UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

DOUGLAS MAURICE SHORTRIDGE,
Plaintiff,
v.
FOUNDATION CONSTRUCTION
PAYROLL SERVICE, LLC, et al.,
Defendants.

Case No. [14-cv-04850-JCS](#)

**ORDER DENYING MOTION TO
ALTER OR AMEND JUDGMENT**

Re: Dkt. No. 76

I. INTRODUCTION

Plaintiff Douglas Shortridge, pro se, brought this action against Defendants Foundation Construction Payroll Service, LLC (d/b/a Payroll4Construction.com), Foundation Software, Inc., and Associated Builders and Contractors, Inc. (collectively, the “Foundation Defendants”), as well as related cases against additional defendants, alleging infringement of U.S. Patent No. 8,744,933 (the “’933 patent”). The Foundation Defendants and the defendants in a related case (the “ADP Defendants”) each brought a motion for judgment on the pleadings, arguing that the ’933 patent was invalid because it was directed to ineligible subject matter—an abstract idea—and therefore fell outside the scope of patent protection under 35 U.S.C. § 101 and the Supreme Court’s decision in *Alice Corporation Pty. Ltd. v. CLS Bank International*, 134 S. Ct. 2347 (2014). Shortridge settled his case against the ADP Defendants before the motions were resolved, but the Court granted judgment in this case for the Foundation Defendants and held the ’933 patent invalid. *See* Order (dkt. 73).¹

Shortridge now moves to alter or amend the judgment pursuant to Rule 59(e) of the Federal Rules of Civil Procedure, claiming various procedural and substantive errors. The Court

¹ *Shortridge v. Found. Constr. Payroll Serv., LLC*, No. 14-cv-04850-JCS, 2015 WL 1739256 (N.D. Cal. Apr. 14, 2015).

1 previously found the matter suitable for resolution without oral argument and vacated the hearing
2 scheduled for June 19, 2015. *See* dkt. 83. For the reasons stated below, Shortridge’s Motion is
3 DENIED.²

4 **II. BACKGROUND**

5 This Order assumes the parties’ familiarity with the ’933 patent, the history of this action,
6 key decisions of the Supreme Court and the Federal Circuit addressing the “abstract idea”
7 exception to patent eligibility under § 101, and this Court’s previous Order, which discusses all of
8 the above in more detail.

9 In brief, Shortridge applied for and received the ’933 patent, which claimed various
10 methods and systems related to the creation of certified payroll records (“CPRs”) and other aspects
11 of payroll processing for public works construction projects. He brought a number of actions in
12 this Court alleging infringement by various parties, including this case against the Foundation
13 Defendants. The Foundation Defendants moved for judgment on the pleadings pursuant to Rule
14 12(c) of the Federal Rules of Civil Procedure, arguing that the ’933 patent fell outside the scope of
15 patent eligibility under § 101, and was therefore invalid, because it was directed to an abstract
16 idea. The ADP Defendants filed a similar motion, and the Court ordered the parties to coordinate
17 a schedule to hear both motions on the same date.³ Shortridge filed a consolidated opposition, and
18 the Foundation Defendants and ADP Defendants each filed a reply. With leave of the Court,
19 Shortridge filed a surreply. Shortridge and the ADP Defendants settled their dispute before the
20 motions were resolved.

21 Both sets of defendants relied heavily on the Supreme Court’s decision in *Alice*, which
22 held that patents describing a system of computer-based intermediated settlement in financial
23 transactions were invalid because they were directed to an ineligible abstract idea. *See Alice*, 134
24 S. Ct. at 2352, 2360. The Supreme Court applied a two-step framework set forth in its earlier
25

26 ² The parties have consented to the jurisdiction of the undersigned magistrate judge for all
27 purposes pursuant to 28 U.S.C. § 636(c).

28 ³ The schedule ultimately adopted allowed Shortridge thirty-seven days from the date of the
Foundation Defendants’ motion to file his opposition—more than twice the standard time
provided by the Court’s local rules.

1 decision in *Mayo Collaborative Services v. Prometheus Laboratories, Inc.*, 132 S. Ct. 1289
 2 (2012): first, whether the claims at issue are directed to a patent-ineligible concept, and second, if
 3 so, whether they add any “inventive element” to that concept sufficient to bring it within the realm
 4 of patent protection. *See Alice*, 134 S. Ct. at 2355 (summarizing *Mayo*). At the second step, the
 5 *Alice* Court notably held that merely requiring “a generic computer to perform generic computer
 6 functions” did not suffice. *See id.* at 2359. Because the patents did “not, for example, purport to
 7 improve the functioning of the computer itself [or] effect an improvement in any other technology
 8 or technical field,” the Court held that they did not add an inventive element to elevate the claims
 9 beyond ineligible abstract ideas. *Id.* at 2359–60. In the wake of *Alice*, the Federal Circuit has
 10 invalidated a number of other computer-based patents under the “abstract ideas” doctrine. *See*
 11 *generally, e.g., Content Extraction & Transmission LLC v. Wells Fargo Bank, N.A.*, 776 F.3d
 12 1343 (Fed. Cir. 2014) (patents describing a method of extracting, recognizing, and storing digital
 13 data from scanned hard copy documents); *Ultramercial, Inc. v. Hulu, LLC*, 772 F.3d 709 (Fed.
 14 Cir. 2014) (patent reciting eleven steps to receive and display copyrighted material on the internet
 15 in exchange for viewers watching advertisements, and to receive payment from the advertiser).

16 Relying on the authority discussed above, among other case law, the Court held in this case
 17 that the ’933 patent was directed to the abstract idea of cataloging labor data and failed to add an
 18 inventive element beyond using generic computer components to perform generic computer
 19 functions. *See Order* at 16–21. The Court therefore found the ’933 patent invalid as outside the
 20 scope of § 101, granted the Foundation Defendants’ motion, and entered judgment in their favor.
 21 *See id.* at 23.

22 Shortridge now moves to alter or amend that judgment pursuant to Rule 59(e). *See*
 23 *generally Mot. (dkt. 76)*. He first argues that the Court erred by allowing the Foundation
 24 Defendants and ADP Defendants to file separate reply briefs after Shortridge filed a consolidated
 25 opposition. *Id.* at 3–6. Shortridge believes that the two motions were consolidated pursuant to
 26 Rule 42 of the Federal Rules of Civil Procedure, and that separate replies were therefore improper.
 27 *See id.* at 2, 5. Substantively, Shortridge argues that the Court’s Order failed to adequately
 28 address the ’933 patent’s potential for preemption, and that the Court inadequately or erroneously

1 addressed a number of terms and concepts in the '933 patent, including “core payroll,” “payroll
2 technology,” and the creation of CPRs “in conjunction with and simultaneously with” core payroll
3 processing. *Id.* at 6–10. He also contends that the Court improperly combined the two steps of
4 *Alice*’s analytical framework, and that the Court failed to hold the Foundation Defendants to their
5 burden of persuasion. *Id.* at 10–12. Finally, Shortridge argues that the judgment should be set
6 aside pending resolution of another case presently on appeal before the Federal Circuit. *Id.* at 13.

7 The Foundation Defendants respond that Shortridge’s present Motion improperly “seeks to
8 relitigate matters previously considered and decided.” Opp’n (dkt. 81) at 2. They go on to argue
9 that the Court specifically addressed each of Shortridge’s present substantive arguments either in
10 its previous Order or at the hearing on the motion for judgment, *see id.* at 3–6, and that the mere
11 possibility that a pending appellate case could address relevant issues of law is not a reason to set
12 aside judgment, *id.* at 6–7. Finally, the Foundation Defendants argue that Shortridge’s present
13 Motion misunderstands the nature of related cases, as opposed to matters consolidated under Rule
14 42, and that even if there had been error in allowing unconsolidated reply briefs, Shortridge
15 suffered no prejudice as a result of that procedural issue. *Id.* at 7–9.

16 In his present Reply, Shortridge addresses only the issue of the Defendants’ unconsolidated
17 reply briefs, and does not pursue any of the other arguments from his Motion. *See generally*
18 Reply (dkt. 82).

19 **III. ANALYSIS**

20 **A. Legal Standard**

21 Rule 59(e) provides that a party may file a “motion to alter or amend a judgment.” Fed. R.
22 Civ. P. 59(e). The Ninth Circuit has explained the standard for a motion under Rule 59(e) as
23 follows:

24 “Since specific grounds for a motion to amend or alter are not listed
25 in the rule, the district court enjoys considerable discretion in
26 granting or denying the motion.” *McDowell v. Calderon*, 197 F.3d
27 1253, 1255 n.1 (9th Cir. 1999) (en banc) (per curiam) (internal
28 quotation marks omitted). But amending a judgment after its entry
remains “an extraordinary remedy which should be used sparingly.”
Id. (internal quotation marks omitted). In general, there are four
basic grounds upon which a Rule 59(e) motion may be granted: (1)
if such motion is necessary to correct manifest errors of law or fact
upon which the judgment rests; (2) if such motion is necessary to

1 present newly discovered or previously unavailable evidence; (3) if
2 such motion is necessary to prevent manifest injustice; or (4) if the
3 amendment is justified by an intervening change in controlling law.
4 *Id.*

5 *Allstate Ins. Co. v. Herron*, 634 F.3d 1101, 1112 (9th Cir. 2011). This Rule “may not be used to
6 relitigate old matters, or to raise arguments or present evidence that could have been made prior to
7 the entry of judgment.” *Exxon Shipping Co. v. Baker*, 554 U.S. 471, 485 n.5 (2008) (citation
8 omitted). In this case, Shortridge relies mainly on the first and third grounds for relief, claiming
9 manifest error and injustice. *See* Mot. at 2.

10 **B. Defendants’ Separate Replies**

11 Shortridge argues that it was unfair to allow the Foundation Defendants and the ADP
12 Defendants to file separate reply briefs after Shortridge filed a consolidated opposition brief. *See*
13 Mot. at 3–6. This appears to be Shortridge’s primary argument for relief, as it is the only
14 argument addressed in his Reply. *See generally* Reply.

15 Shortridge had ample opportunity to raise this argument before the Court entered judgment
16 for the Foundation Defendants, either in his surreply—which the Court granted to leave to file and
17 considered in reaching its decision—or at the hearing on Defendants’ motion for judgment. He
18 failed to do so before his present Motion, filed nearly one month after the entry of judgment.
19 Accordingly, because the argument “could have been made prior to the entry of judgment,”
20 Shortridge cannot raise it for the first time after judgment under Rule 59(e). *See Exxon Shipping*,
21 554 U.S. at 485 n.5. To the extent that Shortridge bases his motion on Defendants filing separate
22 replies, it is denied as procedurally improper.

23 Further, even if the argument had been properly raised, there is no indication of any error
24 by the Court or prejudice to Shortridge, much less the “manifest error” or “manifest injustice”
25 required for relief under Rule 59(e). *See Allstate*, 634 F.3d at 1112. Contrary to Shortridge’s
26 assertions, the Court did not consolidate the two actions or the two motions pursuant to Rule 42.
27 Although Shortridge discussed consolidation at the February 13, 2015 case management
28 conference, the Court merely “ask[ed] [the parties] to work out a scheduled coordinating the other
hearing with this case.” Feb. 13, 2015 Tr. (dkt. 79) at 6:11–12. The Court did not order
Shortridge to file a consolidated opposition to the two *Alice* motions, did not order Defendants to

1 file a consolidated reply, and did not invoke Rule 42 in any way. *See id.* Shortridge is correct that
2 the scheduling order proposed by Defendants on February 26, 2015 and adopted by the Court the
3 following day uses the singular terms “opposition” and “reply” in setting deadlines for “Shortridge
4 to file opposition to *Alice* motions” and “Defendants to file reply to *Alice* motions.” *See* dks. 60,
5 62. However, the Court would require a far more explicit indication of Defendants’ intent before
6 construing that proposed schedule as waiving their rights to file separate replies, and certainly
7 would not so casually deprive Shortridge of his prerogative to respond separately to each motion.
8 Any confusion caused by the proposed and adopted scheduling order is regrettable, but does not
9 warrant setting aside the judgment.

10 Even if the scheduling order was misleading, Shortridge was not prejudiced in any way
11 that would justify the extraordinary remedy of post-judgment relief. The Court’s Order granting
12 the Foundation Defendants’ motion for judgment does not rely on or even cite the ADP
13 Defendants’ reply brief. *See generally* Order. To the extent that Shortridge nevertheless believes
14 Defendants received an unfair advantage by filing two reply briefs, or that he was improperly
15 constrained to a single opposition brief, any such harm was cured by the Court allowing
16 Shortridge to file a surreply. *See id.* at 1 (granting leave to file surreply); *see generally* Surreply
17 (dkt. 60). Given that Shortridge did not see fit to raise the issue of dual reply briefs in his surreply,
18 at the hearing, or in any other manner before entry of judgment, his present claim of severe
19 prejudice rings hollow.

20 The Court finds neither manifest error in its administration of the case nor manifest
21 injustice in the ADP Defendants and Foundation Defendants filing separate reply briefs. Even
22 setting aside the procedural impropriety of Shortridge waiting until after judgment to raise it, this
23 issue provides no basis for relief under Rule 59(e).

24 **C. *Alice* Analysis**

25 Shortridge raises three categories of purported errors in the Court’s analysis of the ’933
26 patent under *Alice*: failure to adequately address the potential for preemption, failure to properly
27 consider the ’933 patent’s relationship to terms and concepts such as “core payroll processing” and
28 “payroll technology,” and failure to adequately distinguish the two steps of the *Alice* analysis. *See*

1 Mot. at 6–11. Shortridge does not pursue or elaborate on any of these arguments in his Reply.

2 All of these arguments are improper attempts to “relitigate old matters, or to raise
3 arguments or present evidence that could have been made prior to the entry of judgment.” *See*
4 *Exxon Shipping*, 554 U.S. at 485 n.5. Shortridge could have, and in many cases did, raise these
5 arguments in his opposition brief and surreply and at the hearing on the motion for judgment.
6 They therefore provide no basis for post-judgment relief under Rule 59(e), and are denied on that
7 basis. The Court nevertheless briefly addresses the merits of each argument below.

8 **1. Preemption**

9 Shortridge asserts that the Court’s Order erred by “only vaguely and without context
10 treat[ing] the issue of whether the ’933 patent risks unlawful preemption of the abstract idea
11 ‘cataloging labor data.’” Mot. at 6–7 (citing Order at 21) (emphasis omitted).

12 Shortridge correctly notes that, in *Alice*, the Supreme Court “described the concern that
13 drives this exclusionary principle [against patenting abstract ideas] as one of pre-emption.” *Alice*,
14 134 S. Ct. at 2354. The concern that motivates the test, however, is not the same as the test itself.
15 The test set out in *Mayo* and *Alice* is first, whether the “whether the claims at issue are directed to
16 a patent-ineligible concept,” and second, “whether [the claim] contains an “inventive concept”
17 sufficient to ‘transform’ the claimed abstract idea into a patent-eligible application.” *Id.* at 2355,
18 2357 (citation omitted). While courts must “must distinguish between patents that claim the
19 ‘buildin[g] block[s]’ of human ingenuity and those that integrate the building blocks into
20 something more,” *id.* at 2354 (citation omitted), no part of the *Alice* test requires a court to
21 examine the scope of any specific patent’s potential for preemption.

22 The Court’s previous Order properly considered whether the ’933 patent was directed to an
23 abstract idea and whether there was “something more” that could bring it within the scope
24 eligibility. *See* Order at 16–21. The Court held that the ’933 patent was directed to the idea of
25 cataloging labor data (and noted Shortridge’s concession that it was directed to an abstract idea),
26 *id.* at 16–19, and held that it failed to add anything more than generic computer technology, which
27 is not sufficient under *Alice*, *id.* at 19–21 (citing, *e.g.*, *Alice*, 134 S. Ct. at 2359–60). That alone is
28 enough to find the ’933 patent invalid as outside the scope of § 101, regardless of how broad or

1 narrow its potential for preemption.

2 The Court did, however, also note the '933 patent's "potential to preempt virtually any use
3 of relational databases (a standard method of organizing computer-based data) in the public works
4 labor context." *Id.* at 21. Although Shortridge now asserts that the extent of the Court's
5 preemption analysis was insufficient, he notably fails to offer any argument whatsoever rebutting
6 the Court's conclusion—that the '933 patent could "preempt virtually any use of relational
7 databases . . . in the public works labor context." *Id.*; *see also* Mot. at 6–7. The Court therefore
8 finds no "manifest error" or "manifest injustice" justifying the "extraordinary remedy" of post-
9 judgment relief under Rule 59(e). *See Allstate*, 634 F.3d at 1112.

10 **2. "Core Payroll" and "Payroll Technology"**

11 Shortridge makes a number of arguments generally related to the Court's treatment of the
12 concepts of "core payroll" and "payroll technology" in relation to the '933 patent. *See* Mot. at
13 7–10.

14 First, he argues that the Court did not adequately consider references in various claims of
15 the '933 patent to producing CPRs and other reports "in conjunction with and simultaneously
16 with" core payroll processing. *Id.* at 7–8. Shortridge offers no coherent explanation for why the
17 use of that phrase should render his patent valid. The Court held that the '933 patent is directed to
18 the abstract idea of "cataloging labor data" using a computer, a form of "categorical data
19 storage" and "electronic recordkeeping—one of the most basic functions of a computer,"
20 ineligible for patent protection under Supreme Court and Federal Circuit precedent. *See* Order at
21 17, 20, 23 (quoting *Alice*, 134 S. Ct. at 2359; *Cyberfone Sys., LLC v. CNN Interactive Grp., Inc.*,
22 558 F. App'x 988, 992 (Fed. Cir. 2014)). Basic multitasking does not "override[] the routine and
23 conventional" operation of a computer. *Cf. DDR Holdings, LLC v. Hotels.com, L.P.*, 773 F.3d
24 1245, 1258 (Fed. Cir. 2014). Nor does it "purport to improve the functioning of the computer
25 itself [or] effect an improvement in any other technology or technical field." *See Alice*, 134 S. Ct.
26 at 2359–60. Accordingly, the fact that the '933 patent describes a system to tailor labor data for
27 one purpose "in conjunction with and simultaneously with" another purpose does not, in itself,
28

1 bring it within the realm of eligibility under § 101.⁴

2 Second, Shortridge argues that the Court’s Order misconstrued the relationship between
3 public works payroll processing and the creation of CPRs. Mot. at 8–9. He focuses on the
4 Court’s statement that “[c]ertain elements of CPR reporting are universally required for any
5 payroll processing,” and from that infers that “the court understands the invention to be saying, in
6 effect, that payroll for public works *cannot be processed without* first (or even simultaneously)
7 producing CPRs”—a conclusion that Shortridge characterizes as “dead wrong.” Mot. at 8–9
8 (quoting Order at 2). Shortridge misinterprets the Court’s statement. The Court’s understanding
9 was, and remains, merely that core payroll administration and the creation of CPRs draw on some
10 common data elements, such as the number of hours worked in a given period, as well as other
11 data that might be specific to one application or the other. Shortridge does not suggest anything to
12 the contrary in his current Motion, nor does he explain how any misunderstanding of this issue
13 would undermine the Court’s conclusion that the ’933 patent describes an application of routine
14 computerized recordkeeping that is ineligible for patent protection.

15 Third, Shortridge asserts that “a key element of the invention, ‘core payroll’, is not
16 separately treated” in the Court’s Order, and inquires whether that concept is “embodied in the
17 Court’s abstract idea; ‘organizing labor data.’” *Id.* at 9.⁵ In short, yes, it is. The Court’s previous
18 Order specifically rejected Shortridge’s argument that various applications of the ’933 patent,
19 including “payroll processing” and “producing payroll records and reports for public works
20 processing,” constituted distinct abstract ideas, and held instead that “even viewing the claims in
21 the light most favorable to Shortidge, the ’933 patent is directed to the unitary abstract idea of
22 cataloging labor data.” Order at 17. The Court went on to note that “[e]ven if that were not so . . .
23 the Court is aware of no case holding that merely combining two or three abstract ideas brings a
24 patent within the scope of § 101,” and held that “using routine organization of data to serve a
25

26 ⁴ As the Foundation Defendants note in their Opposition, the Court rejected this very argument at
27 the hearing. *See* Opp’n at 3–4 (quoting Apr. 3, 2015 Tr. (dkt. 80) at 17:22–18:24).

28 ⁵ Shortridge acknowledges that this “issue may never have been treated extensively in Shortridge’s
Response or surreply.” Mot. at 9. Arguments that “could have been made prior to the entry of
judgment” cannot support a motion under Rule 59(e). *See Exxon Shipping*, 554 U.S. at 485 n.5.

1 handful of different purposes” is not inherently patentable. *Id.* at 17, 18; *see also id.* at 16 (“The
2 fact that [labor] data can be used for multiple purposes—such as ‘core’ payroll processing,
3 generating CPRs, monitoring apprentice-to-journeyman rations, and calculating training fund
4 contributions—fails to negate the abstraction of the underlying process.”). Shortridge presents no
5 coherent argument why that conclusion is clearly erroneous.

6 Finally, Shortridge argues that the Court failed to properly recognize “Payroll Technology”
7 as a technical field, or at least failed to “meaningfully” address the issue. *See Mot.* at 9–10. In its
8 previous Order, the Court noted that although “many employers now use technological methods to
9 track [employees’] hours,” the ’933 patent itself acknowledges that employers are also capable of
10 doing so using non-technological means, and have done so for decades. *Order* at 17. The Court
11 also observed that Shortridge’s argument—essentially, that modern payroll management is so
12 dominated by technology that any patent related to that field satisfies § 101—is not consistent with
13 *Alice*. *See id.* In that case, the Supreme Court held that a patent for computerized intermediation
14 of financial transactions was invalid as directed to an abstract idea, even though the modern
15 financial industry is, if anything, rooted even more firmly in technology than modern payroll
16 processing. *See id.* (discussing *Alice*, 134 S. Ct. at 2356). Shortridge’s present argument that
17 “Payroll Technology is a category unto itself as evidenced by a simple search of the term” does
18 not alter that conclusion. *See Mot.* at 10.

19 **3. Purported Conflation of Steps**

20 Shortridge contends that the Court erred by conflating or coalescing the two analytical
21 steps set forth in *Mayo* and *Alice*. *Mot.* at 10–11. Although the Court’s previous Order explicitly
22 analyzed each step separately, *see Order* at 16–21, Shortridge focuses on the Court’s
23 acknowledgment that “[s]ome courts have suggested that these two steps tend to coalesce in their
24 application,” and the Court’s reference to “reasons previously discussed” at the outset of its
25 analysis of the second step. *See Mot.* at 10–11; *Order* at 12, 19.

26 The confusion here stems from Shortridge’s own argument, in opposition to Defendants’
27 *Alice* motions, that the ’933 patent withstood *Alice* because it was directed to “a plurality of
28 abstract ideas.” *See Order* at 17 (quoting Shortridge’s opposition brief). That argument could be

1 construed as an issue at the first step: that the patent is not directed to *an* abstract idea, because it
2 is instead directed to *many* abstract ideas. It could also be construed as an argument for the second
3 step: that although the patent is directed to an abstract idea, it also adds “something more”—
4 additional abstract ideas. Because the various permutations of the argument are intertwined, the
5 Court addressed the “plurality of abstract ideas” issue primarily in the context of the first step,
6 determining that the entire patent was essentially directed to the single abstract idea of cataloging
7 labor data, and that even if there were a plurality of abstract ideas, that would not satisfy § 101.
8 *Id.* at 17–18. At the second step, the Court referred back to its earlier analysis to reaffirm that the
9 “something more” required by *Alice* does not mean more abstract ideas, and then went on to
10 determine that the ’933 patent adds nothing *else* more besides generic computer hardware and
11 software, which is also insufficient to survive *Alice* scrutiny. *Id.* at 19–21; *see also id.* at 23
12 (summarizing Supreme Court and Federal Circuit precedent regarding generic computer
13 technology). Shortridge’s present Motion does not identify any manifest error in the Court’s
14 application of *Alice*’s analytical framework. Moreover, Shortridge fails to articulate how a
15 different analytical structure would have led to the denial of the Foundation Defendants’ motion
16 for judgment.

17 **D. Burden of Persuasion**

18 Shortridge also argues that the Court failed to hold the Foundation Defendants to their
19 burden of persuasion that the ’933 patent is invalid. Mot. at 12. The Court determined that in
20 evaluating a motion for judgment on the pleadings based on *Alice* and § 101 ineligibility, “the
21 clear and convincing evidence standard is not applicable [but] Defendants, as the parties moving
22 for relief, still bear the burden of establishing that the claims are patent-ineligible.” Order at 11
23 (quoting *Modern Telecom Sys. LLC v. Earthlink, Inc.*, No. SA CV 14-0347-DOC, 2015 WL
24 1239992, at *7–8 (C.D. Cal. Mar. 17, 2015)). According to Shortridge, the Court’s Order was not
25 sufficiently explicit in crediting the Foundation Defendants with explaining why Shortridge’s
26 patent was directed to an ineligible abstract idea. *See* Mot. at 12 (“Foundation Construction
27 Payroll Services, Inc. et. [sic] al. are not referenced in this critical area of validity analysis even
28 once. Shortridge on the other hand is referenced some eighteen times.”).

1 This argument, like the arguments above, improperly seeks to “relitigate old matters.” *See*
2 *Exxon Shipping*, 554 U.S. at 485 n.5. Shortridge had ample opportunity to explain in his
3 opposition brief and at the hearing why he thought the Foundation Defendants failed to meet their
4 burden, and in fact made several arguments to that effect. The Court disagreed, holding that the
5 Foundation Defendants “have sufficiently explained that the ‘933 patent is directed to the abstract
6 and established business practice of organizing labor data to comply with public works law.”
7 Order at 22. The Court went on to explain that “the fact that Defendants in this case, the
8 defendants in the related *ADP* case, and now the Court each articulate the underlying abstract idea
9 somewhat differently is of little consequence.” *Id.* (citing *Tenon & Groove, LLC v. Plusgrade*
10 *S.E.C.*, No. CV 12-1118-GMS-SRF, 2015 WL 1133213, at *3 (D. Del. Mar. 11, 2015)). The
11 Court finds no manifest error or injustice in its conclusion that the Foundation Defendants met
12 their burden of establishing ineligibility.

13 **E. Pending Federal Circuit Litigation**

14 Finally, Shortridge argues that a case currently pending before the Federal Circuit “should
15 clarify the Alice/Mayo test when resolved.” Mot. at 13 (citing the pending case *McRo Inc. v.*
16 *Bandai Namco Games Am., Inc.*, No. 15-1080 (Fed. Cir.)). Although “an intervening change in
17 controlling law” may warrant amending or setting aside a judgment, *see Allstate*, 634 F.3d at
18 1112, the mere possibility of such a change does not. The judgment entered in this case was based
19 on applicable Supreme Court and Federal Circuit precedent. Shortridge has not identified any
20 actual change in the controlling law that would justify altering that judgment.

21 **IV. CONCLUSION**

22 For the reasons stated above, Shortridge has failed to identify any manifest error, manifest
23 injustice, newly discovered evidence, or change in controlling law. His present Motion is
24 therefore DENIED. *See Allstate*, 634 F.3d at 1112. The Court declines to alter the judgment
25 previously entered in favor of the Foundation Defendants.

26 **IT IS SO ORDERED.**

27 Dated: June 23, 2015

28 

JOSEPH C. SPERO
Chief Magistrate Judge
