UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

FEDERAL TRADE COMMISSION,
Plaintiff,
v.
DIRECTV, INC., et al.,
Defendants.

Case No. 15-cv-01129-HSG

**ORDER GRANTING IN PART AND
DENYING IN PART MOTION FOR
JUDGMENT ON PARTIAL FINDINGS;
FINDINGS OF FACT AND
CONCLUSIONS OF LAW**

Re: Dkt. No. 396

On March 11, 2015, the Federal Trade Commission (“FTC”) brought this action alleging that Defendants DIRECTV and DIRECTV, LLC (collectively, “DIRECTV” or “Defendant”) violated Section 5(a) of the FTC Act, 15 U.S.C. § 45(a), as well as the Restore Online Shoppers Confidence Act (“ROSCA”), 15 U.S.C. §§ 8401 et seq. See Dkt. No. 1 (“Compl.”). A court trial was held in August 2017. At the close of the FTC’s presentation of its case-in-chief, DIRECTV moved for judgment on partial findings pursuant to Rule 52(c) of the Federal Rules of Civil Procedure, on the ground that the FTC failed to prove essential elements of its claims. Dkt. No. 396. Based on the evidence presented at trial, the arguments of the parties and the applicable law, the Court **GRANTS IN PART** DIRECTV’s motion. This memorandum opinion will constitute the Court’s Findings of Fact and Conclusions of Law pursuant to Rules 52(a) and (c).

I. BACKGROUND

A. Allegations

In this action the FTC challenges DIRECTV’s advertisement campaign for and sale of its subscription satellite television services. The FTC commenced its investigation in April 2010 when it served DIRECTV with a civil investigative demand. The FTC then filed the complaint in this action in March 2015. See Compl. In the complaint, the FTC sought equitable relief, including a permanent injunction and equitable monetary relief. Id. at 11 (“Prayer for Relief”).

United States District Court
Northern District of California

1 The FTC contends that from 2007 to the time of trial, DIRECTV failed to adequately
2 disclose in its advertising certain terms of purchase for its satellite television services, in violation
3 of § 5 of the FTC Act. In particular, the FTC alleges that DIRECTV failed to adequately disclose
4 that: (1) the introductory discounted price only lasts 12 months, after which the subscriber is
5 charged the then-prevailing rate; (2) the subscriber is subject to a 24-month commitment period;
6 (3) a subscriber who cancels before the end of the commitment period is assessed an early
7 cancellation fee of \$20 per month for the remaining months in the commitment period; and
8 (4) subscribers receive a free premium channel package (e.g., HBO, Starz, Cinemax, and
9 Showtime) for three months, but must affirmatively cancel these premium channels before the end
10 of the three-month period to avoid monthly charges (the “premium channel negative option”). See
11 id. ¶¶ 12–14. The FTC further contends that DIRECTV failed to clearly and conspicuously
12 disclose the premium channel negative option on its website, and that it also failed to obtain
13 express informed consent before charging consumers, in violation of ROSCA. See id. ¶¶ 35–42.

14 Based on these claims, the FTC seeks restitution in the amount of \$3.95 billion. Dkt. No.
15 362 (“Tr. Vol. 1”) at 33:5–16 (transcript of FTC’s opening statement).

16 **B. Procedural Posture**

17 This matter was tried to the Court, sitting without a jury, from August 14, 2017, to August
18 25, 2017. After the close of the FTC’s case-in-chief, DIRECTV moved orally for Judgment on
19 Partial Findings pursuant to Federal Rule of Civil Procedure 52(c). The Court suspended the trial
20 before DIRECTV presented its defense to allow DIRECTV to file its motion, as well as the
21 parties’ respective proposed findings of fact and conclusions of law. See Dkt. No. 390 (“Tr. Vol.
22 10”) at 1708:25–1713:6.

23 **II. LEGAL STANDARD**

24 Under Rule 52(c):

25
26 If a party has been fully heard on an issue during a nonjury trial and
27 the court finds against the party on that issue, the court may enter
28 judgment against the party on a claim or defense that, under the
controlling law, can be maintained or defeated only with a favorable

1 finding on that issue. The court may, however, decline to render any
2 judgment until the close of the evidence. A judgment on partial
findings must be supported by findings of fact and conclusions of
law as required by Rule 52(a).

3 Fed. R. Civ. P. 52(c). Thus, the Rule “authorizes the court to enter judgment at any time that it
4 can appropriately make a dispositive finding of fact on the evidence.” *Granite State Ins. Co. v.*
5 *Smart Modular Techs., Inc.*, 76 F.3d 1023, 1031 (9th Cir. 1996). In doing so, the Court draws its
6 own conclusions as factfinder and need not draw any inferences in favor of the non-moving party.
7 See *Ritchie v. United States*, 451 F.3d 1019, 1023 (9th Cir. 2006). As the plaintiff, the FTC bears
8 the burden of proof and must prove each element of its case by a preponderance of the evidence.
9 *United States v. F/V Repulse*, 688 F.2d 1283, 1284 (9th Cir. 1982). The Court should grant the
10 motion if it becomes apparent that plaintiff has failed to carry an essential burden of proof. Cf.
11 *EBC, Inc. v. Clark Bldg. Sys., Inc.*, 618 F.3d 253, 272 (3d Cir. 2010) (“The rule’s objective is to
12 ‘conserve[] time and resources by making it unnecessary for the court to hear evidence on
13 additional facts when the result would not be different even if those additional facts were
14 established.”).

15 **III. JURISDICTION AND VENUE**

16 The Court has subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331, 1337(a), and
17 1345, and 15 U.S.C. §§ 45(a), 53(b). Venue is proper in this district under 28 U.S.C. §§ 1391(b),
18 (c)(2), and (d), and 15 U.S.C. § 53(b).

19 **IV. FINDINGS OF FACT AND CONCLUSIONS OF LAW**

20 **A. The Parties**

21 The FTC is an independent agency of the United States Government created by statute. 15
22 U.S.C. §§ 41–58. The FTC enforces Section 5(a) of the FTC Act, which prohibits unfair or
23 deceptive acts or practices in or affecting commerce. The FTC also enforces ROSCA, which
24 prohibits certain methods of negative option marketing on the Internet. The FTC is authorized to
25 initiate federal district court proceedings, by its own attorneys, and to seek injunctive relief for
26 violations of the FTC Act and ROSCA. 15 U.S.C. § 53(b).

1 DIRECTV is a provider of subscription satellite television services.¹ Each of DIRECTV’s
2 subscription packages offers a varying selection of channels, equipment, and video quality. See,
3 e.g., Ex. 172 (letter describing several available subscription packages). Over time, the terms of
4 DIRECTV’s subscription packages, including the price for each package, have changed
5 periodically. See Ex. 76 (summary of subscription offers between 2008 and 2015, citing trial
6 exhibits describing the terms of each package), Ex. 617 (2014 “New Customer Offer Timeline”
7 graphic showing offer terms between 2008 and 2013).

8 DIRECTV’s subscription television services are a “considered purchase,” such that
9 consumers generally “go through anywhere between [a] 45- to 90-day process” when deciding
10 whether or not to purchase. Dkt. No. 367 (“Tr. Vol. 2”) at 308:16–309:4 (Bentley). The
11 complexities of the product stem from the “sheer number of different tradeoffs and decisions that
12 need to be made” regarding the packages, “advanced receiver, size of the hard drive, movies to
13 save,” number of rooms, and whether advanced receivers were required in each room. Tr. Vol. 2
14 at 294:19–295:1 (Bentley); Dkt. No. 371 (“Tr. Vol. 4”) at 643:10–11 (Guyardo) (DIRECTV is a
15 “high involvement” and “complex” purchase). Consumers who wish to subscribe to DIRECTV
16 must proceed through a lengthy and detailed subscription process, either on the phone with a
17 DIRECTV representative or on the web. See Tr. Vol. 2 at 302:1–310:14 (Bentley); Tr. Vol. 4 at
18 661:20–662:19 (Guyardo); Dkt. No. 372 (“Tr. Vol. 5”) at 792:18–21 (Chen).

19 DIRECTV acquires subscribers using multiple sales channels that are broadly categorized
20 as either “Direct Sales” or “Indirect Sales.” Tr. Vol. 4 at 667:3–668:9 (Guyardo); Ex. 9 at 44.
21 Direct Sales involves customers who subscribe either by phone through one of DIRECTV’s toll
22 free numbers or on the DIRECTV website, directv.com. Tr. Vol. 2 at 298:19–25 (Bentley). The
23 majority of Direct Sales subscribers complete their sign up over the phone, and only a small
24 percentage subscribe on the web. Dkt. No. 389 (“Tr. Vol. 9”) at 1441:23–1442:15 (Leever).

25 Indirect Sales are made through a number of third-party channels. Ex. 9 at 44. These
26

27 _____
28 ¹ DIRECTV was acquired by AT&T Inc. on July 24, 2015. See Dkt. No. 337 at 17.

1 include Consumer Electronics (consumer electronics and other big box stores like Walmart or Best
2 Buy that sell DIRECTV in their stores, Tr. Vol. 2 at 299:10–23 (Bentley)); Telco (partnerships
3 with telephone companies that sell DIRECTV services on their networks in addition to phone and
4 internet services, Tr. Vol. 2 at 299:2–5 (Bentley)); National Strategic Partners (national third-party
5 dealers, Tr. Vol. 2 at 300:3–7 (Bentley)); Local Strategic Partners (local third-party dealers, Tr.
6 Vol. 2 at 300:9–14 (Bentley)); and Multi-Dwelling Units (multi-unit buildings that contract with
7 DIRECTV to make the service available to residences). Ex. 9 at 44.

8 Many third-party providers, including Telco partners, used their own advertising tactics.
9 See Tr. Vol. 2 at 225:21–226:20, 300:15–301:1 (Bentley); Dkt. No. 388 (“Tr. Vol. 8”) at 1328:20–
10 23 (Pratkanis) (referring to Costco tactic). Third-party providers also had offers that were
11 different from Direct Sales offers. Tr. Vol. 2 at 299:6–9 (Bentley). For example, Telco partners
12 offered bundles with their telephone and Internet services and DIRECTV’s television services, and
13 the Telco partners would offer such services, including DIRECTV’s, using their own sales
14 network and cross-selling to their existing customers. Tr. Vol. 2 at 300:15–301:1 (Bentley).
15 Likewise, there were over two thousand National Strategic Partners that would create and place
16 their own advertising for DIRECTV. Tr. Vol. 2 at 225:21–226:20 (Bentley).

17 **B. The Challenged Advertisements**

18 Between 2007 and the time of the trial, DIRECTV advertised its subscription television
19 service through several different media. DIRECTV aired television commercials, see, e.g., Exs.
20 472–478; disseminated tens of thousands of different print advertisements through newspapers and
21 direct mailings, Dkt. 386 (“Tr. Vol. 6”) at 933:20–21 (Erdem) (over 40,000 ads); published over
22 150 different Internet banner ads, Ex. 1161; and used its website (directv.com), which was revised
23 several times during this period, Tr. Vol. 9 at 1448:12–20 (describing website redesigns).

24 **i. Television Commercials**

25 DIRECTV advertised on television in nationally-broadcast 30-second and one-to-two-
26 minute ads about DIRECTV called “direct response television.” Tr. Vol. 2 at 220:8–11 (Bentley).
27 All television ads prompted consumers to call 1-800-DIRECTV and/or visit directv.com. Id.

ii. **Print Advertising**

DIRECTV’s print advertising has generally included three broad categories: freestanding inserts disseminated with Sunday newspapers (also known as Sunday Circulars), Alternative Media, and Solo Mail.

a. Sunday Circulars

Sunday Circulars are multi-page advertisements inserted into the Sunday newspaper. Tr. Vol. 2 at 312:7–9 (Bentley); Ex. 9 at 60. DIRECTV has circulated approximately 200–300 different types of freestanding newspaper inserts per month. Tr. Vol. 2 at 231:7–10 (Bentley).

The number of consumers who called DIRECTV in response to a Sunday Circular is “extremely small.” Tr. Vol. 5 at 883:6–17 (Gieselman). By way of example, in response to a Sunday Circular distributed to 7 million consumers in or around August 2013, only three one hundredths of a percent (.03%) of the people who received the Sunday Circular called DIRECTV, and only 32% of the people who called ultimately subscribed to DIRECTV during the call. Tr. Vol. 5 at 879:21–883:18 (Gieselman); Ex. 384 at 7.

b. Alternative Media

Alternative Media includes “hundreds of different tactics” that generally are provided to consumers with material or advertisements from other (and often many other) companies. Tr. Vol. 2 at 223:22–224:2, 224:9–13, 313:22–314:10, 315:17–316:17 (Bentley); Ex. 9 at p. 59.

Alternative Media advertisements are comprised of newspaper-delivered inserts, shared mail or co-op mailings, mail inserts, or directories. Tr. Vol. 2 at 223:22–224:13 (Bentley); Ex. 9 at p. 59.

DIRECTV sent out “anywhere from 2[00] to 300 [Alternative Media] tactics every month” in multiple channels of distribution. Tr. Vol. 2 at 312:5–6, 321:6–10 (Bentley) (“there may be 300 different creative versions of [Alternative Media] in a single month . . .”); Ex. 9 at 59. Alternative Media is high-volume, low-return marketing that targets the same households week after week. Tr. Vol. 2 at 320:21–321:10, 322:18–323:16 (Bentley) (one alternative media advertisement disseminated 10 million pieces to generate approximately 300 subscriptions).

18
19
20
21
22
23
24
25
26
27
28

c. Solo Mail

Solo Mail is a multipage letter sent in a standard envelope to targeted, credit pre-approved households. Tr. Vol. 2 at 311:23–312:9, 315:9–16, 321:2–10 (Bentley); Ex. 9 at 58. DIRECTV would use predictive models to determine which households to target. Tr. Vol. 2 at 321:11–19 (Bentley). DIRECTV generally sent 15 to 18 million Solo Mail letters per month. Tr. Vol. 2 at 320:12–16 (Bentley).

iii. **Banner Ads**

Banner ads are animated images that appear on third-party websites. Tr. Vol. 5 at 801:3–6 (Chen). When a consumer clicks on the banner ad, she is routed to directv.com. Id.

iv. **directv.com**

Consumers may subscribe to DIRECTV’s satellite television services through directv.com. Few consumers who enter DIRECTV’s web flow complete the purchase on the website. See, e.g., Tr. Vol. 5 at 794:13–18 (Chen) (rate of subscription for prospects who entered the website and placed a package in their cart ranged between 6.5 and 8.9%.); Ex. 1146 at 1.

Based on unique toll-free numbers on the website and available data regarding visits to directv.com, out of all subscriptions arising from a customer who visited directv.com, approximately 70% of those consumers called a toll-free number and completed their subscription with a telephone customer service representative. Tr. Vol. 2 at 305:14–25 (Bentley).

C. The FTC Failed to Prove a Violation of Section 5(a) of the FTC Act as to Any of Defendant’s Print, Television or Electronic Banner Advertisements

Section 5(a) of the FTC Act prohibits “[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce.” 15 U.S.C. § 45(a). A practice is deceptive in violation of § 5(a) if: (1) “there is a representation, omission, or practice”; (2) that “is likely to mislead consumers acting reasonably under the circumstances”; and (3) “the representation, omission, or practice is material.” F.T.C. v. Gill, 265 F.3d 944, 950 (9th Cir. 2001). Even if it contains some truthful disclosures, a representation still “may be likely to mislead by virtue of the net impression it creates.” F.T.C. v. Cyberspace.Com LLC, 453 F.3d 1196, 1200 (9th Cir. 2006); see also Gill, 265 F.3d at 956 (evaluating the “overall ‘net

1 impression” of the representations). And failure to disclose material information may cause an
2 advertisement to be false or deceptive within the meaning of the Act even where the advertisement
3 does not state false facts. *Simeon Management Corp. v. F.T.C.*, 579 F.2d 1137, 1145 (9th Cir.
4 1978). Actual deception is not required for a Section 5 violation. *Trans World Accounts, Inc. v.*
5 *F.T.C.*, 594 F.2d 212, 214 (9th Cir. 1979).

6 Here, the FTC does not contend that any of the over 40,000 advertisements it purports to
7 challenge contained affirmatively false representations. See Dkt. No. 337 (FTC’s section of joint
8 pretrial statement) at 34 (“Because, in a failure to disclose case, the deception does not turn on
9 literal falsity, the FTC need not demonstrate that reasonable consumers are likely to take away
10 some false message about [the] advertised offer.”); Dkt. No. 412 (transcript of argument on
11 motion for partial findings) at 23 (“This is an omission case, not a falsity case.”). Nor does the
12 FTC contend in any systematic or detailed way that the advertisements entirely omitted the
13 information it claims was necessary to ensure that the statements in the advertisements were not
14 misleading. See Tr. Vol. 1 at 8:3–7 (FTC’s opening statement) (“When you look at the
15 advertisements, you will see disclosures, if they exist at all, flashing briefly on the screen, hidden
16 behind hyperlinks, buried in fine print, or obscured by dense paragraphs of legal text.”) (emphasis
17 added). Instead, the FTC’s theory is that Defendant’s advertisements were likely to mislead
18 reasonable consumers because, in its view, critical details of Defendant’s offer were not disclosed
19 prominently enough. Tr. Vol. 1 at 15:10–13 (“In this case we are talking about omissions;
20 omissions by inadequately disclosing material terms after the advertised price has been
21 prominently featured in DIRECTV’s advertisements.”)

22 The FTC fails to meet its burden as to Defendant’s print, television and electronic
23 advertisements for at least two reasons. First, as to the very small number of advertisements
24 actually analyzed by its expert witnesses, the FTC failed to establish that there was any misleading
25 “net impression,” or even to identify clearly what it claims the net impression was. Neither a
26 facial review of these advertisements nor the FTC’s extrinsic evidence established that these
27 materials are likely to mislead a reasonable consumer. Second, the FTC also failed to articulate
28

1 what common net impression is conveyed by the over 40,000 challenged advertisements (which
2 spanned several different formats), or to explain how and why that impression would be likely to
3 mislead a reasonable consumer.

4 **i. The FTC's Theory**

5 In the complaint, the FTC framed its allegation with regard to the two-year requirement as
6 follows:

7 In numerous instances, in connection with the advertising,
8 marketing, promotion, offering for sale, and sale of Defendants'
9 subscription service, Defendants have represented, directly or
10 indirectly, expressly or by implication, that their programming
11 packages can be purchased by paying the advertised monthly prices,
12 typically for a twelve-month period.

13 In numerous instances in which Defendants have made the
14 representation set forth in Paragraph 28 of this Complaint,
15 Defendants have failed to disclose, or to disclose adequately, to
16 consumers certain material terms and conditions of the offer,
17 including but not limited to:

- 18 A. The mandatory two-year agreement period, which carries
19 an early cancellation fee, for the subscription service; and
- 20 B. The significantly higher price for programming packages,
21 typically \$25 to \$45 per month higher, during the mandatory
22 second year of the consumer's agreement.

23 This additional information would be material to consumers in
24 deciding to purchase Defendants' subscription services.

25 Compl. ¶¶ 28–29.

26 As to the premium channel offer terms, the FTC alleged that:

27 In numerous instances, in connection with the advertising,
28 marketing, promotion, offering for sale, and sale of Defendants'
subscription service, Defendant have represented, directly or
indirectly, expressly or by implication, that consumers could obtain
certain premium channels for free for a certain period of time,
typically three months.

In numerous instances in which Defendants have made the
representation set forth in Paragraph 31 of this Complaint,
Defendants have failed to disclose, or disclose adequately, to
consumers the material terms and conditions related to the costs of
the offer, including:

- A. That Defendants automatically enroll consumers in a
negative option continuity plan with significant charges;
- B. That consumers must affirmatively cancel the negative
option continuity plan before the end of the trial period to
avoid charges;
- C. That Defendants use consumers' credit or debit card
information to charge consumers for the negative option
continuity plan; and

D. The costs associated with the negative option continuity plan.

Compl. ¶¶ 31–32.

In its pretrial statement, the FTC articulated its theory this way: “DIRECTV’s advertisements consistently create an overall ‘net impression’ that the company’s service may be obtained for substantially less than consumers ultimately must pay over the course of their mandatory 24-month contract.” Dkt. No. 337 at 3. Now, in its opposition to the motion for judgment on partial findings, the FTC frames its theory as being based on the principle that “prominently advertising a half-truth while omitting or hiding qualifying material information renders the net impression of the advertisements misleading.” Dkt. No. 401 at 2 and n.2 (emphasis in original) (citing *F.T.C. v. AMG Svc’s, Inc.*, 29 F.Supp.3d 1338, 1351 (D. Nev. 2014) and *Cyberspace.com*, 453 F.3d at 1201).

ii. **Net Impression Analysis**

In assessing whether the FTC has met its burden of establishing liability under § 5(a), the Court must first determine what “net impression” the advertisements at issue create, so that it can then decide whether this net impression was likely to mislead reasonable consumers. See *AMG Svc’s, Inc.*, 29 F.Supp.3d at 1368 n.9 (explaining that “the FTC Act requires the court to determine what ‘net impression’ the [allegedly misleading] loan note creates”); *F.T.C. v. Commerce Planet, Inc.*, 878 F.Supp.2d 1048, 1063 (C.D. Cal. 2012), *aff’d* 642 Fed. Appx. 680 (9th Cir. 2016) (“District courts consider the overall, common sense ‘net impression’ of the representation or act as a whole to determine whether it is misleading.”). In determining what net impression an advertisement creates, the Court considers the face of the advertisement, and may also consider extrinsic evidence. See *Commerce Planet*, 876 F.Supp.2d at 1062–78 (considering face of advertisements as well as extrinsic evidence in assessing whether net impression was misleading; “[a]lthough a facial examination of the sign-up pages sufficiently demonstrates that the website marketing of [company] was misleading to a reasonable consumer, the Court may consider

1 extrinsic evidence as corroborating evidence”).²

2 Generally, the FTC can succinctly describe its position as to what the net impression is and
3 explain why that net impression is likely to mislead in its view. See *F.T.C. v. Johnson*, 96
4 F.Supp.3d 1110, 1139–1140 (D. Nev. 2015) (describing FTC’s position that “a consumer
5 proceeding through the website pages would have a net impression that they were getting a free
6 CD for a minimal shipping and handling or download fee,” while in truth “the sites collected
7 preliminary information without informing the consumer that they would be enrolled in a core
8 membership with a negative option and additional upsell memberships with negative options”).

9 In attempting to determine the net impression of the advertisements at issue, the Court is
10 confronted with an immediate challenge: the FTC’s evidence spans at least four tiers, which
11 together encompass tens of thousands of discrete advertisements used by DIRECTV over an eight-
12 year period.

13 First, the FTC’s expert witness, Dr. Tülin Erdem, conducted an online survey based on a
14 print advertisement from 2013. Exs. 2374, 2375 (survey URL); Ex. 244 (underlying
15 advertisement); Tr. Vol. 6 at 928:3–934:6.

16 Second, Dr. Erdem testified that she chose this print advertisement for her survey based on
17 a review of 116 advertisements used by DIRECTV between 2007 and 2015, and said she found
18 the chosen ad to be “sufficiently representative.” Tr. Vol. 6 at 934:7–21, 956:3–977:20, 996:17–
19 997:10; Dkt. No. 393.³ Dr. Erdem claimed that the results of her survey could be generalized to
20 draw conclusions about other print advertisements beyond the one she tested. Tr. Vol. 6 at 956:8–

21

22 ² Defendant contends, citing two out-of-circuit district court cases, that “courts have consistently
23 held that, where it is not reasonably clear from the face of the advertisement that reasonable
24 consumers take away the alleged implied false message, extrinsic evidence is required to prove
25 deception.” Dkt. No. 396 at 6 (citing *United States v. Bayer Corp.*, 2015 WL 5822595 at *11 and
26 *13 (D.N.J. Sept. 24, 2015) and *F.T.C. v. Nat’l Urological Grp., Inc.*, 645 F.Supp.2d 1167, 1193
27 (N.D. Ga. 2008) (internal quotation marks omitted)). Neither the Ninth Circuit nor any district
28 court in this circuit has construed the requirements of the FTC Act in the manner Defendant urges,
and the Court does not find these cases persuasive on this issue.

³ Dr. Erdem testified that she reviewed “exactly 116 print ads” in detail. Tr. Vol. 6 at 934:22–
935:2. At the Court’s request, the parties submitted a stipulation listing the trial exhibit number
for each of the items reviewed by Dr. Erdem, which included 119 print advertisements. Dkt. No.
393.

1 957:10, 986:1–995:21. Another of the FTC’s expert witnesses, Dr. Anthony Pratkanis, testified
2 similarly that the characteristics of two print advertisements, Exhibits 238 and 273, were
3 generalizable to “hundreds” of other advertisements he reviewed. Tr. Vol. 8 at 1251:21–1266:3.

4 Third, the FTC introduced a total of approximately 228 print advertisements, 17 television
5 commercials, and 33 electronic banner ads into evidence. Dkt. No. 401-1 (FTC’s proposed
6 findings of fact and conclusions of law) at ¶¶ 41, 46, 50, 54, 56, 59, 62–63 (listing exhibit numbers
7 of admitted exhibits in each category). Witnesses testified regarding approximately 47 of these
8 exhibits. A large number—approximately 231—were introduced by stipulation without live
9 witness testimony. Dkt. No. 391.

10 Fourth, and finally, a much larger number of advertisements that were disseminated during
11 the period for which the FTC claims DIRECTV customers are entitled to restitution—over
12 39,000—were never introduced into evidence at all. Tr. Vol. 6 at 933:20–21; cf. Dkt. Nos. 360-1,
13 363-1, 364-1, 368-1, 369-1, 376-1, 381-1, 382-1, 383-1, 392-1, 391, 395, 415 (lists of exhibits
14 admitted at trial and by stipulation).

15 All told, the FTC’s theory of the case thus requires the Court to attempt to determine the
16 “net impression” of more than 40,000 advertisements, across print, television, and electronic
17 formats. Simply to state this fact is to highlight the extraordinary ambition—and daunting
18 challenges—inherent in the FTC’s theory. The district court in Johnson noted similar challenges
19 in that case, where the FTC “ask[ed] the Court to draw conclusions as to all of Defendants’ sites,
20 presented to the Court or not, based on the exhibits presented and [its expert’s report]”:

21 Immediately the Court is confronted with a problem. As previously
22 mentioned, the FTC has provided over one-hundred exhibits of grant
23 websites and the expert report from [expert]. However, for the
24 purposes of summary judgment, the Court cannot rely solely on the
25 representations of the FTC and their expert as to what the websites
26 represent. . . . In its briefing, the FTC picks examples of claims from
27 across its grant website exhibits to suit their arguments. It is not
28 clear to the Court, however, whether the FTC’s examples are
representative of the grant website experience as a whole. . . . The
Court cannot adopt the FTC’s approach of using selected examples
of claims picked from across the entire universe of the FTC exhibits,
seemingly without a clear methodology, and draw conclusions as to
every one of Defendants’ sites.

1 Johnson, 96 F.Supp.3d at 1118, 1121.

2 The challenges described by the Johnson court are substantially multiplied here, given the
3 enormous number of advertisements at issue, the diversity of format of those advertisements, and
4 the varying nature of the representations made in the advertisements over time.

5 Accordingly, the Court will proceed here in two stages. First, the Court will examine the
6 single print advertisement analyzed by Dr. Erdem to determine whether the net impression created
7 by that advertisement would be likely to mislead consumers acting reasonably under the
8 circumstances. Second, the Court will consider whether, even if the net impression of this
9 advertisement was misleading, that impression can be generalized (1) to any of the other
10 advertisements in evidence or (2) to tens of thousands of other advertisements, the vast majority of
11 which were never admitted in evidence, spanning an eight-year period across different media.

12 **iii. Print Advertisements**

13 a. Analysis of print advertisement tested by Dr. Erdem (Ex. 244)⁴

14 1. Facial review

15 Exhibit 244, which Dr. Erdem used as the basis for her web-based survey, is a one-page
16 advertisement with the heading “Best Offer Ever” in gold, silver and yellow letters against a blue
17 background:

18

19

20

21

22

23

24

25

26

27 ⁴ This exhibit was admitted by stipulation. Dkt. No. 391. The parties’ joint exhibit list describes it
28 as “2013 print ad, offer ends 10/02/2013, ‘Best Offer Ever.’” Dkt. No. 353-1 at 34.

#1 in CUSTOMER SATISFACTION
Over all other cable & satellite TV providers. 2013 American Customer Satisfaction Index.

As compared to the largest national cable & satellite TV providers. 2013 American Customer Satisfaction Index.

All programming and pricing subject to change at any time. **BILLING/PROGRAMMING CHANGES: IF BY THE END OF PROMOTIONAL PRICE PERIOD(S) CUSTOMER DOES NOT CONTACT DIRECTV TO CHANGE SERVICE THEN ALL SERVICES WILL AUTOMATICALLY CONTINUE AT THE THEN-PREVAILING RATES. From HBO, STARZ, SHOWTIME and Cinemax for three months, a value of \$41.10/mo. (includes MONTHLY FRACTION). Featured packaged service names and current prices: ENTERTAINMENT \$24.99/mo., CHOICE \$34.99/mo., TRIA \$39.99/mo. Advanced Receiver fee \$19/mo. In certain markets, a \$3/mo. Regional Sports Fee will be assessed with CHOICE Package or above and MA 5 ULTRA Package or above. Prices include the following instant bill credits for 12 months: \$30 for ENTERTAINMENT Package, \$35 for CHOICE Package and \$50 for TRIA Package. †\$10 CREDIT OFFER: To receive the \$10 bill credit for 24 months on your Advanced Receiver fee (required for Genie HD DVR or HD DVR lease), customer must, at point of sale, provide valid email address and activate and maintain the ENTERTAINMENT or SPINNO MAS Package or above, Auto Bill Pay and Paperless Billing.

**2013 NFL SUNDAY TICKET OFFER: Package consists of all out-of-market NFL games (based on customer's service address) broadcasts on FOX and CBS. Games available via remote viewing based on device location. Local broadcasts are subject to blackout rules. Other conditions apply. 2013 NFL SUNDAY TICKET regular full-season retail price is \$274.95. 2013 NFL SUNDAY TICKET MAX regular full-season retail price is \$299.95. Customers activating the CHOICE Package or above or the MA 5 ULTRA Package or above will be automatically enrolled in the 2013 season of NFL SUNDAY TICKET at no additional cost and will receive a free upgrade to NFL SUNDAY TICKET MAX for the 2013 season. NFL SUNDAY TICKET subscription will automatically continue each season at special renewal rate unless customer calls to cancel prior to start of season. To renew NFL SUNDAY TICKET MAX, customer must call to upgrade after the 2013 season. Subscription cannot be cancelled in-season or withheld until the start of the season and subscription fee cannot be refunded. Account must be in "good standing" as determined by DIRECTV in its sole discretion to remain eligible for all offers.

**24-MONTH AGREEMENT: EARLY CANCELLATION WILL RESULT IN A FEE OF \$20/MONTH FOR EACH REMAINING MONTH. Must maintain 24 consecutive months of any DIRECTV base programming package (\$29.99/mo. or above) or any qualifying international service bundle. Advanced Receiver DVR fee (\$19/mo.) required for DVR lease. Advanced Receiver HD fee (\$10/mo.) required for HD Receiver lease. Advanced Receiver fee (\$25/mo.) required for Genie HD DVR, HD DVR and MA 5 ULTRA DVR from DIRECTV lease. TV service fee (\$6/mo.) required for TV HD DVR from DIRECTV lease. If you have two receivers and/or one receiver and a Genie Mini Client/Enabled TV Device, the fee is \$4/mo. For the third and each additional receiver and/or Genie Mini Client/Enabled TV Device on your account, you are charged an additional fee of \$4/mo. per receiver, Genie Mini Client and/or Enabled TV Device. NON-ACTIVATION CHARGE OF \$150 PER RECEIVER MAY APPLY. ALL EQUIPMENT IS LEASED (EXCLUDING GENIE HD DVR) AND MUST BE RETURNED TO DIRECTV UPON CANCELLATION, OR UNRETURNED EQUIPMENT FEES A PPL. VISIT directv.com/legal OR CALL 1-800-DIRECTV FOR DETAILS. **GENIE HD DVR UPGRADE OFFER: Includes instant credits on one Genie HD DVR and up to a 3-Genie Mini which activation of the ENTERTAINMENT Package or above, CHOICE Package or above, or any qualifying international service bundle, which shall include the PRE-SELECTED CHOICE programming package. Free upgrade offer requires a Genie HD DVR or HD DVR or Genie Mini. \$99 fee applies for single-room set-up. Whole Home HD DVR functionality requires a Genie HD DVR connected to the primary television and a Genie Mini, HD HD Receiver(s) or an HD-capable TV Device in each additional room. Limit of three remote viewings per Genie HD DVR at a time. Visit directv.com/genie for complete details. †INSTALLATION: Standard professional installation in up to four rooms only. Custom installation extra.

DIRECTV On Demand: Access to available DIRECTV On Demand programming is based on package selection. Actual number of titles will vary. Additional fees apply for new releases. Some DIRECTV On Demand content requires an HD DVR (HR20 or later) or DVR (DR2 or later), DIRECTV CINEMA Connection Kit and broadband Internet service (at speeds of 7MB kbps or higher and a network router with an available Ethernet port) are required. Visit directv.com/ondemand for details.

*Eligibility for local channels based on service address. Not all networks available in all markets. Programming, pricing, terms and conditions subject to change at any time. Pricing residential. Taxes not included. Receipt of DIRECTV programming subject to DIRECTV Customer Agreement; copy provided at directv.com/legal and in order confirmation. Ex. 244.⁵

1 As would be expected for a complex multi-option product like a satellite television
2 subscription, the advertisement contains a large amount of information about various
3 programming packages, pricing and equipment options, product quality and installation logistics.
4 Roughly the middle third of the advertisement describes three tiers of programming packages: the
5 Entertainment Package, the Choice Package and the Xtra Package. Each package includes a
6 different number of channels and a different number of on demand titles. Each package also
7 includes HBO, Starz, Showtime and Cinemax “free for three months.”

8 The text box for each package includes a price “for 12 months” “after instant savings.” In
9 each instance, that price is crossed out by a red line, and a lower price appears in white text against
10 a red circle with the phrase “Act Now!” at the top. So, for example, the crossed-out price for the
11 Entertainment Package is \$29.99/month, and the “Act Now!” price is \$24.99/month. The price in
12 the red bubble has a caret next to it, which directs the viewer to the following bolded text in the
13 first line of a section of disclosures in black text against a white background at the bottom of the
14 page: “**BILL CREDIT/PROGRAMMING OFFER: IF BY THE END OF PROMOTIONAL**
15 **PRICE PERIOD(S) CUSTOMER DOES NOT CONTACT DIRECTV TO CHANGE**
16 **SERVICE THEN ALL SERVICES WILL AUTOMATICALLY CONTINUE AT THE**
17 **THEN-PREVAILING RATES.”⁶ Because most of the text in the disclosure box is not bolded,
18 not in all capital letters, and not partially underlined, this information stands out visually. See Ex.
19 1119 (FTC “.com Disclosures” guidance) at 17 (“A disclosure in a color that contrasts with the
20 background emphasizes the text of the disclosure and makes it more noticeable.”). The text in the
21 disclosure box is smaller than most of the text in the advertisement, though type in different sizes,
22**

23 ⁵ The Court notes for clarity of the record that the reproduction of Exhibit 244 in this order is
24 substantially smaller than the actual size of the advertisement as it was distributed to potential
25 consumers in paper form. See Exhibit 2026A (paper version of the advertisement measuring
26 approximately 8.5” by 11”). The resolution of the original Exhibits 244 and 2026A is also
27 substantially clearer than the resolution of the reproduction in this order. The Court has inserted a
28 reproduction of Exhibit 244 simply to provide context for this order’s narrative description of the
advertisement’s content.

⁶ Brad Bentley, who has served as a sales and marketing executive at DIRECTV and then at its
parent company AT&T for 17 years, referred to the section at the bottom of the advertisement as
the “offer details” section. Tr. Vol. 2 at 217:9–230:25, 238:23–239:3, 265:22–266:3.

1 fonts and colors is used throughout the ad. The next line in the disclosure box lists the current
2 non-promotional package price for each option (for example, the non-promotional price at the time
3 for the Entertainment Package was \$54.99 per month).

4 Bolded text in black print against a white background immediately below the three boxes
5 describing the packages explains that “**ALL DIRECTV OFFERS REQUIRE 24-MONTH**
6 **AGREEMENT.****” This same bolded language appears again in smaller text (again black
7 against a white background) in the bottom third of the advertisement, below three smaller boxes
8 describing installation details, HD DVR features and options for bundling TV, internet and phone
9 service. The two asterisks direct the viewer to the following bolded text in the disclosure box at
10 the bottom of the page: “**24-MONTH AGREEMENT: EARLY CANCELLATION WILL**
11 **RESULT IN A FEE OF \$20/MONTH FOR EACH REMAINING MONTH.**” Again, this
12 information is one of the few pieces of text in the disclosure section that is bolded, in all capital
13 letters and partially underlined, making the information stand out visually.

14 Near the bottom of the page, above the disclosure section, large text says “Upgrade to
15 DIRECTV! Call 1-866-951-9617 or visit directv.com.”

16 Based on its facial review of Exhibit 244, the Court finds that the net impression a
17 reasonable consumer would take away from this advertisement is that a promotional price applies
18 for 12 months, that a 24-month agreement is required, that an early cancellation fee of \$20 per
19 month will apply if the customer cancels before the end of the 24-month period, that services will
20 continue at the end of any promotional period at the then-applicable regular rate unless the
21 customer contacts DIRECTV to change the services, and that the customer needs to call a toll-free
22 number or go to DIRECTV’s website to subscribe. These provisions are adequately disclosed
23 throughout the advertisement, and while the ad contains a substantial amount of information, a
24 reasonable consumer would understand that this is because subscription satellite television service
25 is a complex product with a number of options for price, level of service, package features and
26 other components. See Tr. Vol. 2 at 308:16–309:7 (subscribing to satellite television services
27 involves a large “number of different tradeoffs and decisions that need to be made,” making
28

1 subscribing a “considered purchase”) (Bentley); Tr. Vol. 9 at 1439:14–24 (testimony of former
2 DIRECTV executive Karen Leever that satellite television services are “a complex product”
3 requiring customers to make a number of decisions to customize their package). Because the
4 advertisement adequately discloses the details that the FTC claims were omitted due to a lack of
5 prominent disclosure, the net impression of the advertisement on its face would not be likely to
6 mislead a reasonable consumer.⁷

7
8 2. Extrinsic evidence

9 The Court further finds that none of the extrinsic evidence introduced by the FTC meets its
10 burden of showing that Exhibit 244, or any of the other print, electronic or television
11 advertisements analyzed by the FTC’s experts, would be likely to mislead a reasonable consumer.

12 a. Expert Testimony

13 1. Dr. Erdem

14 The primary extrinsic evidence upon which the FTC relies in support of its claim is a web-
15 based survey conducted by Dr. Tülin Erdem, a professor of business administration and marketing
16 at New York University. Tr. Vol. 6 at 902:19–21. Dr. Erdem described her assignment as
17 “evaluating whether DIRECTV’s website and print advertisements clearly and conspicuously
18 disclosed certain items about the contract, price terms, et cetera.” Id. at 910:17–20. Dr. Erdem
19 testified that “in order to evaluate this hypothesis whether they are indeed clear and conspicuous
20 or not, I had to look at the baseline understanding as well as whether it can be improved with some
21 targeted modifications.” Id. at 910:22–25.

22 Dr. Erdem created a web-based survey to test this hypothesis, using the actual print ad as a

23 ⁷ As noted above, Exhibit 244 disclosed the then-current promotional price for each package. The
24 FTC argues that “no DIRECTV print ad in evidence stated the actual price a consumer would pay
25 during the second year of the 24-month contract because the regular price is subject to change.”
26 Dkt. No. 401 at 6. The uncontradicted evidence at trial explained why: DIRECTV could not know
27 in advance what the second-year price would be, because it had to take into account consistent
28 increases in its own cost structure before it could set that figure. See Tr. Vol. 3 at 406:20–407:6
(Bentley). DIRECTV’s costs to obtain content rose from 8 to 10 percent annually over a three
year period, but the company could only pass on a 3 to 5 percent increase to its customers for
business reasons. Id. at 331:1–333:5 (Bentley). The evidence at trial also established that annual
price increases occur across the pay television industry. Id. at 333:12–20.

1 control stimulus and creating a modified test version of the ad as a comparative stimulus. *Id.* at
2 927:1–929:25, 936:23–937:22.⁸ In the modified version, Dr. Erdem changed the manner in which
3 certain information regarding price and subscription terms appeared in the ad. *Id.* at 936:23–
4 937:22. She then asked survey respondents a number of questions, and concluded that her
5 modified version of the ad increased “consumer understanding” of these terms. *Id.* at 912:8–
6 913:20.

7 Dr. Erdem’s survey suffers from several flaws that essentially negate its probative value as
8 to the central issue in the case: whether DIRECTV advertisements’ are likely to mislead
9 reasonable consumers based on the net impression they create.

10 First, Dr. Erdem’s survey was designed to test consumers’ comprehension of certain terms
11 and to determine whether their understanding could be enhanced with minor modifications to
12 DIRECTV’s disclosures. See *id.* at 926:20–927:24, 963:2–24, 1010:1–15. But saying that
13 changing the presentation of certain information may result in better recollection of that
14 information simply does not support the conclusion that the information was likely to mislead as
15 presented in its original form. Dr. Erdem acknowledged that she did not perform a deception
16 study, or do any copy testing to determine “what is the overall impression of the consumer from
17 the ad.” See *id.* at 965:2–19, 990:1–22. While the FTC suggests that deception studies are only
18 relevant in Lanham Act cases, see *id.* at 1013:14–14:10, it never explains why. Dr. Erdem’s
19 generic testimony about principles of “shrouding” also failed to establish that the ad was likely to
20 mislead a reasonable consumer. See *id.* at 924:10–13 (“[F]ine print is a classic example of that
21

22 ⁸ FTC counsel used a slide deck as a demonstrative visual aid during Dr. Erdem’s testimony. See,
23 e.g., Tr. Vol. 6 at 938:22–24 (referring to “slide 47”). The FTC submitted the slide deck as
24 “Attachment A” to its proposed findings of fact, and Dr. Erdem’s control and test versions of the
25 Exhibit 244 print advertisement as “Attachment B” to that filing. Dkt. Nos. 401-2 and 401-3.
26 However, the FTC never actually introduced the control and test stimuli in evidence, which it
27 appears to recognize by attempting to submit this material as an “attachment” to its proposed
28 findings. See Dkt. No. 401-2 at 44 (depicting “Modifications to Original DIRECTV Print Ad” by
showing original and treatment versions side by side, and referencing “Trial Exhibit 913”).
Exhibit 913 was not offered for admission at trial, nor was it included in any of the parties’
stipulations. Accordingly, the Court bases its analysis on the testimony Dr. Erdem offered at trial
and the Court’s recollection of the demonstrative slides, and rejects the FTC’s apparent (and
unacknowledged) attempt to supplement the record after the close of the evidence.

1 kind of shrouding or a practice that makes cognitive load of consumers high, and a majority of
2 consumers don't read the fine print."'). Accordingly, the questions asked and answered by Dr.
3 Erdem's survey provide little, if any, support for the FTC's claim that the tested advertisement
4 (Ex. 244) would be likely to mislead a reasonable consumer. Compare *Commerce Planet*, 878 F.
5 Supp. 2d at 1068 (expert's testimony focused on whether most customers would understand
6 negative option and continuity program subscription aspects of website; analysis "focuse[d] on
7 what the user can perceive and what the user should do").

8 Moreover, Dr. Erdem acknowledged that as part of her survey results, she grouped
9 participants who responded that they didn't "know" about specific terms together with those who
10 responded that they didn't "recall" or "remember" the terms. Tr. Vol. 6 at 966:6-968:11. The
11 FTC argues that this approach "is the right one for a deceptive-omission case, where consumers
12 are misled in part as a result of their lack of knowledge." Dkt. No. 401 at 14 (emphasis in
13 original). But the FTC's argument fails to recognize that Dr. Erdem's survey did not test, and
14 therefore cannot establish, why a consumer responded that he or she did not know or recall the
15 terms. Because Dr. Erdem did not ask follow-up questions or have subcategories for responses,
16 she acknowledged that she did not know whether these survey participants saw the key terms but
17 just could not recall what they had seen in the print advertisement earlier, or whether they had the
18 wrong impression about these terms based on the advertisements. Tr. Vol. 6 at 966:22-968:19,
19 970:2-16 (Erdem). Accordingly, this characteristic of Dr. Erdem's survey further supports the
20 Court's conclusion that the results lack substantial probative value on the question of whether
21 Exhibit 244 was likely to mislead a reasonable consumer.

22 Finally, the Court finds that given the centrality of the disclosures in the text at the bottom
23 of the ad to the issues in this case, Dr. Erdem's web study did not adequately replicate the
24 experience of a prospective customer viewing the ad in paper form, as it was actually distributed.
25 Defendant introduced a hard copy of the advertisement in its original paper form. Ex. 2026A.
26 With the paper version in hand, a prospective customer could review those disclosures simply by
27 looking at the bottom of the page. By contrast, in Dr. Erdem's survey, the survey taker had to

1 scroll down the screen to see those disclosures (in other words, the disclosures were not visible
2 unless the survey taker scrolled down). Tr. Vol. 6 at 973:7–15 (Erdem). Further, the Court’s
3 personal comparison at trial of the paper and electronic survey versions of the ad reflected that the
4 disclosure text in the survey version was substantially less clear and legible than the paper copy.
5 Compare Ex. 2026A with Ex. 2371 (URL link for survey).⁹ The fact that respondents could
6 “zoom [in] on any part,” Tr. Vol. 6 at 975:2–4 (Erdem), does not remedy this problem, nor does it
7 matter that none of the participants in Dr. Erdem’s pretest said that the text was not legible, Tr.
8 Vol. 6 at 1013:1–3. Survey participants were not asked if they could read the disclosure block, Tr.
9 Vol. 6 at 1015:6–11, and the Court finds that it would not be apparent to a participant that the
10 specific content of the disclosure block could be relevant (in fact, crucial) to the survey exercise.

11 For all of these reasons, the Court finds that Dr. Erdem’s survey has little to no probative
12 value on the question of whether the 2013 advertisement admitted as Exhibit 244 was likely to
13 mislead a consumer acting reasonably under the circumstances.

14 2. Dr. Pratkanis

15 The Court finds Dr. Pratkanis’ “social influence analysis” to be similarly unpersuasive on
16 the question of whether a reasonable consumer likely would be misled by Defendant’s
17 advertisements. Dr. Pratkanis acknowledged that he did no copy testing or other empirical testing
18 of how consumers perceive Defendant’s advertisements. Tr. Vol. 8 at 1291:13–1293:12. He also
19 did not analyze Defendant’s advertisements to determine their net impression, or do any content
20 analysis that would support the conclusion that his conclusions were generalizable to all of the ads
21 at issue over the eight-year period at issue. Tr. Vol. 8 at 1304:6–1306:24, 1311:6–1315:24.

22 Instead, Dr. Pratkanis testified that general principles of social influence such as “throwing
23 the lowball” and “free gift” can increase the “likelihood” that someone would make a purchase.
24 Dr. Pratkanis’ “fundamental finding” was that DIRECTV employed a “lowball” initial offer to get
25

26 _____
27 ⁹ Because all that was entered in evidence was the URL links, rather than an actual electronic copy
28 of the survey, it is unclear how the FTC intends to preserve the evidence presented at trial for the
record.

1 consumers to later agree to a less desirable offer. *Id.* at 1249:12–1250:8. During his testimony,
2 Dr. Pratkanis discussed two print ads: another variant of the one-page “Best Offer Ever” flyer
3 from 2013 (Ex. 238) and a 2014 two-page advertisement headed “Get 2 YEARS OF SAVINGS”
4 (Ex. 273).

5 Exhibit 238 describes the Entertainment Package, and has a slashed-out price of \$29.99
6 “FOR 12 MONTHS,” next to the notation “With 24-mo. agreement.**” A red bubble just above
7 the slashed-out price contains large white text reading “ACT NOW! \$24.99/MO.” with a caret. As
8 with Exhibit 244, the print ad Dr. Erdem tested, the caret and asterisks refer the viewer to a
9 disclosure section of black text against a white background that occupies approximately the
10 bottom one-third of the advertisement. The text in the disclosure section that corresponds to the
11 caret begins in the first line of that section, and contains the following bolding, underlining and
12 capitalization: **“BILL CREDIT/PROGRAMMING OFFER: IF BY THE END OF**
13 **PROMOTIONAL PRICE PERIOD(S) CUSTOMER DOES NOT CONTACT DIRECTV**
14 **TO CHANGE SERVICE THEN ALL SERVICES WILL AUTOMATICALLY CONTINUE**
15 **AT THE THEN-PREVAILING RATES.”** Later text in that line lists the “current prices” of
16 each package. The text in the disclosure section that corresponds to the asterisks is bolded and in
17 all capital letters, and says **“24-MONTH AGREEMENT: EARLY CANCELLATION WILL**
18 **RESULT IN A FEE OF \$20/MONTH FOR EACH REMAINING MONTH.”**

19 Exhibit 273, like Exhibit 244, describes three different packages. It contains the same red
20 bubble price format, slashed-out prices, and references to the disclosure section via carets and
21 asterisks. The formatting and content of the disclosures described above with regard to Exhibit
22 244 (including underlining, bolding and capitalization) is identical in Exhibit 273, except that the
23 Court assumes that this was a two-sided advertisement, such that the second page of text and the
24 disclosure section would appear on the back of the piece.¹⁰

25 For the reasons described in its analysis of Exhibit 244 above, the Court finds based on a
26

27 ¹⁰ No witness testified to how this exhibit, which was admitted by stipulation, see Dkt. No. 391,
28 was laid out in the document potential DIRECTV customers actually saw.

1 facial review that neither Exhibit 238 nor Exhibit 273 creates a net impression that would be likely
2 to mislead a reasonable consumer.

3 Moreover, the Court accords minimal weight to Dr. Pratkanis' opinions in light of this
4 determination that the advertisements at issue were not facially deceptive. Dr. Pratkanis' general
5 testimony regarding the "likelihood of the impressions that [a consumer] would take," Tr. Vol. 8
6 at 1347:1–1348:8, is unpersuasive for several reasons. First, while Dr. Pratkanis testified, for
7 example, that a consumer would "have a tendency and a likelihood" to perceive the slashed-out
8 price as the "real price or the regular price," he acknowledged doing no study or survey to
9 determine whether customers in fact held that belief. Id. at 1314:8–1315:15. Nor did Dr.
10 Pratkanis do any empirical testing of any advertisement, id. at 1301:4–8, survey customers to ask
11 what messages they took away from ads, id. at 1303:16–1304:24, or do a content analysis of any
12 advertisements, id. at 1305:11–1306:4. Dr. Pratkanis has performed this kind of testing in other
13 instances, but did not do so here because the FTC did not ask him to. Id. at 1303:16–1304:24.

14 Similarly, Dr. Pratkanis conceded that he could not measure how purported "lowball"
15 representations would affect consumers' understanding:

16 Q: But likelihood is what? Is it more likely than not? Does that
17 mean more than 50 percent who sign up don't know?
18 A: It would be an increase over base rate.
19 Q: Do you know what the base rate is?
20 A: No.

21 Tr. Vol. 8 at 1312:2–6.

22 Third, as Defendant points out, the "lowball theory" also does not map well to FTC's
23 theory in this case, because that theory presumes that consumers do understand the price that they
24 will pay before the time of purchase. Id. at 1320:12–1321:12; see id. at 1348:4–8 (agreeing with
25 the Court's statement that "if they are exposed to the true terms up front there can't be a lowball
26 by definition"). Here, the Court has found that the true terms are adequately and accurately
27 disclosed in the advertisements Dr. Pratkanis testified about. For at least these reasons, the Court
28 finds that nothing in Dr. Pratkanis' testimony persuasively supports the FTC's contention that the
print advertisements at issue in this case created a misleading net impression in violation of the

FTC Act.

3. The Cases Upon Which the FTC Relies Reinforce the Conclusion That the Agency Failed to Meet Its Burden of Proof

The cases the FTC relies upon in support of its argument that these advertisements (and, by extension, the thousands of others at issue in this case) were misleading by omission are readily distinguishable. In those cases, the courts found that advertisements created a misleading impression, even when the relevant information was technically disclosed in some form, because the overall presentation would lead a reasonable consumer to conclude that the terms were materially different than the true terms.

For example, in *Cyberspace*, the defendants mailed millions of solicitations offering internet access to individuals and small businesses. 453 F.3d at 1198. The solicitations included a check, usually for \$3.50, addressed to the recipient and referencing the recipient’s phone number on the “re” line. *Id.* The check was “attached to a form resembling an invoice designed to be detached from the check by tearing at the perforated line.” *Id.* “The back of the check and invoice contained small-print disclosures revealing that cashing or depositing the check would constitute agreement to pay a monthly fee for internet access, but the front of the check and the invoice contained no such disclosures.” *Id.* Under those circumstances, the Ninth Circuit readily rejected defendants’ argument that “the fine print notices they placed on the reverse side of the check, invoice, and marketing insert preclude liability” under the FTC Act. *Id.* at 1200. This was because the “mailing created the deceptive impression that the \$3.50 check was simply a refund or rebate rather than an offer for services,” and gave the “overall impression that the check resolves some small, outstanding debt.” *Id.* at 1200–1201.

Similarly, in *AMG Services*, defendants’ loan note contained two sets of representations: a Truth In Lending Act (“TILA”) box, and additional fine print disclosures. 29 F.Supp.3d at 1366. The TILA box “represent[ed] that borrowers [were] obligated to repay a fixed sum equal to the principal plus a single finance charge.” *Id.* (emphasis added). But terms in the fine print “contradict[ed] the terms disclosed in the TILA box,” in that the repayment amount was not fixed,

1 the borrower was automatically enrolled in a ten pay-period “loan renewal” plan that imposed
2 multiple finance charges, and the “renewal plan” increased the borrower’s cost of credit from \$90
3 to \$675. *Id.* at 1367. Given these contradictions, the court had no trouble concluding that “[i]t
4 requires no citation of authority to demonstrate that the ‘net impression’ of a boldfaced
5 representation, which states that the borrower is responsible to repay a fixed sum, is misleading
6 when the fine print indicates that the boldfaced sum is not fixed.” *Id.* at 1368; see also *id.* at 1351
7 (finding that “the net impression of the Loan Note Disclosure is likely to mislead borrowers acting
8 reasonably under the circumstances because the large prominent print in the TILA Box implies
9 that borrowers will incur one finance charge while the fine print creates a process under which
10 multiple finance charges will be automatically incurred unless borrowers take affirmative action”);
11 1373 (recommending that summary judgment be granted because “the representation [was] clearly
12 misleading and the defendant relie[d] exclusively on the fine print to correct the
13 misrepresentation”).

14 Johnson also illustrates the usual type of representation found to create a misleading net
15 impression. In that case, the FTC argued that a consumer reviewing defendant’s website “would
16 have the net impression that they were getting a free CD for a minimal shipping and handling or
17 download fee,” but failed to inform the consumer “that they would be enrolled in a core
18 membership with a negative option and additional upsell memberships with negative options.” 96
19 F.Supp.3d at 1139–1140. Essentially, the FTC argued that “the disclosures were presented in a
20 way that made consumers unlikely to expect them (because the claims ‘free’ and ‘risk free’ were
21 so prominent) and were unlikely to see them (because the disclosures were inadequate or non-
22 existent).” *Id.* at 1140. The court agreed, finding it clear that the sites did not advertise a
23 membership program, and concluding that customers would be likely “to believe that they are
24 ordering a CD for a one-time fee and would not have reason to believe they were enrolling in
25 membership programs with monthly charges.” *Id.* at 1145. The Court noted that “[i]nformation
26 about the trial memberships, and their associated costs, [was] hidden in disclosures that consumers
27 would be justified in believing they did not have to examine closely.” *Id.* at 1146.

1 Significantly, however, the Johnson court noted that the circumstances before it were
2 different than a squarely-presented offer regarding subscription services like the one at issue in
3 this case:

4
5 [T]here is a significant distinction between sites that clearly offer
6 subscription-based or membership-based services to a consumer
7 with a trial period and negative option, on one hand, and sites that
8 offer to ship a product for a one-time payment with a bundled
9 membership trial period and negative option on the other. In the
10 first situation, the consumer is made aware of an ongoing obligation
11 for use of the seller’s service. Generally speaking, Defendants are
12 correct that a consumer’s failure to cancel their membership in that
13 situation would be the fault of the consumer. The Court’s concern
14 in this case is that the sites do not clearly offer a membership
15 program. . . . That is a significantly different situation from one in
16 which a consumer willingly receives the benefit of a subscription or
17 membership program and forgets to cancel.

18 Id. at 1141-42.

19 Cyberspace and AMG Services also do not support the FTC’s argument as to the probative
20 weight of Dr. Erdem’s analysis, Dkt. No. 401 at 14, and the critically different facts of those cases
21 highlight the weakness of the government’s evidence in this case. The Ninth Circuit’s comment in
22 Cyberspace that the defendant’s proffered survey “did not probe whether the notices were
23 sufficiently conspicuous to draw the survey subjects’ attention in the first place,” 453 F.3d at
24 1201, addressed a circumstance in which (1) the supposed disclosure was on the back of what
25 appeared to be a check; and (2) the misleading impression was that a reasonable consumer would
26 not understand that by cashing the check she would be enrolling in a subscription service. Id. at
27 1200–1201. Similarly, as explained above, the deception in AMG Services was that the net
28 impression made by the advertisements at issue fundamentally and comprehensively contradicted
the true terms of the offered loan. In contrast, here Dr. Erdem’s survey treated respondents who
did not recall the terms being studied the same as those respondents who said they did not know
what the terms were, without providing any persuasive basis for concluding that either answer
reflected a misleading net impression. See Tr. Vol. 6 at 966:22–970:16.

In sum, the facts in this case are plainly different from those in cases in which the FTC has

1 successfully established that a misleading net impression existed. Nothing in one part of Exhibit
2 244 (or Exhibits 238 or 273) contradicts any other part of the advertisement. The advertisement
3 makes plain that it essentially describes an “offer for services,” Cyberspace at 1200, accurately
4 describes (within the limitations of a one- or two-page flyer) the terms of the offer, and invites an
5 interested consumer to follow up to select a specific package and subscribe through a phone- or
6 website-based process. The Court finds it self-evident that this case bears no resemblance to cases
7 in which a defendant represents in an advertisement that the consumer will receive a benefit (like
8 the check in Cyberspace, the fixed interest rate in AMG Services, or the free CD in Johnson), only
9 to turn around and impose a concealed and unwanted burden (like the hidden subscriptions and
10 requirements in each of those cases). Compare Ex. 1119 (FTC “.com Disclosures” guidance) at
11 18 (“Consumers who are trying to complete a task and obtain a specific product or service may not
12 pay adequate attention to a disclosure that does not relate to the task at hand. This can be
13 problematic if, for example, an advertiser is selling a product or service together with a negative
14 option trial for a different product or service.”) (emphasis added).

15 Nor has the FTC shown that this advertisement was a “deceptive door opener,” in which
16 DIRECTV “induce[d] first contact through deception, even if the buyer later becomes fully
17 informed before entering the contract.” Dkt. No. 401-1 at 146 (citing *Resort Car Rental Sys., Inc.*
18 *v. F.T.C.*, 518 F.2d 962, 964 (9th Cir. 1975)). In *Resort Car Rental*, defendant used the slogan
19 “Dollar-A-Day” for its car rental business, but apparently charged more than that. *Id.* Under
20 those circumstances, the Ninth Circuit agreed with the FTC that “the trade name, ‘dollar-a-day’ by
21 its nature has a decisive connotation for which any qualifying language would result in a
22 contradiction in terms.” *Id.* That principle is inapplicable here, because (1) the Court has found
23 that nothing in Exhibit 244 (or Exhibits 238 or 273) contradicts the true terms of DIRECTV’s
24 provision of services; and (2) for a complex product like subscription satellite television services,
25 a reasonable consumer would understand the limitations of how information is presented in a one-
26 or two-page flyer. See Tr. Vol. 2 at 243:2–23, 311:11–317:11 (testimony of Brad Bentley that the
27 amount of “real estate” in a particular form of advertisement affects the layout of information
28

1 included, but that “we made sure all the offer details were available on each piece”).

2 Consistent with these observations, the Court finds that the FTC has failed to establish that
3 Exhibit 244, or Exhibits 238 or 273, would be likely to mislead a reasonable consumer.

4 b. Even had the FTC shown that these examples created a misleading net
5 impression, it failed to show how that impression is generalizable to hundreds
6 or thousands of additional advertisements.

6 1. Expert Testimony

7 Dr. Erdem and Dr. Pratkanis’ testified about the detailed content of only three
8 advertisements. Dr. Erdem’s survey concerned a single 2013 print advertisement, which she chose
9 as the basis for her test after reviewing a set of nearly 120 DIRECTV ads culled by her staff. Tr.
10 Vol. 6 at 989:12–25. She did not conduct any copy or content analysis, id. at 989:18–22, but
11 rather reviewed this small set of advertisements “across different denominations like the content,
12 the language, the fine print, whether it was a circular, etc.” and “decided [the 2013 advertisement]
13 was sufficiently representative.” Id. at 956:3–957:10. According to Dr. Erdem, the
14 advertisements “typically” had fine print, a promotional price, and package choices. Id. at 996:6–
15 13. She further testified that “the single page format was easier to adopt for an online survey.” Id.
16 at 957:6–7. In this way, the advertisement was chosen, at least in part, because of the limitations
17 of the survey methodology and not because the advertisement itself was the most representative.

18 Even if the Court had found, contrary to the analysis above, that Exhibit 244 was likely to
19 mislead a consumer acting reasonably under the circumstances, Dr. Erdem presented no
20 persuasive explanation in support of her assertion that this single 2013 print advertisement was
21 somehow representative of even the advertisements she reviewed, let alone the universe of 40,000
22 or more advertisements at issue in this case.¹¹

23 The Court finds that the several years’ worth of advertisements accused by the FTC in this
24 case took different forms and depended on the specific offer in place at the time. See Ex. 617
25 (timeline of offers). The ads contain everyday low pricing or promote introductory pricing for 12
26

27 ¹¹ The evidence at trial established that this single 2013 advertisement would have resulted in only
28 about 300 subscriptions, and even fewer activations. Tr. Vol. 2 at 323:13–16 (Bentley).

1 months; require no commitment or state that a 24-month agreement is required; have no premium
2 channel offer or offer premium channels free for 3 months; explain rebate credits (when rebates
3 were in effect) or, later, the instant rebate prices; and disclose additional terms about equipment
4 pricing, packages, and cancellation in other areas and the disclosure block. See, e.g., Exs. 78, 84,
5 85 (2007); Exs. 92, 95 (2008); Ex. 113 (2009); Exs. 124, 139 (2010); Exs. 172, 2014 (2011); Exs.
6 175, 178/2707, 185 (2012); Exs. 203, 209, 212, 217 (2013); Ex. 281 (2014).¹² Indisputably, there
7 is substantial variation in DIRECTV’s print advertising with respect to, among other things,
8 tactics, page count, content, and the frequency, placement, and manner of disclosures in the ads
9 Dr. Erdem reviewed. Compare, e.g., Ex. 2026A (paper copy of single page ad used in Erdem
10 study, described above), with Ex. 2707 (original four-page Sunday Circular of Ex. 178 with no
11 slashed out pricing; disclosing “FOR 12 MONTHS” and “2-year” agreement immediately under
12 each price point; and disclosing first and second-year savings in large font on inside left page and
13 again, in red, on back cover), with Ex. 124 (advertising “50% OFF FOR ONE YEAR!” at top and
14 side; disclosing promotional price is “FOR 12 MONTHS” in red bubble), with Ex. 92 (two-sided
15 advertisement disclosing promotional price is “FOR 12 MONTHS” with the “Reg.” package price
16 in red bubbles on front and back), with Ex. 172 (four-page direct mail letter disclosing “FOR 12
17 MONTHS” and “2-yr agreement” immediately under each price point; disclosing first and second-
18 year savings in second paragraph of first page, and under each promotional price on later pages;
19 disclosing value of premium channels next to premium channel copy), with Ex. 209 (four-page ad
20 disclosing promotional price is “FOR 12 MONTHS” 12 times on front and back covers; disclosing
21 first and second-year savings under each package on back cover; disclosing value of free premium
22 channels next to premium channel copy on inside right page), with Ex. 113/2011A (slashing out
23 regular package price rather than prior promotional price), with Ex. 139/2013A (advertising

24
25 ¹² As one example of the FTC’s tendency to gloss over pertinent details, counsel in opening
26 statement highlighted an advertisement from 2007 and asked “Where does it say what the higher
27 second year price will be?” Tr. Vol. 1 at 11:12–13 (referencing and displaying Ex. 84). But the
28 evidence ultimately established, without contradiction, that this offer did not require a two-year
commitment, and that it contained standard rather than promotional pricing. Tr. Vol. 2 at 345:3–
25 (comparing Ex. 84 to Ex. 617 (timeline of offers)) (Bentley).

1 “PACKAGES START AT \$29.99 Everyday Low Price” without promoting any specific package
2 or premium channels). This variation among DIRECTV’s ads precludes generalizing Dr. Erdem’s
3 survey results to the relative handful of print ads she reviewed, let alone to the some 40,000 she
4 did not.¹³

5 Contrary to the FTC’s claim, neither DIRECTV nor the Court is suggesting that the FTC
6 had to introduce all of the more than 40,000 advertisements into evidence. See Dkt. No. 401 at 15.
7 But the FTC does have to explain why conclusions about a handful of advertisements can be
8 applied to derive a uniform net impression for an extremely large number of others that vary
9 significantly in format, content and emphasis. The FTC simply cannot meet this burden by
10 characterizing the advertisements at a high level of generality and asserting that conclusions
11 regarding one advertisement apply uniformly to tens of thousands of others. See Dkt. No. 401-1
12 (FTC’s proposed findings of fact and conclusions of law) at ¶¶ 82-91 (referencing inclusion of
13 “some type of ‘call to action’” in advertisements, as well as general thematic and formatting
14 consistency); Tr. Vol. 6 at 956:16–20 (Erdem) (“[T]he common denominations were some kind of
15 promotional package -- I mean, premium channels package and promotional price, some kind of
16 call to action, we call these kind of ads call to action ads, and the templates were similar.”). The
17 Court does not find Dr. Erdem’s opinion that she would “expect no differences” in the empirical
18 test results across all of the dramatically different types of advertisements at issue in this case, Tr.
19 Vol. 6 at 996:21-997:10, to be persuasive or adequately supported. The Court similarly finds
20 unpersuasive and inadequately supported Dr. Pratkanis’ assertion that his conclusions about
21

22 ¹³ This conclusion applies with even more force to the television commercials. Those
23 commercials plainly differ in content, purpose, approach and format from print ads, and often
24 relied primarily on overt humor to attract viewers’ attention and interest them enough to call a toll-
25 free number or visit the website to learn more. See Tr. Vol. 5 at 872:7–875:7 (testimony of former
26 DIRECTV executive Jon Gieselman explaining that commercials focused on different main
27 messages, with the main “proof points” being “technology superiority, programming superiority
28 [and] customer service superiority”); Ex. 443 (television commercial featuring a talking horse
discussing benefits of DIRECTV); Tr. Vol. 2 at 260:13–18, 266:4–16 (the purpose of DIRECTV’s
advertisements was to “create some interest and start a dialogue by motivating the consumers to
pick up the phone and call DIRECTV or to go on the DIRECTV website,” which is colloquially
known as the “call to action” in DIRECTV’s advertising) (Bentley).

1 Exhibits 238 and 273 can be generalized to a broader universe of Defendant’s advertisements.

2 2. Other Extrinsic Evidence

3 The Court also finds that none of the other extrinsic evidence relied upon by the FTC
4 meets its burden of establishing that any of Defendant’s advertisements was likely to mislead a
5 reasonable consumer.

6 a. Eye Tracking Studies

7 The FTC introduced evidence that in 2010, DIRECTV contracted with Realeyes North
8 America, a market research firm, to perform eye tracking studies on four DIRECTV advertising
9 circulars. Hellstrom Depo. 9:19–23; Ex. 705 at 1–2.¹⁴ DIRECTV engaged Realeyes to help its
10 team understand how consumers read circulars. Ex. 378 at 31; Ex. 408. During this study,
11 participants were shown a DIRECTV print advertisement on a large computer screen. Tr. Vol. 7
12 at 1221:8 (Hellstrom Depo. at 25:25–26:07); Ex. 718 at 16. Realeyes then tracked participants’
13 “eye gaze data” for 30 to 90 seconds, aggregated that data, and created a “heat map” to show
14 where participants focused their “visual attention” on DIRECTV’s advertisement. Tr. Vol. 7 at
15 1221:8 (Hellstrom Depo. at 62:16-63:12); Ex. 718 at 16; Ex. 720 at 3.

16 The four DIRECTV ads tested by Realeyes were each four-page circular ads. Each of the
17 circular ads was comprised of three components—a front cover, a two-page inside spread, and a
18 back cover. Hellstrom Depo. 51:12–16. Realeyes conducted individual tests of all three
19 components of each circular ad (twelve tests in all), and generated a report for each test.
20 Hellstrom Depo. 50:24–51:16; Exs. 708, 709, 710, 713, 714, 715, 718, 719, 720, 723, 724, 725.
21 Each report contained a bar graph called “Attention Allocation,” as well as heat maps. See, e.g.,
22 Ex. 708. DIRECTV prepared an internal document called “Heat Mapping Research: Learnings &
23 Recommendations” which presented the results of the Realeyes eye tracking studies. Ex. 408.

24 These eye tracking studies are not persuasive on the relevant issue: whether the studied
25 advertisements, or any of Defendant’s advertisements, were likely to leave a reasonable consumer

26

27 ¹⁴ The FTC played excerpts of Mr. Hellstrom’s deposition at trial. Dkt. No. 387 (“Tr. Vol. 7”) at
28 1221:5–8.

1 with a misleading net impression. These types of studies do not measure consumer sentiment,
 2 persuasion, or understanding of an advertisement. Tr. Vol. 8 at 1339:24–1340:5 (Leever); see also
 3 id. at 1339:15–23 (Pratkanis) (answer to question “And you can’t measure any miscomprehension
 4 or any wrong impression from an ad based on an eye tracking study?” was “Generally, that’s
 5 correct. It might give you some input into understanding that, but in general that’s correct.”). The
 6 fact that study participants’ eyes may be more drawn to bright colors and pictures than to written
 7 details during a simulation test conducted on a computer simply does not provide persuasive
 8 support for the FTC’s claim that advertisements describing a multifaceted offer for a plainly
 9 complex product like subscription satellite television services were misleading.¹⁵

10 b. RIO – Subscriber Call Data

11 DIRECTV’s RIO customer service database includes a note field where the agent writes
 12 down information about a customer’s telephone call. Tr. Vol. 8 at 1280:14–1281:9 (Pratkanis).
 13 DIRECTV developed proprietary text-mining software that goes through the note field and assigns
 14 a primary tag to the call, corresponding to the primary reason for the phone call. (Id.). There are
 15 about 1,120 different primary tags. Tr. Vol. 8 at 1281:10–12 (Pratkanis).

16 Dr. Pratkanis analyzed the RIO data by selecting 17 primary tags he characterized as
 17 encompassing claims by customers, at the fourth and thirteenth months of service, expressing
 18 surprise, confusion, or dislike over bill increases. Tr. Vol. 8 at 1281:17–1282:10 (Pratkanis). The
 19 17 tags fall into four categories: billing, 24-month commitment, early cancellation fee, and
 20 possible remedies for a price increase. Id. Dr. Pratkanis’s RIO analysis was based on a random
 21 sample drawn from the RIO database. Tr. Vol. 8 at 1285:12–23 (Pratkanis).

22 Dr. Pratkanis opined that spikes in the RIO data at months 4 and 13 “would confirm the
 23 kind of things you would expect if the free gift as a negative option is not fully disclosed.” Tr.

24
 25 _____
 26 ¹⁵ This conclusion applies equally to the “click-tracking studies” introduced by the FTC. See, e.g.,
 27 Ex. 347; Tr. Vol. 8 at 1340:6–9 (Pratkanis). A survey participant’s response to an invitation to
 28 “click on the three parts of the [advertisement] that are most compelling to you,” Ex. 347 at slide
 30, simply is not probative of whether the advertisement was likely to leave a reasonable
 consumer with a misleading net impression.

1 Vol. 8 at 1282:19–1283:3. But as Dr. Pratkanis recognized, month 4 is when subscribers wishing
2 to cancel their premium packages because the free period ended would naturally call to do so. *Id.*
3 at 1336:5–7. And in month 13, “one possibility” is that subscribers call to explore other package
4 options once their introductory pricing ends. *Id.* at 1336:8–15. Critically, Dr. Pratkanis did no
5 content analysis to identify callers at these stages who called because they claimed to have been
6 misled about the conditions of their subscriptions. *Id.* at 1336:17–24. While Dr. Pratkanis said he
7 excluded tags like “cancel premiums” or “cancel HBO” from his analysis, *id.* at 1348:18–1349:6,
8 the Court finds the RIO analysis to be unpersuasive evidence of consumer deception given Dr.
9 Pratkanis’ understandable inability to determine anything about why subscribers were actually
10 calling in the months characterized as “spikes.”

11 c. Customer Experience Steering Committee Documents

12 The Court also heard evidence regarding findings made by DIRECTV’s “Customer
13 Experience Steering Committee” (“CX Committee”). The CX Committee was a cross-functional
14 group of DIRECTV executives led by Rasesh Patel. *Tr. Vol. 2* at 274:16–20 (Bentley), *Tr. Vol. 6*
15 at 1020:4–6 (Patel). The evidence showed that the CX Committee was created in 2012 as part of a
16 “company-wide focus” to “improve the customer experience.” *Tr. Vol. 6* at 1025:4–7 (Patel).
17 The initiative focused on both current and prospective DIRECTV customers. *Tr. Vol. 6* at
18 1027:16–18 (Patel). The CX Committee reviewed customer research and satisfaction data and
19 operational data. *Tr. Vol. 6* at 1029:19–1030:2 (Patel). The CX Committee’s goal was to
20 “identify customer pain points . . . and then really prioritize the ones that were most meaningful in
21 terms of impact.” *Tr. Vol. 6* at 1030:7–9 (Patel). The CX Initiative was “very self-critical” and
22 “discerning” in identifying “every opportunity . . . to improve the customer experience.” *Tr. Vol. 6*
23 at 1052:18–24 (Patel). By 2013, the CX Committee had identified numerous customer “pain
24 points,” which it categorized and prioritized in a “Customer Pain Points – Review and
25 Prioritization” discussion document dated May 7, 2013. *Tr. Vol. 6* at 1031:8–22 (Patel); *Ex. 589*.
26 The CX Committee identified a number of these as “top recommended pain points” based on the
27 “degree of impact” a particular pain point might have on metrics such as customer satisfaction,
28

1 call volume, and numerous other dimensions. Tr. Vol. 6 at 1043:10–18 (Patel); Ex. 589 at 7. The
2 CX Committee initiative lasted three years, until 2015. Tr. Vol. 6 at 1029:3–7 (Patel).

3 Nothing about the CX Committee materials introduced at trial persuasively supports the
4 FTC’s claim that Defendant’s advertisements misled millions of customers between 2007 and
5 2015 (or were likely to do so). Instead, Mr. Patel credibly testified that the CX Committee
6 engaged in a good-faith and comprehensive effort to evaluate DIRECTV’s operations, identify
7 potential problem areas and recommend improvements. The evidence at trial established that a
8 number of such improvements were implemented. For example, in October 2012, DIRECTV
9 moved from an offer requiring customers to redeem a rebate via mail or online to an “instant”
10 rebate. Ex. 617 at 5. This policy ensured that every customer would receive the discounted price
11 starting with the first month’s bill, and addressed an issue noted by the CX Committee. Tr. Vol. 2
12 at 293:11–21 (Bentley). This change resulted in an \$80 million reduction in revenue each year.
13 Id. at 294:3–11 (Bentley). As another example, around the same time, DIRECTV adopted a
14 “Simplified Bill” that incorporated a number of changes with the goal of making the bill easier to
15 understand. Ex. 569. And third, another pain point that the CX Committee identified was that
16 customers were unable to refuse the premium channel promotional offer at the point of sale or
17 request a future cancellation date for premium channels. Ex. 589 at 4–9. In response to this pain
18 point, DIRECTV implemented changes to its premium offer policies and processes so that
19 customers could decline the premium channel offer at the point of sale, or at any specified future
20 date without having to remember to call to cancel on the last day of the trial period. Tr. Vol. 7 at
21 1053:1–11 (Patel).

22 Mr. Patel also credibly explained that if consumers believed that the terms in DIRECTV’s
23 advertisements did not match the terms disclosed when they sought to subscribe, that feeling of
24 deception would have been reflected in the findings of the CX Committee and in DIRECTV’s data
25 collected on pain points, consumer research, sales calls, closing rates, activation rates, and churn.
26 Tr. Vol. 8 at 1047:3–10451:9 (Patel). The evidence did not support the FTC’s theory in this
27 regard. DIRECTV’s “churn rate” (the rate at which customers leave DIRECTV’s platform) stayed
28

1 constant at approximately 1.5% from 2007 to 2013. Tr. Vol. 4 at 650:20–651:7 (Guyardo); Ex.
2 991 at 5. DIRECTV improved its market share from 2008 to 2013, when “the DIRECTV
3 subscriber base grew by 3.5 million subscribers . . . while all of [DIRECTV’s] other competitors
4 combined only grew by 400,000.” Tr. Vol. 4 at 651:22–652:5 (Guyardo); Ex. 991 at 6. A
5 subscriber’s average time on the platform has also steadily increased over time. The average
6 customer now stays with DIRECTV for “close[] to seven years”—years after the initial 24-month
7 commitment period. Tr. Vol. 2 at 347:8–18 (Bentley).¹⁶ Finally, DIRECTV’s Net Promoter Score
8 increased over time from 16 to 34 and from “second best in the industry to best in class in the
9 industry.” Tr. Vol. 7 at 1077:16–20 (Patel).¹⁷

10 DIRECTV’s investment of substantial resources in analyzing its operations, candidly
11 identifying areas for improvement, and following through on a number of improvements does not
12 support a finding that the company violated the FTC Act. If anything, this evidence further
13 underscores how this case is very unlike the straightforward deception cases upon which the FTC
14 purports to rely.

15 d. Other Evidence

16 Finally, none of the FTC’s other evidence persuasively met its burden of proof of showing
17 that DIRECTV’s print advertisements were likely to deceive a reasonable consumer. The FTC’s
18 attempt to rely almost entirely on pretrial deposition testimony regarding a large number of
19 exhibits never even discussed at trial is telling, and does not account for the detailed and credible
20 trial testimony that substantially undercut its position. See Dkt. No. 401-1 at ¶¶ 411–453 (citing

21
22 ¹⁶ DIRECTV witnesses testified that, due to upfront “subscriber acquisition costs” approaching
23 \$1,000 per subscriber, the company does not break even until, on average, a customer remains on
24 the platform for 28 to 30 months. Tr. Vol. 2 at 330:3–6 (Bentley); Tr. Vol. 8 at 881:25–882:2
(Gieselman). This means that it is “absolutely paramount” to DIRECTV’s business model to
25 retain the average customer for longer than the break-even point. Tr. Vol. 2 at 347:24–348:14
(Bentley).

26 ¹⁷ “Net Promoter Score,” or “NPS,” is a calculation of promoters (consumers who are satisfied or
27 would recommend a service) minus detractors (consumers who are dissatisfied or would not
28 recommend a service), the sum of which measures customer satisfaction. Tr. Vol. 3 at 363:12–
364:11 (Bentley); Ex. 571 at 2. NPS is not a metric unique to DIRECTV; rather, it is a “self-
critical” standardized metric that can be compared within and across industries. Tr. Vol. 3 at
364:6–11 (Bentley).

1 virtually no trial testimony). Moreover, the FTC’s approach appears to have been to seize on
2 language superficially helpful to its case in documents, while consistently ignoring pivotal context
3 showing the actual meaning of the evidence.

4 For example, the FTC called DIRECTV executive Brad Bentley in its case-in-chief, and
5 asked him a number of questions about a study prepared by McKinsey consultants as part of the
6 CX Committee project. Tr. Vol. 2 at 279:17–282:5 (Bentley); Ex. 573 (July 10, 2012 “discussion
7 document” slide deck). FTC counsel focused on a slide called “NPS drops early--opportunity to
8 improve selling and on-boarding.” Tr. Vol. 2 at 279:17–282:5 (Bentley); Ex. 573 at 18.
9 Government counsel suggested that the slide showed that “33 percent of DIRECTV customers felt
10 misled during the sign-up process.” Tr. Vol. 2 at 281:4–9. But on redirect, Mr. Bentley made
11 clear that because this exercise surveyed customers in the first 90 days of their subscriptions, this
12 figure had nothing to do with the issues that are the basis of the FTC’s complaint: second-year
13 pricing, 24-month commitment or early cancellation fees. Id. at 288:15–289:14. Moreover, Mr.
14 Bentley persuasively explained that the biggest complaint among onboarding customers at this
15 time was the first month’s bill not aligning with the customer’s expectations, an issue DIRECTV
16 addressed by replacing its mail-in rebate model with an automatic instant rebate model. Id. at
17 291:13–294:14 (customers reported feeling misled in survey because, although they “had to
18 redeem [their] rebate” in order to obtain the introductory price, “oftentimes consumers wouldn’t
19 redeem [the rebate] quick[ly] enough for it to be reflected on the first month bill.”).

20 **iv. Conclusion**

21 The evidence at trial conclusively established that the FTC failed in its case-in-chief to
22 meet its burden of proving a Section 5 claim based on any of DIRECTV’s non-website
23 advertisements. The FTC’s ambition in attempting to show that over 40,000 advertisements were
24 likely to deceive substantially exceeded the strength of its evidence: this case did not involve the
25 type of strong proof the Court would expect to see in a case seeking nearly \$4 billion in restitution,
26 based on a claim that all of DIRECTV’s 33 million customers between 2007 and 2015 were
27 necessarily deceived. Tr. Vol. 1 at 34:3–16 (FTC’s opening statement). Because the FTC

1 definitively failed to prove its case as to Defendant’s non-website advertisements, the motion for
2 judgment on partial findings is **GRANTED** as to the FTC’s Section 5 claims to the extent they are
3 based on those advertisements.

4 **D. The Court Will Defer Judgment With Regard to the Claims Based on the Website**

5 For now, the Court reaches a different conclusion with regard to the Section 5 and ROSCA
6 claims based on the various iterations of Defendant’s website. While the FTC’s case as to the
7 websites was far from overwhelming, the Court finds it appropriate to defer a determination on
8 these claims until after the close of the evidence.

9 **i. Website version tested by Dr. Erdem (Exs. 1052, 2033 and 2371)**

10 Dr. Erdem conducted an online survey based on a modified mockup version of the August
11 2013 version of DIRECTV’s website (known as the “Old Flow”). Ex. 2371; Tr. Vol. 6 at 929:1–
12 11, 937:23–938:8; Tr. Vol. 4 at 683:17–684:4; Tr. Vol. 9 at 1448:1–20 (Poling-Hiraldo and
13 Leever). Dr. Erdem testified that she used the August 2013 Old Flow version of the website
14 because she understood that this was the only interactive live version the FTC was able to recover.
15 Tr. Vol. 6 at 938:2–5. FTC expert witness Dr. Nathan Good prepared the “UX” (or user
16 experience) version of the August 2013 Old Flow that Dr. Erdem used as the basis for the
17 treatment stimulus. Tr. Vol. 1 at 114:8–20, 121:8–25 (Good). A number of the links that were
18 live on the actual website were not live in Dr. Good’s UX version (meaning that nothing would
19 happen when those links were clicked). Id. at 114:16–20, 121:8–126:14; see also generally Ex.
20 1052.

21 Dr. Erdem claimed that the results of her survey could be generalized to draw conclusions
22 about other versions of the website beyond the one she tested. Tr. Vol. 6 at 956:3–957:15, 986:1–
23 995:25. She testified that she would “expect” the results to be the same for other versions of the
24 website, but she did not test any other versions. Tr. Vol. 6 at 1003:16–23.

25 In the Old Flow, to complete a purchase, consumers would navigate through a landing
26 page, programming package selection page, receiver selection page, a shopping cart page, and
27 several checkout pages. See Ex. 1045; see also Ex. 2033 at .pdf p. 2 (Landing Page), 5–8

1 (Programming Package Selection Page), 28 (Receiver Selection Page), 47–49 (Shopping Cart
2 Page), 107 (Checkout Page: Installation Address), 111 (Checkout Page: Account Info), 112
3 (Checkout Page: Billing Address), and 121–123 (Confirmation Page).

4 Based on a facial review of the Old Flow, the Court cannot say conclusively at this stage
5 that the FTC has failed to prove that this version of the website could create a net impression that
6 was likely to deceive a consumer acting reasonably under the circumstances. In the Old Flow, on
7 the landing page of the website, near the introductory discounted price, DIRECTV disclosed that
8 the discounted price was for 12 months and required a 24-month agreement, see Ex. 2033 at 1;
9 Dkt. No. 370 (“Tr. Vol. 3”) at 510:7–10 (Poling-Hiraldo). However, other significant details only
10 became visible if the prospective customer moused over a small info hover, labeled only “Offer
11 Details,” at the bottom of the landing page under the “View All Packages” button. See Ex. 2033 at
12 2 (disclosures that all offers require a 24-month agreement, the amount of the discount for the first
13 12 months, and the \$20/month early cancellation fee appeared only behind info hover).

14
15
16
17
18 When a prospective customer clicked the “View All Packages” button and provided her zip
19 code, she would move to the package selection page. Id. at 3–4. On that page, near the
20 introductory discounted price, DIRECTV disclosed that the discounted price was for 12 months
21 with a 24-month agreement, and disclosed the regular package price, see Ex. 2033 at 4.

ENTERTAINMENT

140+ digital channels

\$29⁹⁹ mo

ONLY \$24⁹⁹ MO

FOR 12 MONTHS

FOR 12 MONTHS AFTER INSTANT SAVINGS WITH 24-MO. AGREEMENT

Select

INCLUDES

Value-packed package

Includes all the top entertainment and news channels.

(Reg. \$54.99/mo)

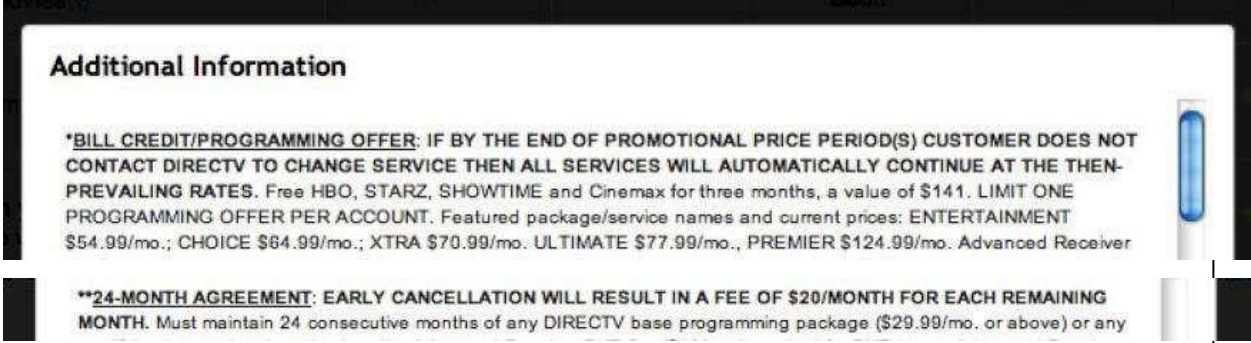

On the bottom of each of the package selection page, receiver selection page, and cart page, DIRECTV disclosed that all offers require a 24-Month Agreement, next to a blue “Additional Offer Details” hyperlink, see Ex. 2033 at 7, 48, 92; Tr. Vol. 3 at 511:17–512:11 (Poling-Hiraldo).

ALL OFFERS REQUIRE 24-MONTH AGREEMENT. Offers end 10/2/13 and are based on approved credit; credit card required, except in MA & PA. New customers only (lease required). Applicable use tax adjustment may apply to the retail value of the installation. Programming, pricing and offers are subject to change and may vary in certain markets. Customers activating the CHOICE Package or above or the MAS ULTRA Package will be automatically enrolled in the 2013 season of NFL SUNDAY TICKET at no additional cost and will receive a free upgrade to NFL SUNDAY TICKET MAX for the 2013 season.

[Additional Offer Details](#)

Again, however, significant details appeared only if a prospective customer clicked the blue “Additional Offer Details” link on the package selection page, receiver selection page, and cart page. Clicking this link led users to a light box (i.e., a textbox overlay that appeared on the same page and dimmed the background, Tr. Vol. 1 at 84:10–14 (Stahl); Tr. Vol. 3 at 451:10–15 (Mandel)) containing a long list of details about the offer, including that the customer had to call to change or cancel the premium channels after three months or be charged the then-prevailing rate; the regular cost of the premium channels for three months; the regular package prices; the 24-month agreement; and the \$20/month early cancellation fee, see Ex. 2033 at 23-26; Tr. Vol. 3 at 512:12–513:25 (Poling-Hiraldo). While this box is titled “Additional Information,” much of this information is actually central to a potential customer’s ability to evaluate and understand the terms of the subscription.

At the top of the shopping cart page, DIRECTV disclosed the regular package price in black, and the first year discount immediately underneath it, in green, as a bill credit labeled for “Months 1-12,” see Ex. 2033 at 50. On the cart page, immediately next to the package, the website included blue language reading “What is my agreement?” Id. at 49. A prospective customer who clicked on this language would see a box reading “You agree to maintain DIRECTV service with any base package of \$29.99/mo. or above for 24 consecutive months.” Id.; Tr. Vol. 3 at 514:23–515:12, 516:15–21 (Poling-Hiraldo).¹⁸

At the top of the Cart, next to the “Package & Programming” header, DIRECTV provided a “View Monthly Cost” tab that opened a chart showing all costs for each of the 24 months in six month blocks, including that the regular price of the premium channels would be billed starting in month four, and that the regular package price would be billed starting in month 13, see 2033 at 78–79; Tr. Vol. 3 at 514:1–22, 518:17–519:4 (Poling-Hiraldo).

In the Cart, under a “Premium Channels” header, DIRECTV disclosed the regular price of the premium channels in black, and immediately underneath them, in green, a bill credit labeled: “FREE for 3 months: HBO, SHOWTIME, STARZ, and Cinemax”, see Ex. 2033 at 59. Again, the

¹⁸ DIRECTV referred to this mechanism as a “tool tip.” A tool tip is a method DIRECTV used to disclose additional information on the same webpage when the consumer clicked on a prompt or icon signaling there was additional information (e.g., a blue “i” enclosed in a circle). Tr. Vol. 3 at 515:24–25, 516:7–11 (Poling-Hiraldo). Unlike a hyperlink, a tool tip does not redirect a user to another webpage. Id. at 516:7–11.

1 disclosure that the customer must call to cancel the premium channels after three free months or be
 2 charged the then-prevailing rate only appeared if the prospective customer moused over an info
 3 hover next to the premium channel bill credit in the shopping cart on the cart page. See Ex. 2033
 4 at 58; Tr. Vol. 3 at 517:10–20 (Poling- Hiraldo).

10 Finally, on the checkout page of the Old Flow, before the consumer could place an order
 11 and transmit financial information to DIRECTV, the consumer was required to affirmatively click
 12 the orange button affirming: “I Accept. Submit My Order.” Ex. 2033 at 111. Next to the orange
 13 button was a blue hyperlink labeled “By clicking ‘Submit Order’ I agree to these Terms &
 14 Conditions.” Id. Clicking on this link brought up a light box that detailed the 24-month
 15 agreement and the \$20/month early cancellation fee. See Ex. 1021 at 124-25; Tr. Vol. 3 at 519:5–
 16 15 (Poling-Hiraldo).

17 

19 It was technically possible for a consumer to proceed through the entire purchase process
 20 without ever clicking or hovering over any of the hyperlinks or symbols described above. See Ex.
 21 1060 at 0:01–5:20, Ex. 1069 at 0:01–5:21; Tr. Vol. 9 at 1482:22–1483:3, 1513:11–1514:15
 22 (Leever).

23 **ii. Section 5**

24 Based on a facial review of the Old Flow website, as well as the evidence introduced at
 25 trial, the Court will defer a finding as to what net impression that website would leave with a
 26 consumer acting reasonably. The manner in which some key terms were presented behind
 27 hyperlinks, info hovers and tool tips leaves the Court unable to conclude at this stage that

1 judgment on partial findings is appropriate. The Court likewise defers this analysis as to the other
2 versions of the website placed in evidence by the FTC.¹⁹

3 iii. **ROSCA**

4 ROSCA prohibits certain methods of negative option marketing on the Internet. A
5 “negative option feature” is “an offer or agreement to sell or provide any goods or services, a
6 provision under which the customer’s silence or failure to take an affirmative action to reject
7 goods or services or to cancel the agreement is interpreted by the seller as acceptance of the offer.”
8 16 C.F.R. § 310.2(w). ROSCA prohibits charging consumers for goods or services in Internet
9 transactions through a negative option feature, unless the seller “provides text that clearly and
10 conspicuously discloses all material terms of the transaction before obtaining the consumer’s
11 billing information.” 15 U.S.C. § 8403(1). Additionally, ROSCA requires sellers to obtain a
12 “consumer’s express informed consent before charging the consumer’s credit card, debit card,
13 bank account, or other financial account for products or services through such transaction.” *Id.*
14 § 8403(2).

15 Consistent with the above discussion of the Old Flow, the Court will defer ruling on this
16 claim until the close of the evidence. The Court is not in a position to conclude on the record
17

18 ¹⁹ DIRECTV’s web flow underwent two major redesigns during the relevant time period. The
19 design that existed until late 2009 was referred to as the “Wizard Flow.” In late 2009, the Old
20 Flow replaced the Wizard Flow, and the “New Flow” completely replaced the Old Flow in 2014.
21 Tr. Vol. 4 at 683:17–684:4 (Poling-Hiraldo); Tr. Vol. 9 at 1448:12–20 (Leever). The New Flow
22 was publically split-tested with the Old Flow from January to July of 2014. During that period,
23 some consumers were directed to the Old Flow, and some were directed to the New Flow. Tr.
24 Vol. 9 at 1493:7–1494:2 (Leever). After more than a year of development, the New Flow took
25 over 100% of prospect traffic in July 2014. Tr. Vol. 9 at 1486:21–1487:5 (Leever). The Wizard
26 Flow, Old Flow, and New Flow differed significantly with respect to, among other things: the
27 design and layout of information (e.g., whether the packages were presented vertically or
28 horizontally); the number and placement of hyperlinks, tool tips, or info hovers that DIRECTV
used to disclose information about its offers and product; and the icons and prompts signaling
those hyperlinks, tool tips, or info hovers. Compare Ex. 1000 (9/4/09 Wizard Flow), with Ex.
2033 (8/13 Old Flow), with Ex. 1065 (9/17/15 New Flow); see also Tr. Vol. 9 at 1448:22–1451:21
(Leever). DIRECTV’s web flow designs also differed with respect to the flow of webpages. For
example, in the New Flow, between the package selection step and the receiver selection step, the
consumer was directed to a “Choose add-on packages” step that was not in the Old Flow. At the
top of this step, DIRECTV provided information and disclosures regarding the free premium
channels offer. See Ex. 1065 at 10:58–11:14 (9/17/15 capture).

1 presented thus far that the FTC cannot meet its burden, given the manner in which information
2 about the negative option feature appeared on the website behind hyperlinks, info hovers or tool
3 tips. This decision to defer ruling until the close of the evidence applies to all versions of the
4 website in existence in 2011 or later that were introduced in evidence by the FTC.²⁰

5 **E. Remedy**

6 Because the Court has granted Defendant’s motion for partial findings to the extent the
7 FTC’s case is based on anything other than Defendant’s website, the scope of the maximum
8 potential recovery in this case has been substantially curtailed.²¹ Even in the event the FTC might
9 eventually be able to prevail on what remains of the case (a question the Court need not answer at
10 this stage), the Court believes that there are a number of problems with the FTC’s equitable relief
11 theories that suggest it will have difficulty meeting its burden of providing an adequate basis for
12 the relief it seeks.

13 The Ninth Circuit has held that § 13(b) of the FTC Act empowers the Court to award “any
14 ancillary relief necessary to accomplish complete justice, including restitution” and injunctive
15 relief. *Commerce Planet*, 815 F.3d at 598 (citing *F.T.C. v. Pantron I Corp.*, 33 F.3d 1088, 1102
16 (9th Cir. 1994)). This holding was premised on the principle that “[t]he equitable jurisdiction to
17 enjoin future violations of § 5(a) carries with it the inherent power to deprive defendants of their
18 unjust gains from past violations” *Commerce Planet*, 815 F.3d at 599. The Ninth Circuit has
19 adopted a two-step approach to determining the amount of unjust gains. Under the first step, “the
20 FTC bears the burden of proving that the amount it seeks in restitution reasonably approximates
21 the defendant’s unjust gains.” *Commerce Planet*, 815 F.3d at 603. In *Commerce Planet*, the
22 Ninth Circuit held that unjust gains in a case like that one are “measured by the defendant’s net
23 revenues (typically the amount consumers paid for the product or service minus refunds and
24 chargebacks), not by the defendant’s net profits.” *Id.* If the FTC makes this showing, at the

25
26 ²⁰ ROSCA was enacted on December 29, 2010.

27 ²¹ See Tr. Vol. 9 at 1441:23–1442:15 (only approximately 20% of direct sales subscribers either
28 subscribed via DIRECTV.com or subscribed via a phone number that indicated they started the
subscription process on the website) (Leever).

1 second step “the burden then shifts to the defendant to show that the FTC’s figures overstate the
2 amount of the defendant’s unjust gains.” Id. at 604. “[T]he purpose of such an award is to prevent
3 the defendant’s unjust enrichment by recapturing the gains the defendant secured in a transaction.”
4 Id. at 603 (quotation omitted).

5 Here, the Court has significant questions about the FTC’s ability to prove that the amount
6 it seeks in restitution reasonably approximates the Defendant’s unjust gains, even if it prevails to
7 some extent with regard to its Section 5 claim based on the website. Expert witness Dr. Daniel
8 Rascher testified in support of the FTC’s claim that \$3.95 billion represents “a reasonable estimate
9 (under Commerce Planet) of the unjust gains DIRECTV collected from consumers.” Dkt. 337 at
10 11. To calculate this amount, Dr. Rascher examined customer billing data for certain types of
11 programming packages identified by the FTC. Tr. Vol. 10 at 1552:5–10, 1554:11–17. He then
12 calculated an estimate of unjust gains related to second year pricing, Tr. Vol. 10 at 1599:09–
13 1600:07 (\$3.68 billion); Ex. 1321, and the premium channel offer, Tr. Vol. 10 at 1605:12–16
14 (\$268 million); Ex. 1322.²²

15 Dr. Rascher testified that he calculated DIRECTV’s “unjust gains” based on the
16 assumption that “all DIRECTV subscribers . . . thought they would pay the same amount in the
17 second year as they paid in the first,” Tr. Vol. 10 at 1630:15–20 (emphasis added), and that he
18 applied “that same kind of presumption” with respect to unjust gains for the premium channel
19 offer, id. at 1681:11–25. He thus presumed that all DIRECTV subscribers in his approximation of
20 unjust gains were misled, and that they were all misled in the same way. Dr. Rascher testified that
21 he was instructed that the FTC would prove what DIRECTV customers “thought” or “believed”
22 their deal with DIRECTV to be and thus supply the core predicate for his analysis. Tr. Vol. 10 at
23 1616:13–18, 1618:08–25 (Rascher). Dr. Rascher testified that the FTC advised him that he could
24 “presume reliance,” which he said he then “operationalized” as a presumption that all subscribers
25 purchased DIRECTV service with the “expectation” that the second-year price would be the same

26
27 ²² Dr. Rascher had never previously testified in a false advertising case before this trial. Tr. Vol.
28 10 at 1608:9–11.

1 as the first year price (and he adopted similar presumptions as to the other terms at issue). Tr. Vol.
2 10 at 1554:5–1556:6.

3 The Court acknowledges the Ninth Circuit’s holding that once the FTC proves a defendant
4 made widely-disseminated material misrepresentations, it is “entitled to a presumption that all
5 consumers who purchased [defendant’s product] did so in reliance on the misrepresentations.”
6 *Commerce Planet*, 815 F.3d at 604 (citing *F.T.C. v. Figgie Int’l*, 994 F.2d 595, 605-06 (9th Cir.
7 1993)).²³ But here, the Court believes the FTC has an uphill climb to prove its “expectation”
8 theory, because it will be difficult to establish based on the presentation of various terms in several
9 different iterations of Defendant’s website that a reasonable consumer uniformly would expect to
10 pay the same price in year two that she paid in year one, as Dr. Rascher assumed. See Tr. Vol. 10
11 at 1555:08–16 (to determine the price that a customer would pay in the but-for world, Dr. Rascher
12 simply used the price the customer had paid in the first year based on the billing data). In other
13 words, Dr. Rascher simply presumed that customers had an expectation that they would pay the
14 same introductory price for two years, based only on an instruction from the FTC. *Id.* at 1618:08–
15 25, 1667:02–09 (Rascher). The Court believes that this issue, and the breadth of the FTC’s
16 interpretation of the “presumption of reliance,” creates a significant possibility that at the close of
17 the evidence the FTC will be unable to establish a reasonable approximation of damages, or that
18 its approximation will be substantially or even entirely rebutted by the Defendant. In any event,
19 the Court will confront this concern if the FTC is able to prove liability as to what remains of its
20 case.²⁴

21
22

23 ²³ Defendants cite the Second Circuit’s decision in *F.T.C. v. Verity Int’l*, 443 F.3d 48, 69 (2d Cir.
24 2006), in support of its argument that no presumption of reliance applies here. Dkt. No. 396 at 23.
25 The Ninth Circuit has never adopted the reasoning of *Verity*, and in fact distinguished that case in
26 an unpublished memorandum disposition. See *F.T.C. v. Publishers Bus. Svcs.*, 540 Fed. Appx.
27 555, 556–557 (9th Cir. 2013) (reversing as inconsistent with Ninth Circuit law district court’s
28 holding, relying in part on *Verity*, that defendants’ gain rather than consumers’ loss was proper
measure of equitable damages).

²⁴ The Court will also have to consider whether injunctive relief is warranted, and assess the
appropriate measure of recovery under ROSCA if the FTC proves that claim.

V. CONCLUSION

Accordingly, the Court **GRANTS IN PART** Defendant’s motion for judgment on partial findings. To the extent the motion is not granted, the Court declines to enter judgment until the close of the evidence.

The Court **SETS** a case management conference for September 4, 2018 at 2:00 p.m. to discuss (1) a schedule and plan for completing what remains of the trial; and (2) whether the parties believe that renewed settlement discussions would be productive in light of the Court’s findings and conclusions.

IT IS SO ORDERED.

Dated: 8/16/2018

HAYWOOD S. GILLIAM, JR.
United States District Judge
