, even though court

1 ultimately found that employer’s conduct was not lawful).

2 California and federal district courts have held that this defense applies not only to section
3 203 claims but also claims under Cal. Labor Code Sections 226 and 1174. *See Dalton v. Lee*
4 *Publications, Inc.*, No. 08CV1072 BTM NLS, 2011 WL 1045107, at *5 (S.D. Cal. Mar. 22, 2011)
5 (granting summary judgment on claims under California Labor Code sections 203, 226 and 1174
6 on the basis that there was a good faith dispute as to whether defendant had properly classified
7 plaintiffs as independent contractors rather than employees); *Harris v. Vector Mktg. Corp.*, 656
8 F.Supp.2d 1128, 1146 (N.D.Cal.2009) (Chen, J.) (granting summary judgment on claims under
9 California Labor Code sections 203 and 226 on the basis that there was good faith dispute as to
10 whether defendant had properly classified plaintiffs as independent contractors rather than
11 employees); *Reber v. AIMCO/Bethesda Holdings, Inc.*, No. SA CV07–0607 DOC RZX, 2008 WL
12 4384147, at *9 (C.D.Cal. Aug. 25, 2008) (granting summary judgment in favor of defendant on
13 claims under California Labor Code sections 203 and 226 on the basis that there was a good faith
14 dispute as to whether defendant had properly classified plaintiffs as administrative employees);
15 *Amaral v. Cintas Corp. No. 2*, 163 Cal. App. 4th 1157, 1174, 1219 (affirming trial court judgment,
16 which “determined Cintas’s violation of the [Living Wage Ordinance] was not willful, [and]
17 declined to impose the higher penalty rates plaintiffs sought,” including penalties under section
18 226).

19 In *Woods v. Vector Mktg. Corp.*, Judge Chen recognized that in applying the “good faith
20 dispute” rule to Section 226, courts are extending a defense that was initially applied to the
21 willfulness standard (the standard that applies to claims under Section 203 and 1174) to the
22 “knowing and intentional” standard of section 226. *See Woods v. Vector Mktg. Corp.*, No. C-14-
23 0264 EMC, 2015 WL 2453202, at *3-4 (N.D. Cal. May 22, 2015). In that case, the court found
24 that similar treatment of the two standards is “consistent with the Labor Code,” offering several
25 specific reasons for its conclusion. *Id.* at 3. “First, California courts have defined willful as
26 intentional.” *Id.* (quoting *Barnhill*, 125 Cal. App. 3d at 7 (“[a]s used in section 203, ‘willful’ [. . .
27] means that the employer intentionally failed or refused to perform an act which was required to
28 be done” (quoting *Davis v. Morris*, 37 Cal. App. 2d 269, 274(1940))); and citing *Amaral*, 163

1 Cal. App. 4th at 1201 (“The settled meaning of ‘willful,’ as used in section 203, is that an
2 employer has intentionally failed or refused to perform an act which was required to be done”).
3 “Second, the Labor Code itself treats ‘willful’ and ‘knowing and intentional’ violations with
4 similar weight” by imposing civil penalties for violations of both provisions. *Id.* at * 4. Finally,
5 the California Supreme Court has equated the willfulness standard to the knowing and intentional
6 standard. *Id.* (citing *Ex parte Trombley*, 31 Cal. 2d 801, 807-08 (1948)).

7 The undersigned finds the reasoning of Judge Chen in *Woods* to be persuasive and
8 therefore concludes that the good faith defense that applies to claims under section 203 also
9 applies to Claims asserted under section 226 and 1174. Further, while the Court ultimately
10 concludes that Plaintiffs have been misclassified, as discussed further below, Plaintiffs have not
11 demonstrated that there is a fact question as to Exel’s intent. Truck drivers who own their own
12 trucks have been found to be independent contractors in a variety of contexts. *See, e.g., United*
13 *States v. Silk*, 331 U.S. 704, 719 (1947) (holding that truck drivers who owned their own trucks
14 and hired their own helpers were “small businessmen” who were properly classified as
15 independent contractors); *Merchants Home Delivery Serv., Inc. v. N.L.R.B.*, 580 F.2d 966, 968
16 (9th Cir. 1978) (holding that delivery truck drivers for Exel’s predecessor company were properly
17 classified as independent contractors); *N.L.R.B. v. A. Duie Pyle, Inc.*, 606 F.2d 379, 388 (3d Cir.
18 1979) (finding that drivers who owned their own trucks and were “not instructed how to do their
19 job” were acting as independent contractors when they delivered coal for defendant). In light of
20 this authority, it was not unreasonable for Exel conclude that it could lawfully classify its drivers
21 as independent contractors.

22 Nor have Plaintiffs pointed to any evidence that Exel did not have a good faith belief that
23 its classification of its drivers as independent contractors was legally proper. The evidence cited
24 by Plaintiffs indicating that Exel made a conscious decision to classify (or reclassify) its drivers as
25 independent contractors in order to cut costs does not create a material issue of fact on this issue
26 because Exel’s financial motivation is not relevant to whether it believed its classification was
27 legal. Accordingly, the Court finds that Exel is entitled to summary judgment on these claims.
28

F. Whether Plaintiffs Can Recover Vehicle Lease Payments

1 Defendants assert that they are entitled to summary judgment on Claim Nine to the extent
2 Plaintiffs seek reimbursement for vehicle rentals or leases. The Court agrees.

3
4 The DLSE has found that although the costs of operating a motor vehicle in the course of
5 employment may be covered by California Labor Code section 2802, the costs of furnishing the
6 vehicle itself are not. *See DLSE Interpretive Bulletin No. 84-7* (Jan. 8, 1985) (“Bulletin 84-7”)
7 (“an applicant for employment may be required, as a condition of employment to furnish his []
8 own automobile or truck to be used in the course of employment, regardless of the amount of
9 wages paid”). In several Opinion Letters, the DLSE has assumed that employers may require
10 employees to provide their own trucks or automobiles without directly addressing the question.
11 *See DLSE Opinion Ltr. 1991.02.25-1* (Feb. 25 1991 Opinion Letter presuming that employer may
12 require employee to use own car while opining that employer must reimburse for insurance
13 premiums); *DLSE Opinion Ltr. 1991.08.30* (Aug. 30, 1991 Opinion Letter presuming that
14 employer can require employee to use own truck but opining that employer must reimburse
15 employee for costs of operation); *DLSE Opinion Ltr. 1994.08.14* (Aug. 14, 1994 Opinion Letter
16 presuming employees may be required to provide own trucks or automobiles and addressing
17 reimbursement rates); *DLSE Opinion Ltr. 1998.11.05* (Nov. 5, 1998 Opinion Letter presuming
18 employee could be required to use own vehicle while opining that employer must reimburse for
19 insurance premiums).

20 In *Estrada v. FedEx Ground Package System, Inc.*, the California Court of Appeal
21 examined the opinions of the DLSE on this issue and addressed whether an Opinion Letter issued
22 on January 22, 1997 represented a limitation on the DLSE’s earlier opinion, in Bulletin 84-7. 154
23 Cal. App. 4th 1 (2007) (citing *DLSE Opinion Ltr. 1997.01.22*, opinion that an employer could not
24 require an employee to purchase a customized truck for \$50,000 as a condition of employment).
25 The *Estrada* court rejected this argument, finding that apart from “two tangential and conclusory
26 sentences” in the January 22, 1997 Opinion Letter that could be read to support a contrary
27 conclusion, all of the commentary supported the conclusion that “an employer may require its
28 employees to provide their own trucks.” *Id.* at 25.

1 Plaintiffs have not offered any substantive arguments suggesting that the conclusion in
2 *Estrada* is incorrect. Indeed, even the case they cited on this issue, *Smith v. Cardinal Logistics*
3 *Mgmt. Corp*, 2009 WL 2588879 (N.D. Cal. Aug. 19, 2009), supports the conclusion that under
4 section 2802 an employer may require employees to furnish their own trucks as a condition of
5 employment. In that case, an employer requested summary judgment as to claims by drivers
6 seeking reimbursement under section 2802 for lease payments they made on their trucks, which
7 they used to perform delivery services for the defendant. 2009 WL 2588879, at *4-5. Judge Conti
8 acknowledged that even if the drivers (who were considered by the employer to be independent
9 contractors) were found to be employees, “the *Estrada* decision provides strong support for [the
10 employer’s] contention that class members are not entitled to be reimbursed for their truck lease
11 payments.” Judge Conti declined, however, to decide the question at the summary judgment stage
12 of the case. *Id.* Rather, he deferred ruling on the question, finding that “prior to a determination
13 that [the defendant’s] drivers are employees, the Court is not willing to engage in hypothetical
14 speculation about whether the lease payments in this case are or are not reimbursable.” *Id.* at *5.

15 Judge Conti’s decision to defer ruling on the question of whether lease payments were
16 available was appropriate under the facts of that case, given that the proper classification of the
17 drivers had not yet been resolved and therefore, the availability of lease payments might not need
18 to be reached, depending on what the jury decided on the classification issue. Here, on the other
19 hand, the Court finds that the classification question is suitable for determination on summary
20 judgment and that Plaintiffs are employees. Therefore, the justification for waiting to decide this
21 issue in *Smith* is not present here. Further, under the authority discussed above, the Court
22 concludes Plaintiffs are not entitled to recover their lease payments and thus, that Exel is entitled
23 to summary judgment on this claim.

24 **G. Whether Plaintiffs Have Standing to Seek Injunctive Relief**

25 Exel argues that Plaintiffs’ claim for injunctive relief must be dismissed because neither of
26 the named Plaintiffs is currently employed by Exel. Exel is correct that “a former employee lacks
27 standing to seek prospective injunctive relief on behalf of a putative class containing both former
28 and current employees.” *Richards v. Ernst & Young LLP*, No. C08-4988 JF(HRL), 2010 WL

1 682314, at *3 (N.D. Cal. Feb. 24, 2010). Plaintiffs, however, have offered declarations by two
2 class members, Pedro Alvarez and Abel Barajas Montes, who are currently employed by Exel and
3 can represent the class as to the injunctive relief claim. *See* Piller Opposition Decl., Exs. 13
4 (Alvarez Decl.) & 14 (Montes Decl.). Where the claims of class representatives are rendered
5 moot, the court may substitute appropriate representatives with live claims. *See Kremens v.*
6 *Bartley*, 431 U.S. 119, 135 (1977); *Nat'l Fed'n of Blind v. Target Corp.*, 582 F. Supp. 2d 1185,
7 1201 (N.D. Cal. 2007). Exel does not challenge the adequacy of these individuals to act as class
8 representatives. Nor does it dispute that the class, which has already been certified, contains
9 numerous class members who are currently employed by Exel. Further, although Exel has
10 asserted, in a conclusory manner, that it will be prejudiced if the Court permits new plaintiffs to
11 substitute in, it has not pointed to any specific prejudice. Under these circumstances, the Court
12 finds that it is appropriate to permit Plaintiffs to substitute in individuals who have standing to
13 pursue the injunctive relief claim. Therefore, the Court denies Exel's request for summary
14 judgment on Plaintiffs' request for injunctive relief.

15 **V. PLAINTIFFS' MOTION FOR SUMMARY JUDGMENT**

16 **A. Evidentiary Objections**

17 Exel objects to Plaintiffs' reliance on the testimony of James Dalpino and Greg Smigelsky
18 on they basis that these witnesses do not have personal knowledge of Exel's California operations
19 during the relevant time period. *See* Defendants' Opposition at 7. Plaintiffs do not oppose Exel's
20 request to strike citations to the Dalpino testimony. Therefore, the objections to the citations of
21 the Dalpino testimony are sustained and the testimony listed in Defendants' Opposition at 7:25 -
22 27 is stricken. The Court overrules Exel's objections to the deposition testimony of Greg
23 Smigelsky. Plaintiffs cite Smigelsky's testimony to establish Exel's policies and practices. As a
24 high-level manager who is responsible for recruitment and development of drivers for the entire
25 company, Smigelsky has sufficient knowledge and experience to testify on these subjects. Further,
26 to the extent Exel contends Plaintiffs have mischaracterized Smigelsky's testimony, this challenge
27 is more appropriately addressed on the merits than in the context of an evidentiary objection.
28

B. Legal Standards Governing Classification of Employees vs. Independent Contractors Under California Law²²

Under California law, an individual who comes forward with evidence that he or she provided services for an employer is presumed to be an employee. *Narayan v. EGL, Inc.*, 616 F.3d 895, 900 (9th Cir. 2010) (citing *Robinson v. George*, 16 Cal. 2d 238, 243 (1940)). “The burden then shifts to the employer to ‘prove, if it can, that the presumed employee was an independent contractor.’” *Ruiz*, 754 F.3d at 1100 (citing *Cristler v. Express Messenger Sys., Inc.*, 171 Cal. App. 4th 72, 83 (2009)). The California Supreme Court has identified a number of factors that courts should consider in making this determination, the most important of which is “whether the person to whom service is rendered has the right to control the manner and means of accomplishing the result desired.” *S. G. Borello & Sons, Inc. v. Dep’t. of Indus. Relations*, 48 Cal.3d 341, 350 (1989). The *Borello* court instructed that this test should not be applied rigidly, however, and that courts should also consider several “secondary” indicia of the nature of a service relationship. *Id.* The court noted that “[s]trong evidence in support of an employment relationship is the right to discharge at will, without cause.” *Id.* (internal quotations and citations omitted). The *Borello* court listed the following secondary factors:

- (a) whether the one performing services is engaged in a distinct occupation or business;
- (b) the kind of occupation, with reference to whether, in the locality, the work is usually done under the direction of the principal or by a specialist without supervision;
- (c) the skill required in the particular occupation;
- (d) whether the principal or the worker supplies the instrumentalities, tools, and the place of work for the person doing the work;
- (e) the length of time for which the services are to be performed;
- (f) the method of payment, whether by the time or by the job;
- (g) whether or not the work is part of the regular business of the principal; and
- (h) whether or not the parties believe they are creating the relationship of employer-employee.

Id. at 351. “Generally, . . . the individual factors cannot be applied mechanically as separate tests; they are intertwined and their weight depends often on particular combinations.” *Id.*

²² In the Court’s Order Granting Motion for Class Certification [Docket No. 150], the Court provided an overview of the California law governing the classification of workers as employees vs. independent contractors, including an examination of *Ruiz* and *Alexander*, the primary cases upon which Plaintiffs rely in support of their request for summary judgment on the classification issue. For the convenience of the reader, the Court includes that overview here, with minor changes.

1 (quoting *Germann v. Workers' Comp. Appeals Bd.*, 123 Cal. App. 3d 776, 783 (1981)). Further,
2 “the label that parties place on their employment relationship ‘is not dispositive and will be
3 ignored if their actual conduct establishes a different relationship.’” *Ruiz*, 754 F.3d at 1101
4 (quoting *Estrada v. FedEx Ground Package Sys., Inc.*, 154 Cal. App. 4th 1, 10-11 (2007)).

5 **1. *Ruiz v. Affinity Logistics Corp.***

6 In *Ruiz*, the court applied the *Borello* factors in a case involving delivery drivers who
7 alleged that they were misclassified as independent contractors. 754 F.3d 1093 (9th Cir. 2014).
8 The drivers alleged that because they were actually employees, they were entitled to sick leave,
9 vacation, holiday and severance pay and should not have been charged for workers’ compensation
10 insurance. *Id.* at 1095. The plaintiffs in the putative class were drivers for Affinity Logistics,
11 which provided delivery services for home furnishing retail stores. *Id.* at 1096. To be hired, the
12 drivers were not required to have any special license; they “simply had to have a driver’s license,
13 sign the [Independent Truckman’s Agreement] and [Equipment Lease Agreement], and pass a
14 drug test and physical exam.” *Id.* at 1097. As in this case, the Independent Truckman’s
15 Agreement and Equipment Lease Agreement stated that the drivers were independent contractors
16 rather than employees. *Id.* Under these agreements, the drivers were paid a “flat per-stop rate.”
17 *Id.*

18 The drivers in *Ruiz* were also required to follow uniform procedures “regarding loading
19 trucks, delivering goods, installing goods, interacting with customers, reporting to Affinity after
20 deliveries, and addressing returns and refused merchandise, damaged goods, and checking in with
21 Affinity after deliveries.” *Id.* at 1097. These procedures were set forth in the Affinity Contractor
22 Procedures Manual. *Id.* Drivers were encouraged to lease their trucks from Affinity (in which
23 case, the cost was deducted from their compensation) but could lease a truck from an outside
24 source. *Id.* In either case, the drivers were required to paint the trucks white; only Affinity’s
25 name and the Sears logo were permitted on the trucks. *Id.* The drivers were required to wear
26 uniforms. *Id.* at 1098. Similar to the drivers in this case, the drivers in *Ruiz* were required to
27 report to one of Affinity’s warehouses every day to attend a morning “stand-up” meeting and
28 receive their route manifests. *Id.* at 1098. Drivers were not permitted to change the order of the

1 deliveries listed on the manifest route. *Id.* They were required to report frequently to dispatchers
2 throughout the day using a “specific type of mobile telephone.” *Id.* Drivers were also required to
3 have a helper or secondary driver on the truck. *Id.* at 1097. The secondary drivers and helpers had
4 to submit to a background check and be approved by Affinity. *Id.* Affinity supervisors sometimes
5 conducted “follow-alongs” in which they “followed a driver for a few stops to ensure that the
6 driver was wearing the uniform and using proper delivery techniques.” *Id.*

7 Following a bench trial, the district court in *Ruiz* entered judgment in favor of Affinity on
8 the basis that the plaintiffs were independent contractors. The Court of Appeals, however,
9 reversed, finding that consideration of the *Borello* factors supported the opposite conclusion, that
10 is, that the drivers were employees rather than independent contractors. *Id.* at 1101. First, the
11 court addressed the “most important” consideration, the right to control the details of the drivers’
12 work. *Id.* Based on the undisputed facts, the court found that this factor “indicate[d]
13 overwhelmingly that the drivers were Affinity employees.” *Id.* at 1103. The court cited the
14 evidence that Affinity controlled the drivers’ “rates, schedules and routes,” as well as the
15 equipment they used and their appearance and that Affinity “closely monitored and supervised its
16 drivers.” *Id.* at 1102. The court also pointed to the fact that the Independent Truckman’s
17 Agreement permitted Affinity to terminate the drivers without cause with sixty days notice. *Id.*

18 The Ninth Circuit specifically rejected the conclusion of the district court that the drivers
19 were independent contractors because they could hire helpers and secondary drivers. *Id.* The
20 court reasoned that the district court had “overlooked the fact that often the reason drivers hired
21 helpers was that they were required to do so by Affinity” and further pointed to the fact that
22 “Affinity retained ultimate discretion to approve or disapprove of those helpers and additional
23 drivers.” *Id.* at 1102.

24 The Ninth Circuit in *Ruiz* also found that “most of the secondary factors outlined in
25 *Borello*” supported the conclusion that the drivers were employees. First, the court found that the
26 district court had erred in finding that the “distinct occupation or business factor” supported the
27 conclusion that the drivers were independent contractors. *Id.* at 1103-04. In particular, the court
28 found that the district court had placed too much weight on the fact that the drivers “had the ability

1 to expand their businesses by hiring more employees, operating multiple trucks, and making
2 managerial decisions regarding the employment and performances of the employees hired.” *Id.*
3 The district court had not placed enough weight, the court found, on “the fact that Affinity
4 required drivers to create these businesses as a condition of employment.” *Id.*

5 The second and third *Borello* factors – whether “the work is usually done under the
6 direction of the principal or by a specialist without supervision” and “the skill required in the
7 particular occupation” – also supported the conclusion that the drivers were employees, the court
8 found. *Id.* As to this factor, the court again found that the district court had erred, holding that it
9 placed too much weight on the fact that drivers installed appliances without supervision, which the
10 district court opined required “substantial skill.” *Id.* at 1104. This conclusion was incorrect, the
11 Ninth Circuit found, given that the drivers were not required to have any work experience or
12 special licenses to be hired and that Affinity “closely supervised the drivers’ work through various
13 methods.” *Id.* Thus, these factors supported the conclusion that the drivers were employees of
14 Affinity. *Id.*

15 The court found that the fourth *Borello* factor supported the same conclusion. *Id.* The
16 fourth factor asks “whether the principal or the worker supplies the instrumentalities, tools, and
17 the place of work for the person doing the work.” *Id.* The district court concluded that this factor
18 supported the conclusion that the drivers were independent contractors because the drivers paid to
19 lease their trucks and mobile telephones from Affinity. *Id.* The Ninth Circuit, however, held that
20 the district court’s conclusion was clearly erroneous because it failed to take into account the fact
21 that “Affinity supplied the drivers with the major tools of the job by encouraging or requiring that
22 the drivers obtain the tools from them through paid leasing arrangements.” *Id.*

23 Next, the court addressed the *Borello* factor that considers “the method of payment,
24 whether by the time or by the job.” *Id.* The court explained that payment “by the time” supports a
25 finding of employee status whereas payment “by the job” supports independent contractor status.
26 *Id.* Citing evidence that drivers performed approximately eight deliveries a day and that the
27 drivers’ daily pay therefore “essentially remained the same,” the court concluded that the method
28 of compensation was by the time rather than by the job. *Id.* In reaching this conclusion, the court

1 rejected the district court’s reasoning that the flat per-delivery rate was more like “by the job”
2 compensation because the time it took to complete each delivery varied and the drivers did not
3 work “set hours.” *Id.*

4 As to the *Borello* factor that asks courts to consider whether or not the parties believe they
5 are creating the relationship of employer-employee, the court noted that both parties believed that
6 they were entering an independent contractor relationship but that “the parties’ label is not
7 dispositive and will be ignored if their actual conduct establishes a different relationship.” *Id.* at
8 1105 (quoting *Estrada v. FedEx Ground Package Sys., Inc.*, 154 Cal. App. 4th 1, 11 (2007)).

9 The court next addressed the “right to terminate at will factor.” *Id.* The Ninth Circuit, like
10 the district court, found that the mutual termination provision in the Independent Truckman’s
11 Agreement was “consistent with either an employer-employee or independent contractor
12 relationship.” *Id.*

13 Finally, the court found that the “length of time for performance of services” favored an
14 employer-employee relationship because “there was no contemplated end to the service
15 relationship when the drivers signed their contracts, and drivers often stayed with Affinity for
16 years.” *Id.*

17 Based on the fact that Affinity had the right to control the details of the drivers’ work and
18 because the totality of the secondary factors supported the conclusion that the drivers were
19 employees of Affinity, the Ninth Circuit reversed the district court’s holding that the drivers were
20 independent contractors and remanded to the district court for further proceedings. *Id.*

21 **2. *Alexander v. FedEx Ground Package System, Inc.***

22 In *Alexander*, the Ninth Circuit again addressed the question of whether delivery drivers
23 had been misclassified as independent contractors under California law. 765 F.3d 981 (9th Cir.
24 2014). In that case, numerous related cases involving FedEx delivery drivers were consolidated
25 for multidistrict litigation (MDL) proceedings. In the MDL, the court certified a class as to the
26 California state law claims and then granted summary judgment in favor of FedEx, finding, as a
27 matter of law, that the plaintiffs were independent contractors. *Id.* at 988. The Ninth Circuit
28 reversed, finding that under the *Borello* factors, the plaintiffs were employees rather than

1 independent contractors. *Id.*

2 The facts in *Alexander* are, in many respects, very similar to the facts in *Ruiz*. Like the
3 drivers in *Ruiz*, the drivers in *Alexander* entered into a contract with FedEx (“the Operating
4 Agreement”) providing that they were independent contractors. *Id.* at 984. The Operating
5 Agreement allowed drivers to operate more than one vehicle and route, but only with the consent
6 of FedEx; it also permitted the driver to hire third parties to help perform their work, but the third
7 party helpers were required to be qualified under federal, state and municipal safety standards, as
8 well as FedEx’s own safety standards. *Id.* at 985-986. The Operating Agreement specified an
9 initial term of one, two or three years, with automatic renewal for one-year terms unless either
10 party gave notice of its intent not to renew. *Id.* at 986. The Operating Agreement provided that
11 the parties could terminate by mutual consent, for cause, including breach of the agreement, if
12 FedEx stopped doing business in the driver’s service area, or upon thirty days written notice by the
13 driver. *Id.*

14 FedEx imposed numerous requirements on the drivers as to how they performed their
15 work. *Id.* This included making deliveries on every day that FedEx was open for business,
16 delivering packages within the window of time negotiated between FedEx and its customers,
17 wearing a FedEx uniform and adhering to FedEx personal grooming rules, using an electronic
18 scanner (purchased from FedEx) to send information to FedEx after each delivery, and adhering to
19 FedEx standards and procedures regarding safety and customer interactions. *Id.* at 985. FedEx
20 policy permitted a driver’s manager to conduct up to four ride-along performance evaluations a
21 year to ensure that drivers were adhering to FedEx standards. *Id.* Under the Operating
22 Agreement, the drivers were required to provide and maintain their own trucks, which had to be
23 approved by FedEx. *Id.* The drivers were required to pay the costs associated with maintaining
24 and operating the trucks. *Id.* The trucks, as well as the shelving inside the trucks, were required to
25 have specific dimensions. *Id.* They had to be painted with the FedEx colors and carry the FedEx
26 logo. *Id.*

27 Applying the *Borello* factors, the court concluded that FedEx’s policies allowed it to
28 “exercise a great deal of control over the manner in which its drivers do their jobs” and therefore,

1 that this factor strongly supported the position of the drivers that they were employees. *Id.* at 989.
2 The court pointed to FedEx’s policies governing uniforms and grooming, the appearance of the
3 drivers’ trucks, the times the drivers worked, and the way the deliveries were performed. *Id.* at
4 990. The court acknowledged that there were “details of its drivers work” that FedEx did not
5 control but found that these details were insignificant in comparison to the extensive control
6 exercised over the drivers overall. *Id.*

7 The court also rejected FedEx’s argument that the drivers were not employees in light of
8 the “flexibility and entrepreneurial activities” they were given and, in particular, “the ability to
9 take on multiple routes and vehicles and to hire third-party helpers.” *Id.* at 991, 993. The court
10 began its analysis of this question by examining *Borello*, in which the California Supreme Court
11 held that “[a] business entity may not avoid its statutory obligations by carving up its production
12 process into minute steps, then asserting that it lacks ‘control’ over the exact means by which one
13 such step is performed by the responsible workers.” *Id.* (quoting *Borello*, 48 Cal. 3d at 357).
14 There, a commercial produce grower hired agricultural workers under sharefarmer agreements to
15 harvest the crops in the plots assigned to them, with the assistance of their families. *Id.* at 991
16 (citing *Borello*, 48 Cal. 3d at 357). Although the sharefarmers used their own tools, set their own
17 hours and were free to decide when to pick the crop to maximize profit, the court found that the
18 workers were employees because the grower exercised a great deal of control over the business as
19 a whole and exercised “all necessary control” over the work of the sharefarmers. *Id.* According to
20 the *Alexander* court, California courts have applied the “all necessary control” test of *Borello* to
21 delivery drivers, recognizing that delivery drivers may be employees, despite operating with some
22 degree of autonomy, because the employer exercises “all necessary control.” *Id.* at 991-92 (citing
23 *JKH Enter., Inc. v. Dep’t of Indus. Relations*, 142 Cal.App.4th 1046, 1049 (2006) and *Air*
24 *Couriers Int’l v. Emp’t Dev. Dep’t.*, 150 Cal.App.4th 923, 931-32 (2007)).

25 The *Alexander* court went on to reject FedEx’s reliance on a D.C. Circuit case, *FedEx*
26 *Home Delivery v. National Labor Relations Board*, 563 F.3d 492 (D.C. Cir. 2009). *Id.* at 993. In
27 that case, the court noted, the D.C. Circuit shifted away from the control inquiry in favor of a test
28 that asks whether the “putative independent contractors have significant entrepreneurial

1 opportunity for gain or loss.” *Id.* Because California has not adopted such a test, the *Alexander*
2 court found, FedEx’s reliance on that case was misplaced. *Id.* The court also noted that its
3 conclusion was consistent with *Ruiz*, in which the Ninth Circuit “found that drivers were
4 employees where the company ‘retained ultimate discretion to approve or disapprove of those
5 helpers and additional drivers.’” *Id.* at 994 (quoting *Ruiz*, 754 F.3d at 1102).

6 Next, the court in *Alexander* examined the secondary factors under *Borello*. The court
7 found that the first factor, the right to terminate at will, “slightly favor[ed] FedEx” because the
8 Operating Agreement did not give FedEx an unqualified right to terminate. *Id.*

9 The court found that the second factor, whether the plaintiffs were engaged in a “distinct
10 occupation or business,” favored the plaintiffs because “‘the work performed by the drivers is
11 wholly integrated into FedEx’s operation [and] [t]he drivers look like FedEx employees, act like
12 FedEx employees, [and] are paid like FedEx employees.’” *Id.* (quoting *Estrada v. FedEx Ground*
13 *Package Sys., Inc.*, 154 Cal. App. 4th 1, 9 (2007)).

14 The court concluded that the third factor, whether the work is performed under the
15 principal’s direction, “slightly favor[ed] plaintiffs” because “although drivers retain freedom to
16 determine several aspects of their day-to-day work, FedEx also closely supervises their work
17 through various methods.” *Id.* at 995.

18 The fourth factor – skill required in the occupation – also favored the plaintiffs, according
19 to the court, because “FedEx drivers ‘need no experience to get the job in the first place and [the]
20 only required skill is the ability to drive.’” *Id.* (quoting *Estrada*, 154 Cal. App. 4th at 12).

21 The court found that the fifth factor, the provision of tools and equipment, only slightly
22 favored FedEx. *Id.* In particular, although the drivers provided their own trucks and were not
23 required to get other equipment from FedEx, this factor did not strongly support FedEx’s position
24 because FedEx was “‘involved in the purchasing process, providing funds and recommending
25 vendors.’” *Id.* (quoting *Estrada*, 154 Cal. App. 4th at 9).

26 The court found that the sixth factor, “length of time for performance of services,”
27 supported the plaintiffs’ position. *Id.* at 996. The court’s conclusion was based on the terms of
28 the Operating Agreement, which provided for an initial term of one to three years and automatic

1 renewal for successive one-year terms if there was no notice of non-renewal by either party. *Id.*

2 The court held that the “method of payment” factor was neutral. According to the court,
3 “FedEx pays its drivers according to a complicated scheme that includes fixed and variable
4 components and ties payment to, among other things, packages, stops, and the ratio of driving time
5 to deliveries. This payment method cannot easily be compared to either hourly payment (which
6 favors employee status) or per job payment (which favors independent contractor status).” *Id.*

7 The court held that the eighth factor, “whether the work is part of the principal’s regular
8 business,” favored the plaintiffs because the work they performed – the pickup and delivery of
9 packages – was ““essential to FedEx’s core business.”” *Id.* (quoting *Estrada*, 154 Cal. App. 4th at
10 9).

11 Finally, the court found that the parties’ beliefs as to the nature of the relationship being
12 formed slightly favored FedEx to the extent the Operating Agreement provided some evidence
13 that both FedEx and the drivers believed they were forming an independent contractor’s
14 relationship. *Id.* As in *Ruiz*, however, the court noted that “neither [FedEx]’s nor the drivers’ own
15 perception of their relationship as one of independent contracting” is dispositive. *Id.* (citations
16 omitted).

17 The court in *Alexander* concluded that the secondary factors did not strongly favor either
18 employee status or independent contractor status but that the primary factor of the right to control
19 test strongly favored the plaintiffs and therefore, that the drivers were employees as a matter of
20 law under California’s right-to-control test. *Id.* at 1105.

21 **C. Application of the *Borello* Test to the Undisputed Facts in This Case**

22 Plaintiffs are entitled to summary judgment on Exel’s independent contractor defense only
23 if the undisputed facts, viewed in the light most favorable Exel, demonstrate that Exel will be
24 unable to meet its burden in establishing that Plaintiffs are independent contractors under
25 California law. In making this determination, the Court is “bound by decisions of the state’s
26 highest court.” *Nelson v. City of Irvine*, 143 F.3d 1196, 1206 (9th Cir. 1998). Further, “[a]lthough
27 a circuit court’s prediction of state law is not binding in the same way as is its definitive
28 interpretation of federal law, as a practical matter a circuit court’s interpretations of state law must

1 be accorded great deference by district courts within the circuit.” *Johnson v. Symantec Corp.*, 58
 2 F. Supp. 2d 1107, 1111 (N.D. Cal. 1999). Here, the Ninth Circuit has applied the *Borello* factors
 3 to highly analogous facts, not once but twice in recent years, in *Ruiz* and *Alexander*, and
 4 concluded that the plaintiffs were employees; in *Alexander*, the Court found that the plaintiffs
 5 were entitled to summary judgment on this question and in *Ruiz*, the Court of Appeals applied
 6 what amounted to a summary judgment standard, finding that the undisputed facts established that
 7 plaintiffs were employees as a matter of law. While it might be appropriate for this Court to
 8 deviate from the Ninth Circuit’s approach in *Alexander* and *Ruiz* if later-filed California cases
 9 suggested that these Ninth Circuit’s opinions were not an accurate prediction of how the
 10 California Supreme Court would rule, *see Owen v. United States*, 713 F.2d 1461, 1464 (9th Cir.
 11 1983), the Court finds no such cases here. To the contrary, the *Ayala* decision, which was issued
 12 by the Supreme Court of California before *Alexander* but after *Ruiz*, is in line with the Ninth
 13 Circuit’s reasoning and holdings in those two cases. Applying the *Borello* factors to the facts of
 14 this case, the Court finds, as a matter of law, that Plaintiffs are employees rather than independent
 15 contractors and therefore, that Defendants cannot defeat Plaintiffs’ request for summary judgment
 16 on this issue.

17 **1. Exel’s Right to Control Manner and Means of Accomplishing Result Desired**

18 The undisputed facts establish that Exel exercises significant control over how Plaintiffs do
 19 their job, which is the “most important” factor under *Borello*. *See* 48 Cal. 3d at 350. As discussed
 20 below, this control is reflected in the ITA, Exel’s Compliance Manual and training materials, and
 21 undisputed testimony relating to Exel’s policies and procedures.

22 First, it is undisputed that the ITA allows Exel to terminate drivers without cause with 60
 23 days notice. Piller Motion Decl., Ex. 8 (ITA) ¶ 3. The same provision was found to support the
 24 conclusion that the drivers in *Ruiz* were employees, *see* 754 F.3d at 1102, and is strong evidence
 25 of Exel’s right to control its drivers. *See Ayala*, 59 Cal. 4th at 531.²³

26 _____
 27 ²³ The Court notes that there is some apparent ambiguity in the case law as to where the
 28 contractual right to terminate fits into the *Borello* inquiry. In *Alexander*, the court addressed this
 question as a secondary factor. *See* 765 F.3d at 994 (referring to the “right to terminate at will” as
 the first of the secondary factors). In *Ruiz*, on the other hand, the court cited the ITA provision

1 Second, it is undisputed that both drivers and their trucks must meet Exel’s appearance
 2 requirements. In particular, Exel’s policies require that drivers wear uniforms carrying the Exel
 3 logo and adhere to a specific color scheme, while their trucks must meet certain dimensional and
 4 color requirements and carry the Exel corporate name. These requirements are reflected in policy
 5 documents produced by Exel and confirmed by Exel’s “person most knowledgeable.” *See* Piller
 6 Reply Decl., Ex. 2 (Albarano Depo.) at 210-211 (testifying that drivers are required to wear Exel
 7 uniforms at all California locations), Ex. 6 (describing “[t]he standard Exel delivery uniform”),
 8 Ex. 7 (describing “Exel Standard Trucking Requirements”). Exel has not disputed that it requires
 9 Plaintiffs to adhere to these rules; nor has it offered evidence that in actual practice, Plaintiffs are
 10 permitted to deviate from these appearance requirements. To the contrary, Exel’s Greg Smigelsky
 11 admitted that failure to follow these appearance requirements can be grounds for termination.
 12 Piller Motion Decl., Ex. 7 (Smigelsky Depo.) at 79. Again, no contrary evidence was offered that
 13 controverts Smigelsky’s testimony. As the court in *Ruiz* found, this control over “‘every exquisite
 14 detail’ of the drivers’ appearance” is indicative of an employer-employee relationship. *See* 754

15
 16 permitting the company to terminate drivers without cause with sixty days’ notice as evidence that
 17 the company retained a right to control the drivers, which is the primary inquiry under *Borello*.
 18 *See* 754 F.3d at 1102. It went on, however, to address the “[r]ight to terminate at will” as a
 19 secondary factor as well, finding that because the provision was mutual, it was “consistent with
 20 either an employer-employee or independent contractor relationship.” *Id.* at 1105. The Court
 21 finds that the approaches of these two cases are reconcilable and consistent with California case
 22 law. In particular, the California Supreme Court has recognized that “[p]erhaps the strongest
 23 evidence of the *right to control* is whether the hirer can discharge the worker without cause,
 24 because ‘[t]he power of the principal to terminate the services of the agent gives him the means of
 25 controlling the agent’s activities.’” *Ayala v. Antelope Valley Newspapers, Inc.*, 59 Cal. 4th 522,
 26 531 (quoting *Malloy v. Fong*, 37 Cal. 2d 356, 370 (1951) (emphasis added)). The *Ayala* court also
 27 recognized, however, that “[t]he worker’s corresponding right to leave is similarly relevant: ‘An
 28 employee may quit, but an independent contractor is legally obligated to complete his contract.’”
Id. at 531 n. 2 (quoting *Perguica v. Indus. Accident Comm’n*, 29 Cal. 2d 857, 860 (1947)). *Ayala*
 indicates that a contractual right to terminate without cause is an important consideration in
 determining whether there is a right to control but that other aspects of a termination clause (such
 as whether it is mutual) may also be considered as secondary indicia of the nature of the
 employment relationship. This is consistent with the Ninth Circuit cases; in *Alexander*, the
 termination clause did not give the employer an “unqualified right to terminate” and thus, the court
 addressed the termination provision of the contract only as a secondary factor. In contrast, in *Ruiz*,
 where the contract gave the employer the right to terminate without cause, the court addressed this
 provision *both* with reference to the primary *Borello* inquiry (the right to control) and as a
 secondary factor. Because this case involves the same termination clause as was considered in
Ruiz, the Court concludes that it is relevant both to the right of control *and* as a secondary factor
 and therefore, like the *Ruiz* court, considers the termination clause of the ITA as part of both
 inquiries.

1 F.3d at 1102 (quoting *Estrada v. FedEx Ground Package Sys., Inc.*, 154 Cal. App. 4th at 11-12
2 (“FedEx’s control over every exquisite detail of the drivers’ performance, including the color of
3 their socks and the style of their hair, supports the trial court’s conclusion that the drivers are
4 employees, not independent contractors”)); *see also Alexander*, 765 F.3d at 989 (holding that
5 appearance requirements that included grooming rules and uniforms, as well as requirements
6 governing truck colors and placement of logo, supported conclusion that drivers were employees).

7 Third, the undisputed facts indicate that Exel, as a matter of general policy, engages in
8 extensive training of its drivers and subjects them to significant managerial oversight, expecting
9 them to follow very specific guidelines as to how they perform their jobs. This is reflected in
10 undisputed testimony as well as written training materials and manuals that use mandatory
11 language and provide detailed procedures for conducting a wide variety of activities related to the
12 services the drivers provide, and even scripts with language drivers should use in specific
13 situations. *See, e.g.*, Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 158-160, 165-66 (testifying
14 that attendance at stand-up meetings is required and describing topics covered, including
15 “reinforcing certain safety guidelines”), 177-79 (testifying that managers may conduct “ride-
16 alongs” or “ride-behinds” to “make sure [a driver is not having problems or issues in making the
17 deliveries”), Ex. 7 (Smigelsky Depo.) at 13, 98-100, 104-05, 148 (testifying that when they are
18 hired, drivers are assigned “professional development coordinators” who work with drivers on
19 retail client policy and interaction with customers, both during initial orientation and later), 58-59
20 (testifying that not doing well on a client scorecard can be grounds for termination), Ex. 14 (Moll
21 Depo.) at 88, 93-94 (describing how Cheetah system is used to monitor progress of drivers
22 throughout the day and testifying that reports are generated from this system and are provided to
23 managers so that they can provide feedback to drivers), 152 (testifying that when a new driver
24 starts, Exel wants the driver to “go through the Safer Way training”), Ex. 15 (Compliance Manual)
25 at EDV000308 (“Every Contractor/driver is required to maintain their qualification status as
26 defined by 49 CFR § 391 and company policy”), EDV000320 (“After an accident, never accept or
27 place blame on any person and do not sign anything”) (“Drivers are expected to make deliveries in
28 accordance with the expectations of our customers”) (“Be courteous and cooperative with the

1 homeowner. If Contractor/driver encounters any problem, notify the dispatcher as soon as
2 possible”) (where “value of the loss [for in-home damage claims] is greater than \$500” the driver
3 must report the claim to a special hotline), Ex. 34 (Exel Direct Driver Training: US DOT
4 Regulations) at EDV001561 (“Every driver must complete the Safer Way of Defensive Driving
5 Program”), Ex. 35 (The Exel Safer Way of Driving) at EDV000455 (instructions for drivers at
6 scene of accident including specific statement drivers should make if asked for comment by
7 member of news media), Ex. 36 (Ride and Evaluation Document), Ex. 38 (Manager Ride-A-Long
8 Compliance Checklist), Ex. 40 (Exel’s Acceptance Requirements of Delivery Specialist) at
9 EDV009746 (stating that Exel provides “unmatched quality service” and promising to “exceed the
10 expectations of [Exel’s] client”); *see also* Declaration of Joshua Konecky in Support of Plaintiffs’
11 Motion for Class Certification, Ex. 14 (instruction DVDs: “The Safer Way of Protecting Floors”
12 and “The Safer Way of Preventing Water Damage”).

13 Admittedly, Exel has offered some evidence that the degree of oversight that is actually
14 exercised over particular drivers may vary somewhat. Several drivers testified that they
15 sometimes altered the order of the deliveries on their manifests when a customer was unavailable
16 or when doing so would be more efficient, and at least one expressly testified that he did not
17 always ask for permission from Exel dispatchers before making these changes. *See* Hanson
18 Opposition Decl., Ex. N (Torres Depo.) at 46-47 (testifying that where he had to make two
19 deliveries in same area but manifest had him making a delivery somewhere else between the first
20 and second delivery, he called the customer to see if he could rearrange the order of the
21 deliveries), Ex. O (Jauregui Depo.) at 56-60 (testifying that sometimes he adjusted the order of the
22 stops if he thought the route was not good and the customers agreed, and that usually he did not
23 call in to Exel for permission to make the change), Ex. P (Marinov Depo.) at 36-37 (testifying that
24 when he received his manifest in the morning he would call customers and try to come up with
25 more efficient route and that was how he completed route earlier)). In addition, Exel points to
26 testimony by one driver that he had never experienced a ride-along and that he remembered only
27 one follow-along, where an Exel employee and a Sears employee followed him for one or two
28 stops and asked him if everything was going okay. Hanson Opposition Decl., Ex. F (Cifuentes

1 Depo.) at 103-04.

2 These variations in Exel’s practices do not give rise to a *material* dispute of fact. Even
3 assuming Exel has not conducted ride-alongs of some of its drivers, and that Exel drivers are
4 permitted to rearrange the order of their stops on occasion, either because a customer is
5 unavailable or the order of deliveries on the manifest is inefficient, this limited flexibility is not
6 inconsistent with the conclusion that the degree of control retained by Exel is sufficient to
7 demonstrate an employer-employee relationship. *See Alexander*, 765 F.3d at 991-92 (recognizing
8 that delivery drivers may be employees, despite operating with some degree of autonomy, because
9 the employer exercises “all necessary control” under *Borello*). Exel does not dispute that it can
10 (and does) conduct ride-alongs and follow-alongs of its drivers, that each morning it provides its
11 drivers with a list of deliveries, including specific time windows for each delivery, and that it
12 monitors the drivers’ progress throughout the day. Nor does it dispute that where a driver is late
13 or a problem arises, the driver is expected to contact Exel dispatchers, or that the results of Exel’s
14 daily monitoring of its drivers are used to give feedback to drivers. In other words, as in
15 *Alexander* and *Ruiz*, Exel retains the right to exercise extensive control over its drivers, whatever
16 minor variations there may be between drivers with respect to the exercise of that authority. *See*
17 *Alexander*, 765 F.3d at 990; *Ruiz*, 754 F.3d at 1101.

18 The undisputed facts show that Exel also retains control over *when* its drivers perform their
19 work. It is undisputed that Exel drivers are required to attend scheduled morning stand-up
20 meetings and that at these meeting, Exel provides drivers with daily manifests that set out the
21 delivery locations and time windows for delivery. Thus, while Exel does not “set specific working
22 hours down to the last minute,” it has a “great deal of control over drivers’ hours” because its
23 managers decide what deliveries to assign to the drivers. *See Alexander*, 765 F.3d at 989-90;
24 Piller Motion Decl., Ex. 5 (Albarano Depo. I) at 102-03 (testifying that Exel puts together the
25 overall routes, namely, the stops and time windows, while the driver “determines the specific
26 streets and roads to take in order to meet those time windows”), Ex. 7 (Smigelsky Depo.) at 51
27 (testifying that Exel expects drivers to make deliveries within time windows provided), Ex. 11
28 (Villalpando Depo.) at 177 (testifying that drivers have no choice as to their routes); Ex. 19

1 (Saravia Depo.) at 50, 52 (testifying that Exel came up with his routes during the night and sent
 2 them to his phone and that he had to arrive at 5:30 am to attend morning standup meeting). Exel
 3 makes much of the testimony of some individual drivers that they have been permitted to take
 4 time off for vacations or to work part-time for Exel. Again, however, this evidence does not create
 5 a material dispute of fact because working a part-time schedule and taking vacations is no more
 6 characteristic of independent contractors than it is of employees. *See Air Couriers Int'l v. Emp't*
 7 *Dev. Dep't*, 150 Cal. App. 4th at 46-47 (“no inconsistency between employee status and the
 8 drivers discretion on when to take breaks or vacation” where drivers worked regular schedule).

9 Similarly, the Court rejects Exel’s reliance on testimony that drivers are permitted to hire
 10 helpers and second drivers and operate more than one truck to show that Plaintiffs are not
 11 employees. Virtually the same argument was rejected by the Ninth Circuit in both *Alexander* and
 12 *Ruiz*. In *Alexander*, as in this case, FedEx argued that the drivers’ “ability to take on multiple
 13 routes and vehicles and to hire third-party helpers” was inconsistent with employee status. 765
 14 F.3d at 993. The court rejected this argument on two grounds. First, it looked to *Borello*, citing
 15 the California Supreme Court’s reasoning that “[a] business entity may not avoid its statutory
 16 obligations by carving up its production process into minute steps, then asserting that it lacks
 17 ‘control’ over the exact means by which one such step is performed by the responsible workers.”
 18 *Id.* at 991 (quoting *Borello*, 48 Cal. 3d at 357). Second, the court found that “[t]here is no
 19 indication that California has replaced its longstanding right-to-control test with the new
 20 entrepreneurial-opportunities test developed by the D.C. Circuit. Instead, California cases indicate
 21 that entrepreneurial activities do not undermine a finding of employee status.” *Id.* at 993. The
 22 reasoning in *Alexander* applies here as well.²⁴

23 The *Ruiz* court also found that the ability to hire helpers and second drivers was not
 24 inconsistent with the conclusion that the plaintiffs were employees. 754 F.3d at 1102. First, the
 25

26 ²⁴ In a footnote, Exel implies that *Alexander* may be distinguishable because that case “was limited
 27 to ‘drivers who personally drive full time for FedEx.’” Defendants’ Opposition at 2 n. 5. In this
 28 case, however, the Court also has limited the class to individuals who have *personally* driven for
 Exel. Exel has not explained why the reasoning of *Alexander* would not apply to a class that
 includes both full-time and part-time drivers.

1 court pointed to the fact that “often the reason drivers hired helpers was that they were required to
2 do so” by the employer. *Id.* Further, as to both helpers and second drivers, the company had the
3 ultimate discretion as to whether to approve or disapprove of them and therefore, the drivers did
4 not have “unrestricted right to choose these persons.” *Id.* Finally, the court noted that “any
5 additional drivers were subject to the same degree of control exerted by [the defendant] over the
6 drivers generally.” *Id.* at 1103. The reasoning of *Ruiz* is equally applicable here. It is undisputed
7 that Exel typically requires drivers to use helpers, both for safety reasons and because the delivery
8 of furniture and appliances requires a second person.²⁵ It is also undisputed that drivers and
9 helpers must be approved by Exel before they can perform deliveries and that once approved, they
10 are subject to all the same requirements as drivers generally.

11 For these reasons, the Court rejects Exel’s assertion that Plaintiffs are not employees – or
12 that there is a fact question as to its right to control the manner and means of their work – because
13 some of them hire multiple drivers and helpers and operate more than one truck.

14 Similarly, the testimony of one class member, Mr. Cifuentes, that his company also
15 performs deliveries for another motor carrier also does not change the Court’s conclusion. At
16 best, this evidence reflects the fact that there may be entrepreneurial opportunities available to
17 individuals who drive for Exel. Notwithstanding such opportunities, however, all class members
18 are subject to the extensive control of Exel when they perform deliveries for Exel, as discussed
19 above, which is sufficient to demonstrate employee status under California law. *See Alexander*,
20 765 F.3d at 993.

21 Finally, the Court rejects Exel’s attempt to avoid the legal consequences of its right to
22 control its drivers by arguing that the detailed requirements it imposes on its drivers are merely
23 intended to meet customer needs or comply with federal law. Exel has conceded that its safety
24 requirements are more stringent than what is required under federal law. *See Piller Motion Decl.*,

25
26 _____
27 ²⁵ Exel cites testimony by Jason Moll that occasionally a second driver isn’t required, but Moll
28 conceded that a helper is required when the driver makes deliveries of furniture and appliances.
See Piller Reply Decl., Ex. 8 (Moll Depo.) at 147. Further, he could not identify any specific
routes driven by Exel drivers that do not require a helper. *Id.* Therefore, the Moll testimony is not
sufficient to demonstrate a material issue of fact.

1 Ex. 5 (Albarano Depo. I) at 233 (admitting Exel’s compliance and safety policies go above and
2 beyond legal requirements), Ex. 7 (Smigelsky Depo.) at 236 (testifying that Exel’s Driver Safety
3 Accountability Program is more protective than federal law, providing for disqualification of a
4 driver under certain circumstances where federal law would not provide for disqualification).
5 Further, the detailed requirements as to customer service go far beyond what is necessary to ensure
6 that the drivers achieve the “end result” of the drivers’ work, that is, to provide timely and
7 professional deliveries. *See Alexander*, 765 F.3d at 990 (finding that no reasonable jury could find
8 that the carriers’ detailed requirements for their drivers were “merely control of results under
9 California law”). In any event, even if these requirements were based, in part, on legal
10 requirements or the needs of customers, as Exel asserts, they are nonetheless indicative of the fact
11 that Exel retains the right to exercise extensive control over its drivers, supporting the conclusion
12 that the drivers are employees and not independent contractors. *See Ruiz*, 754 F.3d at 1102 n. 5
13 (rejecting the district court’s conclusion that appearance requirements did not reflect a right to
14 control because they were adopted in response to customer needs and explaining that the *Borello*
15 test does not require a showing of subjective intent; it looks only at whether the employer has the
16 right to control the drivers’ work).

17 **2. Secondary Factors**

18 In light of the undisputed facts establishing Exel’s right to exercise extensive control over
19 how Plaintiffs perform their work, the Court finds that the evidence offered by Exel as to *Borello*’s
20 secondary factors is insufficient to defeat summary judgment that Plaintiffs are employees.

21 *a. Distinct occupation or business*

22 This factor favors a finding that Plaintiffs are employees. As in *Alexander*, the work
23 performed by Plaintiffs is “wholly integrated” into Exel’s operation. 765 F.3d at 995 (citing
24 *Estrada*, 154 Cal. App. 4th at 8-9). Plaintiffs “look like [Exel] employees [and] act like [Exel]
25 employees.” *See id.* Further, as in *Alexander* and *Ruiz*, the Court finds that this factor favors
26 Plaintiffs even though Plaintiffs have opportunities to hire extra drivers and helpers. As the court
27 in *Alexander* found, “these opportunities themselves are only available subject to [Exel’s] needs.”
28 *See id.* Moreover, Exel retains ultimate discretion to approve or reject drivers and helpers hired by

1 Plaintiffs, and these drivers and employees are also subject to Exel’s rules and requirements
2 restricting how and when they perform their work, as discussed above.

3 *b. Work under principal’s direction or by specialist without supervision*

4 The second factor slightly favors Plaintiffs. *See Alexander*, 765 F.3d at 995. It is
5 undisputed that drivers can chose the specific roads they take and, construing the facts in the light
6 most favorable to Exel, adjust their assigned routes when the stops are not ordered in a way that
7 makes sense. These freedoms are outweighed, however, by the extensive supervision and
8 monitoring conducted by Exel of the drivers’ work. *See id.*; *see also Ruiz*, 754 F.3d at 1104.

9 *c. Skill required*

10 This factor favors Plaintiffs. As in *Ruiz* and *Alexander*, an individual needs no special
11 skills to be hired as a driver for Exel. All that is required is that an individual be at least 21 years
12 old, pass a physical examination and drug test, undergo a criminal background check, and have a
13 clean driving record. *See Piller Motion Decl.*, Ex. 15 (Compliance Manual) at EDV000305-308;
14 *Alexander*, 765 F.3d at 995; *Ruiz*, 754 F.3d at 1104 (noting that district court had erred in relying
15 on skill required to install appliances to find that this factor supported a finding that plaintiffs were
16 independent contractors and citing the *Estrada* court’s conclusion that delivery drivers were
17 employees based, in part, on the fact that they needed no experience to get the job and only had to
18 know how to drive).

19 *d. Provision of instrumentalities, tools and place of work*

20 This factor slightly favors Exel. As in *Alexander*, Plaintiffs provide their own trucks²⁶ and
21 buy their own tools. The significance of this factor is undercut, however, by the oversight Exel
22 exercises over the equipment Plaintiffs use, not only recommending vendors and requiring that

23 _____
24 ²⁶ The Court notes that for part of the class period, until June of 2013, Exel rented trucks on behalf
25 of class members and deducted the rental payments from their compensation. *Id.* (citing Piller
26 Motion Decl., Ex. 5 (Albarano Depo. I) at 215 (testifying that prior to June 2013, Exel could “rent
27 a vehicle . . . assign it to the contractor and do deductions from the settlement, a contractor’s
28 settlement, to pay for the rental”). This undisputed fact cuts in Plaintiffs’ favor. *See Ruiz*, 754
F.3d at 1104 (finding that this factor favored the plaintiffs because the company supplied the
trucks and advanced the drivers the costs of leasing and maintaining the trucks, even though the
costs were ultimately paid by the drivers through paycheck deductions). The Court’s conclusion
that Plaintiffs are not independent contractors would be the same, however, even if Plaintiffs did
not lease their trucks through Exel at any time during the class period.

1 Plaintiffs use particular types of cell phones and trucks, but also providing delivery supplies, such
 2 as blankets, straps and packaging tape, which are then charged back to the drivers. *See* Piller
 3 Motion Decl., Ex. 7 (Smigelsky Depo.) at 200-01 (testifying that Exel purchases certain types of
 4 equipment such as blankets, straps and packaging tape, which it then charges back to the drivers),
 5 Ex. 20 (ELA) ¶ 10 & Ex. D (listing specific charge-back items, including delivery supplies);
 6 *Alexander*, 765 F.3d at 995. In any event, this factor does not outweigh Exel’s right to exercise
 7 extensive control over its drivers. As the California Supreme Court explained in *Tieberg*,
 8 ownership of tools, and particularly tools that have substantial value, is significant, under the
 9 common law, to the extent it may show that “the alleged servant will follow the directions of the
 10 owner in their use.” *Tieberg v. Unemployment Ins. Appeals Bd.*, 2 Cal. 3d 943, 954 (1970) (citing
 11 Restatement (Second) of Agency). Any inference that the drivers are *not* subject to Exel’s control
 12 because Exel does not own Plaintiffs’ trucks or tools is clearly contradicted by the undisputed
 13 facts. Further, as the *Alexander* court noted, “numerous California cases find employee status
 14 even though the employee provides his own vehicle or tools.” *Id.* (citing *Borello*, 48 Cal. 3d at
 15 357; *Estrada*, 154 Cal. App. 4th at 5; *Air Couriers*, 150 Cal. App. 4th at 938; *JHK Enter., Inc. v.*
 16 *Dep’t of Indus. Relations*, 142 Cal. App. 4th 1046, 1051 (2006); *Toyota Motor Sales U.S.A., Inc. v.*
 17 *Superior Court*, 220 Cal. App. 3d 864, 876 (Cal. Ct. App. 1990), as modified (June 5, 1990)).

18 *e. Length of time for which services are performed*

19 This factor favors Plaintiffs. As the court in *Alexander* explained, the length and indefinite
 20 nature of a driver’s tenure with a delivery company supports the conclusion the driver is an
 21 employee rather than an independent contractor who is “hired to perform a specific task for a
 22 defined period of time.” 765 F.3d at 996 (citing *Narayan v. EGL, Inc.*, 616 F.3d 895, 903 (9th Cir.
 23 2010); *Antelope Valley Press v. Poizner*, 162 Cal. App. 4th 839, 855 (2008) (“[T]he notion that an
 24 independent contractor is someone hired to achieve a specific result that is attainable within a
 25 finite period of time, such as plumbing work, tax service, or the creation of a work of art for a
 26 building’s lobby, is at odds with carriers who are engaged in prolonged service to [an employer]”);
 27 *Air Couriers*, 150 Cal. App. 4th at 938 (noting that lengthy tenure of delivery drivers with
 28 employer was inconsistent with independent contractor status)). The ITA provides that the term of

1 the agreement is one year but that it continues in effect from year-to-year unless terminated. *See*
2 Piller Motion Decl., Ex. 8 (ITA) ¶ 2 (“Duration” provision). In other words, the drivers are hired
3 for an indefinite term, which supports the conclusion that they are employees rather than
4 independent contractors.

5 *f. Method of Payment*

6 This factor addresses whether a driver is paid based on the time he or she works
7 (supporting a finding that the driver is an employee) or by the job (supporting the independent
8 contractor classification). Here, it is undisputed that the drivers are paid by the job, as set forth in
9 the ITA. *See* Piller Motion Decl., Ex. 8 (ITA) ¶ 4 & Ex. A. Further, while Plaintiffs contend this
10 case is like *Ruiz*, where the court found that the piece rate resembled a regular rate of pay because
11 the drivers were assigned approximately the same number of deliveries every day, the evidence is
12 mixed on this question. *See Ruiz*, 754 F.3d at 1104-1105. In particular, as discussed above, Exel
13 has presented evidence that some Plaintiffs work less than full-time. Because the undisputed facts
14 do not establish that the piece rate paid by Exel is, in practice, more like a regular rate of pay, the
15 Court finds that this factor favors Exel. Again, however, this factor does not defeat Plaintiffs’
16 request for summary judgment on this issue. As the court explained in *Tieberg*, this factor is a
17 mere “indicia of control.” 2 Cal. 3d at 953. Thus, “[w]here, as here, there is ample independent
18 evidence that the employer has the right to control the actual details of the [drivers’] work and that
19 it exercises this right, the fact that, for example, the employee is paid by the job rather than by the
20 hour appears to be of minute consequence.” *Id.*

21 *g. Parties’ belief*

22 This factor slightly favors Exel to the extent that the ITA and ELA describe the drivers as
23 independent contractors. It is well-established, however, that “the belief of the parties as to the
24 legal effect of their relationship is not controlling if as a matter of law a different relationship
25 exists.” *Grant v. Woods*, 71 Cal. App. 3d 647, 654 (1977); *see also Alexander*, 765 F.3d at 996
26 (acknowledging that Operating Agreement described drivers as independent contractors but
27 employer’s policies and procedures establishing extensive control over drivers “belied” that
28 characterization); *Ruiz*, 754 F.3d at 1105 (finding that “parties’ label is not dispositive and will be

1 ignored if their actual conduct establishes a different relationship”) (quoting *Estrada*, 154 Cal.
2 App. 4th at 10-11)).

3 *h. Right to terminate at will*

4 To the extent the parties have a mutual right to terminate the contract, this secondary factor
5 is “consistent with either an employer-employee relationship or independent-contractor
6 relationship.” *See Ruiz*, 754 F.3d at 1105. Therefore, this factor favors neither Plaintiffs nor Exel.

7 *i. Work part of principal’s regular business*

8 This factor favors Plaintiffs. It is undisputed that the work Plaintiffs perform – the pickup
9 and delivery of furniture and appliances – is essential to Exel’s core business. *See Alexander*, 765
10 F.3d at 996; *Ruiz*, 754 F.3d at 1105.

11 **3. Conclusion**

12 The undisputed facts show that Exel had the right to control the details of Plaintiffs’ work
13 and that the secondary factors under *Borello* also, on balance, point to the conclusion that
14 Plaintiffs are employees rather than independent contractors. Therefore, Plaintiffs are entitled to
15 summary judgment in their favor as to their classification.

16 **VI. CONCLUSION**

17 For the reasons stated above, Defendants’ Motion is GRANTED as to Claims Nine, Ten,
18 Eleven and Twelve, which are dismissed with prejudice, and DENIED in all other respects.
19 Plaintiffs’ Motion is GRANTED. The parties are instructed to meet and confer as to the
20 remaining schedule in the case, including a schedule for Plaintiffs to propose one or more class
21 representatives who are currently employed by Exel, and to submit a joint proposed schedule for
22 the case no later than September 14, 2015. A Case Management Conference shall be held on
23 September 25, 2015 at 2:00 p.m.

24 **IT IS SO ORDERED.**

25 Dated: September 3, 2015
