Many thanks to Janine Adams of the Organize Your Family History site (<https://organizeyourfamilyhistory.com>). She published my answers to a series of intriguing questions about how I do genealogy. It was refreshing to think through the answers--and to peek back at what others have said in this series. Do enjoy!

Linda Balderson I read Janine Adams blog and was curious about Zotero. This sent me to your blog to try to learn more. I am looking forward to your book, because I am struggling to find a way to keep track of my research. If I can figure out how to use it, I think Zotero may be the tool will use. How soon will the book be available?

The Golden Egg Genealogist Thanks, Linda. Zotero doesn't do EE format, but does Chicago Manual of Style, on which EE is based. I will do a section in the book on how I store data in Zotero for later use in EE. Zotero becomes BIG storage--the place where you're collecting the lar... [See More](#)

We're in the countdown...the upgrade to Family Tree Maker 2017 will be available for \$39.95 (versus it's standard \$79.95) until this Sunday, October 1. I have been using it heavily since it came out of beta and went live this summer, and I have been very happy with it, especially with the Ancestry syncing. I'm very pleased with a feature that's been added to let you know whether Ancestry's server has been spotty, giving you a caution light to wait on your sync until its solid... [See More](#)

The Golden Egg Genealogist Certainly a solid product. Without Ancestry syncing it's off the table for me, but it has a very loyal base of users, which says a lot.

31w

Shiela Trantham-Garland Is this the personal tree that is installed on your personal computer or the ancestry online family tree?

31w

View 1 more reply

The Golden Egg Genealogist Right. Your tree can still be private, but this gives you access to it wherever you go, an off-site backup, and easy access to the resources of Ancestry, as you build your tree. I love having both available, because some things are more easily handled in Ancestry and some more easily in the desktop software. The sync technology then brings both sides up to date.

The Golden Egg Genealogist I much prefer the sync in FTM. I've got to ask myself now if RM has enough other bells & whistles to make me willing to sync a fact at a time.

Hi, everyone. I plan to be at the Institute of Genealogy and Historical Research at the University of Georgia starting Sunday. FamilySearch is hosting an expo Sunday afternoon. (I'll be there at the Alabama Genealogical Society table for portions of the afternoon.) They are opening evening sessions to the public (\$15, I think). Details at <http://ighr.gagensociety.org/ighr.../ighr-2017-evening-classes>. Anyone registered for Judy Russell's Course 3, see you there!

IGHR 2017 Evening Classes - IGHR

Wednesday, 12 July 2017, is the last day to order a printed syllabus for your registered course at \$20. A digital copy (pdf) of your course syllabus is included with tuition. All attendees will be emailed a temporary link to download a copy of their course syllabus at no additional cost.

I was excited to hear about RootsMagic's delivery of the long-promised TreeShare sync to Ancestry.com, but unfortunately, RM delivered it before it was adequately tested. I caution all to tiptoe into this with care -- and with test data. Don't damage your hard-earned real trees until RM has fixed the bugs. I've already hit nothing but bugs, by the way. At least it's a start...and one day, we can use it.

Beverly Lowrance I always had problems synching Ancestry to FTM. Things disappeared, were put with the wrong people, etc. There are always going to be bugs!

The Golden Egg Genealogist Minor bugs are indeed to be expected. This is a complete failure to operate, unfortunately, which has me concerned that it was poorly tested and could create more than typical damage. FTM syncing worked great for me most of the time, but now and then it... [See More](#)

The Golden Egg Genealogist I'm hearing a theory about why it's not working that makes sense. A TON of us all start trying RM7.5 at the same time, all trying to upload or download huge trees to Ancestry. We might be crashing Ancestry. Maybe we'll see a better result when the hubbub subsides.
