United States District Court  
For the Northern District of California

UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF CALIFORNIA

COPYTELE, INC.,

No. C-13-0378 EMC

Plaintiff,

v.

**ORDER GRANTING DEFENDANTS’  
MOTION TO DISMISS FOR LACK OF  
STANDING**

E INK HOLDINGS, INC., *et al.*,

**(Docket No. 38)**

Defendants.

\_\_\_\_\_ /

Plaintiff CopyTele, Inc. has filed a patent infringement action against Defendants E Ink Holdings, Inc. and E Ink Corporation (collectively, “E Ink”). According to CopyTele, it is the sole owner of all rights, title, and interest in three patents (the ‘935 patent, the ‘810 patent, and the ‘488 patent), *see* Compl. ¶¶ 8-10, and E Ink has infringed on those patents. Currently pending before the Court is E Ink’s motion to dismiss for lack of standing. In essence, E Ink contends that Copytele’s lawsuit is premature because (1) it previously assigned all substantial rights to the patents at issue to a third-party exclusive licensee, AU Optronics Corp. (“AUO”); (2) it has not yet secured a judgment (in a related case, *CopyTele, Inc. v. AU Optronics Corp.*, No. C-13-0380 EMC) that the assignment has been rescinded; and (3) even upon rescission CopyTele will have standing only to sue prospectively and not retroactively.

Having considered the parties’ briefs, as well as the oral argument of counsel, the Court hereby **GRANTS** E Ink’s motion but without prejudice pending the resolution of CopyTele’s case against AUO.

1 **I. FACTUAL & PROCEDURAL BACKGROUND**

2 For purposes of the pending motion, the relevant facts are not so much contained within the  
3 complaint in *this* case as within the complaint in the related action, *CopyTele, Inc. v. AU Optronics*  
4 *Corp.*, No. C-13-0380 EMC. For convenience, the Court shall hereinafter refer to the related case as  
5 the conspiracy case.

6 In the conspiracy case, CopyTele has filed suit against both E Ink and AUO. The relevant  
7 allegations are as follows.

8 CopyTele is a company with “a 30-year history of inventing, developing, and patenting  
9 pioneering display technologies.” No. C-13-0380 Compl. ¶ 23. It has patented certain display  
10 technologies, including electrophoretic display (“EPD”) technologies. *See* No. C-13-0380 Compl. ¶  
11 2. EPDs “are low voltage, high resolution, black-and-white displays that can be easily viewed in a  
12 variety of lighting conditions including bright sunlight.” No. C-13-0380 Compl. ¶ 23. They are  
13 used, *inter alia*, in eReaders with brand names such as “Kindle” and “Nook.” No. C-13-0380  
14 Compl. ¶ 23.

15 “E Ink is the dominant, worldwide manufacturer and supplier of [EPDs], including those  
16 used in eReaders sold under the ‘Kindle’ and ‘Nook’ brand names.” No. C-13-0380 Compl. ¶ 28.  
17 “AUO is one of the world’s largest manufacturers of flat panel LCD displays for televisions,  
18 computers, and tablets, including the Apple iPads.” No. C-13-0380 Compl. ¶ 26.

19 “In September 2010, AUO approached CopyTele about purchasing a subset of CopyTele’s  
20 EPD Patents for \$1.5 million.” No. C-13-0380 Compl. ¶ 29. CopyTele declined and proposed  
21 instead that the two companies work together to jointly develop EPD products. Accordingly, in May  
22 2011, the parties entered into a contract, known as the EPD Agreement. *See* Compl., Ex. A (EPD  
23 Agreement).

24 A primary goal of the EPD Agreement “was for CopyTele and AUO to jointly develop EPD  
25 Products that would successfully compete with electrophoretic displays manufactured by E Ink.”  
26 No. C-13-0380 Compl. ¶¶ 4, 12. Key terms in the agreement include the following:

- 27 • CopyTele granted to AUO – as well as its subsidiaries – “an exclusive, worldwide license  
28 under [the EPD Patents] to make, have made, sell, offer for sale, [etc.] the Licensed Products,

1 and also [to] sub-license the Licensed Patents, during the term of the Agreement [*i.e.*, until  
2 the last to expire of the Licensed Patents].” No. C-13-0380 Compl., Ex. A (EPD Agreement  
3 §§ 2.2, 5.1).

4 • AUO was given “the right at its discretion to commence, prosecute, compromise and settle  
5 any claim, action or proceeding for infringement (past or future), unfair competition,  
6 unauthorized use, misappropriation or violation of any of the [EPD Patents] by any  
7 unlicensed third party within the territory where the [EPD Patents] may be enforced.” No.  
8 C-13-0380 Compl., Ex. A (EPD Agreement § 3.1). The contract specified that “[i]t is the  
9 intent and agreement of the parties that this Agreement transfers to [AUO] the full exclusive  
10 rights and all substantial rights in the Licensed Patents such that Licensee shall be able to  
11 bring an Enforcement Proceeding in its own name, and that no rights have been maintained  
12 by [CopyTele] that would require [CopyTele] to be a named party to any Enforcement  
13 Proceeding.” No. C-13-0380 Compl., Ex. A (EPD Agreement § 3.1).

14 • Each party agreed to an anti-assignment provision as follows. “Except as otherwise  
15 specifically provided in [the] Agreement, neither [the] Agreement nor any rights hereunder  
16 nor any [EPD Patents] may be assigned or otherwise transferred by any party . . . including  
17 by way of sale of assets, merger or consolidation, without the prior written consent of the  
18 other party, provided that [AUO] may transfer[] its rights and obligations under this  
19 Agreement to a Subsidiary or affiliate without [Copytele’s] consent.” No. C-13-0380  
20 Compl., Ex. A (EPD Agreement § 6.3).

21 • The parties “will discuss and conclude a joint development agreement for the Subject EPD  
22 Products as soon as practicable after the Effective Date hereof and will make their best  
23 efforts to jointly develop the Subject EPD Products.” No. C-13-0380 Compl., Ex. A (EPD  
24 Agreement § 6.12).

25 In consideration for the license granted by CopyTele, AUO was to pay “a *de minimis* initial  
26 payment, considerable progress payments, and significant running royalties that were tied to the  
27 sales of the [jointly developed] EPD Products.” No. C-13-0380 Compl. ¶ 31. According to  
28

1 CopyTele, “[w]ithout the joint development commitment from AUO, CopyTele was unwilling to  
2 license or sell any of its EPD Patents to AUO.” No. C-13-0380 Compl. ¶ 29.

3 In its complaint, CopyTele maintains that AUO breached its “best efforts” obligations under  
4 the EPD Agreement. *See* No. C-13-0380 Compl. ¶¶ 40-46. Moreover, according to CopyTele,  
5 AUO never had any intention of using its “best efforts” to jointly develop EPD products. *See* No. C-  
6 13-0380 Compl. ¶ 49. “Instead, AUO used the EPD Agreement as an excuse to obtain a license to  
7 the EPD Patents, which AUO intended to pass on to E Ink, in conjunction with and in exchange for  
8 the \$50 million paid by E Ink to AUO in connection with the sale of SiPix [an AUO subsidiary] to E  
9 Ink.”<sup>1</sup> No. C-13-0380 Compl. ¶ 49. E Ink desired to acquire SiPix not to obtain manufacturing  
10 capacity but rather to immunize itself from patent infringement actions (by acquiring SiPix’s  
11 intellectual property) and avoid price wars. *See* No. C-13-0380 Compl. ¶¶ 58-59. According to  
12 CopyTele, “[s]hortly after the announced sale of SiPix to E Ink, and after receiving written notice  
13 from CopyTele of CopyTele’s intent to terminate the EPD Agreement due to AUO’s repeated  
14 failures to adhere to its ‘best efforts’ obligations to jointly develop the EPD Products, with no notice  
15 to CopyTele, AUO surreptitiously purported to sublicense CopyTele’s patented EPD Technologies  
16 to E Ink, again breaching AUO’s obligations to CopyTele.” No. C-13-0380 Compl. ¶ 7. AUO  
17 received no consideration for the sublicense. *See* No. C-13-0380 Compl. ¶ 12. *But see* No. C-13-  
18 0380 Compl. ¶ 61 (alleging that AUO and E Ink entered into a cross-licensing agreement).

## 19 II. DISCUSSION

20 In its motion, E Ink contends that, as a result of the EPD Agreement, CopyTele does not have  
21 constitutional standing to prosecute this patent infringement action.

### 22 A. Legal Standard

23 Standing is a matter of subject matter jurisdiction. *See Bates v. UPS*, 511 F.3d 974, 985 (9th  
24 Cir. 2007) (en banc) (stating that Article III “[s]tanding is a threshold matter central to our subject  
25 matter jurisdiction”). A motion to dismiss on the basis of subject matter jurisdiction can be either a  
26 facial attack or a factual one. *See Wolfe v. Strankman*, 392 F.3d 358, 362 (9th Cir. 2004). Here, E

---

27  
28 <sup>1</sup> CopyTele has alleged that SiPix is a wholly owned subsidiary of AUO. *See* No. C-13-0380  
Compl. ¶ 54. AUO and E Ink disputes such, claiming that AUO was a minority owner in SiPix.

1 Ink makes a facial attack. “In a facial attack, the challenger asserts that the allegations contained in  
2 a complaint are insufficient on their face to invoke federal jurisdiction.” *Safe Air v. Meyer*, 373 F.3d  
3 1035, 1039 (9th Cir. 2004). A court may consider not only the allegations in the complaint in a  
4 facial attack but also documents attached to the complaint and judicially noticeable facts. *See Vita-*  
5 *Herb Nutraceuticals, Inc. v. Probiohealth, LLC*, No. SACV 11-1463 DOC (MLGx), 2013 U.S. Dist.  
6 LEXIS 40483, at \*6 (C.D. Cal. Mar. 20, 2013); *Pacific Coast Fed’n of Fishermen’s Ass’ns v. United*  
7 *States DOJ*, No. 1:12-CV-01303-LJO-MJS, 2013 U.S. Dis. LEXIS 32598, at \*10 (E.D. Cal. Mar. 8,  
8 2013) (concluding that a facial attack was being made because, “although the parties do reference  
9 documents subject to judicial notice and/or attached to the Complaint, Defendant does not offer any  
10 additional evidence in support of its jurisdictional arguments”); *Bautista-Perez v. Holder*, 681 F.  
11 Supp. 2d 1083, 1086-87 (N.D. Cal. 2009) (Henderson, J.) (stating that, in deciding a Rule 12(b)(1)  
12 motion, “a court must assume the facts alleged in the complaint to be true unless the allegations are  
13 controverted by exhibits attached to the complaint, matters subject to judicial notice, or documents  
14 necessarily relied on by the complaint and whose authenticity no party questions”).

15 B. Standing to Sue for Patent Infringement

16 The Federal Circuit has explained that

17 [t]here are three general categories of plaintiffs encountered  
18 when analyzing the constitutional standing issue in patent  
19 infringement suits: those that can sue in their own name alone; those  
20 that can sue as long as the patent owner is joined in the suit; and those  
21 that cannot even participate as a party to an infringement suit. The  
22 first category includes plaintiffs that hold all legal rights to the patent  
23 as the patentee or assignee of all patent rights – the entire bundle of  
24 sticks. Unquestionably, a patentee who holds all the exclusionary  
rights and suffers constitutional injury in fact from infringement is one  
entitled to sue for infringement in its own name. Additionally, if a  
patentee transfers “all substantial rights” to the patent, this amounts to  
an assignment or a transfer of title, which confers constitutional  
standing on the assignee to sue for infringement in its own name  
alone. When a party holds all rights or all substantial rights, it alone  
has standing to sue for infringement.[<sup>2</sup>]

---

25  
26  
27 <sup>2</sup> See also *Alfred E. Mann Found. for Sci. Research v. Cochlear Corp.*, 604 F.3d 1354, 1360  
28 (Fed. Cir. 2010) (stating that “the question is whether the license agreement transferred sufficient  
rights to the exclusive licensee to make the licensee the owner of the patents in question[;] [i]f so,  
the licensee may sue but the licensor may not”).

1                   The second category of plaintiffs hold exclusionary rights and  
2 interests created by the patent statutes, but not all substantial rights to  
3 the patent. As the grantee of exclusionary rights, this plaintiff is  
4 injured by any party that makes, uses, sells, offers to sell, or imports  
5 the patented invention. Parties that hold the exclusionary rights are  
6 often identified as exclusive licensees, because the grant of an  
7 exclusive license to make, use, or sell the patented invention carries  
8 with it the right to prevent others from practicing the invention.

9                   However, these exclusionary rights “must be enforced through  
10 or in the name of the owner of the patent,” and the patentee who  
11 transferred these exclusionary interests is usually joined to satisfy  
12 prudential standing concerns. The patentee is joined for the purpose  
13 of avoiding the potential for multiple litigations and multiple liabilities  
14 and recoveries against the same alleged infringer. . . .

15                   The third category of plaintiffs includes those that hold less  
16 than all substantial rights to the patent and lack exclusionary rights  
17 under the patent statutes to meet the injury in fact requirement. They  
18 are not injured by a party that makes, uses, or sells the patented  
19 invention because they do not hold the necessary exclusionary rights.  
20 Plaintiffs in this category lack constitutional standing. This standing  
21 deficiency cannot be cured by adding the patent title owner to the suit.

22 *Morrow v. Microsoft Corp.*, 499 F.3d 1332, 1339-41 (Fed. Cir. 2007).

23                   In the instant case, E Ink contends that the EPD Agreement between CopyTele and AUO  
24 provided for an effective assignment of the patents at issue such that CopyTele lacks the  
25 exclusionary rights and all substantial rights to meet the injury-in-fact requirement of constitutional  
26 standing. According to E Ink, because the patents were effectively assigned, only AUO has standing  
27 to sue, at least until the EPD is rescinded.

28                   To determine whether a provision in an agreement is tantamount to an assignment or is  
instead merely a license (which would not divest the patentee of standing to sue for infringement), a  
court ““must ascertain the intention of the parties [to the agreement] and examine the substance of  
what was granted.”” *Alfred E. Mann Found.*, 604 F.3d at 1359. “It is well settled that ‘whether a  
transfer of a particular right or interest under a patent is an assignment or a license does not depend  
upon the name by which it calls itself, but upon the legal effect of its provisions.’” *Vaupel  
Textilmaschinen KG v. Meccanica Euro Italia SpA*, 944 F.2d 870, 875 (Fed. Cir. 1991).

1.           Intention of the Parties to the Agreement

As noted above, the relevant agreement in the instant case is the EPD Agreement. The EPD  
Agreement includes a California choice-of-law provision. *See* Compl., Ex. A (EPD Agreement §

1 6.1) (providing that “[t]he rights and obligations of the Parties under this Agreement shall be  
2 governed by and construed in accordance with laws of the California”). Thus, the EPD Agreement  
3 is to be interpreted under California law. *See id.* at 1359.

4 Under California law, “[a] contract must be so interpreted as to give effect to the mutual  
5 intention of the parties as it existed at the time of contracting, so far as the same is ascertainable and  
6 lawful.” Cal. Civ. Code § 1636.

7 Such intent is to be inferred, if possible, solely from the written  
8 provisions of the contract. The “clear and explicit” meaning of these  
9 provisions, interpreted in their “ordinary and popular sense,” unless  
“used by the parties in a technical sense or a special meaning is given  
to them by usage,” controls judicial interpretation.

10 *E.M.M.I Inc. v. Zurich Am. Ins. Co.*, 32 Cal. 4th 465, 470 (2004) (citing Cal. Civ. Code §§ 1638-39,  
11 1644). “Extrinsic evidence is admissible, however, to interpret an agreement when a material term  
12 is ambiguous.” *Wolf v. Walt Disney Pics. & Tel.*, 162 Cal. App. 4th 1107, 1126 (2008).

13 Accordingly, under California law, the Court must determine here whether, on the face of the  
14 EPD Agreement, the parties intended there to be an assignment or something tantamount to an  
15 assignment, as opposed to a mere license.

16 The EPD Agreement on its face states:

17 It is the intent and agreement of the Parties that this Agreement  
18 transfers to [AUO] the full exclusive rights and *all substantial rights*  
19 in the Licensed Patents such that Licensee shall be able to bring an  
20 Enforcement Proceeding in its own name, and that no rights have been  
maintained by [CopyTele] that would require [CopyTele] to be a  
named party to any Enforcement Proceeding.

21 No. C-13-0380 Compl., Ex. A (EPD Agreement § 3.1) (emphasis added). Given this express  
22 statement in the EPD Agreement, it is difficult to see how the parties did *not* intend for there to be an  
23 assignment, as CopyTele argues in its opposition. Indeed, the reference to “substantial rights”  
24 combined with the statement that CopyTele would not need to be a named party to any enforcement  
25 proceeding clearly implicates Federal Circuit law holding that, where all substantial rights have been  
26 transferred, then the transferee is effectively the owner of the patent and has the sole right to bring  
27 an infringement suit.  
28

1 In its papers, CopyTele tries to argue that the above statement in the EPD Agreement was  
2 simply an expression of intent to convey all rights to sue, and nothing more. *See* Opp’n at 10-12.  
3 CopyTele is right in pointing out that it is possible for a patent holder to give another party the right  
4 to sue without giving that party all substantial rights. *See* Opp’n at 13; *see also Propat Int’l Corp. v.*  
5 *RPost US, Inc.*, 473 F.3d 1187, 1192 (Fed. Cir. 2007) (stating that a “right to sue” clause in a  
6 contract, *unaccompanied by the transfer of other incidents of ownership*, does not constitute an  
7 assignment of the patent rights that entitles the transferee to sue in its own name[;] [t]hat principle  
8 sensibly reflects that a patent owner may give another responsibility to select targets for suit – a  
9 power of attorney, in effect – without surrendering ownership of the patent”) (emphasis added). But  
10 here, as discussed below, there are other substantial incidents of ownership that have been  
11 transferred under the EPD Agreement (*e.g.*, the exclusive license, the right to sublicense, the right to  
12 sue and settle for patent infringement).

13 CopyTele’s argument is particularly problematic because it ignores the explicit provision in  
14 the EPD Agreement that substantial rights were being transferred to AUO such that CopyTele would  
15 not need to be a named party in any enforcement proceeding. *See* Reply at 10 (noting that “an  
16 exclusive licensee only gains the ability to sue without joining the patent owner when it receives a  
17 transfer of ‘all substantial rights’”); *cf. Morrow*, 499 F.3d at 1340 (noting that, where a party holds  
18 some exclusionary rights and interests created by the patents statutes, but not all substantial rights to  
19 the patent, that party must usually bring suit with the patent holder who transferred the exclusionary  
20 rights in order to satisfy prudential standing concerns). Hence, both the explicit terms and the  
21 substance of the EPD Agreement evidences the parties’ intent to transfer all substantial rights to  
22 AUO.

23 Presented with this situation, CopyTele makes a final contention that, at the very least, the  
24 EPD Agreement is ambiguous as to the intent of the parties and, as “there is a disputed issue of fact  
25 as to whether the intent of the parties was to simply transfer to AUO a right to sue, . . . the issue  
26 cannot be resolved at the pleadings stage.” Opp’n at 11-12. The problem with this argument is that  
27 the EPD Agreement is not ambiguous on its face. While “a contract apparently unambiguous on its  
28 face may still contain a latent ambiguity that can only be exposed by extrinsic evidence,” *Wolf*, 162

1 Cal. App. 4th at 1133, CopyTele has not pointed to any extrinsic evidence that suggests an intent  
2 contrary to that expressed in the EPD Agreement. *See WYDA Assocs. v. Merner*, 42 Cal. App. 4th  
3 1702, 1710 (1996) (noting that a “trial court’s determination of whether an ambiguity exists is a  
4 question of law”; adding that a “trial court’s resolution of an ambiguity is also a question of law if  
5 no parol evidence is admitted or if the parol evidence is not in conflict”).

6 In sum, the factor of the parties’ intent militates in favor of E Ink. It alone, however, is not  
7 dispositive.

8 2. Substance of What Was Granted

9 As noted above, what the parties’ intentions are is only part of the Court’s inquiry. The  
10 Court must also ““examine the substance of what was granted.”” *Mann*, 604 F.3d at 1359.

11 The Federal Circuit has never “purported to establish a complete list of rights” that must be  
12 examined by a court in determining whether a licensee has been given substantial rights in the patent  
13 such that it alone has the right to bring suit. *Id.* at 1360. The Federal Circuit, however, has

14 listed at least some of the rights that should be examined. Of course, transfer of the exclusive right to make, use, and sell products or  
15 services under the patent is vitally important to an assignment. We have also examined the scope of the licensee’s right to sublicense, the  
16 nature of license provisions regarding the reversion of rights to the licensor following breaches of the license agreement, the right of the  
17 licensor to receive a portion of the recovery in infringement suits brought by the licensee, the duration of the license rights granted to  
18 the licensee, the ability of the licensor to supervise and control the licensee’s activities, the obligation of the licensor to continue paying  
19 patent maintenance fees, and the nature of any limits on the licensee’s right to assign its interests in the patent. *Frequently, though, the  
20 nature and scope of the exclusive licensee’s purported right to bring suit, together with the nature and scope of any right to sue purportedly  
21 retained by the licensor, is the most important consideration.* Where the licensor retains a right to sue accused infringers, that right often  
22 precludes a finding that all substantial rights were transferred to the licensee. It does not, however, preclude such a finding if the  
23 licensor’s right to sue is rendered illusory by the licensee’s ability to settle licensor-initiated litigation by granting royalty-free sublicenses  
24 to the accused infringers. Under the prior decisions of this court, *the nature and scope of the licensor’s retained right to sue accused  
25 infringers is the most important factor in determining whether an exclusive license transfers sufficient rights to render the licensee the  
26 owner of the patent.*

27 *Id.* at 1360-61 ( emphasis added).

28

1 In the instant case, E Ink contends that AUO was assigned all substantial rights because,  
2 under the agreement (1) AUO was given an exclusive license and for the lifetime of the patents at  
3 issue; (2) AUO was given the right to sublicense without any restraints; (3) AUO was given the  
4 unfettered right to sue and settle at its discretion; and (4) there was no specific provision providing  
5 for a reversion of rights to CopyTele under any circumstances, including a breach by AUO. *See*  
6 *Mot.* at 8. At the hearing, CopyTele did not really dispute that these rights were substantial rights,  
7 including the right to settle and sue which, as noted above, the Federal Circuit has considered to be  
8 the most important consideration.

9 Nevertheless, CopyTele argues that it still has standing to sue because AUO was not  
10 assigned *all* substantial rights – *i.e.*, under the agreement, CopyTele retained significant rights, in  
11 particular: (1) CopyTele had the responsibility to pay maintenance fees for the patents at issue, *see*  
12 *No. C-13-0380 Compl., Ex. A (EPD Agreement § 6.11)* (providing that “[CopyTele] agrees to make  
13 any maintenance fees for the Licensed Patents in a timely manner as they are due”); (2) CopyTele  
14 “retain[ed] a non-exclusive right to use the Licensed Patents and Licensed Products in a non-  
15 competitive manner,” *No. C-13-0380 Compl., Ex. A (EPD Agreement § 2.2)*; and (3) AUO was  
16 barred from assigning or transferring the agreement, any rights under the agreement, or the licensed  
17 patents without the prior written consent of CopyTele. *See No. C-13-0380 Compl., Ex. A (EPD*  
18 *Agreement § 6.3)*.

19 a. Obligation to Pay Maintenance Fees

20 Section 6.11 of the EPD Agreement provides as follows:

21 [CopyTele] agrees to make any maintenance fees for the Licensed  
22 Patents in a timely manner as they are due. [CopyTele] agrees to take  
23 further reasonable actions as may be requested by [AUO] from time to  
time during the term of this Agreement to effectuate the terms and  
conditions of this Agreement.

24 *No. C-13-0380 Compl., Ex. A (EPD Agreement § 6.11)*.

25 As a preliminary matter, the Court notes that the section taken as a whole indicates that  
26 CopyTele’s payment of maintenance fees is not really for its own benefit but rather is part of the  
27 obligations owed to AUO. *See Reply* at 9. Thus, arguably, for that reason alone, the above  
28 provision should not constitute a retention of substantial rights by CopyTele. However, even to the

1 extent CopyTele’s payment of maintenance fees is some evidence of retained ownership of the  
2 patents at issue, the Federal Circuit has never held that the payment of such fees is dispositive. At  
3 best, evidence of such is simply one indication of ownership. *See Propat*, 473 F.3d at 1191 (stating  
4 that “[t]he responsibility to maintain a patent is one of the obligations that has been recognized by  
5 this court as an *indication* that the party with that obligation has retained an ownership interest in the  
6 patent”) (emphasis added); *see also Mentor H/S, Inc. v. Medical Device Alliance, Inc.*, 240 F.3d  
7 1016, 1018 (Fed. Cir. 2001) (concluding that Sonique retained significant ownership rights in the  
8 patent at issue but not based solely on its obligation to pay the maintenance fees for the patent;  
9 noting, *e.g.*, that Sonique could develop and manufacture products for sale to licensee, supervise and  
10 control licensee’s product development, and “most importantly” had the first obligation to sue  
11 parties for infringement). It is not a conclusive factor.

12 b. Right to Use Patents

13 Section 2.2 of the EPD Agreement provides as follows:

14 [CopyTele] hereby grants to [AUO] and its Subsidiaries an exclusive,  
15 worldwide license under any and all Licensed Patents to make, have  
16 made, sell, offer for sale, use, import, export, lease and/or otherwise  
17 dispose of the Licensed Products, and also sub-license the Licensed  
18 Patents, during the term of the Agreement. *[CopyTele] retains a non-  
19 exclusive right to use the Licensed Patents and Licensed Products in a  
20 non-competitive manner, consistent with this Agreement.*

21 No. C-13-0380 Compl., Ex. A (EPD Agreement § 2.2) (emphasis added).

22 According to CopyTele, the above retention of rights establishes that it retained substantial  
23 rights to the patents at issue, as established by multiple Federal Circuit cases. However, the cases on  
24 which CopyTele relies are all distinguishable. In none of the cases was there a significantly  
25 *restricted* right to use the patent – certainly nothing comparable to a restriction to use the patent in a  
26 noncompetitive manner as provided for above. Indeed, in two of the cases, the Federal Circuit took  
27 note of a retained right to market and sell the patented invention – something that the EPD  
28 Agreement would bar CopyTele from doing if it would be competitive to AUO.

- 29 • *Prima Tek II, L.L.C. v. A-Roo Co.*, 222 F.3d 1372 (Fed. Cir. 2000). In *Prima Tek*, there was  
30 not even a fact pattern involving a patent holder’s retention of a right to use the patent.

31 CopyTele seems to rely on the case primarily because it contains the following statement:

1 “In evaluating whether a particular license agreement transfers all substantial rights in a  
2 patent to the licensee, we pay particular attention to whether the agreement conveys *in full*  
3 the right to exclude others from making, using and selling the patented invention in the  
4 exclusive territory.” *Id.* at 1379 (emphasis in original). But the Federal Circuit never held  
5 that a failure to convey in full was dispositive, particularly in the situation where there is a  
6 *restricted* right to use the patent by the patent holder.

7 • *Abbott Labs. v. Diamedix Corp.*, 47 F.3d 1128 (Fed. Cir. 1995). In *Abbott*, the Federal  
8 Circuit held that the defendant retained substantial rights in part because it “retained the right  
9 to make and use, for its own benefit, products embodying the inventions claimed in the  
10 patent, as well as the right to sell products to end users, to parties with whom Diamedix had  
11 pre-existing contracts, and to pre-existing licensees.” *Id.* at 1132. As noted above, in the  
12 instant case, the EPD Agreement does not provide that CopyTele retained the right to use the  
13 patents by selling products embodying the patented inventions to others in a competitive  
14 manner. CopyTele’s right to use the patent is substantially restricted to noncompetitive use.  
15 *See* No. C-13-0380 Compl., Ex. A (EPD Agreement, Schedule B) (defining “Subject EPD  
16 Products”). Moreover, in *Abbott*, there were other considerations that the court took into  
17 account in concluding that the defendant retained substantial rights. *See id.* (noting that  
18 “Diamedix retained a limited right to make, use, and sell products embodying the patented  
19 inventions, a right to bring suit on the patents if Abbott declined to do so, and the right to  
20 prevent Abbott from assigning its rights under the license to any party other than a successor  
21 in business”).

22 • *Fieldturf, Inc. v. Southwest Rec. Indus., Inc.*, 357 F.3d 1266 (Fed. Cir. 2004). In *Fieldturf*,  
23 the agreement simply stated that a company would be an exclusive licensee; the agreement  
24 did not address who would have the right to enforce the patent at issue against infringers or  
25 whether the patent holders retained the right to develop, display, commercialize, and market  
26 embodiments of the patent. *See id.* at 1269. The Federal Circuit stated that “[t]hese  
27 omissions were significant.” *Id.* “[W]ithout granting [the company] the right to enforce the  
28 patent, either explicitly or impliedly, the document conveys no more than a bare license.” *Id.*

1 While a “licensor’s retention of a limited right to develop and market the patented invention  
2 indicates that the licensee failed to acquire all substantial rights,” the agreement was “silent  
3 with respect to [this] important consideration[]” as well. *Id.* (citing *Abbott*). Here, the right  
4 to enforce the patent is clearly vested in AUO.

5 Notably, a number of courts have held that a retention of noncompetitive rights does *not*  
6 amount to a retention of substantial rights. *See, e.g., Adventus Am. Inc. v. Innovative Envntl. Techs.*,  
7 No. 06 CV 3267, 2007 U.S. Dist. LEXIS 15611, at \*12-13 (N.D. Ill. Mar. 5, 2007) (noting that “the  
8 University has retained non-commercial research investigatory rights” but stating that “[t]hese  
9 research rights . . . are not the same type of ‘use’ rights the Federal Circuit has held amount to a  
10 failure to transfer all substantial rights to a licensee”) (citing *Abbott*); *PerkinElmer Health Scis., Inc.*  
11 *v. Agilent Techs., Inc.*, No. 12-10562-NMG, 2013 U.S. Dist. LEXIS 3288, at \*9-10 (D. Mass. Jan. 8,  
12 2013) (stating that “the License Agreement appears to convey most, if not all, substantial rights to  
13 PerkinElemer, who obtained all commercial use rights and the right to sublicense the patents for  
14 commercial purposes, for the duration of the patents”; Yale simply retained the right to make, use,  
15 and practice the patented material for noncommercial purposes); *see also Trendx Enters. v. All-*  
16 *Luminum Prods.*, 856 F. Supp. 2d 661, 669 (D.N.J. 2012) (distinguishing case because “the patent  
17 owner retained the rights only for a limited educational, non-commercial purpose”).

18 c. Right to Assign

19 Section 6.3 of the EPD Agreement states as follows:

20 Except as otherwise specifically provided in this Agreement, neither  
21 this Agreement nor any rights hereunder nor any Licensed Patents may  
22 b assigned or otherwise transferred by any party, in whole or in part,  
23 whether voluntary or by operation of law, including by way of sale of  
24 assets, merger or consolidation, without the prior written consent of  
the other party, provided that [AUO] may transfer[] its rights and  
obligations under this Agreement to a Subsidiary or affiliate without  
[CopyTele’s] consent. Any purported assignment without any such  
consent is void.

25 No. C-13-0380 Compl., Ex. A (EPD Agreement § 6.3).

26 ///  
27 ///  
28 ///

1 CopyTele argues that the above provision, which limits the right of AUO to assign its rights  
2 under the agreement to a third party (*i.e.*, consent of CopyTele is required), is dispositive – *i.e.*, it  
3 establishes that CopyTele retained substantial rights.

4 CopyTele relies in large part on *Propat*, where the Federal Circuit noted that “[t]he right to  
5 dispose of an asset is an important incident of ownership.” *Propat*, 473 F.3d at 1191. But *Propat* is  
6 distinguishable on its facts. As in the instant case, in *Propat*, the agreement between the patent  
7 holder and the licensee provided that the licensee could not assign its rights under the agreement  
8 without the consent of the patent holder. However, the agreement in *Propat* used very specific  
9 language – *i.e.*, that the patent holder could “freely withhold” consent. *Id.* at 1190. The district  
10 court considered this provision to mean that the patent holder could withhold consent ““even  
11 arbitrarily,”” *id.*, and the Federal Circuit seemed to agree. *See id.* at 1191 (referring to “the  
12 unrestricted power to bar Propat from transferring its interest in the patent to a third party”; also  
13 stating that “the agreement expressly indicates that Authentix is free to veto any such transfer  
14 decision, even if it does so ‘arbitrarily’”). It was this ability to *arbitrarily* refuse consent to which  
15 the Federal Circuit gave great weight:

16 Authentix’s right to veto any transfer of Propat’s rights under the  
17 agreement is particularly significant, the more so because the  
18 agreement expressly indicates that Authentix is free to veto any such  
19 transfer decision, even if it does so “arbitrarily.” The right to dispose  
of an asset is an important incident of ownership, and such a  
restriction on that right is a strong indicator that the agreement does  
not grant Propat all substantial rights under the patent.

20 *Id.*

21 Here, Section 6.3 does not confer upon CopyTele the right to withhold consent arbitrarily.  
22 Absent such a provision, the right to withhold consent is subject to the implied covenant of good  
23 faith and fair dealing. *See Foley v. Interactive Data Corp.*, 47 Cal. 3d 654, 683 (1988) (stating that  
24 “[e]very contract imposes upon each party a duty of good faith and fair dealing in its performance  
25 and its enforcement”).

26 CopyTele’s reliance on *Sicom Systems Ltd. v. Agilent Technologies, Inc.*, 427 F.3d 971 (Fed.  
27 Cir. 2005), presents a closer case. In *Sicom*, the Federal Circuit seemed to express agreement with  
28 the lower court’s statement that the restriction on the licensee’s right to assign/sublicense (*i.e.*,

1 consent of the patent holder was required) was a “fatal reservation of rights.” *Id.* at 979.  
2 Nevertheless, it is far from clear that the Federal Circuit rested its decision on that specific fact  
3 alone. Indeed, in *Sicom*, there were a number of factors pointing to a retention of substantial rights  
4 by the patent holder – *e.g.*, the licensee did not have the exclusive right to sue for any kind of  
5 infringement, the licensee did not have the right to settle litigation without the consent of the patent  
6 holder, the patent holder reserved the rights to grant contracts and subcontracts to develop, and so  
7 forth. *See id.* As noted above, many substantial rights were transferred to AUO, including the right  
8 to sue and settle and the right to sublicense.

9         With respect to the right to sublicense, *Aspex Eyewear, Inc. v. Miracle Optics, Inc.*, 434 F.3d  
10 1336 (Fed. Cir. 2006), and *Vaupel*, 944 F.2d at 870, are particularly instructive cases. In *Aspex*, the  
11 licensee was given “a virtually unfettered right to sublicense all of its rights to a third party [of its  
12 own choosing].” *Aspex*, 434 F.3d at 1138. While there was another provision in the license  
13 agreement that no right under the agreement could be assigned or transferred by the licensee without  
14 the patent holder’s prior written consent (unless the assignment was made to an affiliate of the  
15 licensee), *see id.* at 1341, the licensee contended that this provision was not “meaningful” because  
16 the “more relevant provision” was the former. The Federal Circuit agreed stating that, “given its  
17 *virtually unfettered right* to sublicense, Chic’s limited ability to assign its rights to unaffiliated third  
18 parties is not controlling.” *Id.* at 1342 (emphasis added).

19         As E Ink argues, *Aspex* is essentially analogous to the instant case. Here, even though the  
20 EPD Agreement has a provision that requires the other party’s consent to an assignment (§ 6.3), that  
21 provision has an exception – *i.e.*, “[e]xcept as otherwise specifically provided in this Agreement,”  
22 Compl., Ex. A (EPD Agreement § 6.3) – and the EPD Agreement includes another provision (§ 2.2)  
23 which expressly gives AUO the right to “sub-license the Licensed Patents.” Compl., Ex. A (EPD  
24 Agreement § 2.2). That right to sublicense does not appear to be subject to any restrictions.

25         *Vaupel* also weighs against CopyTele. In *Vaupel*, the Federal Circuit noted that the license  
26 agreements showed that the patent holder retained, *inter alia*, a veto right on sublicensing by the  
27 licensee. In spite of this veto right (or consent requirement), the court stated that the right was not  
28 “so substantial as to reduce the transfer to a mere license or indicate an intent not to transfer all

1 substantial rights.” *Vaupel*, 944 F.2d at 875. The court characterized “[t]he sublicensing veto [as] a  
2 minor derogation from the grant of rights” that “did not substantially interfere with the full use by  
3 [the licensee] of the exclusive rights under the patent.” *Id.* Here, of course, there is not even a  
4 sublicensing veto. However, even if the Court were to evaluate the *assignment* veto (*i.e.*, the  
5 requirement that CopyTele consent to the assignment), *Vaupel* indicates that that veto right  
6 constitutes at best a “minor derogation” from the broad grant of rights under the EPD Agreement.  
7 *Id.* The power to withhold consent appears to be restricted by the duty of good faith, as noted above.

8 To be sure, in *Refax International, Ltd. v. Visa USA, Inc.*, No. C-89-2198-DLJ (ENE), 1990  
9 U.S. Dist. LEXIS 11942 (N.D. Cal. June 26, 1990), Judge Jensen noted that “REFAC is . . .  
10 precluded under the agreement from assigning its rights under the patent to anyone except a  
11 successor company that acquires REFAC’s entire business. In the opinion of the Court, we need  
12 look no farther in determining that the patentee Lemelson reserved substantial rights under the  
13 agreement.” *Id.* at \*14. But the restriction on transfer here is not so broad. In any event, *Refax*  
14 predated *Aspex* and *Vaupel*.

15 3. Summary

16 Because both the intention of the parties and the substance of what was granted under the  
17 EPD Agreement indicate that the EPD Agreement between CopyTele and AUO was tantamount to  
18 an assignment of the patent, and not merely a license, *see Mann*, 604 F.3d at 1359, or merely an  
19 assignment of the bare right to sue, the Court holds that all substantial rights were transferred to  
20 AUO such that it alone has the right to bring a suit for patent infringement. *See Morrow*, 499 F.3d at  
21 1340 (noting that, if a patentee transfers ‘all substantial rights’ to the patent, this amounts to an  
22 assignment or a transfer of title, which confers constitutional standing on the assignee to sue for  
23 infringement in its own name alone”). CopyTele does not have standing to prosecute the action.

24 C. Termination

25 CopyTele argues that, even if, as an *initial* matter only AUO had standing to bring a suit for  
26 patent infringement because of the assignment of substantial rights under the EPD Agreement,  
27 CopyTele obtained standing to sue once AUO materially breached the EPD Agreement. According  
28 to CopyTele, once AUO materially breached the agreement, that legally gave CopyTele the right to

1 terminate the agreement<sup>3</sup> – which it did prior to filing suit – thus all rights essentially reverted back  
2 to CopyTele and gives it standing to bring the patent infringement suit. *See* Opp’n at 16-17.

3 In response, E Ink argues that CopyTele did not have the right to terminate the agreement  
4 because it had assigned (and not licensed) rights to AUO. That is, E Ink contends that, where rights  
5 have been *assigned*, the only way to undo an agreement is to rescind it; in contrast, where rights  
6 have been *licensed*, then an agreement may be undone by terminating it. *See* Reply at 11-13 (citing,  
7 *inter alia*, *Jim Arnold Corp. v. Hydrotech Sys., Inc.*, 109 F.3d 1567 (Fed. Cir. 1997)). While the  
8 Court has found that the EPD Agreement effected in essence an assignment and not a mere license  
9 of the patent to AUO, the Court need not resolve the issue of whether a rescission or termination of  
10 the agreement is required to vest CopyTele with enforcement rights, because there is a more  
11 fundamental problem.

12 CopyTele does not dispute that whether there was a material breach by AUO is a question of  
13 fact that needs to be resolved before the issue of patent infringement can be addressed. *See* Opp’n at  
14 17. Indeed, CopyTele’s reliance on *CAI International Inc. v. South Atl. Container Lines, Ltd.*, No. C  
15 11-2403 CW, 2012 U.S. Dist. LEXIS 93214, at \*16 (N.D. Cal. July 5, 2012), underscores that there  
16 must be an adjudication of the breach issue first. Given this circumstance, this infringement suit by  
17 CopyTele is premature. *See Heidelberg Harris, Inc. v. Loebach*, 145 F.3d 1454, 1458 (Fed. Cir.  
18 1998) (noting that, in *Arachnid, Inc. v. Merit Industries, Inc.*, 939 F.2d 1574 (Fed. Cir. 1991), the  
19 court had held that “a plaintiff cannot sue for patent infringement occurring prior to the time that  
20 plaintiff actually obtained legal title to the asserted patent”<sup>4</sup>; *cf. Whitmore v. Arkansas*, 495 U.S.  
21 149, 158 (1990) (noting that “[a]llegations of possible future injury [*i.e.*, contingent future injury] do  
22 not satisfy the requirements of Art. III”); *see also Texas v. United States*, 523 U.S. 296, 300 (1998)  
23 (stating that “[a] claim is not ripe for adjudication if it rests upon contingent future events that may  
24 not occur as anticipated, or indeed may not occur at all”) (internal quotation marks omitted).

---

25  
26 <sup>3</sup> The EPD Agreement does not contain an express termination clause.

27 <sup>4</sup> To the extent CopyTele tries to distinguish *Arachnid* because, unlike the plaintiff in  
28 *Arachnid*, CopyTele is the legal title holder of the patents at issue, *see* Opp’n at 19-20, it misses the  
point that, even though it may be the legal title holder, it transferred all substantial rights to AUO  
such that AUO alone has the right to bring suit.

1 CopyTele fails to address this problem in its papers. Moreover, its suggestion that it can  
2 regain the right to enforce the patent simply by a *unilateral* declaration that the EPD Agreement is  
3 terminated is without any support. In fact, to allow CopyTele to prosecute the instant case after this  
4 Court has found that the right to enforce the patent was assigned to AUO would contravene the rule  
5 that the party which holds all substantial rights “*alone* has standing to sue for infringement.”  
6 *Morrow*, 499 F.3d at 1340 (emphasis added).

7 D. Joinder of AUO

8 Finally, CopyTele makes the assertion that whether the EPD Agreement transferred all  
9 substantial rights to AUO and whether the EPD Agreement has been terminated or rescinded are  
10 ultimately “academic” issues because “joining AUO as a party to the instant case pursuant to Federal  
11 Rule of Civil Procedure 19 will obviate any standing issue.” Opp’n at 20.

12 The problem with this argument is that CopyTele must first have standing before it can ask  
13 for another party to be joined. As determined above, CopyTele does not, at this juncture, have  
14 standing to bring a claim for patent infringement. *See WiAV Solns. LLC v. Motorola, Inc.*, 631 F.3d  
15 1257, 1265 (Fed. Cir. 2010) (stating that “the touchstone of constitutional standing in a patent  
16 infringement suit is whether a party can establish that it has an exclusionary right in a patent that, if  
17 violated by another, would cause the party holding the exclusionary right to suffer legal injury”).

18 Notably, the cases cited by CopyTele in its opposition brief are largely distinguishable  
19 because they address a patent infringement action being brought by an exclusive licensee who has  
20 standing since it had certain exclusionary rights. Here, CopyTele does not claim to be an exclusive  
21 licensee. The party to whom all substantial rights, including the right to enforce, have been assigned  
22 is AUO, and thus it alone has standing to sue. *See Alfred E. Mann*, 604 F.3d at 1360 .

23 **III. CONCLUSION**

24 For the foregoing reasons, the Court concludes that CopyTele has failed to establish standing  
25 at this juncture to proceed with its patent infringement suit. The EPD Agreement transferred all  
26 substantial rights to AUO such that AUO alone has standing to bring a suit for infringement – at  
27 least until a determination is made that AUO materially breached the agreement such that the  
28 agreement may be terminated or rescinded.

1           Accordingly, the Court grants E Ink’s motion to dismiss but the dismissal shall be without  
2 prejudice to the extent that this ruling does not bar CopyTele from asserting a patent infringement  
3 claim against E Ink should a judicial determination be made that AUO materially breached the EPD  
4 Agreement, thus resulting in termination or rescission.

5           The Clerk of the Court is instructed to enter a final judgment in accordance with this opinion  
6 and close the file in the case.

7           This order disposes of Docket No. 38.
