**DECLARATION OF LESLIE A. PEREIRA**

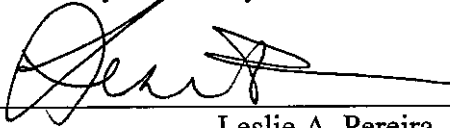

I, Leslie A. Pereira, declare as follows:

1. I am an attorney duly licensed to practice law in the State of California and before the bar of this Court. I am of counsel to the law firm of Abelson | Herron LLP and, in that capacity, I am counsel of record for Plaintiffs Netscape Communications Corporation and America Online, Inc. (collectively, the "Insureds") in this action. I have personal knowledge of the matters stated herein, except as to matters upon which I state are based upon information and belief. I could and would competently testify to the same.

2. Attached hereto as Exhibit G is a true and correct copy of excerpts from the book, "The Complete Idiot's Guide to the Internet," (Seventh Edition) by Peter Kent.

I declare under penalty of perjury of the laws of the United States of America that the foregoing is true and correct.

Executed this 11<sup>th</sup> day of January 2007 at Los Angeles, California.

- **The World Wide Web** The Web is so popular that many Internet users think that the term *World Wide Web* is synonymous with the *Internet*. It's not, although it certainly is the pre-eminent Internet tool, one that's used for many different purposes. The Web is a giant *hypertext* system in which documents around the world are linked to one another. Click a word in a document in, say, Sydney, Australia, and another document (which might be from Salzburg, Austria) appears. You'll begin learning about this amazing system in the very next chapter.
- **Newsgroups** Newsgroups are discussion groups. Want to hear the latest theory about why American teenagers are arming themselves to the teeth? Want to learn an unusual kite-flying technique? Want to learn about...well, anything really? You can choose from tens of thousands of internationally distributed newsgroups, and you'll find out how to work with them in Chapter 10, "Finding and Using Newsgroups."
- **Mailing lists** If tens of thousands of discussion groups are not enough for you, here are hundreds of thousands more. As you'll learn in Chapter 11, "More Internet Discussions—Mailing Lists and Web Forums," mailing lists are another form of discussion group that works in a slightly different manner—you send and receive messages using your email program. You'll learn about Web forums, too, discussion groups located at Web sites. In these forums, you read and submit messages using your Web browser.

## Getting on the Net

So, you think the Net sounds great. How do you get to it, though? You can get Internet access in a number of ways:

- Your college provides you with an Internet account.
- Your company has an Internet connection from its internal network.
- You use an online service such as America Online (AOL), CompuServe, The Microsoft Network (MSN), or Prodigy.
- You use a small, local Internet service provider.
- You use a large, national Internet service provider such as PSINet, EarthLink, or SpryNet.
- You use a free Internet-access service.
- You use your cable-TV company's Internet access service.
- You've signed up with one of the phone companies, such as AT&T, Sprint, or MCI WorldCom, or your local phone company.
- You use some sort of special high-speed access system such as satellite access or microwave service.
