UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

IN RE
MYFORD TOUCH CONSUMER
LITIGATION

Case No. [13-cv-03072-EMC](#)

**ORDER GRANTING IN PART AND
DENYING IN PART DEFENDANT’S
MOTION FOR SUMMARY JUDGMENT**

Docket No. 341

The crux of this case is that Ford’s infotainment system known as MyFord Touch was allegedly defective. Plaintiffs seek to recover damages on behalf of the certified classes in the form of the diminution in value caused to their vehicles by the defect. Ford now moves for summary judgment on the classwide express and implied warranty claims as well as a number of individual fraud and consumer protection claims. For the reasons below, the Court **GRANTS IN PART** and **DENIES IN PART** Ford’s motion.

I. FACTUAL AND PROCEDURAL BACKGROUND

The following claims have been certified for class treatment: Breach of Implied Warranty on behalf of California, Massachusetts, New Jersey, North Carolina, Ohio, and Virginia classes; Breach of Express Warranty on behalf of California and Washington classes; violation of the Massachusetts Consumer Protection Act on behalf of the Massachusetts class; negligence under Ohio law; and strict product liability under Colorado law. *See* Docket No. 279 at 41-43.¹ The classes are defined to include “all persons or entities who purchased or leased a Ford or a Lincoln

¹ The Court initially certified similar claims under California’s Consumer Legal Remedies Act and the consumer protection statutes of Ohio, Texas, and Virginia, but decertified them upon reconsideration because Plaintiffs could not demonstrate a method to prove actual reliance on a classwide basis. *See* Docket No. 301 at 8-9.

1 vehicle in [the applicable state] from Ford Motor Company or through a Ford Motor Company
2 dealership before August 9, 2013, which vehicle was equipped with a MyFord Touch or
3 MyLincoln Touch in-car communication and entertainment system.” *Id.* at 1.

4 Plaintiffs’ various claims alleging fraud and fraudulent omission were not certified by the
5 Court, nor were express warranty claims under the laws of Iowa, Massachusetts, New Jersey, New
6 York, North Carolina, Ohio, and Virginia. *Id.* at 36-39, 43. However, several of the non-class
7 claims remain in the case on an individual basis.

8 The following chart summarizes the class claims certified by state.

State	Claims Certified
California	Breach of Implied Warranty Breach of Express Warranty Song-Beverly Act Unfair Competition Law
Colorado	Strict Product Liability
Massachusetts	Breach of Implied Warranty Massachusetts Consumer Protection Act
New Jersey	Breach of Implied Warranty
North Carolina	Breach of Implied Warranty
Ohio	Breach of Implied Warranty Negligence
Virginia	Breach of Implied Warranty
Washington	Breach of Express Warranty

19 A. Summary of Factual Allegations

20 Plaintiffs and Class Members purchased vehicles from Ford that were equipped by
21 MyFord Touch (“MFT”), an “infotainment” system. The gravamen of Plaintiffs’ allegations is
22 that the MFT system suffered from an underlying, systemic defect in its base software that caused
23 numerous problems, many of which are described in more detail below. In general, these involved
24 failure of navigation systems, failure of Bluetooth connectivity and hands-free systems, failure of
25 the climate control system, frequent freezes and lock-ups, the failure of the back-up camera
26 including images that froze in place, and so on. *See* TAC ¶ 7. When malfunctions occurred,
27 certain vehicle features allegedly became inoperable because MFT was the only way to utilize
28 them. Further, Plaintiffs allege that the malfunctions distract drivers and therefore cause

1 unreasonable safety risks.

2 MFT is powered by an operating system known as Ford SYNC, which is also the name
3 given to Ford's first generation MFT system. Vehicles with MFT cost more than those without it,
4 though the precise cost is disputed. Plaintiffs allege that Ford has not yet fixed the problem with
5 MFT, though Ford claims that one of its post-Class Period software updates in 2013 made MFT
6 "first in class," and that other software updates issued during the Class Period improved MFT's
7 functionality. Ford's vehicles were covered by a limited express warranty, whose relevant
8 portions are quoted in the analysis below.

9 B. Summary of Expert Reports

10 Although not all of the expert reports are material to the instant motion, the Court
11 summarizes each expert's proffered testimony below.

12 1. Plaintiffs' Expert Dr. Arnold

13 Dr. Arnold is an economist with advanced degrees in business and who has taught
14 economics; he works at Compass Lexecon applying economic models to project damages
15 calculations. Ford does not challenge Dr. Arnold's expertise, but contends his models in this case
16 are not tied to implied and express warranty damages and provide no reliable justification for his
17 assumption that the value of a defective MFT to consumers was \$0.

18 Dr. Arnold used data produced by Ford to calculate the revenue Ford received for sales of
19 the MFT system with and without a navigation feature. *See* Edwards Decl., Ex. 56. He calculates
20 that consumers paid \$625 for MFT without navigation and \$1,364 for MFT with navigation. Dr.
21 Arnold then treats the full cost paid as equivalent to the economic loss suffered by each plaintiff
22 due to the defect; in other words, Dr. Arnold's damages calculation assumes that the MFT system
23 was valueless. Plaintiffs argue that this assumption is supported by other evidence they intend to
24 introduce at trial showing that none of the subsequent software upgrades released by Ford resolved
25 the defects at issue, and thus failed to restore any value to the MFT system. Dr. Arnold's
26 determination that the MFT system had zero value is premised on the notion that risk averse
27 consumers would not purchase the MFT with known and severe defects, especially as many affect
28 safety, thus rendering its value zero. However, that the value to some consumers is zero does not

1 necessarily imply that the MFT had no market value generally. Dr. Arnold did not attempt to
2 determine the percentage of consumers or Class Members who were in fact risk averse and for
3 whom the MFT system therefore had zero value versus those who might attribute value to it. At
4 best, he states that “most” consumers are risk averse, but he does not state that “all” are. Plaintiffs
5 argue that the basis for his assumption is economic literature he relies upon; thus, the credibility of
6 his assumption is a question of fact for the jury, which may discredit his testimony and make
7 downward adjustments to his damages estimate. The parties disagree about whether Dr. Arnold’s
8 predicate assumptions are so unreliable or unsound as to require exclusion of his opinion entirely,
9 or whether they may be presented to the jury to consider alongside other foundational evidence
10 and the jury may be allowed to determine what weight, if any, to give to Dr. Arnold’s opinion.

11 2. Plaintiffs’ Expert Mr. Boedeker

12 Mr. Boedeker is an economist with advanced degrees in statistics and economics, and 25
13 years of experience applying economic, statistical, and financial models. Ford does not challenge
14 Mr. Boedeker’s qualifications but rather whether his damages model is tied to implied and express
15 warranty damages, and whether his methodology is reliable.

16 Mr. Boedeker used a survey method called choice-based conjoint analysis to infer how
17 consumers valued the MFT system in four scenarios where they were exposed to varying levels of
18 information about the MFT defect, its safety implications, and Ford’s knowledge of and failure to
19 disclose information about the defect. *See* Edwards Decl., Ex. 57. The analysis shows that the
20 more information consumers were provided about the defect, the less valuable the MFT system
21 became to them. Thus, while consumers originally valued MFT at \$1,850, that value dropped by
22 \$729 when they were told to “[i]magine that your salesperson tells you at the point of purchase
23 that the MFT system has a glitch but that a fix for the glitches will be provided for free in the
24 future when ready,” *id.* ¶ 74; by \$910 when they were presented with statements showing Ford’s
25 knowledge of the defect and its severity; and by \$839-\$1,290 when they learned that the defect
26 also caused distractions raising safety concerns.

27 Ford argues that Mr. Boedeker’s model is not suitable for calculating express or implied
28 warranty damages because it does not estimate the cost of repair, it fails to account for the value of

1 subsequent software upgrades, and because the survey questions introduce an element of fraud
2 into respondents' valuations, an element irrelevant to breach of warranty claims. Ford also argues
3 that Mr. Boedeker's methodology is unreliable because his calculation of the change in MFT's
4 value focuses only on the demand side of the equation without considering the supply-side,
5 because he does not account for used car sales data, and because certain aspects of his
6 methodology have not been peer reviewed in economic literature.

7 3. Plaintiffs' Expert Dr. Rosenberg

8 Dr. Rosenberg provided a human factors analysis of the MyFord Touch system. *See*
9 Berman Decl., Ex. 19. He analyzes MFT for its usability, safety, and stability. He performed
10 driving studies that focused on measuring subjective and objective measures of driver distraction
11 resulting from interactions with MFT. He concluded that there are issues with the design and
12 implementation of MFT including requiring undue time and attention, excessive task demand,
13 overly complicated mental models, and causing mistrust of the system, resulting in distraction to
14 drivers and hence a safety hazard. He also observes that because of the frustrations with the MFT
15 systems, drivers may fall back on performing tasks with other devices like smartphones that are
16 not designed with the driving task in mind, therefore increasing the safety risks involved. Dr.
17 Rosenberg evaluated up to version 3.7 of the MFT system, including software upgrades issued
18 after the end of the class period in August 2013. Ford has not challenged Dr. Rosenberg.

19 4. Other Experts

20 The parties have retained other experts but they are not at issue on this motion, although
21 there are some references to their testimony or positions. Ford's additional experts include Dr.
22 Taylor (safety issues and analysis of accident data), Dr. Rauschenberger (usability/safety issues),
23 and Dr. Singer (economic analysis regarding damages). Plaintiffs have also retained a technical
24 expert, Dr. Smith, but the scope of his testimony and opinion is unclear because the report was not
25 submitted. These experts are not subject to challenges at this time.

26 **II. LEGAL STANDARD**

27 A party may move for summary judgment by arguing that the nonmoving party "fails to
28 make a showing sufficient to establish the existence of an element essential to that party's case,

1 and on which that party will bear the burden of proof at trial.” *Celotex Corp. v. Catrett*, 477 U.S.
2 317, 322 (1986); Fed. R. Civ. P. 56(a). When a party so moves, it must identify the elements of
3 the claims upon which the nonmoving party has failed to produce sufficient evidence. *Carmen v.*
4 *S.F. Unified School Dist.*, 237 F.3d 1026, 1031 (9th Cir. 2001). The nonmoving party then has the
5 burden to present evidence demonstrating the existence of a genuine dispute of material fact,
6 which exists only when there is sufficient evidence to permit a reasonable jury to find for the
7 nonmoving party. *See Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 248-49, 252 (1986). At the
8 summary judgment stage, evidence is viewed in the light most favorable to the nonmoving party
9 and all justifiable inferences are drawn in his or her favor. *Id.* at 255.

10 “Where the record taken as a whole could not lead a rational trier of fact to find for the
11 non-moving party, there is no genuine issue for trial.” *Matsushita Elec. Indus. Co. v. Zenith Radio*
12 *Corp.*, 475 U.S. 574, 587 (1986). The nonmoving party, however, may not rely on bare assertions.
13 *Anderson*, 477 U.S. at 248. Rather, it must bring relevant evidence to the district court’s attention
14 in a clear manner, as the court is “not required to comb the record to find some reason to deny a
15 motion for summary judgment.” *Carmen v. San Francisco Unified School Dist.*, 237 F.3d 1026,
16 1029(9th Cir. 2001); *see also Keenan v. Allan*, 91 F.3d 1275, 1279 (9th Cir. 1996) (the court is not
17 obligated to “scour the record in search of a genuine issue of triable fact”).

18 **III. DISCUSSION**

19 A. **Implied Warranty of Merchantability**

20 To state a claim for breach of the implied warranty of merchantability, a consumer must
21 demonstrate that a good sold by a merchant with respect to such goods is “fit for the ordinary
22 purposes for which such goods are used.” U.C.C. § 2-314(2). Additional requirements which
23 may apply on a state-by-state basis and which are relevant to Ford’s motion are discussed below.
24 Here, Ford argues that Plaintiffs (1) cannot present evidence the vehicles were unmerchantable,
25 (2) cannot present evidence showing the defect manifested within one year; (3) may not as a
26 matter of law bring a claim under the Song-Beverly Act for used car purchasers; (4) and are
27 precluded from bringing claims to the extent that they used their vehicles for business or
28 commercial purposes because of Ford’s disclaimer of implied warranty.

1 1. Unmerchantability

2 Ford argues that it is entitled to summary judgment because Plaintiffs do not present (a)
3 evidence that the transportation function of their vehicle was impaired; (b) evidence that the
4 vehicles were so unsafe as to be unmerchantable in light of their continued use of the vehicles; or
5 (c) evidence that MFT-equipped vehicles were involved in accidents at a greater rate than
6 comparable vehicles.

7 a. Legal Standard

8 Before reviewing the evidence, it is necessary to set forth the standard for
9 unmerchantability. “The implied warranty of merchantability does not impose a general
10 requirement that goods precisely fulfill the expectation of the buyer. Instead, it provides for a
11 minimum level of quality.” *T&M Solar & Air Conditioning, Inc. v. Lennox Int’l Inc.*, 83
12 F.Supp.3d 855, 878 (N.D. Cal. 2015) (quotation omitted). To state a claim, “a plaintiff must
13 allege a fundamental defect that renders the product unfit for its ordinary purpose.” *Id.* (quotation
14 omitted).

15 The law is clear that to be fit for its ordinary purpose, a vehicle must be “in safe condition
16 and substantially free of defects.” *Isip v. Mercedes-Benz USA, LLC*, 155 Cal.App.4th 19, 27
17 (2007).² Moreover, it must provide “reliable” transportation. *Brand v. Hyundai Motor Am.*, 226
18 Cal.App.4th 1538, 1547 (2014) (quotation omitted). Thus, three factors related to vehicle
19 merchantability are safety, reliability, and substantial freedom from defects.

20 Contrary to Ford’s suggestion, proof of a safety condition is not required to demonstrate
21 unmerchantability; it is merely one way to demonstrate unmerchantability. *See Brand*, 226

22 _____
23 ² A number of cases cited by Ford do not involve vehicles and therefore are not illuminating with
24 respect to when a vehicle is unfit for its ordinary purpose. *See, e.g., Stearns v. Select Comfort*
25 *Retail Corp.*, 2009 WL 1635931, at *8 (N.D. Cal. Jun. 5, 2009) (plaintiff alleging defect caused
26 mold to grow in bed failed to demonstrate unmerchantability where mold was not discovered for
27 several years and no harm was alleged); *Haglund v. Philip Morris, Inc.*, 847 N.E.2d 315, 323
28 (Mass. 2006) (in cigarette case, stating that “[w]hen the consumer’s knowing use of a product in a
dangerous and defective condition is unreasonable, the consumer’s own conduct has become the
proximate cause of his injuries, and he can recover nothing from the seller”); *Tietsworth v. Sears*
Roebuck & Co., 720 F.Supp.2d 1123, 1142 (N.D. Cal. 2010) (purchaser continued to use washing
machine to clean clothes for full duration of implied warranty period despite occasional error
messages, but machine did not fail until after warranty period).

1 Cal.App.4th at 1538, n.2 (holding that “vehicle safety is [not] the sole or dispositive criterion in
2 implied warranty cases, which may turn on other facts”). The *Brand* court further explained that
3 *Isip*, which concerns a defect related to a potential safety hazard, “provides just one example of a
4 breach of the implied warranty of merchantability, and does not purport to establish the only
5 manner in which a seller violates the warranty.” *Id.* 1547. Reliability, operability, and substantial
6 freedom from defects related thereto are independent grounds for demonstrating
7 unmerchantability.

8 Moreover, courts reject the notion that a vehicle is fit for its ordinary purpose “merely
9 because [it] provides transportation from point A to point B[.]” *Isip*, 155 Cal.App.4th at 27. A
10 car’s ability to provide transportation is a defense only in “the context of . . . cases in which *no*
11 *damage ha[s] been suffered*” otherwise. *Id.* at 25 (emphasis added). Ford cites a number of cases
12 where courts looked to continued use of the vehicle to conclude that it was not unmerchantable,
13 but those cases involved defects where a vehicle’s operability was not impaired until a particular
14 part malfunctioned and required replacement.³ They did not involve situations where a defect’s
15 symptoms were persistent and could not be addressed through repair or replacement of an isolated
16 component.⁴ Because no aspect of the vehicle’s operability in such cases was impaired before the

18 ³ See *Troup v. Toyota Motor Corp.*, 545 F. App’x 668, 669 (9th Cir. 2013) (affirming dismissal
19 where plaintiff alleged fuel tank required more frequent refills because plaintiffs “failed to allege
20 that their Prius was unfit for its intended purpose, as the alleged defect did not compromise the
21 vehicle’s safety, render it inoperable, or drastically reduce its mileage”); *Suddreth v. Mercedes-*
22 *Benz, LLC*, 2011 WL 5240965, at *5 (D.N.J. Oct. 31, 2011) (defect that caused balance shaft to
23 require premature but post-warranty replacement did not breach warranty of merchantability
24 because “Plaintiffs all *admit* that they were able to drive their vehicles for several years *without*
25 *issue*” (emphasis added)); see also *Sheris v. Nissan N. Am., Inc.*, 2008 U.S. Dist. LEXIS 43664, at
*15-16 (D. N.J. Jun. 2, 2008) (premature break pad wear did not support claim for implied
merchantability in light of “the undisputed facts” that plaintiff could drive vehicle for 2 years and
over 20,000 miles before break pad required replacement and had “failed to allege factually what
made his [vehicle] unmerchantable or unsafe for driving”); but see *Keegan v. Am. Honda Motor*
Co., 838 F.Supp.2d 929, 945-46 (C.D. Cal. 2012) (on motion to dismiss, plaintiff alleging that rear
suspension defect caused premature tire wear adequately pleaded claim for breach of implied
merchantability warranty).

26 ⁴ Ford also cites *In re Toyota Motor Corp. Hybrid Brake Mktg., Sales Practices & Prod. Liab.*
27 *Litig.*, 959 F.Supp.2d 1244, 1254 (C.D. Cal. 2013), *aff’d sub nom. Kramer v. Toyota Motor Corp.*,
28 668 F. App’x 765 (9th Cir. 2016), to support its argument that continued usage is relevant, but that
case does not discuss unmerchantability at all. Rather, summary judgment for the defendant was
affirmed because of the plaintiff’s failure to present evidence of a defect in the first place—there
was no evidence that the purported brake defect resulted in extended and therefore unsafe stopping

1 defective part failed, it could not be unmerchantable. In contrast, courts have recognized that
2 vehicles may be unmerchantable even if they can be used to provide basic transportation when a
3 defect presents symptoms in a persistent manner that can be said to impair safety, reliability, or
4 operability over an extended period of time.⁵

5 In sum, the law does not require Plaintiffs to introduce proof that the vehicles were not in
6 fact used to demonstrate unmerchantability. They can also demonstrate unmerchantability by
7 introducing evidence that their vehicles were affected by a persistent defect that so affected their
8 safety, reliability, or operability as to render them unfit.

9 a. Application to Evidence

10 Plaintiffs have introduced sufficient proof from which a reasonable jury could conclude
11 that the MFT defect caused, *inter alia*, persistent distractions; failed intermittently and
12 unexpectedly while performing key functions such as navigation assistance or rear-view cameras;
13 and impaired operability by undermining use of the rear-view cameras, climate control systems,
14 and navigation systems, often requiring drivers to pull-over to reboot the systems.⁶ Plaintiffs have
15

16 distances. Because there was no defect, there was no occasion to consider whether the vehicle was
17 fit for its ordinary purpose.

18 ⁵ See, e.g., *Isip*, 155 Cal.App.4th at 27 (unmerchantability demonstrated where vehicle “smells,
19 lunches, clanks, and emits smoke *over an extended period of time*” (emphasis added)); *Borkman v.*
20 *BMW of N. Am., LLC*, 2017 WL 4082420, at *9, *9 n.10 (C.D. Cal. Aug. 28, 2017) (plaintiff
21 alleged defect causes “loss of power during operation, engine overheating, and, potentially, engine
22 failure” in addition to “check engine alerts . . . and a strong burning smell in the cabin of her
23 vehicle”); see also *Burdv v. Whirlpool Corp.*, 2015 U.S. Dist. LEXIS 102761, at *17 (N.D. Cal.
24 Aug. 5, 2015) (distinguishing allegedly defective oven-rack which tipped over on only a single
occasion from vehicle defects which “consistently impair [the drivers’] entire use [of the vehicle]
over an extended period of time”); *Brand*, 226 Cal.App.4th at 1547-48 (holding that “a reasonable
jury could conclude that a vehicle sunroof that opens and closes *on its own* creates a substantial
safety hazard” due to, *inter alia*, sudden distractions and “the element of surprise” (emphasis in
original)).

25 ⁶ See, e.g., Watson Dep. (Berman Decl., Ex. 1) at 68:21-69:21 (volume may suddenly spike, back-
26 up camera may fail while reversing, and navigation system may suddenly instruct driver to exit
27 freeway at highway speeds); Thomas-Maskrey Dep. (Berman Decl., Ex. 2) at 15:12-16:17, 17:8-
19:16 (built-in navigation system times out frequently without providing directions, screen blacks
28 out intermittently, and rear-view cameras and sensors do not function); Connell Dep. (Berman
Decl., Ex. 3) at 18:17-19:13 (rearview camera non-functional, navigation system lockup, among
other problems); Creed Dep. (Berman Decl., Ex. 4) at 11:15-25, 102:8-104:21 (sound system

1 introduced evidence that these defects are prevalent in the class vehicles. *Id.* Irrespective of
2 whether these issues also pose safety concerns, they are adequate to support a claim for
3 unmerchantability because a jury could conclude that the symptoms were so persistent and
4 prevalent that they impaired the reliability or operability of the vehicles class-wide.

5 Ford argues that Plaintiffs cannot demonstrate that the MFT defect created safety issues so
6 serious as to render the vehicles unmerchantable because they have not shown that the MFT-defect
7 causes more accidents than other vehicles nor presented evidence of an accident caused by MFT.
8 Plaintiffs are not required to introduce proof of an accident caused by the defect to demonstrate the
9 vehicle was unmerchantable. *See, e.g., Brand*, 226 Cal.App.4th at 1547 (focusing on whether sun-
10 roof defect could create a “dangerous distraction,” not whether accident actually occurs);
11 *Borkman*, 2017 WL 4082420, at *9 (defect could create “hazardous conditions, including loss of
12 power during operation, engine overheating, and *potentially*, engine failure” (emphasis added)).
13 Rather, it is sufficient to show that the defect creates “hazardous conditions,” *Borkman*, 2017 WL
14 4082420, at *9, or “dangerous distraction[s],” *Brand*, 226 Cal.App.4th at 1547.

15 Many of the safety issues alleged with respect to MFT are not as graphic as in other cases.
16 *See, e.g., Isip*, 155 Cal.App.4th at 27 (smoke, smells, engine failure); *Borkman*, 2017 WL
17 4082420, at *9 (burning smells in cabin, engine overheating). Moreover, Plaintiffs do not suggest

18
19
20 would not shut off, navigation system locked up or did not provide directions, sound system
21 unexpectedly turned on, climate control system blew cold air uncontrollably); Fink Dep. (Berman
22 Decl., Ex. 5) at 11:22-12:4, 12:11-15:6 (navigation system instructs him to make illegal U-turns,
23 may freeze for ten-twenty minutes during journey, may arrive at incorrect destination, climate
24 control system does not function at times, entire MFT system may crash during travel); Matlin
25 Dep. (Berman Decl., Ex. 6) at 21:1-11, 108:19-25, 112:19-114:13, 124:10-125:16 (backup camera
26 did not always work, radio station presets often did not function, MFT system froze several times
27 per month, at least once a week); Sheerin Dep. (Ex. 7) at 8:8-9:11 (failures include system crashes,
28 backup camera completely fails, backup camera image may freeze while vehicle is in motion,
MFT may spontaneously reboot in the middle of navigation); Whalen Dep. (Ex. 8) at 38:18-40:13,
69:1-70:8, 89:5-20 (climate control interface does not function, voice commands do not work,
navigation unreliable, back-up camera froze, MFT system froze a lot, he is distracted and feels
unsafe when MFT stops working); Kirchoff Dep. (Ex. 9) at 10:15-11:3 (backup camera did not
function properly, navigation screen did not update properly or updated slowly, MFT system
crashes or provides frequent distracting text message alerts); Miskell Dep. (Ex. 10) at 9:13-10:7,
56:3-22 (MFT system froze, sometimes rebooting three times a day).

1 that the MFT defects impair the mechanical functionality of the vehicles.⁷ Nevertheless, a
2 reasonable juror could conclude, for instance, that a rear-view camera whose image spontaneously
3 freezes without warning while a car is moving in reverse, and thus misleads a driver about what is
4 or is not behind the vehicle, may present a hazardous or dangerous condition. *See supra*, n. 6.

5 Additionally, Plaintiffs have testified that problems like their navigation systems failing in
6 the middle of a trip or providing insufficient time before instructing the driver to exit or turn, the
7 non-responsiveness of the climate control system, and their inability to properly operate the
8 Bluetooth or hands-free features of MFT cause unexpected distractions while they are driving.
9 *See supra*, n. 6. This is bolstered by Plaintiffs' expert on user interfaces, Dr. Rosenberg, who
10 claims that various design issues and usability problems with MFT result in greater distractions
11 than necessary to drivers. These are further examples of evidence that a jury could rely on to
12 determine the defect caused a safety issue implicating merchantability.

13 Although many of the distraction-based evidence implicates safety issues that are less
14 tangible than defect cases involving engine fires or shutdowns, Ford has not identified case-law
15 which precludes, as a matter of law, a claim for unmerchantability. Moreover, Plaintiffs have
16 presented sufficient evidence from which a jury could reasonably conclude that the extent of the
17 distractions, in addition to other problems associated with the defect, rendered the vehicles so
18 unsafe as to be unmerchantable. Though Ford cites evidence like customer satisfaction surveys
19 supporting the notion that many customers provided positive feedback about MFT, *see* Edwards
20 Decl., Ex. 40 at 31-32 (in 2012, most consumers report being "mostly satisfied" with most MFT
21 features), Ex. 41 at 27 & 31 (in 2012, most would "probably" or "definitely" recommend MFT),
22 Ex. 42 at 32, 35 and 43 (similar results in 2013), and an expert analysis purporting to show that
23 crash and injury rates of MFT-equipped vehicles were lower than those of vehicles without MFT,
24 *see* Edwards Decl., Ex. 44 at ¶¶ 29-30, 33-34, that evidence is for the trier of fact to consider and
25 weigh against Plaintiffs' competing evidence. *See* Docket No. 97 (Order re: Motion to Dismiss) at
26

27 _____
28 ⁷ *See* Edwards Decl., Ex. 4 (Smith Depo.) at 367:13-369:21 (Plaintiffs' technical expert conceding
that MFT is not known to affect steering, throttle control, braking, vehicle stability control, or
mirrors).

1 48 (“[I]t is a question of fact for the jury as to whether the problems with MFT posed enough of a
2 safety risk that the cars at issue could not be said to provide safe, reliable transportation.”).

3 Accordingly, the Court **DENIES** Ford’s motion for summary judgment on the basis that
4 Plaintiffs cannot prove the vehicles were unmerchantable.

5 2. Manifestation Within One Year Under Song-Beverly

6 Ford argues that the California Plaintiffs have not demonstrated that their vehicles’ MFT
7 system “caused an accident or otherwise caused his or her vehicle to be inoperable” during the
8 one-year statute of limitations for an implied warranty claim under the Song-Beverly Act. Mot. at
9 8.

10 Under the Song-Beverly Act, a plaintiff must show their vehicle was unmerchantable
11 within one year of purchase. *See* Cal. Civ. Code § 1791.1(c). However, this requirement does not
12 mean “that the purchaser [must] discover and report to the seller a *latent* defect within that time
13 period.” *Daniel v. Ford*, 806 F.3d 1217, 1222-23 (9th Cir. 2015) (quoting *Mexia v. Rinker Boat*
14 *Co.*, 174 Cal.App.4th 1297, 1309 (2009)) (emphasis in reproduction). Rather, there is a
15 “distinction between unmerchantability caused by a latent defect and the subsequent discovery of
16 the defect; the fact that the alleged defect resulted in destructive [harm to the product] two years
17 after the sale . . . does not necessarily mean that the defect did not exist at the time of sale,” the
18 critical question under the Act. *Mexia*, 174 Cal.App.4th at 1308. In other words, the defect itself
19 renders a vehicle unmerchantable at the time of sale, even if the consequences of the defect do not
20 manifest until a later time.

21 The evidence shows the defect did manifest persistently from the time of purchase
22 onwards; indeed, Plaintiffs allege that the defect was inherent to the MFT software system, which
23 was included in all vehicles as of purchase.⁸ Plaintiffs need not show that an accident occurred or
24 that the vehicle became absolutely inoperable within one year. Rather, as discussed above,

25 _____
26 ⁸ *See, e.g.*, Maskrey Dep. (Berman Decl., Ex. 2) at 18:8-19:9 (testifying he encountered problems
27 with navigation system “[r]ight away” after purchase”); Connell Dep. (Berman Decl., Ex. 3) at
28 254:16-24 (discussing service sought for MFT-related issues in January 2011, just a few months
after purchasing vehicle); Matlin Dep. (Berman Decl., Ex. 6) at 21:1-4 (testifying he “had a really
bad experience with MyFord Touch throughout my entire lease”); Whalen Dep. (Berman Decl.,
Ex. 8) at 69-70, 89 (discussing MFT problems within months of purchase).

1 Plaintiffs need only to demonstrate that a persistent defect affecting safety, reliability, or
2 operability either manifested within one year or arose due to a latent defect; they have done so
3 here. Accordingly, the Court **DENIES** Ford’s motion for summary judgment on this basis.

4 3. Song-Beverly and Used Car Purchasers

5 Ford argues that used car purchasers do not have a claim under the Song-Beverly Act
6 because the statute extends only to “consumer goods,” which are defined as referring to “any *new*
7 product or part.” Cal. Civ. Code § 1791(a) (emphasis added).

8 In opposition, Plaintiffs argue that the statute permits used car purchasers to sue for the
9 breach of implied warranty of merchantability because it also provides that, “[n]otwithstanding the
10 provisions . . . defining consumer goods to mean ‘new’ goods, the obligation of a distributor or
11 retail seller of used consumer goods in a sale in which an express warranty is given shall be the
12 same as that imposed on manufacturers under this chapter.” Cal. Civ. Code § 1795.5. Such an
13 express warranty was given here, so § 1795.5 would apply to used vehicles where its conditions
14 are met. The provision, however, does not create additional obligations on a *manufacturer* vis-à-
15 vis used car purchasers; rather, it simply states that the *retailer* or *distributor* is also subject to
16 whatever obligations already apply to the manufacturer. *See Johnson v. Nissan N. Am., Inc.*, ---
17 F.3d ---, Case No. 17-cv-00517-WHO, 2017 WL 4570712, at *6-7 (N.D. Cal. Aug. 29, 2017)
18 (holding that used car purchaser may only pursue implied warranty claims against a “distributor”
19 or “retailer” under § 1795.5(c)).⁹

20 Plaintiffs assert that Ford is liable as a “distributor” or “retailer” of used vehicles, but they

21 _____
22 ⁹ Plaintiffs also cite cases that state that privity of contract between a consumer and manufacturer
23 is not required to state a claim for breach of the implied warranty of merchantability under the
24 Song-Beverly Act, but they are inapposite because the question here is what constitutes a
25 “consumer good” under the Act, not whether privity is required. *See In re MyFord Touch*
26 *Consumer Litig.*, 46 F.Supp.3d 936, 982-83 (N.D. Cal. May 30, 2014) (“For the implied warranty
27 claim under the Song-Beverly Act, there is no privity requirement.”); *Sater v. Chrysler Grp. LLC*,
28 2015 WL 736273, at *8 (C.D. Cal. Feb. 20, 2015) (“The SBA does not require privity to assert an
implied warranty claim (either for merchantability or fitness).”). Additionally, *Mui Ho v. Toyota*
Motor Corp., 931 F.Supp.2d 987, 993 (N.D. Cal. 2013), is inapposite because it does not consider
whether used vehicles are “consumer goods” for purposes of the statute; rather, it dismissed the
implied warranty claim for failure to plead that the vehicle was purchased during the implied
warranty period. *See Johnson*, 2017 WL 4570712, at *7 (explaining that *Mui Ho* “did not
recognize a claim against the manufacturer for used goods because it did not reach the question”).

1 do not cite evidence to support that representation (nor is evidence cited of an agency relationship
2 between the dealers and Ford). *Cf. Herrera v. Volkswagen Grp. of Am., Inc.*, 2016 WL 10000085,
3 at *5 (C.D. Cal. Sep. 9, 2016) (dismissing implied warranty of merchantability claims for used car
4 purchasers on the basis that plaintiffs had not alleged defendant was a distributor or retailer). At
5 the hearing, Plaintiffs conceded that they have no evidence of an agency relationship between
6 Ford and its authorized dealerships with respect to used car sales.

7 Because Plaintiffs have no evidence sufficient to create a genuine, triable issue of material
8 fact with respect to whether Ford was a retailer or distributor of used vehicles, the Court
9 **GRANTS** summary judgment in Ford’s favor on the California Class’s implied warranty claims
10 under the Song-Beverly Act with respect to class members who purchased used vehicles.¹⁰

11 4. Vehicles Used for Business Purposes

12 Ford argues that its express warranty disclaims the implied warranty of merchantability for
13 vehicles used for business purposes, and summary judgment should therefore be granted in its
14 favor against each of the six certified implied warranty classes (California, Massachusetts, New
15 Jersey, North Carolina, Ohio, and Virginia).

16 In opposition, Plaintiffs argue that the disclaimer is not sufficiently conspicuous and
17 therefore invalid, citing the California Commercial Code.¹¹ The Code permits disclaimers of the
18 implied warranty of merchantability so long as they are “conspicuous,” defined as “so written,
19 displayed, or presented that a reasonable person against whom it is to operate ought to have
20 noticed it.” Cal. Com. Code § 1201(10); *see also* Cal. Com. Code § 2316(2). The statute further
21 provides:

22 Whether a term is “conspicuous” or not is a decision for the court.
23 Conspicuous terms include both of the following:

24 _____
25 ¹⁰ The Court need not address persons who purchased used vehicles from an entity other than a
26 Ford authorized dealership because they are not included in the class definition.

27 ¹¹ The parties do not appear to dispute that the same conspicuousness requirement applies in each
28 of the certified states. *See* Ford’s Mot. at 9, n.9; *see also* Cal. Com. Code § 2316(2); Mass. Gen.
Laws ch. 106, § 2-316; N.J. Stat. Ann. § 12A 2-316; N.C. Gen. Stat. § 25-2-316(2); Ohio Rev.
Code § 1302.29(B); Va. Code Ann. § 8.2-316(2). Thus, the same analysis with respect to
California applies to all six classes.

- (A) A heading in capitals equal to or greater in size than the surrounding text, or in contrasting type, font, or color to the surrounding text of the same or lesser size.
- (B) Language in the body of a record or display in larger type than the surrounding text, or in contrasting type, font, or color to the surrounding text of the same size, or set off from the surrounding text of the same size by symbols or other marks that call attention to the language.

Id. (emphasis added). The conspicuousness requirement serves to “protect the buyer from the situation where the salesman’s ‘pitch,’ advertising brochures, or large print in the contract, giveth, and the disclaimer clause—in fine print—taketh away.” *Dorman v. Int’l Harvester Co.*, 46 Cal.App.3d 11, 18 (Cal. Ct. App. 1975). The court must “review the conspicuousness of the disclaimer in the context of the entire contract, and in light of the sophistication of the parties.” *Medimatch, Inc. v. Lucent Techs., Inc.*, 120 F.Supp.2d 842, 860 (N.D. Cal. 2000) (citation omitted). The court’s analysis “is not simply a matter of measuring the type size or looking at the placement of the disclaimer within the contract,” but rather, “[a] reviewing court must ascertain that a reasonable person in the buyer’s position would not have been surprised to find the warranty disclaimer in the contract.” *Sierra Diesel Injection Serv., Inc. v. Burroughs Corp., Inc.*, 890 F.2d 108 (9th Cir. 1989).

The relevant portions of Ford’s disclaimer appear on pages 5, 6, and 7 of the 2013 Limited Warranty, near the middle of a 3-page section titled, in all-caps and bold text, “Limitations and Disclaimers.” It is re-produced below with a highlight of the sentence that disclaims the implied warranty for vehicles used for business purposes.

3. The New Vehicle Limited Warranty for your 2013-model vehicle

LIMITATIONS AND DISCLAIMERS
All of the warranties in this booklet are subject to the following limitations and disclaimers:
The warranties in this booklet are the only express warranties applicable to your vehicle. Ford does not assume or authorize anyone to assume for it any other obligation or liability in connection with your vehicle or these warranties. No person, including Ford employees or dealers, may modify or waive any part of these warranties.
Ford and its dealers reserve the right to make changes in or additions to vehicles built or sold by them at any time without incurring any obligation to make the same or similar changes or additions to vehicles previously built or sold.
Ford and its dealers also reserve the right to provide post-warranty repairs, conduct recalls, or extend the warranty coverage period for certain vehicles or vehicle populations, at the sole discretion of Ford. The fact that Ford has provided such measures to a particular vehicle or vehicle population in no way obligates Ford to provide similar accommodations to other owners of similar vehicles.
As a condition of these warranties, you are responsible for properly using, maintaining, and caring for your vehicle as outlined in your Owner's Manual. Ford recommends that you maintain copies of all maintenance records and receipts for review by Ford.

Ford and your dealer are not responsible for any time or income that you lose, any inconvenience you might be caused, the loss of your transportation or use of your vehicle, the cost of rental vehicles, fuel, telephone, travel, meals, or lodging, the loss of personal or commercial property, the loss of revenue, or for any other incidental or consequential damages you may have.
Punitive, exemplary, or multiple damages may not be recovered unless applicable law prohibits their disclaimer.
You may not bring any warranty-related claim as a class representative, a private attorney general, a member of a class of claimants or in any other representative capacity.
Ford shall not be liable for any damages caused by delay in delivery or furnishing of any products and/or services.
You may have some implied warranties. For example, you may have an implied warranty of merchantability (that the car or light truck is reasonably fit for the general purpose for which it was sold) or an implied warranty of fitness for a particular purpose (that the car or light truck is suitable for your special purposes), if a special purpose was specifically disclosed to Ford itself not merely to the dealer before your purchase, and Ford itself not just the dealer told you the vehicle would be suitable for that purpose.
These implied warranties are limited, to the extent allowed by law, to the time period covered by the written warranties, or to the applicable time period provided by state law, whichever period is shorter.
These implied warranties do not apply at all if you use your vehicle for business or commercial purposes. In addition, the implied warranty of fitness for a particular purpose does not apply if your vehicle is used for racing, even if the vehicle is equipped for racing.

The warranties contained in this booklet and all questions regarding their enforceability and interpretation are governed by the law of the state in which you purchased your Ford vehicle. Some states do not allow Ford to limit how long an implied warranty lasts or to exclude or limit incidental or consequential damages, so the limitation and exclusions described above may not apply to you.
NOTE: This information about the limitation of implied warranties and the exclusion of incidental and consequential damages under the NEW VEHICLE LIMITED WARRANTY also applies to the EMISSIONS WARRANTIES described on pages 17-31.
Ford participates in the BBB AUTO LINE warranty dispute resolution program. You may contact BBB AUTO LINE by calling 800-955-5100. You are required to submit your warranty dispute to the BBB AUTO LINE before exercising rights or seeking remedies under the Federal Magnuson-Moss Warranty Act, **15 U.S.C. § 2301**, et seq. To the extent permitted by the applicable state "Lemon Law", you are also required to submit your warranty dispute to the BBB AUTO LINE before exercising any rights or seeking remedies under the "Lemon Law". If you choose to seek remedies that are not created by the Magnuson-Moss Warranty Act or the applicable state "Lemon Law", you are not required to first use BBB AUTO LINE to resolve your dispute - although the program is still available to you.
For more information regarding the BBB AUTO LINE program, see page 34 of this booklet.

See Edwards Decl., Ex. 47 at 5-7 (Docket No. 343-4).

Ford relies primarily on two cases to show that its disclaimer is conspicuous, but they are different in important respects because, in those cases, the heading clearly indicated that it involved a disclaimer of warranty, and the portions disclaiming the implied warranty of merchantability were distinguishable from the surrounding text. *See Hammond Enters. Inc. v. ZPS Am. LLC*, 2013 WL 5814505, at *3-4 (N.D. Cal. Oct. 29, 2013) (disclaimer sufficiently conspicuous even though entire term sheet was in small typeface because paragraph 13 contained a bold-face, all-capitals heading stating "Warranty: Disclaimer of Implied Warranties," followed by a subheading in all capitals explaining that all implied warranties were disclaimed); *In re Google Phone Litig.*, 2012 WL 3155571, at *8 (N.D. Cal. Aug. 2, 2012) (disclaimer sufficient where boldfaced heading larger than surrounding text read "Warranties; Disclaimer of Warranties," and text of disclaimer was in all-caps while surrounding text was not, and stated that "GOOGLE EXPRESSLY DISCLAIMS ALL WARRANTIES . . . WHETHER EXPRESS OR IMPLIED . . . INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY").¹²

¹² Ford also cites a number of other cases under the laws of other states in a footnote. *See* Mot. at 9, n.9. Two cases cited by Ford actually found that the disclaimer was *not* conspicuous in circumstances similar to this case. *See Wayne Mem'l Hosp., Inc. v. Elec. Data Sys. Corp.*, 1990 WL 606686, at *5 (E.D.N.C. Apr. 10, 1990) (holding that a disclaimer "in the same type, color, and size as the rest of the Agreement" was not conspicuous, even though it was in a separately numbered paragraph with line spaces and an underlined heading titled "No Other Representation or Warranty," but enforcing it because the commercial customer had actual knowledge of the disclaimer); *Hoffman v. Daimler Trucks N. Am., LLC*, 940 F. Supp. 2d 347, 355 (W.D. Va. 2013) (disclaimer not conspicuous when located in the middle of back-page in all-caps because heading

1 In contrast, here, the heading only states “Limitations and Disclaimers,” and the disclaimer
2 of the implied warranty of merchantability does not appear until the middle of 3 pages that mostly
3 discuss the terms of the express warranty. The sentence including the disclaimer of implied
4 warranty does not appear until the bottom of the second page and is not distinguished from the
5 surrounding text. To be conspicuous, the disclaimer of implied warranty should have been in a
6 larger font size, in all caps, in bold, or set-off in some way from the surrounding text (much like
7 the “NOTE:” that appears on page 3 of this section).

8 Thus, these circumstances are more similar to *Sierra Diesel*, where the Ninth Circuit held
9 that a disclaimer was not conspicuous even though the front of a software agreement stated in
10 large capital bold letters that “THE TERMS AND CONDITIONS, INCLUDING THE
11 WARRANTY AND LIMITATION OF LIABILITY, ON THE REVERSE SIDE ARE PART OF
12 THE AGREEMENT,” but the back-side contained 14 separately numbered and titled sections and
13 the ninth section containing the disclaimer was titled “WARRANTY,” in all caps but not bolded.
14 *Sierra Diesel*, 890 F.2d at 114. On those facts, the Ninth Circuit held that a reasonable person
15 would not have noticed the warranty disclaimers on the back of the contract.

16 Ford has not cited any case approving a disclaimer similar to the one in its limited
17 warranty, and the warranty does not appear to meet the requirements for conspicuousness.
18 Accordingly, the Court **DENIES** Ford’s motion for summary judgment with respect to class

19
20 was in the same font type and size as for other paragraphs and two other paragraphs were also in
capital letters and text was not set off from other paragraphs in any distinctive way).

21 The others are distinguishable for the same reason as *Hoffman* and *In re Google Phone Litig.* See
22 *Bos. Helicopter Charter, Inc. v. Agusta Aviation Corp.*, 767 F. Supp. 363, 376 (D. Mass. 1991)
23 (disclaimer conspicuous where stated in all caps, unlike surrounding text, that “THIS
WARRANTY IS GIVEN EXPRESSLY AND IN PLACE OF ALL OTHER EXPRESS OR
24 PARTICULAR PURPOSE . . .”); *In re Caterpillar, Inc., C13 & C15 Engine Prod. Liab. Litig.*,
25 2015 WL 4591236, at *28 (D.N.J. July 29, 2015) (disclaimer stated in all-caps, unlike surrounding
text, that “THIS WARRANTY IS EXPRESSLY IN LIEU OF ANY OTHER WARRANTIES,
26 EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY . . .”);
Nat’l Mulch & Seed, Inc. v. Rexius Forest By-Prod. Inc., 2007 WL 894833, at*26–27 (S.D. Ohio
27 Mar. 22, 2007) (disclaimer conspicuous where immediately below signature line it stated in all
caps that “THIS AGREEMENT IS SUBJECT TO ALL TERMS AND CONDITIONS ON THE
REVERSE SIDE INCLUDING THOSE WHICH **LIMIT WARRANTIES**,” and on the reverse
28 side stated in all capital letters “THERE ARE NO . . . WARRANTIES, EXPRESS OR IMPLIED .
. . INCLUDING OF MERCHANTABILITY . . .”).

1 members who used their vehicles for business or commercial purposes.¹³

2 B. Tort Claims

3 The Court has also certified a class tort claim under Colorado strict product liability law
4 and under Ohio negligence law. Ford argues that (1) the economic loss doctrine bars Plaintiffs’
5 strict product liability claim under Colorado law; (2) Plaintiffs cannot demonstrate that the
6 vehicles created an unreasonable safety risk under Colorado law; and (3) Plaintiffs cannot show
7 that Ford breached its duty to design a safe vehicle under Ohio negligence law. The Court
8 addresses each argument below.

9 1. Colorado Law and Economic Loss Doctrine

10 Ford argues that the economic loss doctrine bars the Colorado Plaintiffs’ strict liability
11 claim, an argument this Court previously rejected in connection with Ford’s earlier motion to
12 dismiss. *See In re MyFord Touch Consumer Litig.*, 46 F.Supp.3d 936, 962-63 (N.D. Cal. 2014).
13 The parties’ disagreement arises from an apparent conflict between two decisions of the Colorado
14 Supreme Court. In 1975, the Colorado Supreme Court held that in non-commercial, non-business
15 transactions, a consumer may bring a claim under strict products liability in tort to recover
16 damages, even when the defect harms only the product’s own economic value. *See Hiigel v.*
17 *General Motors Corp.*, 54 P.2d 983, 989 (Colo. 1975). Twenty-five years later, in 2000, the
18 Colorado Supreme Court re-visited the question in *Town of Alma v. AZCO Constr. Inc.*, 10 P.3d
19 1256, 1264 (Colo. 2000), engaging in a thorough discussion about the economic loss doctrine and
20 its role in maintaining a boundary between tort and contract law. After a lengthy analysis of the
21

22 ¹³ Some case-law suggests that, insofar as sophisticated business entities are concerned, a
23 disclaimer may be enforceable even if it is inconspicuous. *See, e.g., Wayne*, 1990 WL 606686, at
24 *6 (holding that “if the plaintiffs have actual knowledge of the disclaimer, they are experienced
25 businessmen, and have legal as well as technical consultants, then the purpose of the
26 conspicuousness requirement is met” even if the disclaimer was not conspicuous). Here, the class
27 includes both private individuals and business entities. However, Ford has not specifically argued
28 for summary judgment with respect to business entity class members, and the parties have not
briefed or addressed that issue. In any case, Ford here interprets its disclaimer quite broadly to
apply even to private individuals who use a car for “business or commercial purposes,” including,
in Ford’s view, claiming mileage for tax purposes. Given that Ford’s broad interpretation would
apply equally to both ordinary consumers with incidental business-related uses and sophisticated
business entities, the Court finds the conspicuousness requirement has not been satisfied and
denies summary judgment.

1 history of the economic loss rule nationwide, the court concluded, “[w]e hold that a party suffering
2 only economic loss from the breach of an express or implied contractual duty may not assert a tort
3 claim for such a breach absent an independent duty of care under tort law.” *Id.* Though *Town of*
4 *Alma* did not expressly overrule *Hiigel*, it cited the case in its historiography of the economic loss
5 rule. *Id.* at 1260.

6 This Court previously interpreted *Town of Alma* narrowly, stating that it “did not overrule
7 *Hiigel*,” that it “addressed the issue of whether the [economic loss] rule barred the plaintiff’s claim
8 for negligence, not strict liability,” and emphasized that it applies when no “independent duty”
9 arises under tort law. See *In re MyFord Touch*, 46 F.Supp.3d at 963, 963 n.8. Since then,
10 however, the Colorado Supreme Court has described *Town of Alma* as “adopting the economic
11 loss rule, which provides that a party who suffers only economic harm may recover damages for
12 that harm based only upon a contractual claim and not on a tort theory, such as negligence or strict
13 liability, in order to ‘maintain the boundary between tort law and contract law.’” *Forest City*
14 *Stapleton Inc. v. Rogers*, 393 P.3d 487, 491 (Colo. 2017) (emphasis added). This description
15 appears in a parenthetical describing *Town of Alma* and is not central to *Forest City*’s holding that
16 implied warranty claims may be brought only if privity of contract is shown, except in the
17 consumer goods context. Arguably, it is dicta. However, coming from Colorado’s highest court,
18 the language—contradicting this Court’s earlier interpretation that *Town of Alma* was limited to
19 negligence claims—is a sufficient reason to re-consider the issue despite Plaintiffs’ objections
20 under the law of the case. See *Hurst v. Prudential Securities, Inc.*, 923 F.Supp. 150, 153 (N.D.
21 Cal. 1995) (court has discretion to reopen a previously resolved question when, inter alia, “an
22 intervening change in the law has occurred” or “other changed circumstances exist”).

23 With the benefit of the Colorado Supreme Court’s clarification in *Forest City*, the Court
24 concludes that *Town of Alma* is not limited to negligence claims. Rather, in *Town of Alma*, the
25 Supreme Court adopted the economic loss rule in relation to *all* tort claims. See *Town of Alma*, 10
26 P.3d at 1264 (“We hold that a party suffering only economic loss from the breach of an express or
27 implied contractual duty may not assert a tort claim for such a breach absent an independent duty
28 of care under tort law.”). Notwithstanding the fact that *Town of Alma* does not expressly overrule

1 *Hiigel*, it extends the economic loss rule to tort claims in strict liability, as the Colorado Supreme
2 Court later stated in *Forest City*.

3 Plaintiffs urge the Court not to read *Forest City*'s parenthetical reference to have
4 overturned "decades" of law under *Hiigel*, but it is *Town of Alma*—not the parenthetical remark in
5 *Forest City*—that appears to have changed the law. *Hiigel* did not stand without ambiguity for
6 decades. In *Town of Alma*, the Colorado Supreme Court began by discussing the origins of the
7 economic loss rule, including its adoption by the California Supreme Court in 1965. *See Town of*
8 *Alma*, 10 P.3d at 1259-61. The court then explained that, in *Hiigel*, "[a]lthough not reaching as far
9 as the [California Supreme Court], we endorsed the principles underlying the economic loss rule
10 when we declined to extend . . . [the] strict liability doctrine to allow it to be used as a vehicle to
11 recover commercial or business losses." *Id.* at 1261. Consumers could still pursue strict product
12 liability claims premised solely on economic loss. The court then discussed the gradual adoption
13 of the broader economic loss rule by courts around the country and by Colorado's appellate courts.
14 *Id.* at 1261-62. After that overview and a discussion of the rationale underlying the economic loss
15 rule, *id.* at 1262-63, the court stated unequivocally, "we now expressly adopt the economic loss
16 rule" and "[w]e hold that a party suffering only economic loss from the breach of an express or
17 implied contractual duty may not assert a tort claim for such a breach absent an independent duty
18 of care under tort law." *Id.* at 1264. As this Court noted in its earlier ruling, *see* 46 F.Supp.3d at
19 963, *Town of Alma* had to be construed narrowly to save *Hiigel*.¹⁴ That interpretation is no longer
20 viable after *Forest City*.

21 Thus, the economic loss rule applies to strict product liability claims in Colorado.
22 Plaintiffs' claim may only proceed if premised on breach of an "independent duty of care under
23

24 ¹⁴ Plaintiffs cite two cases to argue that *Hiigel* is good law, but they are distinguishable because
25 they both involved a product defect which *also* caused damage to *other* property, and therefore
26 could have proceeded even if the economic loss rule applied. *See U.S. Aviation Underwriters, Inc.*
27 *v. Pilatus Bus. Aircraft, Ltd.*, 358 F.Supp.2d 1021, 1025-27 (D. Colo. 2005) (holding that loss of
28 aircraft in crash due to defective engine was "more than damage to the warrantied 'product' or
products [itself]"); *Loughridge v. Goodyear Tire and Rubber Co.*, 192 F.Supp.2d 1175, 1184 (D.
Colo. 2002) (though holding that strict products liability law imposes an independent duty from
contract law and relying on *Hiigel*, holding that even if that were not the case, "Plaintiffs alleged
physical harm to property other than the product itself").

1 tort law.” *Town of Alma*, 10 P.3d at 1264. The Tenth Circuit has recently explained:

2 Under Colorado law, for a duty to be ‘independent’ of a contract,
3 and thus actionable in tort notwithstanding the economic-loss rule,
4 two conditions must be met. First, the duty must arise from a source
5 other than the relevant contract. Second, the duty *must not be a duty*
6 *also imposed by the contract*. That is, even if the duty would be
7 imposed in the absence of a contract, it is not independent of a
8 contract that memorializes it.

9 *Haynes Trane Serv. Agency, Inc. v. Am. Standard, Inc.*, 573 F.3d 947, 962 (10th Cir. 2009)
10 (citations, quotations, and alterations omitted) (emphasis added). Thus, it is not sufficient simply
11 that strict products liability creates a duty independent of the contract if the contract memorializes
12 or imposes the same duty. *See, e.g., In re Porsche Cars N. Am., Inc.*, 880 F.Supp.2d 801, 837
13 (S.D. Ohio 2012) (interpreting *Town of Alma* as setting forth a standard inconsistent with *Hiigel*
14 and holding that “[w]hen a product sustains damage that would have been covered under its
15 warranty, but the damage occurs outside of the warranty period, the damages could have been
16 addressed in contract and are exactly the kind of damages that the economic loss rule developed to
17 address”).

18 Here, to the extent that Plaintiffs allege the defective design gave rise to an unreasonable
19 safety hazard (rather than non-safety defective performance), there is some ambiguity whether
20 such claims arise from an independent tort duty and therefore are not precluded by the economic
21 loss rule. *See Scott v. Honeywell Int’l Inc.*, 2015 U.S. Dist. LEXIS 42194, at *34-36 (D. Colo.
22 Mar. 30, 2015) (holding that plaintiffs’ strict liability claims had to be dismissed under Colorado’s
23 economic loss rule because, inter alia, plaintiff failed to allege his defective “humidifiers created
24 any unreasonable risk of injury”). Most courts still apply the economic loss rule in such
25 circumstances, however, and that appears to be the direction Colorado has taken after *Town of*
26 *Alma* and *Forest City*.¹⁵ In any case, even if strict liability gives rise to an independent duty

25 ¹⁵ *See also* Restatement (Third) of Torts: Prod. Liab. § 21 (1998) (“A somewhat more difficult
26 question is presented when the defect in the product renders it unreasonably dangerous, but the
27 product does not cause harm to persons or property. In these situations the danger either (1) never
28 eventuates in harm because the product defect is discovered before it causes harm, or (2)
eventuates in harm to the product itself but not in harm to persons or other property. A plausible
argument can be made that products that are dangerous, rather than merely ineffectual, should be
governed by the rules governing products liability law. However, a majority of courts have
concluded that the remedies provided under the Uniform Commercial Code—repair and

1 protecting against safety hazards in design, given the terms of Ford’s express warranty, that duty
2 also arises under Ford’s broader express warranty protections against *any* design defects. Under
3 *Haynes*, Ford’s express warranty effectively memorializes the strict liability duty and therefore the
4 economic loss rule precludes the claim for breach of that duty. The Court **GRANTS** Ford’s
5 motion for summary judgment on the Colorado strict product liability claim.¹⁶

6 2. Ohio Negligence Claims

7 Plaintiffs bring a class claim for negligence based on Ohio law. TAC ¶ 640 (alleging Ford
8 breached its “duty to design and manufacture [vehicles that] worked reasonably well and
9 presented no significant risks to the safe operation of the vehicles”). Under Ohio law, “to establish
10 actionable negligence, one seeking recovery must show the existence of a duty, the breach of the
11 duty, and injury resulting proximately therefrom.” *Strother v. Hutchinson*, 423 N.E.2d 467, 469-
12 70 (Ohio 1981). Moreover, manufacturers have a duty “to design a product that is reasonably safe
13 for its intended use, and for other uses which are foreseeably probable.” *Jones v. White Motor*
14 *Corp.*, 401 N.E.2d 223, 229 (Ohio Ct. App. 1978) (quotation omitted). No cases have been cited
15 to support the notion that Ford had a duty to design vehicles that “worked reasonably well,” TAC
16 ¶ 640, so it appears this claim may proceed only to the extent Plaintiffs present evidence of a
17 breach of duty to design a vehicle that is reasonably safe.

18 Ford argues Plaintiffs have failed to present evidence of an unreasonable safety risk,
19 especially in light of the fact that Ohio Plaintiff Miskell never collided his vehicle despite driving
20 it extensively and continuously for several years. Thus, according to Ford, Plaintiffs’ sole “harm”
21 is allegedly the potential risk of future accidents, which is not actionable in and of itself. *See*
22 *Hoffer v. Cooper Wiring Devices, Inc.*, 2007 WL 1725317 (N.D. Ohio June 13, 2007). Plaintiffs
23 respond that they are not seeking damages caused by car accidents—present or future—but rather
24

25
26 replacement costs and, in appropriate circumstances, consequential economic loss—are sufficient.
Thus, the rules of this Restatement do not apply in such situations.”).

27 ¹⁶ Because the Court grants summary judgment on these grounds, it need not reach Ford’s
28 alternative argument that Plaintiffs have not introduced evidence of an unreasonable risk of harm
under Colorado law.

1 only for the decreased value of their vehicles consistent with the Court’s certification order.¹⁷ As
2 *Hoffer*—the case cited by Ford—itself recognizes, plaintiffs may recover for economic loss
3 “connected to alleged damage to or decreased value of a defective product.” 2007 WL 1725317 at
4 *8.

5 Thus, the Ohio Plaintiffs’ negligence claim appears to rise or fall with whether Plaintiffs
6 have shown that Ford breached its duty to design a reasonably safe product, and whether they can
7 show a loss of value of the vehicles proximately caused by that breach of duty. As explained
8 earlier, Plaintiffs have presented sufficient evidence for a jury to conclude that the defect presents
9 an unreasonable safety risk. Further, as discussed below, they present evidence that the MFT lost
10 value due to the various problems associated with it.

11 However, in their briefing Plaintiffs have not squarely addressed *causation, i.e.*, whether
12 the lost value can be attributed to the breach of the duty to design a *safe* product rather than a *good*
13 product. If the economic harm was simply the result of MFT not living up to consumer
14 expectations (rather than the result of its safety defects), then their economic loss would not be
15 proximately caused by breach of the duty underpinning their negligence claim. Nevertheless,
16 though Plaintiffs do not cite to it in this portion of their briefing, as explained in the section below
17 regarding the experts, it appears that one of Mr. Boedeker’s studies predicts the loss of economic
18 value when the defect is linked to safety concerns (see Result 4 in Mr. Boedeker’s study, *infra*).
19 This model may constitute a basis for calculating proximate damages with respect to the Ohio
20 negligence claims, for the reasons explained below.

21 The Court thus **DENIES** Ford’s motion for summary judgment on the Ohio negligence
22 claim.

23 C. Express Warranty Claims and Repair Attempts

24 Ford argues that the California and Washington class claims for breach of express warranty
25 based on failure of its essential purpose must fail because Plaintiffs cannot demonstrate that class
26

27 ¹⁷ See Docket No. 279 at 27 (“Where Plaintiffs seek actual or economic damages, these claims
28 will be certified to the extent Plaintiffs seek to recover lost value” but not “to the extent they seek
incidental or consequential damages”).

1 members attempted at least two repair attempts. “A manufacturer’s liability for breach of an
2 express warranty derives from, and is measured by, the terms of that warranty.” *Cipollone v.*
3 *Liggett Grp., Inc.*, 505 U.S. 504, 525 (1992). A repair or replace remedy “fails of its essential
4 purpose when a warrantor fails to successfully repair defects within a reasonable time.” *Oddo v.*
5 *Arcoaire Air Conditioning and Heating*, Case No. 15-cv-01985-CAS(Ex), 2017 WL 372975, at
6 *12 (Jan. 24, 2017). “[B]efore the exclusive repair and replace remedy is considered to have
7 failed of its essential purpose, the seller *must be given an opportunity* to repair and replace the
8 product.” *In re MyFord Touch Consumer Litig.*, 46 F.Supp.3d 936, 970 (N.D. Cal. 2014)
9 (quotation and citation omitted, emphasis in original). Ford makes a similar argument with
10 respect to Plaintiffs Kirchoff and Mitchell’s individual breach of express warranty claims. The
11 Court addresses each separately.

12 1. Class Claims

13 In its class certification order, the Court explained that “[t]o recover for breach of express
14 warranty, a plaintiff must have brought his or her vehicle in for repair twice, and Ford must have
15 been unable to repair it.” *See* Docket No. 279 at 42. The Court reasoned that such information
16 should be reflected in Ford’s records, and,

17 [i]f Ford has no record that a particular consumer took his or [her]
18 vehicle in for repair twice, then the fact finder can presume that the
19 consumer did not do so. A consumer may rebut that presumption by
20 producing proof that he or she took the vehicle in for two repairs,
21 from his or her own records. As the consumer has the burden of
proof, if he/she is not able to produce such proof, then he or she will
not recover. The inquiry will turn on records and is relatively
simple. It does not defeat predominance.

22 *Id.*

23 Ford’s expert, Dr. Taylor, analyzed Ford’s business records with respect to Subject
24 Vehicles in twelve states (before the Court certified only two states) and concluded that 77.1% of
25 proposed class members did not obtain any MFT repairs, and 17.3% obtained only one. *See*
26 Edwards Decl., Ex. 44 at 31, Fig. 14. Thus, 94.4% of the then-proposed class members did not
27 meet the two-repair threshold, and only 1.5% obtained three or more MFT warranty repairs. *Id.*
28 Neither party has introduced evidence focusing on repair attempts by class members in the

1 certified states, California and Washington.

2 Plaintiffs raise two main arguments in rebuttal.

3 First, Plaintiffs argue that Ford’s “repair and replace remedy” under the warranty does not
4 apply to design defects, so they were not required to attempt repairs to demonstrate a breach.¹⁸
5 Ford’s warranty states that “if” a vehicle “was taken to a Ford dealership for a warranted repair
6 during the warranty period,” then Ford will “without charge, repair, replace, or adjust all parts on
7 your vehicle that malfunction or fail during normal use . . . *due to a manufacturing defect* in
8 factory-supplied materials or factory workmanship.” See Edwards Decl., Ex. 47 at 8-9 (emphasis
9 added). The next paragraph, however, states that “[d]efects may be unintentionally introduced . . .
10 during the *design* and manufacturing processes,” and “[f]or this reason, Ford provides the
11 [warranty] in order to remedy *any such defects* that result in vehicle part malfunction or failure
12 during the warranty period.” *Id.* at 9 (emphasis added). As Plaintiffs note, the Ninth Circuit has
13 construed this warranty provision to cover both design and manufacturing defects, reasoning that
14 the ambiguity created by the second clause requires construction of the first clause against the
15 drafter, Ford. See *Daniel v. Ford Motor Co.*, 806 F.3d 1217, 1225 (9th Cir. 2015). Contrary to
16 Plaintiffs’ argument, however, that necessarily means that the requirement to present the vehicle
17 for repair *also* applies to design defects. Thus, class members must comply with the repair
18 requirement to allege a breach.

19 Second, Plaintiffs point back to the Court’s order on class certification to state that Ford
20 has records which could show the required repairs were attempted. This argument makes little
21 sense. Plaintiffs conflate their burden at class certification (demonstrating the existence of a
22 common issue not predominated by individualized inquiries) with their burden at summary
23 judgment (demonstrating that evidence exists to permit a jury to conclude that class members
24 exhausted their repair attempts). Plaintiffs have not presented any evidence that permits a class-
25 wide inference that repair attempts were exhausted such that Ford was given an opportunity to
26 resolve the breach with respect to each class member.

27 _____
28 ¹⁸ The Court did not reach this question at class certification because “[t]he parties did not brief whether the warranty applies to design defects.” Docket No. 279 at 42, n.26.

1 Nevertheless, classwide summary judgment in Ford’s favor is not appropriate here. Dr.
2 Taylor’s analysis, as Ford concedes, does not address whether the California and Washington class
3 members had the same rates of repair attempts as the twelve states analyzed by Dr. Taylor in the
4 aggregate. Moreover, even Dr. Taylor’s analysis confirms that at least 5% of consumers in the
5 twelve states analyzed *did* attempt at least two repairs. There is no basis to enter judgment against
6 those class members. Further, Ford’s lack of records with respect to the remaining class members
7 is not dispositive; rather, under the burden-shifting framework established by the Court’s class
8 certification order, they are still entitled to demonstrate on an individual basis whether they
9 pursued repairs. The Court therefore **DENIES** Ford’s motion for summary judgment (on a
10 classwide basis) on this basis.¹⁹

11 2. Plaintiff Kirchoff (Washington)

12 Ford argues it is entitled to summary judgment against Plaintiff Kirchoff because he sought
13 only one repair for the MFT system and then three repairs for an issue with his rearview camera,
14 which was “solved.” Ford’s summary mischaracterizes the record.

15 Kirchoff presented his vehicle for service on July 3, 2013 regarding a Bluetooth
16 connectivity issue in connection with incoming and outgoing calls, for which he was advised to
17 pull the fuse to reset SYNC. He followed these steps a few times when the problem arose and he
18 said the problem stopped recurring after a summer 2013 software update. *See* Edwards Decl., Ex.
19 36 at 162:16-164:23. In November 2014, Kirchoff began experiencing problems with his backup
20 camera, so he presented it to a dealer three times between November and December 2014. *See*
21 Edwards Decl., Ex. 36 at 186:24-192:24. The measures that the dealer attempted (including
22 cleaning connectors and replacing the camera) solved a “problem concerning wavy lines on the
23 screen or picture, a fuzzy, a staticy picture.” *Id.* at 191:18-23. However, the issue of ‘the MyFord
24

25 ¹⁹ Though summary judgment is inappropriate, the question arises whether common issues still
26 predominate over individualized inquiries with respect to the express warranty claims. The Court
27 certified these classes on the presumption that Ford’s records would provide a starting point for
28 demonstrating the attempted repairs, but it now appears that those records can substantiate the
claims of only a very small percentage of the potential class, with the overwhelming majority of
class members being required to demonstrate their exhaustion attempt through some sort of
individualized proceeding. However, that question has not been brought before the Court.

1 Touch indicating it can't connect with a camera went back to the incident that was the frequency
2 prior to when it started to get much worse." *Id.* In other words, the November 2014 repairs
3 mitigated the issues that had suddenly become exacerbated, but did not eliminate all the issues
4 Kirchoff had been experiencing in connection with the MFT system. *See id.* at 192:16-18
5 (testifying that "[c]ertain aspects of those problems still exist and are part of the total body of
6 issues which have prompted me to get involved in this").

7 Ford argues that these multiple repair attempts are insufficient because they related to
8 "separate" issues, and that Plaintiffs, in place of "lumping" service requests, have to instead show
9 that they sought two repair attempts with respect to each discrete issue to show a breach of
10 warranty. In connection with Ford's first motion to dismiss, the Court observed that "all of the
11 problems here relate to the MFT system specifically" and held:

12 Plaintiffs have alleged there is an underlying defect within the MFT
13 system (software and/or hardware). Even if that underlying defect
14 manifests itself in different ways within the MFT system, that does
15 not necessarily detract from the allegation that there is still an
16 underlying systemic defect. That assertion is supported by factual
17 allegations in the complaint, in particular, the allegations related to
18 Ford's issuance of the TSBs and software updates. In other words,
19 if Ford was trying to fix the problems with MFT by issuing TSBs
20 and software updates that implemented systemic types of fixes, that
21 lends support to Plaintiffs' theory that the varying problems were
22 manifestations of an underlying systemic problem and hence
23 'grouping' is permissible, at least for pleading purposes.

19 *In re MyFord Touch Litig.*, 46 F.Supp.3d 936, 972 (N.D. Cal. 2014). Thus, to the extent a repair
20 request arises out of that systemic, underlying defect, then it appears that grouping of service
21 requests for purposes of fulfilling the terms of the express warranty—even with respect to distinct
22 symptoms—is permissible.

23 Ford does not argue that Plaintiffs lack evidence of an underlying systemic defect in MFT.
24 For the purposes of this motion, then, the existence of such a defect is not disputed. Grouping of
25 Plaintiff Kirchoff's repair requests is therefore proper. The Court **DENIES** Ford's motion
26 because Kirchoff unsuccessfully sought warranty service related to MFT on at least two occasions.

27 3. Plaintiff Mitchell (Iowa)

28 Ford also argues that Plaintiff Mitchell failed to attempt at least two repairs. In November

1 2010, Mitchell presented his car for service due to a problem with his USB connector, but it turned
2 out that the issue was with his cable and not MFT. *Id.* at 104-110. Replacing the cable fixed the
3 problem, but Mitchell testified that “[t]here was still other issues[.]” *Id.* at 110:7-8. Ford does not
4 appear to have closed out the issue by asking Mitchell what those “other issues” were. In any
5 case, the repair request related to a dysfunctional USB cable, not the MFT defect, so it does not
6 count for purposes of this breach of express warranty claim.

7 In September 2011, Mitchell presented his vehicle for service again due to issues with the
8 backup camera image freezing. *See* Edwards Decl., Ex. 51 at 128-129. Ford installed a software
9 update. Mitchell could not recall whether it ever happened again, but noted that it “hasn’t
10 happened for some time, so it very well could have been this [software] update that cleared that
11 up.” *Id.* at 129:24-25. He could not remember any specific additional issues he raised in
12 September 2011, but he testified that he “repeatedly complained about [MFT].” *Id.* at 130:11-13.
13 Ford did not close out the issue to determine what or when those repeated complaints were. Thus,
14 Ford has not established that no question of material fact exists as to how many times Mitchell
15 requested a repair and whether it addressed the issues with the MFT system. Ford’s motion is
16 **DENIED.**

17 D. UCL Class Claims

18 The parties dispute what claims under California’s Unfair Competition Law have been
19 certified for class treatment. Ford contends that none have been certified because Plaintiffs sought
20 only certification of fraud claims under the UCL, which the Court declined to certify. *See* Docket
21 No. 279 at 48 (stating “The Court will not certify the class as to Plaintiffs’ claims for violation of
22 California’s Unfair Competition Law to the extent they are predicated upon fraud[.]”); *see also*
23 Docket No. 202 (Mot. for Class Certification) at 25, 29-30 (describing the UCL claim as a
24 “California consumer fraud claim” and arguing only that the elements of fraudulent conduct
25 satisfy commonality). Plaintiffs respond that the Notice of Motion was broader, in that it stated
26 broadly that the “California Class seeks certification of claims for: . . . (b) violation of the Unfair
27 Competition Law,” Docket No. 202 at 1. They contend the Court therefore understood that
28 Plaintiffs may bring class claims under the unfair and unlawful prongs of the UCL as well, which

1 Plaintiffs pled in their complaint. *See* TAC ¶¶ 300-304.

2 Though there is some ambiguity in Plaintiffs’ briefing of the motion for class certification,
3 both parties ignore that the Court’s class certification order explicitly states that “[t]he Court will
4 certify the class as to claims for violation of . . . California’s Unfair Competition Law to the extent
5 they are predicated on bases other than fraud.” Docket No. 279 at 47-48. If fraud were the only
6 basis on which Plaintiffs sought class certification for the California Class under the UCL, then
7 there would have been no need for this sentence. Moreover, the TAC is clear that Plaintiffs have
8 at least also pled a claim under the UCL’s “unlawful” prong. *See* TAC ¶ 301(ii) (Ford marketed
9 the vehicles as possessing functional and defect-free in-car communications and entertainment
10 units); *id.* ¶ 301(iii) (Ford refused or otherwise failed to repair and/or replace defective MFT
11 systems); *id.* ¶¶ 301(iv) (Ford violated the Magnuson-Moss Warranty Act). The breach of
12 warranty claims have therefore been pled under the UCL and, in light of the Court’s order, are
13 certified for class treatment.

14 Thus, whether Ford should be granted summary judgment on the class UCL claim depends
15 on the outcome of Plaintiffs’ express and implied warranty claims. Because the Court denied
16 Ford’s motion to grant summary judgment on the breach of warranty claims, the Court will also
17 **DENY** Ford’s motion with respect to the UCL.

18 E. Plaintiff Creed’s MCPA § 9 Claim

19 Ford argues that Plaintiff Creed’s claim under the Massachusetts Consumer Protection Act
20 (MCPA), Mass. Gen. Laws ch. 93A, § 9, fails because he did not use his vehicle for purely
21 business purposes and the pre-litigation demand letter he sent failed to meet the statutory
22 requirements. Neither of Ford’s arguments is persuasive, as explained below.

23 1. Purely Business Purposes

24 Under Massachusetts law, “[u]nfair methods of competition and unfair or deceptive acts or
25 practices in the conduct of any trade or commerce are . . . declared unlawful.” Mass. Gen. Laws
26 ch. 93A, § 2(a). A person “who engages in the conduct of any trade or commerce and who suffers
27 any loss of money or property” due to violations of § 2 “by another person who engages in any
28 trade or commerce” may bring a cause of action under § 11 of the MCPA. *See id.* § 11. In

1 contrast, any other person must bring a cause of action under § 9 of the MCPA. *See id.* § 9. Thus,
2 the MCPA “distinguishes between ‘consumer’ and ‘business’ claims, the former actionable under
3 § 9, the latter actionable under § 11.” *Fruzzo v. Landenberger*, 61 Mass. App. Ct. 814, 821 (2004).
4 “The dividing line between a consumer claim and a business claim . . . is not always clear.” *Id.*
5 The question “[w]hether a particular plaintiff is acting in a business context . . . is a question of
6 fact” reserved for the trier of fact. *Fruzzo*, 61 Mass.App.Ct. at 822; *see also Brown v. Gerstein*,
7 460 N.E.2d 1043, 1052 (Mass. App. Ct. 1984).

8 Here, Plaintiff Creed brings a claim under § 9, but Ford argues that he may not do so
9 because he did not use his vehicle for “purely” personal reasons. *See Fruzzo*, 61 Mass.App.Ct. at
10 821 (explaining that “the choice [between Section 9 and Section 11 claims] appears to turn on
11 whether a given party has undertaken the transaction in question for business reasons, or has
12 engaged in it for purely personal reasons (such as the purchase of an item for personal use)”). In
13 using the phrase “purely personal reasons,” however, the Appeals Court of Massachusetts went
14 beyond Massachusetts Supreme Court precedent stating that Section 9 merely “require[s] the
15 plaintiff to prove that she purchased goods or services *primarily* for personal, family, or household
16 purposes.” *Linthicum v. Archambault*, 398 N.E.2d 482, 487 (Mass. 1979) (emphasis added),
17 *abrogated on other grounds by Knapp Shoes, Inc. v. Sylvania Sohe Mfg. Corp.*, 418 Mass. 737
18 (1994); *see also Slaney v. Westwood Auto, Inc.*, 366 Mass. 688, 701 (1975) (for a section 9
19 remedy, “the included transaction must have been undertaken *primarily* for personal, family, or
20 household purposes” (emphasis added)). The *Fruzzo* court did not explain the departure, discuss
21 the potential conflict, or cite any case-law as direct support for its “purely personal reasons”
22 standard. In determining state law, this Court is obligated to determine what the highest state
23 court has held or would hold. *See Dimidowich v. Bell & Howell*, 803 F.2d 1473, 1482 (9th Cir.
24 1986) (federal courts must “follow a state supreme court’s interpretation of its own statute in the
25 absence of extraordinary circumstances,” and when the highest court has not ruled on an issue,
26 “the task of the federal courts is to predict how the state high court would resolve it”), *modified at*
27 810 F.2d 1517 (9th Cir. 1987). Where there appears to be a conflict, this Court must follow the
28 Massachusetts Supreme Court.

1 Moreover, the *Fruzzo* court’s statement was equivocal. *See* 61 Mass. App. Ct. at 821 (“the
2 choice *appears* to turn on whether . . . [the transaction was undertaken] for purely personal
3 reasons” (emphasis added)). The use of the term “appears” is significant because this sentence
4 follows a string citation of cases presumably forming the backdrop for the court’s observation.
5 However, none of those cases set forth or follow a “purely personal reasons” standard; to the
6 contrary, two in fact use the “primarily personal reasons” standard.²⁰

7 In light of the *Fruzzo* court’s equivocal statement, the lack of support in the case-law for a
8 “purely personal reasons” standard,²¹ and the unexplained deviation from Massachusetts Supreme
9

10 ²⁰ *See Lantner v. Carson*, 374 Mass. 606, 609 (1978) (stating that Section 9 “provides a private
11 right of action to any person who purchases . . . property . . . primarily for personal, family or
12 household purposes”); *Linthicum, supra*, 398 N.E.2d at 487 (same); *Begelfer v. Najarian*, 381
13 Mass. 177 (holding that defendant private individuals participating in a real estate transaction were
14 not “engaged in the conduct of any trade or commerce” and therefore could not be liable, and
15 stating that one relevant factor is “whether the transaction is motivated by business or personal
16 reasons” but not stating how that analysis is conducted); *Linkage Corp. v. Trustees of Boston*
17 *Univ.*, 425 Mass. 1, 22-27 (1997) (following *Begelfer* to conclude defendant university was acting
18 in a business context and therefore could be liable under the MCPA); *Lynn v. Nashawaty*, 12
19 Mass.App.Ct. 310, 312-314 (1981) (following *Begelfer* to conclude trial court’s conclusion that
20 defendant was acting in business context was not clearly erroneous); *Brown v. Gerstein*, 17
21 Mass.App.Ct. 558, 569-571 (1984) (holding that “[t]he evidence warranted a finding that the
22 plaintiffs as lessors of commercial property and perhaps as commercial clients of [defendant])
23 were acting in a business context” and thus could bring § 11 claim).

24 ²¹ Ford cited one federal district court applying the *Fruzzo* standard, but the case did not discuss
25 this unexplained deviation and potential conflict with the state supreme court’s precedent. *In re*
26 *Asacol Antitrust Litig.*, 2016 WL 4083333, at *13 (D. Mass. July 20, 2016) (plaintiff health funds
27 suing pharmaceutical companies for reverse settlement “cannot bring a claim under § 9 as they
28 cannot show that they undertook the relevant transactions ‘for purely personal reasons (such as the
purchase of an item for personal use)’” (quotation omitted)). Moreover, the *Asacol* court did not
need to address that question because the plaintiffs were plainly engaging in business activity and
could not have shown they transacted “primarily” for personal reasons. In any case, at least one
federal court has permitted the question whether the plaintiff was acting in a business context to go
to a jury where the evidence could have supported either conclusion, thus implicitly rejecting a
“purely personal reasons” standard. *See South Shore Hellenic Church, Inc. v. Artech Church*
Interiors, Inc., 183 F.Supp.3d 197, 217 (D. Mass. 2016) (denying summary judgment because
reasonable fact finder could find *either* that plaintiff non-profit church was not acting in a business
context when it contracted repair work but rather “in furtherance of its core mission to provide
religious services,” *or* that the work “was undertaken in order to increase revenue”). The other
two cases cited by Ford are not illuminating because they do not analyze the applicable standard
and involve obvious business transactions. *Cont’l Ins. Co. v. Bahnan*, 216 F.3d 150, 156 (1st Cir.
2000) (property owner who rented the property and lived elsewhere was engaged in “trade or
commerce” and therefore could not bring claim under section 9); *Kay Constr. Co. v. Control Point*
Assocs., 15 Mass. L. Rptr. 203 (Mass. Super. Ct. 2002) (holding that a plaintiff business entity was
“barred from bringing a consumer protection claim against an insurance company under § 9, when
the claim asserted is based on conduct covered in § 11”).

1 Court precedent, the Court concludes it must follow the Massachusetts Supreme Court’s clear
2 examination of the “primarily personal reasons” standard.

3 Ford’s motion for summary judgment fails. Ford’s argument is premised exclusively on
4 Plaintiff Creed’s testimony about how he subsequently used the vehicle. Creed testified that he
5 used his vehicle for both “personal” and “business” reasons, and by “business,” he meant his use
6 of the car during work hours to attend meetings, visit clients, and travel between job sites. *See*
7 Edwards Decl., Ex. 34 at 48:2-9, 52:16-54:3; Reply, Ex. A at 24:22. He estimated that 30-40% of
8 his total mileage was for business purposes, as he “meticulously” tracked his mileage in a log in
9 the car for tax purposes. *Id.* Moreover, Ford did not present any evidence that spoke directly to
10 Creed’s motivations at the time he purchased the vehicle. Though his subsequent use may be
11 probative of his original motivations, none of it precludes a reasonable jury finding that he
12 purchased the vehicle either for “purely” or “primarily” (or indeed on this record—“purely”)
13 personal reasons.

14 Accordingly, the Court **DENIES** Ford’s motion for summary judgment on this basis.

15 2. Sufficiency of Demand Letter

16 Massachusetts law requires a demand letter to be sent at least thirty days prior to filing suit
17 which “identif[ies] the claimant and reasonably describ[es] the unfair or deceptive act or practice
18 relied upon and the injury suffered.” Mass. Gen. Laws ch. 93A, § 9(3). The purpose of the
19 written demand requirement is “(1) to encourage negotiation and settlement by notifying
20 prospective defendants of claims arising from allegedly unlawful conduct and (2) to operate as a
21 control on the amount of damages which the complainant can ultimately recover.” *Spring v.*
22 *Geriatric Auth. of Holyoke*, 475 N.E.2d 727, 736 (Mass. 1985) (quotation omitted). The injury
23 suffered and relief demanded must “provide[] the prospective defendant with an opportunity to
24 review the facts and the law involved to see if the requested relief should be granted or denied and
25 enables him to make a reasonable tender of settlement.” *Id.* (quotation omitted). This is a context-
26 specific inquiry. “[A] demand letter need not contain a dollar amount of damages, so long as it
27 describes the injuries in ‘sufficient detail to permit [the defendant] reasonably to ascertain its
28 exposure.’” *Richards v. Arteva Specialties S.A.R.L.*, 66 Mass.App.Ct. 726, 734 (2006) (quotation

1 and citation omitted, alteration in original). Moreover, “in judging the sufficiency of . . . a
2 precertification demand letter [in the class action context], we look solely to the description of the
3 individual claimant’s own injury[.]” *Id.* at 733.

4 Ford argues that Plaintiff Creed’s pre-suit demand letter was insufficient because it “did
5 not describe any concrete injury he allegedly suffered,” “says nothing about the number of times
6 his MFT system required repair, what repairs he requested or received, the amount of any out-of-
7 pocket repair expenses incurred, or any other injury.” Mot. at 17. Creed’s 4-page demand letter,
8 made on behalf of himself and those similarly situated, states that Ford failed to disclose that the
9 MFT systems were defective, enumerates a number of specific problems with the MFT systems,
10 states that “Ford has benefited from collecting funds from its customers who have paid for the
11 Sync System option, as well as, potentially unnecessary vehicle service procedures,” and demands
12 (1) a voluntary recall, repair, and replacement of the subject vehicles; (2) notice of the defect to
13 the class; (3) “actual damages representing, with interest, the ascertainable loss of moneys and/or
14 property and/or value suffered or to be suffered as a result of Ford’s omissions”; (4) treble
15 damages; (5) “damages suffered or to be suffered as a result of Ford’s breach of contract, and
16 restitution for the unjust enrichment conferred upon Ford;” (6) attorneys’ fees; and (7) additional
17 relief as appropriate. *See* Edwards Decl., Ex. 53.

18 While no specific dollar amount is stated, the type of injury asserted is clear, as the letter
19 claims the defective vehicles require repair (*i.e.*, a voluntary recall, repair, or replacement),
20 damages related to the loss of vehicle value, and restitution. Moreover, the letter states that Creed
21 “purchased a 2011 model year Ford Explorer equipped with the SYNC and MyFord Touch
22 infotainment system.” *Id.* at 1. This information is sufficient for Ford to ascertain its exposure at
23 least vis-à-vis Plaintiff Creed, as the potential value of his individual claim would be derived
24 principally from the cost of repairing or replacing his 2011 Ford Explorer. *See Richards*, 66
25 Mass.App.Ct. at 735 (holding that demand letter sent by prospective named plaintiff in antitrust
26 class action was sufficient where it stated that the injury was “higher out-of-pocket costs to
27 purchase [the] products” and therefore provided “sufficient detail to permit the defendants
28 reasonably (even if only roughly) to ascertain their exposure, at least to [plaintiff] as an individual

1 and occasional purchaser of [the products in question]”). That was enough for Ford to determine a
2 ballpark figure of what was at stake and to make a settlement offer to Creed, satisfying the
3 purposes of the requirement for a prelitigation demand letter under Massachusetts law.

4 Thus, the Court **DENIES** Ford’s motion for summary judgment on Plaintiff Creed’s
5 MCPA § 9 claim.²²

6 F. Expert Opinions re: Classwide Damages

7 Ford challenges the expert opinions of Dr. Arnold and Mr. Boedeker under both *Daubert*
8 and *Comcast*. Under *Daubert*, Ford argues that Dr. Arnold presents no evidentiary basis for his
9 assumption that MFT had no value and therefore consumers’ damages were the full cost they paid
10 for the system. Ford also argues that Mr. Boedeker’s prediction of the diminution in value due to
11 the defect is unreliable because Mr. Boedeker predicts only changes in the demand curve without
12 considering any changes in the supply curve. Under *Comcast*, Ford argues that Mr. Boedeker’s
13 model is based on a fraud theory of liability rather than liability for breach of implied and express
14 warranty, and therefore incapable of estimating classwide damages on the certified claims.

15 Before analyzing each expert, the Court clarifies the appropriate measure of damages for
16 each of the express and implied warranty claims.

17 1. Measure of Damages

18 a. Express Warranty Damages

19 Generally speaking, consumers suing for breach of an express warranty are limited to the
20 remedies provided therein. *See* Cal. Com. Code § 2719(1)(a); Wash. R.C. § 62A.2-719. Here,
21 Ford’s warranty states that any remedy for a breach may not “exceed the cost of correcting
22 manufacturing defects.” Edwards Decl., Ex. 47 at 12. Though Plaintiffs argue this limitation of
23 remedies does not extend to design defects, the Ninth Circuit has construed the scope of Ford’s

24 _____
25 ²² Ford cites two other cases but they are not analogous. *See Hiller v. Daimler Chrysler Corp.*,
26 2007 WL 2367629, at *1 (Mass.Super.Ct. July 25, 2007) (plaintiffs’ demand letter was “vague and
27 devoid of any description of an injury” and “fail[ed] to inform Defendant that their c. 93A claim
28 was based on a breach of implied and expressed warranties”); *Moynihan v. LifeCare Centers of
Am., Inc.*, 60 Mass.App.Ct. 1102 (2003) (in negligence claim against nursing home, plaintiff’s
letter “contained neither a reasonable description of the plaintiff’s injuries nor a damage figure of
an amount which would enable the defendant to assess the plaintiff’s claim,” but the contents of
the letter are not described so a comparison is not possible).

1 express warranty to cover both design and manufacturing defects. *See Daniel v. Ford Motor Co.*,
2 806 F.3d 1217, 1224-25 (9th Cir. 2015). It appears that the limitation clause should be similarly
3 construed, as discussed above. If the appropriate measure of damages is the cost of correcting the
4 MFT defects, then Ford is correct that Plaintiffs have not proffered any expert opinion or other
5 evidence that estimates the cost of repair.

6 Plaintiffs correctly point out, however, that both California and Washington law provide
7 that “[w]here circumstances cause an exclusive or limited remedy to fail of its essential purpose,
8 remedy may be had as provided in this code.” Cal. Com. Code § 2719(2); Wash. Rev. Code §
9 62A.2-719(2). A limited remedy of repair fails of its essential purpose when the seller is unable to
10 repair the product. *See, e.g., S.M. Wilson & Co. v. Smith Int’l, Inc.*, 587 F.2d 1363, 1375 (9th Cir.
11 1978); *RRX Industries, Inc. v. Lab-Con, Inc.*, 772 F.2d 543, 547 (9th Cir. 1985). In those
12 circumstances, the purchaser “is entitled to recover the difference between the value of what he
13 should have received and the value of what he got.” *S.M. Wilson*, 587 F.2d at 1375. *See also* Cal.
14 Com. Code § 2714(2); Wash. Rev. Code § 62A.2-714(2).

15 Thus, there are two issues: whether Plaintiffs can demonstrate that the express warranty
16 failed of its essential purpose (*i.e.*, that Ford failed to repair the defects despite the opportunity to
17 do so) and, if so, whether Plaintiffs’ damages models are admissible evidence of the difference in
18 value between the vehicles as warranted and as accepted.

19 As discussed above, the question whether the limited warranty failed its essential purpose
20 because Ford failed to repair the defects despite a sufficient opportunity cannot be resolved on
21 summary judgment. If a jury ultimately concludes that the warranty failed its essential purpose
22 because all Class Members attempted unsuccessful repairs, then damages will be measured by the
23 diminution in value between the vehicles as warranted and the vehicles as sold. The Court will
24 rely on this measure in assessing the adequacy of Plaintiffs’ damages models. As explained
25 below, this is the same measure of damages as Plaintiffs’ implied warranty claims.²³

26
27

28 ²³ Plaintiffs concede that if they cannot prove the warranty failed of its essential purpose, then they have offered no evidence estimating the cost of repair.

1 b. Implied Warranty Damages

2 The parties agree that the U.C.C. provides for the measure of damages for the breach of
3 implied warranty in all of the certified states. *See* U.C.C. § 2-714(2) (“The measure of damages
4 for breach of warranty is the difference at the time and place of acceptance between the value of
5 the goods accepted and the value they would have had if they had been as warranted, unless
6 special circumstances show proximate damages of a different amount.”). Thus, this standard is
7 identical to damages for breach of express warranty, if Plaintiffs were to prove that Ford’s
8 warranty failed its essential purpose.

9 c. Summary

10 The Court’s analysis of the expert models will proceed from the assumption that damages
11 for both the implied and express warranty claims will be measured presumptively by the
12 diminution in value of the vehicles as warranted versus as sold. Indeed, this is the same measure
13 of damages certified by the Court for class treatment. *See* Docket No. 279 at 27. In connection
14 with class certification, the Court approved Dr. Arnold and Mr. Boedeker’s damages models
15 because, at that stage of proceedings, they appeared to “allow the fact finder to calculate the
16 diminution in value of Plaintiffs’ vehicles.” *Id.* However, the Court also held that “Plaintiffs are
17 incorrect in arguing their damages cannot be reduced by post-purchase mitigation;” rather, the
18 Court’s holding was “without prejudice to Ford’s ability to present evidence of mitigation later in
19 this litigation (to reduce its liability)[.]” *Id.* at 31.

20 2. Ford’s *Daubert* Challenges

21 The Court first analyzes Ford’s *Daubert* challenges to Plaintiffs’ experts. Under *Daubert*,
22 in assessing the admissibility of expert testimony under Federal Rule of Evidence 702,²⁴ the Court
23 must perform “a preliminary assessment of whether the reasoning or methodology underlying the
24 testimony is scientifically valid and of whether that reasoning or methodology properly can be

25 _____
26 ²⁴ “A witness who is qualified as an expert by knowledge, skill, experience, training, or education
27 may testify in the form of an opinion or otherwise if: (a) the expert’s scientific, technical, or other
28 specialized knowledge will help the trier of fact to understand the evidence or to determine a fact
in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of
reliable principles and methods; and (d) the expert has reliably applied the principles and methods
to the facts of the case.” Fed. R. Evid. 702.

1 applied to the facts in issue.” *Daubert v. Merrell Down Pharmaceuticals, Inc.*, 509 U.S. 579, 592-
2 93 (1993); *see also Kumho Tire Co., Ltd. v. Carmichael*, 526 U.S. 137 (1999) (*Daubert* standards
3 apply to all expert testimony, not only scientific experts). The Supreme Court has identified a
4 non-exhaustive list of factors that may bear on the inquiry:

- 5 • whether the theory or technique can be or has been tested
- 6 • whether the theory or technique has been subjected to peer review and publication
- 7 • the known or potential rate of error with a scientific technique
- 8 • acceptance of the technique by a relevant scientific community

9 *Id.* at 593-94; *see also United States v. Hankey*, 203 F.3d 1160, 1167 (9th Cir. 2000). None of
10 these factors is dispositive and, ultimately, “[t]he inquiry envisioned by Rule 702 is . . . a flexible
11 one” which is focused “solely on principles and methodology, not on the conclusions that they
12 generate.” *Id.* at 594-95. Under Rule 702 and *Daubert*, “[t]he duty falls squarely upon the district
13 court to act as a gatekeeper to exclude junk science that does not meet Federal Rule of Evidence
14 702’s reliability standards.” *Estate of Barabin v. AstenJohnson, Inc.*, 740 F.3d 457, 463 (9th Cir.
15 2014) (quotation and citation omitted). Moreover, “[t]he trial judge also has broad latitude in
16 determining the appropriate form of the inquiry.” *Id.* at 463.

17 In this role, the “judge is a gatekeeper, not a fact finder,” and the “gate [should] not be
18 closed to [a] relevant opinion offered with sufficient foundation by one qualified to give it.”
19 *Primiano v. Cook*, 598 F.3d 558, 568 (9th Cir. 2010). The purpose of the gatekeeping role is to
20 ensure that expert testimony is “properly grounded, well-reasoned and not speculative,” but it is
21 not meant to substitute for “[v]igorous cross-examination, presentation of contrary evidence, and
22 careful instruction on the burden and proof [which] are the traditional and appropriate means of
23 attacking shaky but admissible evidence.” Fed. R. Evid. 702, Adv. Comm. Notes (2000)
24 (quotation omitted). Thus, “[a]fter an expert establishes admissibility to the judge’s satisfaction,
25 challenges that go to the weight of the evidence are within the province of a fact finder, not a trial
26 court judge.” *Pyramid Technologies, Inc. v. Hartford Cas. Ins. Co.*, 752 F.3d 807, 814 (9th Cir.
27 2014).

28 Because the Court acts merely as a gatekeeper and not a factfinder, an expert whose

1 methodology is otherwise reliable should not be excluded simply because the facts upon which his
2 or her opinions are predicated are in dispute, unless those factual assumptions are “indisputably
3 wrong.” *Guillory v. Domtar Indus. Inc.*, 93 F.3d 1320, 1331 (5th Cir. 1996); *see also* Fed. R.
4 Evid. 702, Adv. Comm. Notes (2000) (explaining that “[w]hen facts are in dispute, experts
5 sometimes reach different conclusions” and a trial court is not “authorize[d] . . . to exclude an
6 expert’s testimony on the ground that the court believes one version of the facts and not the
7 other”). Indeed, Rule 702 is “broad enough to allow an expert to rely on hypothetical facts that are
8 supported by the evidence.” Fed. R. Evid. 702, Adv. Comm. Notes (2000). It traditionally falls
9 upon cross-examination to negate the facts or factual assumptions underlying an expert’s opinion.

10 a. Mr. Boedeker and *Daubert*

11 Ford argues Mr. Boedeker’s methodology is unreliable under *Daubert* because he (i) fails
12 to consider used car prices in assessing whether the defect caused a diminution in value; (ii) fails
13 to consider the supply side of the equation in his market analysis; and (iii) uses a method that has
14 not been peer reviewed. Ford does not otherwise challenge Mr. Boedeker’s qualifications.

15 i. Mr. Boedeker’s Method Is Not Unreliable Because It Relies On
16 Survey Evidence Rather Than Used Car Sales Data

17 Mr. Boedeker uses a choice-based conjoint analysis to measure how consumers valued the
18 MFT system in four scenarios where they were provided varying levels of information about
19 MFT; each scenario and the resulting value calculation is summarized in the table below. *See*
20 *Edwards Decl., Ex. 57 at ¶¶ 67-83.*

Scenario	Consumers Aware Of...	Projected Value of MFT
Result 1	MFT’s general features, but no defect	\$1,850 (¶¶ 67-73)
Result 2	MFT suffers from a “glitch” that will be fixed free of charge in the future	Drops by \$729 (¶ 74)
Result 3	Specific statements by Ford officials regarding extent of MFT defect and that it could not be fixed	Drops by \$910 (¶ 75-77)
Result 4	MFT defect may cause distractions affecting safety	Drops by \$839 without Result 3 Ford statements (¶79) Drops by \$1,290 if Result 3 statements also disclosed (¶ 83)

As the table demonstrates, Mr. Boedeker found that the more information consumers were provided about the defect, the greater the drop in MFT’s value to consumers. Where survey respondents simply learned MFT suffered from a glitch that would be fixed within a year, the value dropped by \$729 (Result 2). Where respondents also learned of statements by Ford officials concerning their knowledge of the problem and its severity (*i.e.*, the lack of a solution), the value dropped by \$910 (Result 3). Under Result 4, Mr. Boedeker performed two tests. Under one, he concluded that where respondents were informed that the MFT defect could cause distractions affecting safety, the value dropped by \$839. Under the other, where they learned about *both* the Ford officials’ statements (the same as in Result 3) *and* the safety problem, the value dropped by \$1,290.

Ford argues that it is “conceptually inappropriate and inherently unreliable to use responses to hypothetical survey questions to estimate willingness to pay when actual pricing data for used vehicle sales is available.” Mot. at 22-23. In other words, Ford contends that Mr. Boedeker should have analyzed used car sales data rather than consumers’ opinions. As support, Ford relies only on *In re Ford Motor Co., Spark Plug & 3-Valve Engine Prod Liab. Litig.*, 2014 WL 3778592, at *43 (N.D. Ohio July 30, 2014). However, that case does not hold that an expert may only rely on used vehicle sales data to estimate a vehicle’s diminution in value. Rather, in that case, Ford’s experts opined based on used car sales data that the defect at issue had not caused

1 any diminution of value. *Id.* at *43. The plaintiffs in *Spark Plug* did not introduce any expert
2 testimony or other evidence to support their diminution of value theory. *Id.* In light of that
3 failure, summary judgment was granted in Ford’s favor. In contrast, here Plaintiffs have presented
4 evidence to rebut Ford’s own contentions about the vehicles’ value. *Spark Plug* does not purport
5 to establish adopt or apply a per se rule that used car sales data is the only legitimate measure of a
6 diminution in value, nor does it support exclusion of Mr. Boedeker’s analysis.

7 Under *Daubert*, Mr. Boedeker’s method need only be “reliable” and Ford has not
8 explained why a choice-based conjoint analysis is inherently unreliable because it relies on survey
9 evidence rather than used car sales data. To the contrary, one court has specifically rejected
10 Ford’s argument. *See Sanchez-Knutson v. Ford Motor Co.*, 181 F.Supp.3d 988, 996 (S.D. Fla.
11 2016) (admitting choice-based conjoint analysis and holding that Ford’s evidence of “an active
12 secondary market . . . which [Ford] contends shows successful sales of used [vehicles] with no
13 indication of decreased value” may be presented to the jury as refutation evidence but “is not
14 grounds to exclude [plaintiffs’ expert’s] opinion”). Moreover, a similar choice-based conjoint
15 analysis survived a *Daubert* challenge in one of the cases cited by Ford. *See In re NJOY, Inc.*
16 *Consumer Litig.*, 120 F.Supp.3d 1050, 1073-75(C.D. Cal. 2015) (holding that expert’s choice-
17 based conjoint analysis measuring consumer willingness-to-pay satisfied reliability requirements
18 of *Daubert*).

19 Though Ford criticizes Mr. Boedeker’s decision not to analyze used car sales data, that
20 objection goes to the weight of his opinion, not its admissibility. His value analysis is sufficiently
21 reliable to survive *Daubert*. The Court declines to exclude Mr. Boedeker’s analysis on the basis
22 he uses a survey rather than used car sales data.

23 ii. Mr. Boedeker’s Focus On The Demand Side Of The Equation Does
24 Not Render His Method Unreliable

25 Ford also argues that Mr. Boedeker focused only on consumers’ subjective valuations to
26 determine how the defect affects demand, but failed to consider the effects of the supply curve on
27 hypothetical prices. According to Ford, Mr. Boedeker’s failure to consider the supply curve
28 means he cannot offer a well-founded opinion about market price, which requires looking at the

1 intersection of supply and demand curves and the resulting equilibrium market price under
2 traditional economic theory.

3 In response, Plaintiffs claim that Mr. Boedeker—unlike experts in cases cited by Ford—
4 did not ignore the supply curve, but rather assumed that it was constant. Mr. Boedeker’s report
5 states:

6 Defendant’s act to not disclose the defect at the point of purchase
7 has created a new situation with respect to supply and demand – if
8 the purchasers of the vehicle would have been informed about the
9 defect at the point of purchase, their purchase decision would have
10 been different and, as a result, the demand curve shifts.

11 However, the supply curve remains the same with either set of
12 information: in the consumers’ actual point-of-purchase situations
13 where vehicles with a defective MFT were sold without disclosing
14 the defect, the same vehicles were sold at the same price as in the
15 hypothetical world where the defects were disclosed at the point of
16 purchase. Therefore, only the changes in the demand curve are
17 relevant for the damages assessment.

18 Edwards Decl., Ex. 57 ¶¶ 22-23.

19 Although it is correct that Mr. Boedeker assumes that the supply curve is constant (*i.e.*, its
20 shape is fixed), that does not in itself respond fully to Defendant’s challenge; Mr. Boedeker does
21 not expressly look to the new equilibrium price point as defined by the intersection of a sloping
22 supply curve with the adjusted demand curve. This is illustrated by Figure 7 in Mr. Boedeker’s
23 report, reproduced below:

26 The hypothetical equilibrium price point (intersection between supply and demand) would be
27 where the two gray lines intersect at the left; the equilibrium price point would be approximately
28

1 \$35. Instead, Mr. Boedeker calculates a diminution in value by looking at the absolute difference
2 between the original demand curve (in red) and the hypothetical demand curve (in gray) assuming
3 the amount of product supplied remained constant. At the same quantity, the price under the new
4 demand curve would be approximately \$20.

5 Thus, he measures the difference in value by assuming that the supply—the quantity—was
6 fixed. In terms of economic theory, the portion of the supply curve that concerns Mr. Boedeker’s
7 analysis is effectively vertical—supply is fixed regardless of price in this region of the graph.
8 Though Mr. Boedeker adamantly denies that his analysis is consistent with assuming a vertical
9 supply curve, *see* Edwards Decl., Ex. 59 at 322:6-24, that is the effect.

10 Despite Mr. Boedeker’s apparent inconsistency in characterizing his own analysis, the
11 substance of this analysis is clear. The Court cannot conclude at this stage that Mr. Boedeker’s
12 assumption that the supply would have been the same regardless of the change of price within the
13 range of his survey is “indisputably wrong.” *Guillory*, 93 F.3d at 1331. Mr. Boedeker explained
14 that, “[f]or my calculations, the supply is fixed because it’s – it’s the same vehicles that include
15 the MyFord Touch System, it’s just that the level of information available to the consumer, who is
16 at the point of purchase, differs.” Edwards Decl., Ex. 59 at 315:20-24; *see also id.* at 316:9-317:2.
17 The assumption that Ford would have sold the same number of vehicles notwithstanding a drop in
18 value ranging from \$729-\$1,290 is not so far-fetched as to be indisputably wrong. The projected
19 reduction in value is not so significant as to suggest that Ford would have preferred not to sell any
20 vehicles at that price; indeed, the projected drop in value appears to be within a range of
21 negotiable price discounts not uncommon at a car dealership—at least Ford has not on this motion
22 demonstrated to the contrary. The jury is entitled to weigh the credibility of Mr. Boedeker’s
23 assumption, and Ford will have the opportunity to cross-examine him.²⁵

24 _____
25 ²⁵ Ford has identified two district court decisions that may fairly be read to hold that an expert’s
26 failure to consider the supply side of the equation when predicting diminution in value may render
27 his or her testimony unsuitable for calculating damages. *See Saavedra v. Eli Lilly & Co.*, 2014
28 U.S. Dist. LEXIS 179088 (C.D. Cal. Dec. 18, 2014); *See In re NJOY, Inc. Consumer Litig.*, 120
F.Supp.3d 1050 (C.D. Cal. 2015). But because Mr. Boedeker does consider the supply curve,
those cases are distinguishable. Moreover, those courts cited other weighty reasons rendering the
expert’s methodology unsuitable for the cases before them. *See Saavedra*, 2014 U.S. Dist. LEXIS
170988 at *16-17 (choice-based conjoint analysis to determine a “refund ratio” based on relative

1 Finally, the Court notes there are policy reasons to afford Plaintiffs a reasonable
2 opportunity to posit damages based on a more flexible approach to economic theory. Under a
3 traditional economic model, determining the equilibrium price point would require looking at the
4 intersection of a supply and demand curve. In this case, modifying the supply curve could mean
5 that a projection will assume that fewer vehicles were sold than were in fact sold, thereby failing
6 to account for the fixed number of defective vehicles that *were* sold. Assuming that fewer
7 consumers were injured in the hypothetical world than were injured in the real world runs the risk
8 of undercompensating the real-world injured consumers. Although the Court understands why, as
9 a matter of economic theory, projecting an equilibrium market price requires consideration of both
10 supply and demand curves, here the fact that a fixed number of vehicles were in fact sold (and thus
11 a fixed number of consumers were potentially harmed) merits assuming that the size of the class is
12 the same in both the hypothetical and real worlds and assessing damages on that basis. Doing
13 otherwise might allow a defendant to profit in the real world by its wrongdoing (if proven) based
14 on the notion that fewer people were harmed in the hypothetical world. That would not serve the
15 remedial purpose of the damages remedy, making real-world consumers whole again. *See, e.g.,*
16 *Plasti-Line Mfg. Co. v. Combined Communications Corp.*, 741 F.Supp. 141, 144 (E.D. Tenn.
17 1989) (“The purpose of damages is to put the injured party . . . in as good a position as it would
18 have been in if the breach of warranty had not occurred. It is to give [the plaintiff] the benefit of
19 its bargain—not more and not less.”).

20 A defendant should not be permitted to profit on the basis that calculating damages may be
21 theoretically challenging. *See Comcast Corp. v. Behrend*, 569 U.S. 27, 35 (2013) (noting that
22 damages “[c]alculations need not be exact” so long as they “attempt” to “measure only those
23 damages attributable to [plaintiffs’] theory”); *cf. Living Designs, Inc. v. E.I. Dupont de Nemours*

24
25 value of misrepresentation to consumers could not simply be applied to consumers’ out-of-pocket
26 costs to calculate damages because those costs were not “tether[ed]” to “fair market value” but
27 rather “an arbitrary amount [such as a prescription co-payment] that is unrelated to the amount of
28 harm incurred by individual class members”); *In re NJOY*, 120 F.Supp.3d at 1121-22 (choice-
based conjoint analysis could determine “the relative value a class of consumers ascribed to the
safety message [regarding electronic cigarettes],” but [did] not permit the court to turn the ‘relative
valuation . . . into an absolute valuation to be awarded as damages”). Here, Mr. Boedeker
rendered opinions based on actual dollar amounts.

1 *and Co.*, 431 F.3d 353, 367 (9th Cir. 2005) (explaining that “[w]here the fact of damage is
2 established,” the court will “not insist upon a higher degree of certainty as to the amount of
3 damages than the nature of the case admits, particularly where the uncertainty was caused by the
4 defendant’s own wrongful acts”); *Hunt Foods, Inc. v. Phillips*, 248 F.2d 23, 33 (9th Cir. 1957)
5 (“[W]here it clearly appears that a party has suffered damage, a liberal rule should be applied in
6 allowing a court or jury to determine the amount; and that, given proof of damage, uncertainty as
7 to the exact amount is no reason for denying all recovery. The fact that the amount of damage
8 may not be susceptible of exact proof or may be uncertain, contingent or difficult of ascertainment
9 does not bar recovery.”); *Frank Music Corp. v. Metro-Goldwyn-Mayer, Inc.*, 772 F.2d 505, 513
10 (9th Cir. 1985) (“Although uncertainty as to the amount of damages will not preclude recovery,
11 uncertainty as to the fact of damages may.”).

12 For these reasons, the Court concludes Mr. Boedeker’s treatment of supply in his analysis
13 is sufficiently reliable to satisfy *Daubert*.

14 iii. Market Simulation Method

15 Ford also argues that the “market simulation method” which Mr. Boedeker uses has no
16 accepted basis in economics. Mr. Boedeker’s market simulations “begin[] by defining a ‘base
17 case’ vehicle with no features added and no additional cost.” Edwards Decl., Ex. 57 at ¶ 68.
18 Respondents are then asked whether they would take the “base case” vehicle or not; Mr. Boedeker
19 determined that 29.5% of consumers would have chosen the “base case” option while 70.5%
20 would not. *Id.* In the next step, Mr. Boedeker adds the MFT system at no additional cost. *Id.*
21 Then, Mr. Boedeker increases the price of the MFT system incrementally. *Id.* ¶ 69. The price
22 increases correspond with a gradual decrease in the number of consumers who opt for the MFT-
23 equipped vehicle. *Id.* Eventually, “the proportion of consumers accepting the option declines
24 until the proportion of consumers choosing the MFT system will fall below the ‘base case’ defined
25 earlier.” *Id.* Under the market simulation method, “[t]he cost at the intersection of the line
26 depicting the percentage of consumers who initially chose the ‘base case’ and the downward
27 sloping line of increased cost for additional attributes is the implicit price estimate for the attribute
28 [*i.e.*, MFT].” *Id.* Mr. Boedeker then repeats the process again and averages the results from both

1 phases to conclude that consumers’ willingness-to-pay for the MFT system, absent a defect, is
2 \$1,850. *Id.* ¶¶ 70-73. As Mr. Boedeker explained in his deposition, the purpose of this method to
3 increment the price of MFT until he identifies the price point at which the market share of people
4 willing to pay falls below the market share of those in the base case group. That point is
5 “interpret[ed]” as “the price of the added feature.” Berman Decl., Ex. 27 at 469:25-470:10.

6 Ford claims that Mr. Boedeker cannot point to any examples of other economists using
7 such a simulation or academic studies supporting it, and that he therefore invented it “out of whole
8 cloth.”²⁶ However, as the Supreme Court has explained, though peer review is a “pertinent
9 consideration,” “[p]ublication (which is but one element of peer review) is not a *sine qua non* of
10 admissibility,” “does not necessarily correlate with reliability,” and “well-grounded but innovative
11 theories will not have been published.” *Daubert*, 509 U.S. at 593. Thus, “[t]he fact of publication
12 (or lack thereof) in a peer reviewed journal . . . will be a relevant, though not dispositive,
13 consideration in assessing the scientific validity of a particular technique or methodology on
14 which an opinion is premised.” *Id.* at 594. *See also Wendell v. GlaxoSmithKline LLC*, 858 F.3d
15 1227, 1235-36 (9th Cir. 2017) (district court abused its discretion by excluding expert opinion
16 because it had not been published in peer reviewed journal and therefore “conflated the standards
17 for publication . . . with the standards for admitting expert testimony in a courtroom”).

18 Here, Mr. Boedeker’s report itself cites at least two other studies in which a market
19 simulation was used. *See* Edwards Decl., Ex. 57 at 19 (describing two studies that used similar
20 market simulations). Ford replies that those studies were forward-looking while Mr. Boedeker’s is
21 backward-looking and that therefore “[r]etrospective simulation is invalid when the actual
22 valuation has been established in the real world [through used car data]”. However, the *method* is
23 the same when making projections about past and future scenarios. Ford’s attempt to distinguish
24 Mr. Boedeker’s study is an implicit concession that Mr. Boedeker’s methodology is not *inherently*
25 unreliable. Ford’s argument is essentially that *better* evidence exists to determine historic market
26

27 ²⁶ *See* Edwards Decl., Ex. 63 at 243:19-23 (“Q: All right. Now, has the market simulation process
28 that you followed to estimate the willingness to pay for MyFord Touch been endorsed in any peer-
reviewed economics papers? A. I wouldn’t know.”).

1 value, but that is an argument going to the weight of Mr. Boedeker’s analysis, not its admissibility
2 under *Daubert*. It is within the province of the jury to decide whether Mr. Boedeker’s estimates of
3 past market value are more or less credible than estimates based on subsequent used car sales.

4 Finally, Mr. Boedeker cites examples in which his method has been used by industry and
5 marketing experts to assess the relevant value of products and product features, which Ford has
6 not challenged. *See* Edwards Decl., Ex. 57 at ¶¶ 52-53. That the method is used in the industry
7 for the same purpose here (*i.e.*, predicting market value based on consumer preferences) further
8 bolsters its reliability for admissibility purposes. Thus, the Court declines to exclude Mr.
9 Boedeker’s testimony on this basis.²⁷

10 In sum, Ford has not demonstrated that exclusion of Mr. Boedeker’s testimony is
11 warranted under *Daubert*. All of Ford’s objections go to the soundness of certain underlying
12 factual assumptions or to the weight of Mr. Boedeker’s analysis, questions that are properly for the
13 jury to consider.

14 b. Dr. Arnold and *Daubert*

15 Ford also argues that Dr. Arnold improperly values the MyFord Touch system as having
16 zero value to Class Members by assuming their damages are the full amount they paid for the
17 MFT. In his study, Dr. Arnold offers two methods of calculating class-wide damages. First, he
18 calculates the average revenue received by Ford from the sale or lease of a MyFord Touch system.
19 *See* Edwards Decl., Ex. 56, ¶¶ 34, 35-39. Second, he calculates the “economic loss” each class
20 member suffered at the time of purchase, which he treats as equivalent to the price they paid for
21 MFT, estimated to be \$625 without the navigation feature and \$1,364 with it. *Id.* ¶¶ 34, 40-44.

22 Ford does not dispute the method Dr. Arnold uses to estimate Ford’s revenue from MFT or
23 the amount consumers paid for it, but it disputes whether Dr. Arnold presents a valid basis to

24 _____
25 ²⁷ Ford cites *United States v. Frazier*, 387 F.3d 1244, 1261 (11th Cir. 2004) as support, but it is
26 inapposite because it simply reiterates the *Daubert* standard and affirms the district court’s
27 exclusion of an expert opinion because the expert “offered precious little in the way of a reliable
28 inculpatory hair or seminal fluid ‘would be expected.’” *Id.* at 1264-65. The district court did not
abuse its discretion in finding “the absence of a sufficiently verifiable, quantitative basis for [the
expert’s] opinion.” *Id.* at 1265. In contrast, Mr. Boedeker’s opinion is founded upon the surveys
he conducted.

1 assume that the entire amount paid by consumers was lost.

2 Dr. Arnold’s assumption that the MFT systems had zero value is based on his reliance on
3 the risk averseness of consumers. He explains that “a risk averse customer would prefer to obtain
4 \$40 with certainty instead of assuming a risk that may yield \$100 with 40 percent chance and \$0
5 with 60 percent chance.” Edwards Decl., Ex. 56 ¶ 23. “In other words, a risk averse consumer
6 with perfect knowledge of the defect would not pay \$40 to purchase a product that provides \$40
7 on average. Instead, this risk averse consumer would prefer to avoid the associated risk.” *Id.* Dr.
8 Arnold posits that even if the “average” value of a defective product is still greater than zero, it in
9 fact holds zero value to a risk averse consumer who prefers not to take the chance. *Id.* Following
10 this general proposition, Dr. Arnold asserts that “most” consumers are risk averse, and therefore
11 would not have purchased a defective product at all had they been aware of a defect. Edwards
12 Decl., Ex. 56 at ¶¶ 23-24. He does not maintain, however, that “all” consumers or that “all” class
13 members are risk averse, nor does he attempt to determine what proportion of the class are risk
14 averse and therefore would pay nothing for the MFT system. Yet, in order to conclude the class
15 damages are based on the full value paid for the MFT, Dr. Arnold implicitly assumes that all class
16 members were risk averse consumers.

17 This is a tenuous thread, as Plaintiffs acknowledged at the hearing. Nevertheless, Plaintiffs
18 are willing to hinge their case on proving to the jury that the MFT was so defective as to confer no
19 value to *any* class member. Ford disputes that fact and will be entitled to present evidence of MFT
20 value. The resolution of this factual predicate upon which Dr. Arnold’s opinion is based is for the
21 jury to determine. *See* Fed. R. Evid. 702, Adv. Comm. Notes (2000) (explaining that “[w]hen
22 facts are in dispute, experts sometimes reach different conclusions” and a trial court is not
23 “authorize[d] . . . to exclude an expert’s testimony on the ground that the court believes one
24 version of the facts and not the other”).²⁸ So long as that assumption regarding the universality of

25
26 ²⁸ Ford’s reliance on *Phillips v. Ford Motor Co.* is inapposite for the same reasons stated by Judge
27 Koh in her decision. *See* Case No. 14-cv-02989-LHK, 2016 U.S. Dist. LEXIS 177672, at *73
28 (N.D. Cal. Dec. 22, 2016) (contrasting Dr. Arnold’s report in that case because it appears “in
conjunction with a second report by another expert that faithfully measure[s] class members’
expected utility” and because the defect in this case “is visible to consumers and about which
consumers are likely to have preferences,” in contrast to those in *Phillips* involving an obscure

1 risk averseness is not “indisputably wrong,” *Daubert* does not bar Dr. Arnold’s testimony. In
2 view of the evidence regarding the pervasiveness and seriousness of the defect of the MFT system,
3 the Court is unable at this juncture to conclude that Dr. Arnold’s assumption is indisputably
4 wrong. The Court therefore declines to exclude Dr. Arnold’s testimony at this time.

5 3. Ford’s Challenges Under *Comcast*

6 Ford also challenges whether Plaintiffs’ damages models are adequately tailored to
7 measure the diminution of value caused by the defect, as required for breach of warranty claims.
8 Under *Comcast*, “[a] model purporting to serve as evidence of damages in [a] class action must
9 measure only those damages attributable to that theory [of liability certified for class treatment].”
10 *Comcast Corp. v. Behrend*, 569 U.S. 27, 35 (2013). “If the model does not even attempt to do
11 that, it cannot possibly establish that damages are susceptible of measurement across the entire
12 class for purposes of Rule 23(b)(3).” *Id.* “Calculations need not be exact, but at the class-
13 certification stage (as at trial), any model supporting a plaintiff’s damages case must be consistent
14 with its liability case” *Id.* (quotation and citations omitted). *See also Culley v. Lincare Inc.*,
15 2017 U.S. Dist. LEXIS 121834 (E.D. Cal. Aug. 2, 2017) (granting summary judgment and
16 decertifying class where plaintiffs’ damages model was “wholly unconnected to . . . any specific
17 loss resulting from Defendants’ allegedly unfair and deceptive treatment of meal breaks”).

18 a. Mr. Boedeker’s Calculation Of Breach Of Warranty Damages

19 Ford claims that Mr. Boedeker’s analysis “results in very specific value differences tied
20 directly to certain material non-disclosures—the very fraud theory that this Court refused to certify
21 for classwide adjudication.” Mot. at 22. According to Ford, this creates a mismatch between Mr.
22 Boedeker’s damages model and the liability theory, in violation of *Comcast*.

23 Plaintiffs argue that, for purposes of their warranty claims, they may rely on both Result 2
24 and Result 3. As explained above, under Result 2, Mr. Boedeker informed respondents that MFT
25 suffered from a glitch that would be resolved in the future. Under Result 3, Mr. Boedeker exposed
26 respondents to particular statements by Ford officials in which they acknowledged the extent of
27

28 component of which “consumers are probably not aware”).

1 the defect, including that it could not be resolved.

2 Result 2 appears to be appropriately tailored to a breach of warranty theory of damages.
3 Though it is true that Result 2 measures how consumers value MFT when they are aware of a
4 defect, that does not mean that Result 2 is premised on a fraud theory of liability. The survey
5 respondents were not made aware of *Ford's* state of mind, the key to a fraud theory. The
6 respondents were not told, *e.g.*, that Ford already knew about the defect. Rather, Result 2
7 measures the difference in how consumers value MFT with and without the defect, a subjective
8 valuation from which Mr. Boedeker then extrapolates MFT's drop in value caused by the defect.
9 That corresponds with the measure of damages under breach of warranty, as explained above.
10 Accordingly, there is no "mismatch" under *Comcast* between the method used to calculate
11 damages under Result 2 and Plaintiffs' theory of warranty liability.

12 Plaintiffs also argue that Result 3, in which survey respondents were provided with
13 statements by Ford officials revealing the extent of the MFT defect,²⁹ also provides an appropriate
14 measure of damages because the Song-Beverly Act allows for a penalty of two times the amount
15 of actual damages if "the buyer establishes that the failure to comply was willful." Cal. Civ. Code
16 § 1794(c). That argument not only fails to address the laws of other states, but is also a non-
17 sequitur. The fact that Plaintiffs may double actual damages if they prove willfulness at trial does
18 not mean that the method used in Result 3 to estimate actual damages is tailored to Plaintiffs'
19 liability theory. The question is whether Result 3 provides an appropriate model to measure
20 breach of warranty damages. To the extent it measures the effect on consumer valuation of
21 information about the severity of the defect, it does. However, it appears that Result 3 injects
22 information about Ford's state of mind and implicitly about Ford's culpability. Ford argues that
23 Result 3's projection of damages is tainted because it makes it impossible to separate how
24 respondents valued Ford's knowledge of fraud (and its culpability) in comparison to consumers'
25 valuation based solely on the defect's severity.

26
27 _____
28 ²⁹ The actual statements shared with survey respondents have not been submitted to the Court.
Mr. Boedeker's report states they are listed in "Appendix A" to the report, but Appendix A was
not filed.

1 However, the effect of this potential defect in the survey design, if any, is not clear. The
2 Court cannot say the analysis is inherently unreliable. Exclusion under *Daubert* and *Comcast* is
3 not required particularly since the alleged defect of Mr. Boedeker’s analysis will be made plain to
4 the jury which can then choose what weight to give to his testimony.

5 In sum, *Comcast* does not bar Mr. Boedeker’s testimony.

6 b. Mr. Boedeker and Dr. Arnold’s Failure To Consider Post-Purchase Facts

7 Ford also faults Mr. Boedeker for “fail[ing] even to consider the available direct evidence
8 of the actual performance or value of the class vehicles,” and failing to “offer[] any opinion as for
9 the value of the software updates Ford offered to MFT,” which Ford’s expert Dr. Singer opined
10 were valuable. Mot. at 22.³⁰ It is true that Mr. Boedeker did not consider any services or repairs
11 related to MFT, any software updates to MFT, any actual use of MFT by class members, or
12 whether customers received any value from such use. Edwards Decl., Ex. 59 at 293:3-294:7;
13 343:14-345:15. According to Ford, this means that Mr. Boedeker’s damages analysis “fails to
14 provide a reliable measure of the actual value of the class vehicles.” *Id.* However, Plaintiffs’
15 burden is to offer a measure of the difference in value “at the time and place of acceptance,”
16 U.C.C. § 2-714(2), which, by definition, does not require looking at subsequent use. Thus, Mr.
17 Boedeker’s model adequately focuses on the difference in value, anchored in differences in
18 willingness-to-pay, *at the point of purchase*. His opinion goes no further than addressing this
19 point.

20 As to whether Ford’s subsequent software upgrades improved the value of MFT, that goes
21 to the question whether damages based on diminished value at time of purchase were mitigated, a
22 matter which is Ford’s burden to produce. *See* Docket No. 279 at 31 (permitting Ford “to present
23 evidence of mitigation later in this litigation (to reduce its liability)”).³¹ There appears to be

24 _____
25 ³⁰ Ford also criticized Mr. Boedeker for failing to take into account the effect wear and tear has on
26 vehicle value under *Isip*, but that is irrelevant because Mr. Boedeker estimates MFT-value, not
overall vehicle value.

27 ³¹ Where the plaintiff presents evidence of value at the time of delivery, it is the defendant’s
28 burden to rebut that evidence. *See Louis DeGidio Oil & Gas Burner Sales and Serv., Inc. v. Ace
Engineering Co., Inc.*, 302 Minn. 19 (1974) (affirming jury award for full value of defective
burners even though “the continued use of most of the equipment was certainly some evidence it

1 conflicting evidence on whether Ford’s subsequent software updates completely resolved the
2 defect. Ford’s expert, Dr. Singer, opines that improvements to the software through subsequent
3 upgrades would have conferred additional value, but he does not evaluate whether the software
4 upgrades were in fact improvements.³² Ford itself has not submitted evidence to demonstrate that
5 the software upgrades in fact resolved the defects at issue. Further, Plaintiffs dispute that the MFT
6 updates resolved the defects or restored any value.³³ This is a matter for trial, which, if resolved in
7 Ford’s favor, will likely impact the jury’s assessment of damages notwithstanding Mr. Boedeker’s
8 analysis.³⁴

9 Ford also challenges Dr. Arnold’s analysis of damages because he does not account for

10
11 had value” because such evidence was “not conclusive on the factfinders” and the defendant
12 “offered no evidence whatever of the value of the equipment at the time of its delivery to rebut the
13 testimony of plaintiff’s witnesses”). The circumstances of this case are somewhat distinguishable
14 because post-purchase software updates would not alter the value of the vehicles at time of
15 delivery. However, they may constitute “special circumstances” under U.C.C. § 2-714 permitting
16 a different measure of damages, and thus may offset the class members’ original loss if Ford can
17 demonstrate the software updates conferred value.

18 ³² See Edwards Decl., Ex. 60 at ¶40 (stating that “[i]mprovements to the Base Software imply a
19 high Value Received for Class Members that received the updates, particularly those that
20 purchased MFT-equipped vehicles later in the Class Period,” but no explanation whether the
21 upgrades were in fact “improvements”); ¶ 55 (same).

22 ³³ That the issue is disputed distinguishes this case from *Waller v. Hewlett-Packard Co.*, 295
23 F.R.D. 472, 487-89 (S.D. Cal. 2013), where a consumer who purchased software that did not
24 contain an advertised feature brought a class action complaint on behalf of defrauded consumers.
25 After receiving evidence that the software manufacturer released a free software update adding the
26 feature, which the plaintiff acknowledged resolved his concerns, the court decertified the class.

27 ³⁴ Because no such evidence was provided by Ford in connection with its motion, Plaintiffs were
28 not obligated to submit rebuttal evidence on this motion. However, the Court notes that Plaintiffs’
attempt to do so fell far short. Plaintiffs merely cited back to the Court’s class certification order
and re-attached exhibits cited by the Court in the class certification order as Exhibits 23, 24, and
25 to the Berman Declaration. Plaintiffs’ brief made no attempt to explain the contents of the
26 exhibits, and counsel was unable to explain their import at the hearing. In any case, the exhibits
do not appear to demonstrate that *no* software upgrade ever resolved the defect. Exhibit 23 is an
27 October 2011 e-mail; regardless of its contents, it is unclear how an e-mail sent very early in the
28 class period can demonstrate that no software upgrade resolved the defect. Exhibit 24 is a July 23,
2012 slideshow titled “Electrical AQM Quality Review,” but it is unclear how it indicates that no
subsequent update successfully repaired the MFT defect. Similarly, Exhibit 25 is a January 28,
2013 slideshow titled “Electrical AQM Quality Review – Glidepaths & Warranty Spend.” The
charts apparently deal with information about improvements in connection various MFT features,
but no explanation was provided to the Court how it demonstrates that the MFT defect was never
repaired. Nevertheless, there is at least some evidence in the record of MFT problems arising after
the August 2013 software update. See, e.g., Kirchoff Dep. (Edwards Decl., Ex. 36) at 186-192
(defect problems arose in November-December 2014).

1 post-purchase software fixes. Like Mr. Boedeker, Dr. Arnold confined his analysis to valuation at
2 the time of purchase. In his report, Dr. Arnold states:

3 I intentionally chose to exclude from my analysis any consideration
4 of, and allowance for, potential residual value of MyFord Touch
5 equipment. I understand that Plaintiffs' claim that the injury from
6 the misrepresentation and/or sale of the defective MyFord Touch
7 system occurs at the time of purchase by Class members and that,
8 therefore, damages should be computed as of that time. For these
9 reasons, any remedy need not look forward in time and consider *ex post*
10 factors. If, for the sake of argument, the law requires
11 consideration of *ex post* factors (for example, software fixes), I can
12 easily incorporate such a consideration on a classwide basis. For
13 example, I could compute the economic life of the vehicles at issue
14 and determine what portion of the economic life was used during the
15 presence of the defect.

16 *Id.* ¶ 48.

17 As discussed above in connection with Mr. Boedeker, however, it is Ford's burden to rebut
18 Plaintiffs' damages calculations by showing that its subsequent software updates added value and
19 thereby mitigated their damages.

20 Finally, Ford claims Dr. Arnold must consider "the value of the entire vehicle, not just the
21 purportedly defective system." Ford cites *T&M Solar and Air Conditioning, Inc. v. Lennox Int'l*
22 *Inc.*, 83 F.Supp.3d 855 (N.D. Cal. 2015) for that proposition, but *T&M Solar* is not a vehicle
23 defect case and does not discuss how damages must be measured for breach of implied warranty in
24 such cases. Similarly, Ford cites to this Court's previous dismissal order, but the cited portion
25 merely states that one may not "[i]dentify a particular component of a car . . . and use that to
26 define the ordinary purpose of the car," but it says nothing about how damages are calculated. *See*
27 *Docket No. 97 at 48, n.14.* In any case, since MFT was a component of the vehicles, a loss in
28 value for the MFT is a loss of value for the vehicle as well.

For the same reasons stated above, Dr. Arnold's decision not to consider subsequent value
added does not mean that his model fails to estimate implied and express warranty damages at the
time of purchase under *Comcast*.

In sum, because Ford has not established that Dr. Arnold and Mr. Boedeker's damages fail
to pass muster under *Daubert* or *Comcast*, the Court **DENIES** Ford's motion for summary
judgment based on a failure of proof with respect to classwide damages.

1 G. Individual Fraud Claims and Evidence of Reliance

2 An essential element for a claim of fraud by omission is demonstrating actual reliance on
3 the fraudulent omission. *See Daniel v. Ford Motor Co.*, 806 F.3d 1217, 1225 (9th Cir. 2015).
4 Ford argues that individual Plaintiffs Rodriguez, Miller-Jones, and Ervin cannot prove justifiable
5 reliance on Ford’s omissions because they either subsequently purchased a second MFT-equipped
6 vehicle despite their experience with the first vehicle, or were aware, prior to purchase, of
7 criticisms of MFT. Ford cites cases for the general proposition that a plaintiff cannot prove
8 reasonable or justifiable reliance if the plaintiff was actually aware of the omitted information or
9 based on notice would have uncovered it through the exercise of reasonable diligence.³⁵ However,
10 justifiable reliance is a fact-specific question that is usually appropriate for jury resolution.³⁶ As
11 explained below, viewing the evidence in Plaintiffs’ favor, a reasonable jury could conclude that
12 Plaintiffs’ reliance was justified.

13 1. Plaintiff Rodriguez’s Texas DTPA claim

14 Ford argues that Plaintiff Rodriguez cannot prove reliance in support of his individual
15 claim under the Texas Deceptive Trade Practices Act because six months after purchasing an
16 MFT-equipped Ford Focus, he purchased an MFT-equipped Ford Explorer for his sister. This
17 appears to be a challenge under the first component of reliance, *i.e.*, materiality. *Daniel*, 806 F.3d

19 ³⁵ *See Meridian Title Ins. Co. v. Lilly Homes, Inc.*, 735 F.Supp. 182, 185-86 (E.D. Va. 1990)
20 (plaintiff who hired title search company and had actual knowledge that title belonged to two
21 entities could not have justifiably relied on defendant’s representation that only one entity had
22 title); *Rich v. Olah*, 274 S.W.3d 878, 887-88 (Tex.App.Ct. 2008) (purchasers who were advised of
23 warranty inspections of home after foundation repairs and were aware of cracks in the walls,
24 kitchen tile, and of sticking doors prior to purchase could not have justifiably relied on failure to
disclose need for remedial work on foundation); *Courseview, Inc. v. Phillips Petroleum Co.*, 312
S.W.2d 197, 205 (Tex. 1957) (noting that a plaintiff alleging fraud must exercise reasonable
diligence when it is put on notice of facts that arouse its suspicions, such as obtaining information
through public records or other inquiries).

25 ³⁶ *See Copart, Inc. v. Sparta Consulting, Inc.*, 2017 WL 4269921, at *13 (E.D. Cal. Sep. 26,
26 2017) (noting that “justifiable reliance is a context-specific and fact-intensive inquiry”); *Jackson v.*
27 *Fischer*, 2017 WL 1019830, at *7 (N.D. Cal. Mar. 16, 2017) (concluding that “under the facts of
28 this case, the questions of scienter and reasonable reliance raise further triable issues—in
particular, issues related to state of mind, intent, and credibility—which are not appropriate for
resolution on summary judgment”); *Dias v. Nationwide Life Ins. Co.*, 700 F.Supp.2d 1204, 1218
(E.D. Cal. 2010) (“Justifiable reliance is normally a question of fact for a jury” except in “rare
cases.”).

1 at 1225. In other words, the fact that Rodriguez purchased a second MFT-equipped vehicle might
2 suggest that the MFT defect could not have made a difference to his own earlier purchase and was
3 thus immaterial.

4 However, Plaintiff Rodriguez’s testimony does not establish that he was aware of the
5 defect and its severity by the time he paid for his sister’s vehicle. He states that when his sister
6 purchased her vehicle, he “still had held out hope that [Ford] would fix the system around that
7 time.” Edwards Decl., Ex. 64 at 146:8-9. This testimony does not establish that Plaintiff
8 Rodriguez was fully aware of the omitted information at the time of the second purchase (*i.e.*, the
9 severity of the defect or the fact that it could not be solved), such that the only reasonable
10 inference is that the defect was immaterial to him. At most it would be probative, but not
11 dispositive, of what was material to his *own* vehicle purchase six months earlier. Furthermore,
12 Plaintiff Rodriguez testified that he played virtually no role in his sister’s purchase decision other
13 than paying the bill. Edwards Decl., Ex. 64 at 62:11-14, 62:20-23. Because he deferred to his
14 sister’s decision, her purchase decision does not necessarily speak to what he himself considered
15 to be material.

16 Because Ford has not established that no reasonable jury could conclude that Rodriguez
17 justifiably relied on Ford’s omission at the time of his own vehicle purchase, the Court **DENIES**
18 Ford’s motion for summary judgment.

19 2. Virginia Plaintiff Miller-Jones and Texas Plaintiff Ervin

20 Ford also argues that Plaintiffs Miller-Jones and Ervin could not have reasonably relied on
21 the omitted information because they were already aware of certain criticism of MFT before their
22 vehicle purchases. In effect, Ford argues that the omitted information was thus immaterial to
23 them. However, each Plaintiff’s testimony does not support that argument.

24 Plaintiff Miller-Jones testified that he had not visited websites with consumer complaints
25 before he purchased the vehicle. *See* Berman Decl., Ex. 13 42:25-4. To the extent he had read
26 articles in which the MyFord Touch system “got heavily criticized in the New York Times and
27 Consumer Reports,” he said that “the articles . . . had been written originally, I think around 2010
28 and ’11, 12 even, maybe even early 12 before that, and there had been upgrades to the system, so I

1 was – I wasn’t terribly worried.” *Id.* at 102:6-15. He “dismissed” that coverage because “the[
2 [articles] were a year or so old . . . and I had assumed and knew at least to some degree that they
3 [Ford] had upgraded [MFT] at least once, and there were no follow-up articles that I could find
4 that basically said anything more than what they had said before.” *Id.* at 124:3-9. He thought that
5 “Ford will fix it if it’s got a problem.” *Id.* 102:19-20; 124:12-13 (“I trusted them to fix whatever
6 would – would have been wrong.”). He reiterated, “I have faith in Ford, they – they’re going to
7 fix this, and I will buy it. That’s really why I went – I ultimately bought it, because everything
8 that had been criticized before that looked like it could have been fixed in the period between the
9 time the criticism was written and the time I bought – was ready to buy the car.” *Id.* at 329:13-21.
10 He reiterated that, “if I had a choice to buy the car again today, I wouldn’t.” *Id.* at 81:14-15.

11 Plaintiff Miller-Jones never testified that he was aware of the full scope of the problem
12 (*i.e.*, that MFT had not or could not have been fixed). Ford has not introduced any evidence that
13 Plaintiff Miller-Jones had reason to suspect that the version of MFT he purchased suffered from
14 the same problems for which earlier versions had been criticized. Nor has Ford introduced any
15 evidence establishing that Plaintiff Miller-Jones could have learned about the severity of the defect
16 or its un-fixability through the exercise of reasonable diligence. Indeed, Ford does not explain
17 how an ordinary consumer could have learned that information when, if it existed, it was likely in
18 Ford’s exclusive possession. Viewing the evidence most favorably to Miller-Jones, then, a
19 reasonable jury could conclude that he justifiably relied on Ford’s omission because he was not
20 and could not have become aware of the extent and irreparability of the MFT defect prior to
21 purchase.

22 Similarly, Plaintiff Ervin was exposed to some criticism of the MFT system prior to
23 purchasing his vehicle, but was not aware of the extent of the defect. Specifically, he stated that
24 an article he read explained that “[o]verall, the vehicle was great” and “[e]ven MyFord Touch was
25 very useful” but that “as there are with anything, there’s always an imperfection that they find,”
26 such as “saying it’s a little bit slow to respond, which it was, and that it’s not necessarily perfect,
27 but nothing is.” Edwards Decl., Ex. 65 at 102:20-103:4. The “gist of these articles was that it was
28 a positive indication” for the vehicle. *Id.* at 102:1-5. Ervin also testified he did not read anything

1 “negative” or “critical” of MyFord Touch before he went to the dealership for the first time.
2 Berman Decl., Ex. 12 at 75:4-10, 75:22-25. Indeed, he agreed that “specifically about the
3 MyFord Touch system, the theme was, some imperfection, but overall, it’s a good system.” *Id.* at
4 103:10-16. As with Miller-Jones, this testimony does not establish that Ervin was aware of the
5 extent of the defect or that it could not be repaired at the time that he purchased his vehicle; nor
6 does Ford explain how Ervin could have learned that information through the exercise of
7 reasonable diligence.

8 Accordingly, the Court **DENIES** Ford’s motion for summary judgment on Plaintiff Ervin
9 and Miller-Jones’s individual, non-certified fraud claims.

10 3. Plaintiff Center for Defensive Driving

11 Plaintiffs concede that Ford’s motion for summary judgment with respect to Plaintiff
12 Center for Defense Driving’s uncertified claim under California’s Consumer Legal Remedies Act
13 should be granted because CDD is a non-profit corporation that purchased its vehicle for work,
14 and therefore does not constitute a “consumer” under California law. *See* Cal. Civ. Code §§
15 1761(d) (defining “consumer” as “an individual who seeks or acquires, by purchase or lease, any
16 goods or services for personal, family, or household purposes”), 1780(a) (limiting cause of action
17 to “[a]ny consumer”); *see also* Edwards Decl., Ex. 33 (CDD Depo.) at 12:4-5, 20:14
18 (acknowledging that CDD is a non-profit corporation that purchased an MFT-equipped vehicle for
19 non-personal use). The Court **GRANTS** Ford’s motion for summary judgment on this claim.

20 **IV. CONCLUSION**

21 To summarize, the Court **GRANTS** Ford’s motion as follows:

- 22 • On the California Class’s implied warranty of merchantability claims under the
23 Song-Beverly Act, **GRANT** with respect to used car purchasers because Plaintiffs
24 have not presented evidence to support an inference that Ford acted as a distributor
25 or retailer, such as through an agency relationship with its authorized dealers.
- 26 • On the Colorado Class’s strict product liability claim, **GRANT** because the claim is
27 precluded by the economic loss rule.
- 28 • For Plaintiff Center for Defensive Driving’s California Consumer Legal Remedies

1 Act claim, **GRANT** because CDD is not a “consumer” within the meaning of the
2 statute.

3 The Court **DENIES** Ford’s motion as follows:

- 4 • **Implied Warranty:** With respect to new vehicles, Plaintiffs have introduced
5 sufficient evidence for a reasonable jury to conclude that the vehicles were
6 unmerchantable and that the defects manifested within one year. Ford’s disclaimer
7 for vehicles used for business purposes is not conspicuous and therefore
8 unenforceable with respect to vehicle use for business or commercial purposes.
- 9 • **Express Warranty:** Ford has not established that classwide summary judgment
10 for failure to exhaust two repair attempts is appropriate where its own evidence
11 indicates that at least some class members satisfied that requirement. Plaintiffs
12 Kirchoff and Mitchell have demonstrated that a genuine issue of material fact exists
13 as to whether they exhausted two repair attempts in connection with the MFT
14 defect.
- 15 • **Ohio Negligence Class Claim:** With respect to the Ohio Class’s negligence claim,
16 Plaintiffs have introduced sufficient evidence for a jury to conclude that Ford
17 breached its duty to design a reasonably safe product, thereby causing economic
18 harm to class members.
- 19 • **California UCL Class Claim:** With respect to the California Class’s UCL claim,
20 the Court certified the non-fraud breach of warranty theories for class treatment, so
21 the UCL claim may proceed consistent with the Court’s holdings regarding implied
22 and express warranty.
- 23 • **Plaintiff Creed:** Plaintiff Creed may pursue a claim under the Massachusetts
24 Consumer Protection Act because a jury could conclude he purchased his vehicle
25 for primarily personal reasons and his demand letter was sufficient.
- 26 • **Expert Damages Models:** Mr. Boedeker and Dr. Arnold’s damages models are
27 adequate under *Daubert* and *Comcast* to project classwide damages for breach of
28 implied and express warranty.

- **Individual Fraud Claims:** Plaintiffs Rodriguez, Ervin, and Mitchell-Jones have presented sufficient evidence for a jury to conclude that they justifiably relied on Ford’s omissions concerning the MFT defect when they purchased their vehicle.

This order disposes of Docket No. 341.

IT IS SO ORDERED.

Dated: February 14, 2018

EDWARD M. CHEN
United States District Judge
