Hey there,

Made my flight with seven seconds to spare - plenty of time.

I really appreciate the time to be with you and your members today. Jamie, I want to make sure that I follow-up on any questions or matters in a more complete fashion, to you, your staff, your membership, however you'd like. Just let me know. I'm worried that the commercialism discussion became too uncomfortable to some - but I was seriously prepared to stay as long as possible at that point because of the tone Father used in his comments.

Attached is a copy of the presentation. Let me know if you need anything further on this. No problem.

Jamie, I respect you, the work you are doing, and the mountain you are climbing - with great success. I want to help. And I want to make sure today results in steps forwards, no matter what you might need in follow-up.

Finally, and without burdening you, at someone can you have someone e-mail me the names and e-mails of each of the people who were at my dinner table and at the bar last night? I'd like to follow-up with each to thank them. Obviously, this is not an urgent priority - just when time allows.

Thanks again.

g

# “COMMERCIALISM”

- The need to modernize standards with the times.
- Recognizing that the “horse is already not only out of the barn, it is in an entirely different state”
- Assuring that the role of the support of commercial entities is clearly stated, so that a “typical” consumer would understand.
- Providing institutional discretion.
