UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

WORD TO INFO INC,
Plaintiff,
v.
GOOGLE INC.,
Defendant.

Case No. 15-cv-03486-WHO

**ORDER GRANTING MOTION FOR
LEAVE TO AMEND INFRINGEMENT
CONTENTIONS AND DENYING AS
MOOT MOTION TO STRIKE**

Re: Dkt. Nos. 115, 116, 129, 131, 138

INTRODUCTION

Plaintiff Word to Info, Inc. (“WTI”) brings these two separate lawsuits – one against defendant Facebook Inc. (“Facebook”) (No. 15-cv-03485-WHO) and the other against Google Inc. (“Google”) (No. 15-cv-03486-WHO) – accusing both defendants of infringing the same seven patents, United States Patent Nos. (1) 5,715,468 (“the ’468 patent”); (2) 6,138,087 (“the ’087 patent”); (3) 6,609,091 (“the ’091 patent”); (4) 7,349,840 (“the ’840 patent”); (5) 7,873,509 (“the ’509 patent”); (6) 8,326,603 (“the ’603 patent”); and (7) 8,688,436 (“the ’436 patent”). The patents-in-suit all share a specification and relate to natural language processing.

WTI moves for leave to amend its infringement contentions with respect to both Facebook and Google. Google moves to strike WTI’s original infringement contentions. For the reasons discussed below, WTI’s motions to amend are GRANTED, and Google’s motion to strike WTI’s original infringement contentions is DENIED AS MOOT.

BACKGROUND

I. WTI v. FACEBOOK

A. Basic Procedural History

WTI initiated its action against Facebook on December 14, 2015 in the United States District Court for the Northern District of Texas. Dkt. No. 1. On May 8, 2015, WTI served

1 Facebook with infringement contentions pursuant to the Northern District of Texas’s Amended
2 Miscellaneous Order No. 62, paragraph 3-1, which the parties describe as “substantively similar”
3 to this district’s Patent Local Rule 3-1. Joint Case Management Statement at 2-3, 13 (Dkt. No.
4 69). On July 23, 2015, the case was transferred to this district. Dkt. No. 49. The parties have
5 since continued to treat the infringement contentions served on May 8, 2015 as the operative
6 infringement contentions in the case.

7 During the initial case management conference on November 10, 2015, I set a schedule for
8 reducing the asserted claims and prior art references, requiring (1) WTI to preliminarily elect no
9 more than 10 claims per patent and 32 claims in total by December 14, 2015, and then to finally
10 elect no more than 5 claims per patent and 16 claims in total by 28 days after the claim
11 construction ruling; and (2) Facebook to preliminarily elect no more than 18 references per patent
12 and 50 references in total by February 5, 2016, and then to finally elect no more than nine
13 references per patent and 25 references in total by 14 days after WTI’s final election of asserted
14 claims. Dkt. No. 73.

15 At the end of the case management conference, Facebook asked to confirm “that in the
16 December date when we get the reduction in claims, it’s a full citation to the code that they’ve had
17 access to, these are final contentions at this point, . . . that’s what your Honor is anticipating.”¹
18 Hearing Tr. at 21 (Dkt. No. 78). I stated, “Under the local rules, that’s what I’m anticipating.” *Id.*
19 WTI added, “Final except for leave to amend with good cause,” and I responded, “Right.” *Id.*

20 The Civil Minutes issued following the case management conference set out the following
21 case management deadlines:

22 CLAIM CONSTRUCTION SCHEDULE

23 Invalidation Contentions:	February 5, 2016
24 Exchange of proposed terms:	February 19, 2016
25 Exchange of preliminary constructions:	February 26, 2016
26 Joint claim construction statement:	March 18, 2016

27 ¹ The parties joint case management statement included proposed deadlines for “Plaintiff Serves
28 Supplemental Infringement Contentions Selecting Up To 15 Claims, Meeting The Good Cause
Standard of Patent L.R. 3-6, To Add Citations To Core Technical Documents.” Dkt. No. 69 at 13.
WTI proposed no deadline at all, while defendants proposed November 2, 2015 with respect to
Facebook and December 14, 2015 with respect to Google. *Id.*

1 Complete claim construction discovery: April 15, 2016
Opening Brief: April 29, 2016
2 Response Brief: May 13, 2016
Reply Brief: May 27, 2016
3 Claim Construction Tutorial: June 10, 2016
Claim Construction Hearing: June 17, 2016

4 PRETRIAL SCHEDULE

5 Deadline to amend/add parties: December 31, 2015
6 Fact discovery cutoff: November 11, 2016
Expert disclosure: December 15, 2016
7 Expert rebuttal: February 16, 2017
Expert discovery cutoff: March 6, 2017
8 Dispositive Motions heard by: May 10, 2017
Pretrial Conference: September 11, 2017
9 Trial: October 10, 2017

10 Dkt. No. 73. Pursuant to stipulation by the parties, the deadline for serving invalidity contentions
11 was extended to February 12, 2016 for Facebook and to February 19, 2016 for Google, the
12 deadline for proposing terms for construction was extended to March 18, 2016, and the deadline
13 for submitting the joint claim construction statement was extended to April 1, 2016. Dkt. No. 84.

14 **B. WTI's Review of Source Code and Service of Amended Infringement
15 Contentions**

16 Starting in June 2015 – while the case was still pending in Texas – the parties exchanged
17 emails regarding a stipulated protective order without agreeing on a final draft. *See, e.g.*, Mead
18 Decl. Ex. A & Corrected Ex. H (Dkt. Nos. 97-2, 99-1). On July 8, 2015, Facebook sent WTI an
19 email stating,

20 Facebook is making available for inspection source code and
21 documents reflecting or containing source code at the offices of
22 Facebook's counsel Cooley LLP. Per our discussion earlier today,
the production is being made available for inspection subject to the
terms of the draft Protective Order last circulated by Facebook,
pending entry of a Protective Order by the Court. Please let us know
when you would like to schedule a review. Facebook is also
separately producing documents via secure FTP.

23 Mead Decl. Ex. B (Dkt. No. 97-3). WTI states that in light of the phrase “subject to the terms of
24 the draft Protective Order last circulated by Facebook, pending entry of a Protective Order by the
25 Court,” it understood the email to communicate that either “(1) the source code review would
26 remain ‘pending’ until ‘entry of a Protective Order by the Court,’ or (2) the source code would
27 only be available for inspection if WTI immediately conceded to Facebook’s revisions to the
28 protective order.” Reply at 3-4 (Dkt. No. 100). WTI did not respond to the email (or at least,

1 neither party discusses whether or how WTI responded to it) and did not then begin reviewing
2 Facebook’s source code. There is no evidence on record of any further discussions between the
3 parties regarding the terms of their protective order, and no protective order has been entered in
4 the case.

5 On September 24, 2015, WTI sent Facebook a letter stating that Facebook “has neither
6 produced any source code, nor made source code available for inspection.” Mead Decl. Ex. C
7 (Dkt. No. 97-4). In an email dated October 1, 2015, Facebook responded that its source code
8 “ha[s] been available for WTI’s review for nearly three months, since Facebook made [it]
9 available for inspection . . . on July 8, 2015.” Mead Decl. Ex. D (Dkt. No. 97-5). Facebook also
10 stated that if WTI provided amended infringement contentions by November 2, 2015, Facebook
11 would not oppose the amendment on the ground that WTI had not been diligent. *Id.*

12 WTI began reviewing Facebook’s source code on October 19, 2016. Saunders Facebook
13 Decl. ¶ 5 (Dkt. No. 89-1). According to the “Source Code Review Sign-In/Sign-Out Log,” WTI
14 reviewed the source code on October 19, 20, 23, and 30, 2015, for a total of approximately 17
15 hours. Mead Decl. Exs. E-F (Dkt. Nos. 97-6, 97-7).² WTI requested 57 pages of Facebook’s
16 source code in hard copy, which Facebook sent to WTI on October 29 and 30, 2015. Saunders
17 Facebook Decl. ¶ 6; Mead Decl. ¶ 10, Exs. L-M (Dkt. Nos. 97-13, 97-14).

18 On December 30, 2015, WTI served Facebook with amended infringement contentions,
19 which WTI described as “add[ing] citations to Facebook’s source code based on WTI’s source
20 code inspection.” Saunders Facebook Decl. Ex. M (Dkt. No. 89-14); Webb Decl. Ex. N (Dkt. No.
21 88-6). On January 5, 2016, Facebook sent WTI an email objecting to the amended infringement
22 contentions, asserting that they were both untimely and insufficient under Patent Local Rule 3-1.
23 *See* Mead Decl. Ex. N (Dkt. No. 97-15); Saunders Decl. ¶ 7.

24 On February 3, 2016, WTI served Facebook with a revised version of its amended
25 infringement contentions. Mead Decl. Ex. Q (Dkt. No. 97-18). Facebook objected again, this
26 time only on the ground of untimeliness. Saunders Decl. Ex. Y (Dkt. No. 89-25). The parties met
27

28 ² Facebook notes that WTI’s source code review on October 30, 2015 lasted only 7 minutes and
was limited to checking a file name the reviewer had failed to note. *Oppo.* at 4 (Dkt. No. 97).

1 and conferred on February 26, 2016 but were unable to resolve their dispute. Saunders Decl. Ex.
2 Z (Dkt. No. 89-26). WTI filed its motion for leave to amend on March 31, 2016. Dkt. No. 89.

3 **II. WTI v. GOOGLE**

4 The basic procedural history of *WTI v. Google* is identical to that of *WTI v. Facebook*. In
5 contrast with Facebook, however, Google did not make its source code available to WTI until in
6 or around December 2015, and WTI conducted its review of the source code between December 8
7 and 11, 2015. Saunders Google Decl. ¶ 8 (Dkt. No. 116-1). WTI received hard copies of
8 requested portions of Google’s source code on December 23, 2015 and January 12, 2016, and then
9 served Google with amended infringement contentions on January 20, 2016. Saunders Google
10 Decl. ¶ 9, Ex. P (Dkt. No. 116-15). Google objected on the ground that the amended infringement
11 contentions failed to provide reasonable notice of WTI’s infringement theories. Saunders Google
12 Decl. Ex. T (Dkt. No. 116-19). On February 11, 2016, WTI served Google with a revised version
13 of its amended infringement contentions. Saunders Google Decl. Ex. U (Dkt. No. 116-20). On
14 March 10, 2016, Google sent WTI a letter objecting to the revised version, again asserting that the
15 amended infringement contentions failed to provide reasonable notice of WTI’s infringement
16 theories. Saunders Google Decl. Ex. V (Dkt. No. 116-21). WTI filed its motion for leave to
17 amend on March 31, 2016, the same date it filed its motion in *WTI v. Google*. Dkt. No. 116.

18 **LEGAL STANDARD**

19 “Patent Local Rule 3 requires patent disclosures early in a case and streamlines discovery
20 by replacing the series of interrogatories that parties would likely have propounded without it.”
21 *ASUS Computer Int’l v. Round Rock Research, LLC*, No. 12-cv-02099-JST, 2014 WL 1463609, at
22 *1 (N.D. Cal. Apr. 11, 2014) (internal quotation marks and modifications omitted). The
23 disclosures required under Rule 3 are designed “to require parties to crystallize their theories of
24 the case early in the litigation and to adhere to those theories once they have been disclosed.”
25 *Nova Measuring Instruments Ltd. v. Nanometrics, Inc.*, 417 F. Supp. 2d 1121, 1123 (N.D. Cal.
26 2006). “They are also designed to provide structure to discovery and to enable the parties to move
27 efficiently toward claim construction and the eventual resolution of their dispute.” *Golden Bridge*
28 *Tech. Inc v. Apple, Inc.*, No. 12-cv-04882-PSG, 2014 WL 1928977, at *3 (N.D. Cal. May 14,

1 2014) (internal quotation marks omitted); *see also O2 Micro Int'l Ltd. v. Monolithic Power Sys.,*
2 *Inc.*, 467 F.3d 1355, 1365-66 (Fed. Cir. 2006) (“The local patent rules in the Northern District of
3 California [require] both the plaintiff and the defendant in patent cases to provide early notice of
4 their infringement and invalidity contentions, and to proceed with diligence in amending those
5 contentions when new information comes to light in the course of discovery. The rules thus seek
6 to balance the right to develop new information in discovery with the need for certainty as to the
7 legal theories.”).

8 Patent Local Rule 3-1 requires a party claiming patent infringement to serve infringement
9 contentions within 14 days of the initial case management conference. Patent L.R. 3-1. The
10 infringement contentions must include “[e]ach claim of each patent in suit that is allegedly
11 infringed by each opposing party, including for each claim the applicable statutory subsections of
12 35 U.S.C. § 271 asserted.” Patent L.R. 3-1(a). The party must also specify “where each limitation
13 of each asserted claim is found within each Accused Instrumentality,” and “[w]hether each
14 limitation of each asserted claim is alleged to be literally present or present under the doctrine of
15 equivalents.” Patent L.R. 3-1(c), (e). Rule 3-1 does not “require a plaintiff to prove its
16 infringement case.” *Tech. Licensing Corp. v. Grass Valley USA, Inc.*, No. 12-cv-06060-PSG,
17 2014 WL 3752108, at *2 (N.D. Cal. July 30, 2014) (internal quotation marks omitted). But “all
18 courts agree that the degree of specificity under [Rule 3-1] must be sufficient to provide
19 reasonable notice to the defendant why the plaintiff believes it has a reasonable chance of proving
20 infringement,” and to “raise a reasonable inference that all accused products infringe.” *Shared*
21 *Memory Graphics LLC v. Apple, Inc.*, 812 F. Supp. 2d 1022, 1025 (N.D. Cal. 2010) (internal
22 quotation marks omitted). Parties should include in their infringement contentions “all of the
23 theories of infringement that they in good faith believe they can assert.” *Apple Inc. v. Samsung*
24 *Elecs. Co.*, No. 12-cv-00630-PSG, 2013 WL 3246094, at *3 (N.D. Cal. June 26, 2013).

25 Patent Local Rule 3-6 permits amendment of infringement contentions only by court order,
26 and only upon a “timely showing of good cause.” Patent L.R. 3-6. Rule 3-6 lists several
27 examples of “circumstances that may, absent undue prejudice to the nonmoving party, support a
28 finding of good cause.” *Id.* These include the “[r]ecent discovery of nonpublic information about

1 the Accused Instrumentality which was not discovered, despite diligent efforts, before the service
2 of the Infringement Contentions.” *Id.* In determining whether a party has established good cause,
3 courts first look to whether the party has shown that it has acted with diligence. *See O2 Micro*,
4 467 F.3d at 1366. “[I]f the moving party was not diligent, the inquiry should end.” *Apple*, 2013
5 WL 3246094, at *1 (internal quotation marks omitted). On the other hand, “[i]f the court finds
6 that the moving party has acted with diligence, it must then determine whether the nonmoving
7 party would suffer prejudice if the motion to amend were granted.” *Id.* (internal quotation marks
8 omitted).

9 **DISCUSSION**

10 **I. WTI’S MOTION FOR LEAVE TO AMEND WITH RESPECT TO FACEBOOK**

11 Facebook’s principal argument against amendment is that WTI has not shown diligence.
12 *See Oppo.* at 8-14 (Dkt. No. 97). Facebook identifies three lapses in WTI’s efforts to amend:
13 (1) from July 8, 2015, when Facebook notified WTI that its source code was “being made
14 available for inspection subject to the terms of the draft Protective Order last circulated by
15 Facebook, pending entry of a Protective Order by the Court,” to October 19, 2015, when WTI
16 began its review of the source code; (2) from October 19, 2015 to December 30, 2015, when WTI
17 served Facebook with the initial version of its amended infringement contentions; and (3) from
18 December 30, 2015 to March 31, 2016, when WTI filed its motion for leave to amend. According
19 to Facebook, this timeline demonstrates that WTI was not diligent.

20 I disagree. WTI’s conduct was certainly close to the line of exhibiting a lack of diligence.
21 *See, e.g., Par Pharm., Inc. v. Takeda Pharm. Co.*, No. 13-cv-01927-PSG, 2014 WL 3704819, at
22 *1-2 (N.D. Cal. July 23, 2014) (four-month delay between discovery of new prior art references
23 and filing of motion for leave to amend was not diligent); *Power Integrations, Inc. v. Fairchild*
24 *Semiconductor Int’l, Inc.*, No. 09-cv-05235-MEJ, 2013 WL 4604206, at *4 (N.D. Cal. Aug. 28,
25 2013) (defendant was not diligent based on an unexplained two-month delay between the issuance
26 of the claim construction order and the date the defendant first notified the plaintiff that it would
27 seek leave to amend). But I am not convinced that the particular circumstances of this case justify
28 such a finding. Given the ambiguity in the language of the July 8, 2015 email, and the absence of

1 any additional communications between the parties regarding source code review until September
2 24, 2015, WTI's delay in beginning its review of Facebook's source code does not support the
3 conclusion that WTI was not diligent. WTI's delay in serving the initial version of its amended
4 infringement contentions also fails to show a lack of diligence. This case involves dozens of
5 asserted claims from seven different patents (each of which shares the same multi-hundred-page
6 specification), and the period of time between the start of WTI's source code review and the
7 service of its initial version of its amended infringement contentions included the winter holiday
8 season. In these circumstances, WTI's approximately ten-week delay is not unreasonable.
9 Finally, WTI's efforts after December 30, 2015 to resolve or narrow the amendment issue by
10 meeting and conferring with Facebook and revising its amended infringement contentions does
11 not indicate a lack of diligence. WTI should not be punished for good faith attempts to resolve
12 this issue without the need for extensive motion practice.³

13 As to prejudice, Facebook does not argue that it would be prejudiced in these proceedings
14 by the requested amendment, and there is no indication that it would be: WTI served its amended
15 infringement contentions and moved for leave to amend months before claim construction, the fact
16 and expert discovery cutoffs are months away, and Facebook does not identify any particular
17 aspects of the amended infringement contentions that do more than flesh out the infringement
18 theories WTI set out in its original infringement contentions. Facebook argues instead that it
19 would be prejudiced because the deadline to petition for inter partes review ("IPR") expired on
20 December 17, 2015 and it "needed to see WTI's [amended infringement contentions] accounting

21
22 ³ Facebook also argues that WTI was not diligent because it did not serve its amended
23 infringement contentions by either August 8, 2015 or December 14, 2015. *See* *Oppo*. at 8-9. The
24 August 8, 2015 deadline is based on a proposed case management schedule submitted by the
25 parties when the case was pending in Texas, and which was not entered by the Texas court. *See*
26 *Dkt. Nos. 40, 41*. Facebook does not explain why that deadline would be effective ever, much less
27 after the case was transferred to this district. The December 14, 2015 deadline is based on
28 Facebook's question at the case management conference whether "in the December date when we
get the reduction in claims, it's a full citation to the code that they've had access to, these are final
contentions at this point, . . . that's what your Honor is anticipating." *Hearing Tr.* at 21. My
response to this question did not require WTI to serve amended infringement contentions by
December 14, 2015. Facebook's question was ambiguous at best and said nothing about a
deadline for serving amended infringement contentions. My understanding of the question was
that Facebook wanted to confirm that WTI should include citations to the source code in its
amended infringement contentions, not that it should serve those contentions by a particular date.

1 for the source code in order to meaningfully evaluate and petition for IPR.” *Oppo*. at 14.

2 Again, I am not convinced. Even assuming that Facebook is correct that WTI’s particular
3 infringement theories materially impact its ability to “meaningfully evaluate and petition for IPR,”
4 it is not clear why Facebook could not have made an informed decision about petitioning for IPR
5 based on WTI’s original infringement contentions. *Cf. Adaptix, Inc. v. Dell Inc.*, 2015 U.S. Dist.
6 LEXIS 23134, *25 (N.D. Cal. Feb. 24, 2015) (finding prejudice based on the plaintiff’s request to
7 amend its infringement contentions after the defendant’s IPR deadline, where the plaintiff sought
8 to shift its infringement accusations to a wholly different functionality of the defendant’s product).
9 Facebook appears to argue that it needed to see the specific source code citations in WTI’s
10 amended infringement contentions before being able to make an informed decision about
11 petitioning for IPR. But Facebook does not explain how it would have approached the IPR
12 process differently had it received WTI’s amended infringement contentions before the IPR
13 deadline. Nor does it identify any particular aspect of the original or amended infringement
14 contentions that impacts the IPR analysis. WTI’s motion for leave to amend its infringement
15 contentions with respect to Facebook is GRANTED.

16 **II. WTI’S MOTION FOR LEAVE TO AMEND WITH RESPECT TO GOOGLE**

17 WTI’s motion for leave to amend its infringement contentions with respect to Google is
18 also GRANTED. Google’s principal argument against amendment is that WTI’s amended
19 infringement contentions fail to provide reasonable notice of WTI’s infringement theories, and
20 that Google would be prejudiced by amendment as a result. *See Oppo*. at 6-20 (Dkt. No. 129-4).
21 The problem with this argument is that Google’s actual critique of WTI’s amended infringement
22 contentions is not so much that the contentions are unclear, but that they lack merit and include
23
24
25
26
27
28

1 alternative infringement theories.⁴ *See id.* Neither of these alleged defects supports denying
2 WTI’s motion for leave to amend. The merits of WTI’s infringement theories will be tested at
3 summary judgment and trial, not on a motion for leave to amend. In addition, Google cites no
4 authority to support its apparent position that infringement contentions cannot include alternative
5 infringement theories. Parties should include in their infringement contentions “all of the theories
6 of infringement that they in good faith believe they can assert.” *Apple*, 2013 WL 3246094, at *3.
7 Following this principle, I see no reason why a party with a good faith basis for asserting
8 alternative infringement theories should not include each of those theories in its infringement
9 contentions.

10 Google’s attack on WTI’s diligence in moving for leave to amend is also unpersuasive.
11 *See Oppo.* at 20-25. WTI may amend its infringement contentions against Google.

12 **III. GOOGLE’S MOTION TO STRIKE**

13 Google’s motion to strike is aimed at WTI’s original infringement contentions. Mot. at 1
14 (Dkt. No. 131). In light of the ruling on WTI’s motion for leave to amend with respect to Google,
15 the motion to strike is DENIED AS MOOT.

16 **IV. SEALING MOTIONS**

17 In conjunction with its motion for leave to amend with respect to Facebook, WTI moved to
18 seal the entirety of its amended infringement contentions (submitted as Exhibits A and N to the
19 Saunders Facebook Declaration) on the ground that they contain Facebook’s confidential source
20 code. Dkt. No. 88. Facebook then submitted a declaration pursuant to Civil Local Rule 79-5(e)
21 seeking to seal only certain portions of the amended infringement contentions. Dkt. No. 94. The
22

23 ⁴ Two exceptions to this observation are Google’s complaints that the amended infringement
24 contentions use open-ended placeholder phrases like “such as” and “for example,” and that the
25 amended infringement contentions fail to provide claim charts for Google Chrome, Google
26 Search, and Google Now. *See Oppo.* at 18-19. WTI is advised that its use of open-ended
27 placeholder phrase like “such as” and “for example” will not enable it to rely on infringement
28 theories not specifically articulated in its infringement contentions. *Cf. Apple Inc. v. Samsung
Elects. Co.*, No. 12-cv-00630-PSG, 2013 WL 3246094, at *9 (N.D. Cal. June 26, 2013) (striking
the phrase “and/or other processes” from infringement contentions). With respect to Google
Chrome, Google Search, and Google Now, WTI must provide claim charts for these products if it
wants to accuse them of infringement. WTI shall serve any such claim charts on Google within
seven days of the date of this Order.

1 portions identified by Facebook may remain under seal. Within seven days of the date of this
2 Order, Facebook shall file redacted versions of the amended infringement contentions with only
3 those portions identified in its declaration redacted. Facebook is not required to file courtesy
4 copies of these redacted versions. The documents filed under seal at Dkt. No. 86 may also remain
5 under seal.

6 In conjunction with its motion for leave to amend with respect to Google, WTI moved to
7 seal the entirety of its amended infringement contentions (submitted as Exhibits B and R to the
8 Saunders Google Declaration) on the ground that they contain Google's confidential source code.
9 Dkt. No. 115. WTI also moved to seal portions of two letters (submitted as Exhibits T and V to
10 the Saunders Google Declaration). Google then submitted a declaration pursuant to Civil Local
11 Rule 79-5(e) seeking to seal only certain portions of the amended infringement contentions and
12 letters. Dkt. No. 120. The portions of the amended infringement contentions identified by Google
13 may remain under seal. Within seven days of the date of this Order, Google shall file redacted
14 versions of the amended infringement contentions with only those portions identified in its
15 declaration redacted. Google is not required to file courtesy copies of these redacted versions.
16 The documents filed under seal at Dkt. No. 113 may also remain under seal.

17 On the other hand, Google has not established good cause to seal the entirety of the
18 requested portions of the letters. If Google wants any portions of the letters to remain under seal,
19 it shall submit an amended declaration within seven days of the date of this Order narrowing its
20 sealing requests and/or articulating specific reasons justifying its sealing requests.

21 WTI also moved to seal portions of its reply in support of its motion for leave to amend
22 with respect to Google. Dkt. No. 138. Google has not established good cause to seal the entirety
23 of these portions either. *See* Dkt. No. 142. If Google wants any of these portions to remain under
24 seal, it shall submit an amended declaration within seven days of the date of this Order narrowing
25 its sealing requests and/or articulating specific reasons justifying its sealing requests.

26 Finally, in conjunction with its opposition to WTI's motion for leave to amend, and in
27 conjunction with its own motion to strike and reply in support of that motion, Google moved to
28 seal various portions of its briefing and associated exhibits. Dkt. No. 129. Google has not

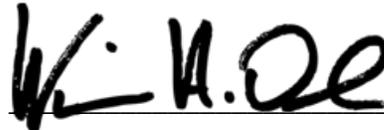

1 established good cause to support any of these sealing requests. If Google wants any of these
2 documents or portions thereof to remain under seal, it shall submit an amended declaration within
3 seven days of the date of this Order narrowing its sealing requests and/or articulating specific
4 reasons justifying its sealing requests.

5 **CONCLUSION**

6 For the foregoing reasons, WTI's motions for leave to amend its infringement contentions
7 are GRANTED with respect to both Facebook and Google, and Google's motion to strike is
8 DENIED AS MOOT.

9 **IT IS SO ORDERED.**

10 Dated: July 8, 2016
