

EXHIBIT 2

SECOND DECLARATION OF JILL E. STIGLICH

I, Jill E. Stiglich, pursuant to 28 U.S.C. § 1746, hereby declare as follows:

1. I am the Director of Contracting for the U.S. Army Corps of Engineers (USACE), and have been designated as the Head of the Contracting Activity (HCA) for USACE by the Senior Procurement Executive for the Department of the Army. In my capacity as the Director of Contracting and HCA for USACE, I am responsible for oversight and direction of the South Pacific Border District (Border District) for the USACE South Pacific Division.

2. This declaration is based on my personal knowledge and information made available to me in the course of my official duties.

3. As explained in the seventh declaration of Kenneth P. Rapuano, dated February 13, 2020, on February 13, 2020, the Secretary of Defense approved 31 additional Section 284 projects and segments to be funded using \$3.831 billion transferred to the counter-narcotics support line of the Drug Interdiction and Counter-Drug Activities, Defense, account. Such funds have been transferred from that account to the Operation and Maintenance, Army, account for use by USACE to undertake fence and road construction and lighting installation for the approved projects.

4. USACE anticipates that it will award contracts and fully obligate the necessary funds for these additional Section 284 projects no later than September 30, 2020, but no earlier than March 15, 2020. The funds will expire if they are not obligated before the end of the fiscal year. USACE does not expect to begin construction, or engage in any ground disturbing activities, on any of these Section 284 projects before March 15, 2020.

5. Generally, USACE anticipates utilizing two contracting processes to construct the additional Section 284 projects.

a. For the additional Section 284 projects that are in close proximity to existing Section 284 projects authorized in fiscal year 2019, USACE intends to execute non-competitive modifications to the existing contracts. These existing contracts include the El Paso 1 contract; the Tucson 1, 2, and 3 contracts; and the El Centro/Yuma 1 contract. USACE plans to seek proposals from the contractors currently performing work under the existing Section 284 contracts, enter into bilateral contract modifications for the additional work, and fully obligate the necessary funds no earlier than March 15, 2020. Because the contractors working on the existing Section 284 contracts are already mobilized in close proximity to the new work, ground-disturbing activities and substantial construction may occur as early as the dates of execution of the contract modifications. USACE is working to determine which, if any, of the additional Section 284 projects to undertake using this non-competitive process.

b. For the remaining Section 284 projects that are not executed through the non-competitive contract modification process described above, USACE intends to undertake a competitive contract award process and award task orders to the short-list of qualified contractors currently holding either one of two existing multiple award task order contracts (MATOCs). A MATOC is a type of indefinite delivery contract that does not procure or specify a firm quantity of services (other than a minimum or maximum quantity) and that provides for the issuance of orders for the performance of tasks during the period of the contract. USACE anticipates that it will award the first of these task orders and fully obligate the necessary funds for these additional Section 284 projects no earlier than April 7, 2020. For these projects, USACE will be prepared to begin ground-disturbing activities as early as five days after task order award and substantial construction as early as ten days after task order award.

I hereby declare under penalty of perjury that the foregoing is true and correct.

Executed on: February 13, 2020

JILL E. STIGLICH
