1 October 5, 2007 9:20 a.m.

2 P R O C E E D I N G S

3 THE VIDEOGRAPHER: Here begins the
4 30(b)(6) deposition of David Tufts, Tape 1, Volume
5 1, in the matter of Facebook, Inc., et al. versus
6 ConnectU, et al. in the United States District
7 Court, Northern District of California, San Jose
8 Division, Case No. 5:07-CV-01389-RS. Today's date
9 is October 5th, and the time on the video monitor is
10 9:21. The video operator today is Rosa Fox-Ogg,
11 representing LiveNote World Service, located at 221
12 Main Street, San Francisco, California 94105, phone
13 number 415-321-2300. The court reporter is Alan H.
14 Brock, of the firm Farmer Arsenault Brock, on behalf
15 of LiveNote World Service. Today's deposition is
16 being taken on behalf of the plaintiffs and is
17 taking place at One International Place, Boston,
18 Massachusetts.

19 Counsel, please introduce yourselves and
20 state whom you represent.

21 MR. CHATTERJEE: This is Neel Chatterjee
22 and Theresa Sutton, representing Facebook, Inc., and
23 Mark Zuckerberg.

24 MR. HAMPTON: My name is Dan Hampton. I
25 don't represent a party in the California case, but

1 I represent defendant Eduardo Saverin in a case
2 sharing many of the same parties now pending in the
3 District of Massachusetts.

4 MS. SCHOENFELD: This is Meredith
5 Schoenfeld, from Finnegan Henderson Farabow Garrett
6 & Dunner. I represent the plaintiffs in the same
7 Massachusetts litigation, ConnectU.

8 MR. SCHULTZ: Chris Schultz, for the
9 defendants.

10 MR. CHOW: Stephen Chow, for iMarc,
11 Inc., and the witness today.

12 MR. CHATTERJEE: And just for sake of
13 clarity, Ms. Sutton and I also represent all of the
14 defendants except for Eduardo Saverin in the
15 Massachusetts case that Ms. Schoenfeld and Mr.
16 Hampton referred to.

17 DAVID TUFTS, duly sworn

18 EXAMINATION

19 BY MR. CHATTERJEE:

20 Q. Please state your name for the record.

21 A. David Tufts.

22 Q. Mr. Tufts, my name is Neel Chatterjee, and
23 I'm an attorney for the plaintiffs in a lawsuit
24 pending in California. I represent Facebook, Inc.
25 and Mark Zuckerberg in that case.

1 Have you ever had your deposition taken
2 before?

3 A. No.

4 Q. By the way, thank you for coming today.
5 I'm going to go through some ground rules with you
6 about the deposition before we get started, just to
7 kind of make sure we're on the same page and you
8 kind of know how the process works, because you
9 haven't had your deposition taken before.

10 A. Uh-huh.

11 Q. The basic process of a deposition is pretty
12 simple: I'll ask you questions, and I will expect
13 that you will answer, absent your attorney saying
14 something's protected by attorney-client privilege,
15 in which case your lawyer will tell you what to do.

16 This is a videotaped deposition, and
17 what that means is, your testimony here is basically
18 the same as if it were in trial. And if it were in
19 trial, we would have a judge sitting in the room,
20 too, and there might be jurors and other people
21 witnessing this testimony.

22 However, this is a slightly more
23 informal procedure, but your testimony is exactly
24 the same. Do you understand that?

25 A. Yes.

1 MR. CHATTERJEE: Let's mark this as
2 Exhibit in this case 63.

3 (Exhibit 63 marked for identification.)

4 Q. Before I give Exhibit 63 to the witness,
5 I'm going to ask one thing, Mr. Tufts: I'm going to
6 try as best as possible to encourage you to look
7 into that camera when you're answering questions.
8 If it ends up being uncomfortable or strange because
9 you're actually getting questions from me, I'm not
10 going to push you a lot on this. The only reason I
11 do that is because, if we choose to submit this to a
12 judge or a jury, it creates a very strange effect
13 when you're not looking into the camera, because
14 they kind of see a witness who is looking someplace
15 that they can't see where the witness is looking.

16 So I may ask you at times, "Can you look
17 into the camera and answer the question," or
18 something like that. But I don't want you focusing
19 on that. It's more important that your testimony be
20 truthful and accurate.

21 One other question before we get started
22 on this: Are you under any medications or is there
23 any reason why you could not testify truthfully and
24 accurately today?

25 A. No.

1 Q. So let me hand you Exhibit 63. Mr. Tufts,
2 do you recognize this document?

3 A. Yes.

4 Q. What do you understand this document to be?

5 A. Not a whole lot. It tells me that I'm
6 supposed to be here at this time and that you're
7 going to ask me questions.

8 Q. So you understand that you're testifying as
9 a corporate designee for iMarc about the topics set
10 forth in this deposition notice.

11 A. Yes.

12 Q. And what did you do to prepare for your
13 deposition today? And I don't want you to talk
14 about specific conversations with your lawyers.
15 Just generally, could you describe what you did to
16 prepare for your deposition today.

17 A. We talked about -- I believe there's a
18 bullet list on the last page of this, and we just
19 kind of talked about those items.

20 Q. How long did you spend preparing?

21 A. A morning.

22 Q. Would you say that was two hours, three
23 hours?

24 A. Two to three hours.

25 Q. Anything else you did to prepare for the

1 deposition today?

2 A. I looked through some of the emails that
3 you guys have like a whole -- our archive of emails,
4 and I looked through some of them just to refresh my
5 mind.

6 Q. Did you have any conversations with people
7 at iMarc or that have left iMarc about the topics?

8 A. Not about the topics, just mostly about the
9 sort of like hassle of it.

10 Q. The fact that you're being deposed.

11 A. Yes.

12 Q. And were you involved at all in the
13 collection and production of documents from iMarc?

14 A. Yes. I printed out my emails.

15 Q. Did you do anything else?

16 A. For this trial? To produce documents in
17 response to a subpoena. I think a number of months
18 ago we were -- our emails or documents were
19 subpoenaed. I'm not sure if that's the right term.
20 And I printed out all the emails that I had and gave
21 them to Nils, who I work with, and he emailed them
22 to wherever we were supposed to email them.

23 Q. Could you give me Nils' last name?

24 A. Nils Menten.

25 Q. Could you spell that, please?

1 A. N-i-l-s M-e-n-t-e-n.

2 Q. And was Mr. Menten the person that was
3 coordinating the document production related to that
4 subpoena?

5 A. Yes. Our first subpoena, or all these
6 subpoenas have come to iMarc. He is the founder,
7 the president, so he sort of took charge of the
8 first one. I was a little more familiar with this
9 matter, so after he sent in emails, it kind of fell
10 in my court.

11 Q. I'm going to ask you to speak up just a
12 little bit, to make sure that the court reporter can
13 get the transcript down and the mike picks you up.

14 A. Okay.

15 Q. Could you describe what your educational
16 background is.

17 A. I finished -- I went to high school and
18 then college.

19 Q. Where did you go to college?

20 A. Northeastern University.

21 Q. And what kind of degree did you get?

22 A. Bachelor of arts.

23 Q. And in what subject matter?

24 A. Graphic design.

25 Q. Other than a bachelor of arts in graphic

1 design, do you have any special training or
2 certifications?

3 A. No.

4 Q. And where do you currently work?

5 A. IMarc.

6 Q. And what is your job at iMarc?

7 A. I'm one of the partners.

8 Q. Could you generally describe on a
9 day-to-day basis what you do?

10 A. Mostly on a day-to-day basis I do project
11 management. We make websites, Web applications; and
12 my job right now is interfacing between clients and
13 our production team and finding out what clients
14 want and making sure our production team does it.

15 Q. How long have you been with iMarc?

16 A. Since nine -- since November of 1999.

17 Q. Did you join iMarc straight out of college?

18 A. No.

19 Q. Where did you work before that?

20 A. A company called Unison.

21 Q. Could you spell that, please.

22 A. U-n-i-s-o-n.

23 Q. What did Unison do?

24 A. They printed large-scale graphics, banner
25 advertisements, for the FleetCenter, places like

1 that the Web servers were running.

2 Q. You were the IT guy.

3 A. Yes. But at that point there were -- iMarc
4 was three people, or two people, so everyone was
5 every guy.

6 Q. Did your job responsibilities ever change
7 from being a computer programmer and server
8 administrator?

9 A. Yes.

10 Q. And how did your jobs change?

11 A. As iMarc grew, probably by 2002 -- or I
12 just became more involved -- between 2000 and 2002 I
13 became more involved with the programming. And then
14 around 2002-2003 I became -- or no, even after that.
15 I guess it would have been -- I'm not sure; maybe
16 2004-2005, even, I became a project manager. I did
17 more of that stuff, because we had more employees,
18 and there needed to be sort of another layer of
19 project management.

20 Q. And project manager is the person who
21 interfaces between the clients and the production?

22 A. Yes.

23 Q. At what point did you become a partner in
24 iMarc?

25 A. 2000, early 2000, late 19- -- yeah, early

1 2000, I think, or late 1999; right around there.

2 Q. How big is iMarc today?

3 A. Seventeen people.

4 Q. How many clients does iMarc have,
5 approximately?

6 A. 150.

7 Q. I'm going to go through a list of names,
8 just to understand who they are, because we've seen
9 a lot of different names in the various email
10 traffic and things, and I just want to get a sense
11 of who they are and what they did.

12 Bill Boo-shee?

13 A. Bushee.

14 Q. Who is Bill Bushee?

15 A. He is a programmer at iMarc, a Web
16 developer.

17 Q. What is a Web developer?

18 A. He writes the code that powers the
19 websites.

20 Q. Do you know how long he's been with iMarc?

21 A. I believe he joined iMarc around 2000.

22 Q. And Nick Grant?

23 A. Nick Grant was the first project manager.
24 He joined iMarc January of 2000, as a project
25 manager. As iMarc grew, we split, and we needed two

1 project managers. But Nick has always been a
2 project manager at iMarc. He is also a partner in
3 the company.

4 Q. Is he still with iMarc?

5 A. Yes.

6 Q. And is Bill Bushee still with the company?

7 A. Yes.

8 Q. Fred LeBlanc?

9 A. He's also a Web developer, programmer.

10 Q. Is he still with the company?

11 A. Yes.

12 Q. Marc Pierrat?

13 A. He was a salesperson in new business

14 development.

15 Q. You said "was." Is he no longer with the

16 company?

17 A. That is correct.

18 Q. When did he leave the company?

19 A. Three years ago, two to three years ago.

20 Q. Was his leaving the company voluntary?

21 A. Yes.

22 Q. How long did he work at iMarc?

23 A. About two years.

24 Q. I'm going to go through these names again

25 and I'm going to ask if you know what their email

1 addresses were at iMarc. Mr. Bushee, do you know
2 what his email address was?

3 A. B-i-l-l@imarc.net.

4 Q. And Nick Grant?

5 A. Nick@imarc.net.

6 Q. Fred LeBlanc?

7 A. Fred@imarc.net.

8 Q. And Marc Pierrat?

9 A. Marc, M-a-r-c, @imarc.net.

10 Q. So emails with those email headers would be
11 emails that originated from the people that you
12 identified?

13 A. If the header was the "from" address.

14 MR. SCHULTZ: Sorry. Objection, calls
15 for speculation.

16 Q. So if it said bill@imarc.net, it would be
17 an email that came -- if it said from Bill at
18 imarc.net, it would be an email from Bill Bushee.

19 MR. SCHULTZ: Same objection.

20 A. This is what I don't understand: Should I
21 still answer the question?

22 Q. Yes.

23 A. Yes.

24 Q. As I said, when he lodges an objection or
25 anybody lodges an objection, as long as the question

1 is clear to you, you can go ahead and answer it.

2 A. All right.

3 Q. Is there a general practice at iMarc for
4 people to use each others' email addresses?

5 A. I don't understand that question.

6 Q. So, for example, would Mr. LeBlanc
7 generally be allowed to use Mr. Bushee's email
8 address?

9 MR. SCHULTZ: Objection, vague.

10 A. I don't know of any case where that's
11 happened.

12 Q. Now I'm going to turn to a different topic.
13 I want to talk to you about ConnectU, Cameron and
14 Tyler Winklevoss, and Divya Narendra. Do you
15 recall --

16 Well, let me start with this: Have you
17 ever met, either electronically, through an email or
18 the like, or live, Divya, Cameron Winklevoss, or
19 Tyler Winklevoss?

20 MR. SCHULTZ: Object to the form.

21 A. Yes.

22 Q. When was the first time that you met any
23 one of those people?

24 MR. SCHULTZ: Object to the form.

25 A. This is including electronically, you said?

1 Q. Yes.

2 A. Whenever the first email is.

3 Q. Can you give me an estimate as to time?

4 A. 2003.

5 Q. Do you recall the first time you met them
6 via a telephone call or in person?

7 MR. SCHULTZ: Object to the form.

8 A. I don't recall the first time. I'm
9 guessing it was probably after that.

10 Q. And do you recall who it was that contacted
11 iMarc?

12 MR. SCHULTZ: Objection, foundation.

13 A. I believe one of the Winklevosses.

14 Q. One of the Winklevoss brothers?

15 A. Yes.

16 Q. Do you recall why they said they were
17 contacting iMarc?

18 MR. SCHULTZ: Objection, foundation.
19 Assumes facts not in evidence.

20 A. I was not part of the original. That would
21 be typical of a client. Specifically, in this case,
22 the client contacts our sales department. That
23 would have been Marc -- to talk about a probable
24 job. And then after it was ironed out, it would go
25 to me or the production team. So I don't recall who

1 contacted us first and why, but I'm guessing it's
2 all in those emails.

3 Q. And when you said you were contacted --
4 iMarc was contacted about a possible job, what did
5 you understand the job ultimately to be?

6 A. By the time Marc presented it to me, I
7 believed it to be a social networking site.

8 Q. What do you mean by "social networking
9 site"? 

10 A. A website where people can create profiles
11 about themselves to interact with or network with
12 other people on the website, either for personal
13 dating reasons or professional reasons.

14 Q. Please explain a little bit more what you
15 mean by that.

16 MR. SCHULTZ: Objection, vague.

17 A. I'm not sure. Can you ask me a specific
18 question?

19 Q. Sure. You described the scope of the
20 project being a social networking website. Did I
21 get that right?

22 A. Yes.

23 Q. And you said that it was a website where
24 people can create profiles to interact with others
25 for dating or professional reasons.

1 A. Correct.

2 Q. Maybe I can probe a little bit more into
3 what you mean by "dating and professional reasons."

4 Let me ask the question, first: What
5 did you mean when you said "for dating reasons"?

6 A. I believe that they wanted to allow their
7 users to create profiles so they could meet, connect
8 with other people for personal reasons --
9 friendship, dating. The website was really just
10 about bringing people together, and from then on,
11 it's not going to impose any rules about dating or
12 something like that. It's mostly about just
13 meeting.

14 Q. That was the scope of the project they
15 presented.

16 A. Yes.

17 Q. And what about professional reasons? What
18 do you mean when you said that?

19 A. Perhaps someone would create a profile much
20 like a resume. Other people in a company could
21 search through or look for specific people to hire,
22 to work with, things like that -- professional
23 business.

24 Q. And were you given any guidance when you
25 were given the scope of this project about what to

1 look at to develop this website?

2 A. Yes.

3 Q. And what guidance were you given?

4 A. By the time it came to me with a proposal,
5 there was a number of benchmarking sites --
6 match.com, I believe, rise.com, thefacebook.com,
7 friendster.com -- and then also some -- so those
8 were all, especially friendster.com -- those were
9 all social networking sites that were already out on
10 the Internet that did something similar. And they
11 also gave us a number of benchmarking sites for the
12 visual look and feel. Most of those sites were
13 really stripped down and technical. And they sent
14 us, I believe, YSL, which might be a fashion
15 company, a couple of sites that we had actually
16 developed they liked the look at -- look of. So
17 they gave us a couple other, maybe four sites --
18 again, it's in those emails -- of benchmarking sites
19 which they liked the look of. So we had a couple of
20 sites that they liked features from, a couple of
21 sites that they liked the look of.

22 Q. You mentioned these benchmarking sites.
23 Were you told to do anything specifically with
24 respect to your review of the match.com website?

25 A. No. I think that they pointed out features

1 that they liked. Again, this is just from me
2 recently looking through these emails. I noticed
3 that on match.com there was a feature where, I think
4 you could wink at someone. If you had a profile and
5 -- if I had a profile and you had a profile and I
6 found you attractive, I could wink at you and send
7 you a little email. They liked something like that,
8 and I think we ended up implementing something
9 similar to that. That was something from match.com
10 that they found appealing.

11 Q. And what about rise.com? Do you remember
12 anything specific that they identified that they
13 wanted?

14 MS. SCHOENFELD: Objection, relevance.

15 A. I believe rise.com did a good job of
16 presenting professional profiles, much like, you
17 know, a resume, but online.

18 Q. Anything else?

19 MS. SCHOENFELD: Same objection.

20 A. No.

21 Q. What about thefacebook.com? What did they
22 identify from that?

23 MS. SCHOENFELD: Same objection.

24 A. Some of the features that -- I think the
25 Facebook had more of a mix of the professional and

1 MS. SCHOENFELD: Same objection.

2 A. No, they -- no. We didn't spend a lot of
3 time talking about Mark Zuckerberg and their
4 relationship.

5 Q. Are you aware of whether iMarc ever signed
6 a nondisclosure agreement related to information
7 that was shared by the ConnectU founders -- Divya
8 Narendra, Tyler Winklevoss, and Cameron
9 Winklevoss -- with iMarc?

10 MS. SCHOENFELD: Objection, relevance.

11 A. I'm not aware of any nondisclosure
12 agreement.

13 Q. Are you aware of whether they shared with
14 you any information which was to be held
15 confidential by iMarc?

16 MS. SCHOENFELD: Objection, calls for
17 speculation, relevance.

18 A. I'm not aware of anything other than some
19 of the emails. There's that standard footer that
20 says, "This is private," and that was a concern of
21 mine, sending that to you guys. But that's about
22 the only thing that I could think of.

23 Q. So as you sit here today, you're not aware
24 of any confidentiality obligation between iMarc and
25 the ConnectU founders or ConnectU, LLC?

1 MR. SCHULTZ: Objection, calls for
2 speculation.

3 A. I personally am not aware of it.

4 Q. Would it generally be your practice to be
5 aware of obligations like that in relationships with
6 clients?

7 A. Not in my role during this time. My role
8 is mostly programming. I don't remember -- again,
9 the size of the company was a lot smaller. I'm not
10 aware that we had any nondisclosure agreements at
11 that time.

12 Q. Who owned the intellectual property
13 associated with the development of the ConnectU
14 website?

15 MS. SCHOENFELD: Objection.

16 MR. SCHULTZ: Objection. Foundation,
17 calls for a legal conclusion.

18 A. I'm not sure.

19 Q. If we go back to Exhibit 65, in this third
20 paragraph --

21 A. Yes.

22 Q. -- the second-to-last sentence says, "In
23 fact, for some sections, like groups, our only
24 instructions were, 'Go to Facebook, figure out what
25 they are doing, add it to our site.'" What did you

1 mean by that?

2 A. I meant by the time it seemed there was
3 definitely this period of time that we were racing
4 around to try add more features to compete with
5 sites that were already out there that had traction.
6 So they were going to lots of sites on the Web and
7 figuring out, I mean, what features might interest
8 people who create accounts on social networking
9 sites. And I think that one specific one, the
10 groups, was one of the ones that we added toward the
11 end, where they were just like, "Hey, that's a cool
12 feature. Let's do that" -- as opposed to the way we
13 normally work, which is spec'ing out -- like working
14 with a client, really like defining what the problem
15 is, what the solution is. That's the way iMarc
16 typically works.

17 Once connectu.com launched, there seemed
18 to be much more of a quick, all of a sudden "We need
19 to add lots of features, we need to get popular and
20 get traction, and we think that that will happen by
21 adding lots of features." So there was a lot less
22 spec work -- which personally, again, this is my
23 personal rant, and I assume that that bothered me,
24 that I like to define problems, define solutions, as
25 opposed to just being, "Hey, Facebook does this."

1 Cool, let's add something like that to our site."

2 Q. Did you ever access the Facebook website at
3 the direction of the ConnectU founders?

4 A. I think -- yeah, I think we certainly -- I
5 think we accessed a number -- I mean, we looked
6 at -- by "access" I'm assuming you mean looking at,
7 log in, look at a website. I think we did that to a
8 number of social networking sites.

9 Q. And what did you do to access the Facebook
10 website?

11 A. Looked at it.

12 Q. Well, let me make it a little simpler. Did
13 you have an account with Facebook?

14 A. I think that they had an account, that they
15 would show us stuff.

16 Q. Whose account was it?

17 A. Cameron's. I'm not sure. I don't know,
18 actually. I shouldn't speculate.

19 Q. When you said "they would show us,"
20 describe what you mean by that.

21 A. I think they would -- you know, we'd have
22 a -- they'd come up to our office, or they'd, you
23 know, send us screen shots or email us, you know,
24 pages and say, "Hey, look at this. This is kind of
25 neat."

1 Q. So you wouldn't log in yourself. They
2 would log in and show something to you from the
3 Facebook website?

4 A. I'm sure that I had an account through my
5 Northeastern email. I had an account on pretty much
6 all the benchmarking sites.

7 Q. And when you looked at it with respect to
8 the ConnectU project, were you doing it at the
9 direction of the Winklevoss brothers and Divya
10 Narendra?

11 A. I think if they mentioned something that
12 they saw that they thought was a cool idea, I would
13 probably check it out, too.

14 Q. And would you ever use their password
15 accounts?

16 MS. SCHOENFELD: Objection, vague.

17 A. I don't know. I don't know. I think
18 before I had an account, they had an account. I'm
19 not sure if they logged in or we logged in. I think
20 that they had an account before we did, though,
21 because they went to Harvard.

22 Q. My question was simpler than that. Did you
23 ever use their accounts to access Facebook, as
24 opposed to your own account?

25 A. Oh. I don't know.

1 the Winklevoss brothers. Are we on the same page
2 when I say "ConnectU founders"?

3 A. Yes.

4 Q. Did the ConnectU founders ever describe to
5 you what arrangement they had with Mark Zuckerberg?

6 MS. SCHOENFELD: Objection, relevance,
7 outside the scope of the deposition.

8 A. As far as I can recall, the ConnectU
9 founders, in the loosest terms, may have said -- or
10 said, "He was supposed to build a website, and he
11 never finished it," something as vague as that --
12 like "He started building it and didn't finish it."

13 Q. Did they say anything else to you?

14 MR. SCHULTZ: Objection, outside the
15 scope.

16 A. Yes, they said other stuff to us.

17 Q. With regard to that relationship?

18 MR. SCHULTZ: Objection, outside the
19 scope of the deposition.

20 A. They complained about him a lot.

21 Q. When you say, "They complained about him a
22 lot," describe what you mean.

23 MR. SCHULTZ: Same objection.

24 A. Anytime that the Facebook was in the news,
25 they would, you know, be mad about it, or they'd --

1 they obviously just didn't like it. I don't know.
2 We just ended up hearing a lot of complaining about
3 him. I don't remember specifically exactly what was
4 said.

5 Q. When you said that they said in the loosest
6 terms that Mark Zuckerberg was supposed to develop a
7 website, what do you mean when you say "in the
8 loosest terms"?

9 A. I mean, I can't remember exactly what they
10 said. But again, we had talked about this before:
11 Like a month into the project it was brought out
12 that -- they started talking more about Mark
13 Zuckerberg because thefacebook.com started getting
14 more popular, and they obviously had some personal
15 feelings, that they didn't like him. And they
16 mentioned that "He was supposed to build this for
17 us."

18 Again, there wasn't a whole lot of us,
19 the production team, talking with ConnectU about
20 Mark Zuckerberg. We were more concentrating -- we
21 were concentrating on just getting a site up, and we
22 know that they wanted to get a site up quickly,
23 because this other site, the Facebook, was already
24 getting traction.

25 Q. Did they ever tell you that they had a

1 contract with Mark Zuckerberg?

2 MR. SCHULTZ: Objection, outside the
3 scope of the deposition.

4 A. Not that I remember.

5 Q. Did they ever tell you that Mark Zuckerberg
6 was a partner in their project?

7 MR. SCHULTZ: Same objection.

8 A. Not that I remember.

9 Q. Do you remember at any point in time any of
10 the ConnectU founders telling you to keep
11 information confidential that they were sharing?

12 MR. SCHULTZ: Objection, outside the
13 scope of the 30(b)(6) topics.

14 A. I don't remember that, no.

15 Q. We'll go through a few more names, not
16 iMarc names.

17 Are you familiar with someone by the
18 name of David Gucwa?

19 A. Again, I'll probably -- if I saw his name
20 printed -- the pronunciation doesn't sound familiar.
21 If I saw it printed -- a lot of these people are
22 just email addresses to me, so if you showed me his
23 name printed --

24 Q. He's not actually in any emails that I
25 recall. I just wondered if you'd heard the name.

1 A. No.

2 Q. It's G-u-c-w-a.

3 A. I don't know.

4 Q. What about John Taves, T-a-v-e-s?

5 A. Yes, I believe that he was sort of the new
6 webmaster, maybe. He was technically in charge of
7 the site after we -- he took over after we were
8 done.

9 Q. Have you ever had conversations with
10 Mr. Taves?

11 A. Yep.

12 Q. And when do you remember having your first
13 conversation with him?

14 A. I'm not sure of the exact -- maybe late
15 2004, or summer 2004. When we were -- we -- iMarc
16 moved ConnectU off of our servers, onto their own
17 server, he seemed to be the one who was going to
18 take over, technically take over. So there was a
19 couple of conference calls, talking about where
20 files were, where stuff was.

21 Q. Why was ConnectU being taken off of your
22 servers?

23 A. We just weren't happy with stuff they were
24 asking us to do, and we just weren't happy with our
25 relationship with them.

1 Q. Describe what you mean by that.

2 A. They asked us to do a couple of things that
3 we deemed unethical, and they actually seemed to do
4 something -- seemed to send out emails that we saw,
5 and we didn't want that happening on a server that
6 we managed.

7 Q. Anything else?

8 A. Just in general we just weren't happy
9 working with them any more.

10 Q. Other than the email issue, when you say
11 you generally weren't happy, what was prompting
12 those feelings?

13 A. I think I touched on in that personal rant,
14 where they were just telling us to "Do this, add
15 this, add this," and that's not really how we work
16 and like to work. We were growing and had enough
17 other clients that we just really didn't want to
18 work that way with them. Compound that with a
19 couple of unethical things that they seemed to be
20 doing, we just didn't want any part of managing
21 their server or working with them any more.

22 Q. Were you concerned at all for iMarc's
23 liability associated with some of those activities?

24 A. Oh, yeah, sure, yep.

25 Q. Describe what you mean by that.

1 A. If it's a server that we manage that might
2 have other clients on it and someone sends out mass
3 emails from it and the server gets blacklisted --
4 which would mean that it's known to send spam, so
5 email clients won't accept mail from that -- if
6 they're sending spam, it gets the whole server
7 blacklisted, and we have other clients that suddenly
8 their email stops working. So we didn't want to
9 deal with that. That's not what we do.

10 Q. You used the term "spam." What do you mean
11 by that?

12 A. Sending out email without someone signing
13 up for it or requesting it.

14 Q. Did you ever tell the Winklevoss brothers
15 or Divya Narendra that you didn't -- that you found
16 these emails unethical?

17 A. Yes.

18 Q. Tell me when you first discussed that issue
19 with any of them.

20 A. It's in one of the emails. It's referenced
21 in the bullet list in the back of the thing, where
22 they sent out a number of emails, 6:00 a.m. by 9:00
23 a.m. we saw, what are they doing, and we disabled
24 the ability to do that and talked with them about
25 it.

1 Q. I'll ask a little bit more about that a
2 little bit later today.

3 I want to go back to John Taves. So
4 after migrating the ConnectU website from the iMarc
5 servers to John Taves --

6 Does he have a business?

7 A. I think originally -- so iMarc hosted a
8 number of websites on shared servers. So we buy one
9 single piece of hardware and can fit, you know, 40
10 to 50 websites on it. Step No. 1, when we saw that,
11 you know -- when we started to question their
12 ethics, we told them, "You guys get your own server.
13 You sign up for it, and we'll help you move stuff
14 there." I don't know if John Taves had anything to
15 do with that, if he actually owned the server or
16 whatnot. So it's not saying it's John Taves'
17 server. It's a server that ConnectU set up. They
18 gave us the log-in information to move everything
19 to. So I think that was before there was any talk
20 of John Taves.

21 Q. And so what was the first circumstance you
22 remember having an interaction with John Taves?

23 A. I think he wanted to add a feature to the
24 website, and he was obviously taking over the
25 webmastering stuff. We were not as responsive with

1 Q. Are you familiar with something called
2 Importer?

3 A. No.

4 MR. CHATTERJEE: Let's mark this as
5 Exhibit 73.

6 (Exhibit 73 marked for identification.)

7 Q. After you're done looking at this, just let
8 me know.

9 A. Okay.

10 Q. At the very end of this email it talks
11 about, "We are starting to see an increased load
12 right now from Social Butterfly and it isn't going
13 to stop (only get worse)." Do you have any
14 understanding as to what Mr. Wink was talking about
15 there?

16 A. No.

17 Q. Does this email refresh your recollection
18 as to what your involvement with the website was on
19 or about February 16th, 2005?

20 A. Yes, and it was little to none. I'm
21 telling them, Cameron and cc'ing someone at pnwsoft,
22 like where some files are and what they're doing.
23 But at this point we were not involved -- I don't
24 think we were doing work on the website at this
25 point.

1 Q. Do you have any understanding of why
2 Mr. Winklevoss sent you this email?

3 A. He wants to know what I -- he seems to
4 think that the website is slow, and he wants to know
5 if I have any ideas to make it faster. And do I
6 seem to be suggesting the Social Butterfly connect
7 to Wayne's servers? I seem to be suggesting that he
8 should move it off his own server onto one of
9 Wayne's servers. And then I tell Cameron and
10 mrprimate@pnwsoft.com what these scripts are doing.

11 Q. What is a script?

12 A. A file that performs some sort of
13 functionality.

14 Q. And what -- when you say "these scripts are
15 doing," what scripts were those?

16 A. I think these scripts kept track of who was
17 on line at any given time. So if you went to the
18 home page, you could see a list of users who were
19 actually on line. And one of them seems to -- every
20 couple of minutes it performs some cleanup to delete
21 people from the list.

22 Q. Are you familiar with something called
23 Hurricane Electric?

24 A. No.

25 Q. You said earlier that there was -- that

1 you -- that your company originally hosted the
2 ConnectU website.

3 A. Yes.

4 Q. What information would be stored on your
5 servers when you were hosting the ConnectU website
6 that was associated with ConnectU?

7 MS. SCHOENFELD: Objection, vague.

8 A. Tons of information, information about
9 almost anything -- I mean, information about what
10 the server is doing, what software is installed on
11 the server. I think that there was probably 40 to
12 50 other iMarc clients hosted on the server as well,
13 information -- you know, everything that you could
14 see by going to any one of those websites.

15 Q. I was actually just focused on with respect
16 to the ConnectU website.

17 A. You asked me what was on the server.

18 Q. Right, with respect to the ConnectU
19 website, if that wasn't clear. I'm sorry about
20 that.

21 So the question is: With respect to,
22 you know, the ConnectU website, what information
23 related to ConnectU would be stored on that server?

24 A. Every single file that powered the ConnectU
25 website would be on that server.

1 Q. And would all the activity that occurred
2 through the ConnectU website be stored in some way?

3 MR. SCHULTZ: Objection, vague and
4 overbroad.

5 A. What sort of activity?

6 Q. Such as instant messages that were sent.

7 A. Yes, there was -- yes. I mean, the
8 database, yes, keeps track of all that information.

9 Q. Now, when you transferred the server --
10 when you transferred the website to another
11 company --

12 A. Uh-huh.

13 Q. -- would any of the information that was
14 stored on your server related to the ConnectU
15 website be lost?

16 A. If all went well, no. The idea would be to
17 completely transition everything off.

18 Q. And everything related to ConnectU would be
19 transferred off?

20 A. Yeah. So if the site looked a specific way
21 and had a set of information on our server and we
22 moved it to their server, it should continue looking
23 and acting and storing all the same information in
24 their server.

25 Q. And it would have all the historical

1 information as well?

2 MR. SCHULTZ: Objection, vague.

3 A. Yes.

4 MR. CHATTERJEE: Let's mark this as
5 Exhibit 74.

6 (Exhibit 74 marked for identification.)

7 Q. After you're done looking at it, let me
8 know.

9 A. Yes.

10 Q. Do you recognize this email marked as
11 Exhibit 74, Mr. Tufts?

12 A. Yes.

13 Q. And what is this email?

14 A. This is an email from me asking for --
15 asking Cameron to confirm that we're terminating all
16 his services and all his billing.

17 Q. And it says that there would be a recurring
18 bill for connectu.com email and DNS. Do you see
19 that?

20 A. Yes. I believe that Nils mentioned \$50 for
21 these email and DNS services.

22 Q. And what were those services?

23 A. Email and DNS services.

24 Q. Describe what those are.

25 A. DNS, we have a name server where, when you

1 type "ConnectU" into your browser, the DNS server --
2 your computer doesn't go directly to ConnectU. It
3 first needs to know where ConnectU is. So type
4 "ConnectU" into your Web browser. Your Web browser
5 looks up, finds out where the DNS is hosted. Your
6 Web browser goes to the DNS server. The DNS server
7 says, "ConnectU is on this server," and your Web
8 browser goes to that server.

9 Q. What about the email?

10 A. Email is email hosting, a POP email
11 account.

12 Q. So that's where all the emails for ConnectU
13 would be stored?

14 A. That's where they would come in to. But
15 like how I described iMarc's. It's a POP email
16 server. It's not like Exchange, where it keeps
17 everything on the server.

18 Q. It's more of a delivery vehicle than
19 something that stores email.

20 A. Correct.

21 Q. So it's essentially a vehicle to direct
22 emails to a particular location?

23 A. Correct.

24 MR. CHATTERJEE: Let's mark this as
25 Exhibit 75.

1 (Exhibit 75 marked for identification.)

2 Q. After you're done looking at it, let me
3 know.

4 A. I'm done.

5 Q. Do you recognize what's been marked as
6 Exhibit 75?

7 A. Yes.

8 Q. And what is that?

9 A. This is an email from myself with a
10 previous thread between me, Nils Menten, Cameron
11 Winklevoss, and Nick Grant.

12 Q. And in the middle of this email is the
13 remark, "I deleted all ConnectU email accounts from
14 our servers." Was that from a statement you made or
15 someone made to you?

16 A. I believe that was something I made.

17 Q. And what did you mean when you wrote that?

18 A. Well, so, Cameron had sent me an email
19 saying -- so this is a week after this other one.
20 Basically the other one says, "We're turning off the
21 Web server. Do you want to leave email and DNS on?"
22 And Cameron says, "I'll let you know when we decide
23 to change email or DNS." So I'm guessing a week,
24 week and a half later he decided to turn those off.

25 So if I don't actually remove the DNS

1 and email accounts from my own server, when I send
2 email to anything at ConnectU, it will go to my
3 server, it will bypass the real route to the new
4 one. So the only way to avoid having a lame DNS or
5 lame email record, you need to completely remove
6 those. So now when I type in "ConnectU," it goes to
7 the real DNS and finds its way to the real address,
8 instead of stopping at my own server.

9 Q. So what exactly did you delete when you
10 said you deleted all ConnectU email accounts?

11 A. Just the pointer to the account. Like you
12 said, it's a delivery system. So it was -- at this
13 point it was not doing anything. It would only be
14 basically messing up or intercepting my iMarc email
15 to ConnectU. So removing that sort of like pointer,
16 as you called it, a delivery method, it finds its
17 way to the real one. And the same thing with DNS.

18 Q. Earlier today -- I'm going to move now to
19 the topics of data that may have been obtained from
20 the Facebook website and the sending of email
21 messages to people based upon information obtained
22 from Facebook.

23 You mentioned earlier today that there
24 were several or a number -- I don't remember the
25 exact word that you used -- of unethical actions

1 that you felt were taken by ConnectU. Could you
2 please list what those actions were.

3 A. The two primary ones are what's listed in
4 this document. Those are something about like
5 screen-scraping Facebook, asking us if we would do
6 that, and something about sending out a whole bunch
7 of unsolicited emails.

8 Q. Anything else? Okay, sorry.

9 A. So June and July of 2004. And right after
10 that is when we took their Web hosting off of our
11 Web server. They set it up on their own server.
12 And then in that other email we were suggesting,
13 "Instead of you managing on your own server, move to
14 Wayne" whatever.

15 But yeah, that is what, June 11 and July
16 6, those two instances are what promoted us not
17 wanting to host their website or really do anything.

18 Q. Is there anything else that you recall,
19 other than those two instances?

20 A. No.

21 Q. Are you aware of whether any additional --
22 after the website was moved to another hosting
23 provider, are you aware of whether there was any
24 further efforts to obtain email addresses from
25 Facebook?

1 A. I don't know. At that point we kind of
2 washed our hands of it. I didn't know, nor did I
3 care.

4 Q. And are you aware of whether after the
5 hosting ended whether any further sending of
6 unsolicited emails occurred?

7 A. I don't know.

8 MR. CHATTERJEE: Let's mark this as
9 Exhibit 76.

10 (Exhibit 76 marked for identification.)

11 Q. After you're done looking at this, let me
12 know.

13 A. Uh-huh. Yep.

14 Q. Do you know someone named Marc M. Pierrat,
15 P-i-e-r-r-a-t?

16 A. Yes.

17 Q. Who is that?

18 A. He's the person we discussed at the
19 beginning of this meeting. He was the salesperson
20 for iMarc at the time.

21 Q. Are you familiar with any discussions
22 between anyone at iMarc and any of the ConnectU
23 founders about creating something called a parser?

24 A. No.

25 Q. And do you have any reason to believe that

1 this email is inaccurate?

2 A. No.

3 Q. Is this something that iMarc would have
4 done?

5 A. No, and we didn't do it.

6 Q. And why wouldn't iMarc have done it?

7 A. Well, it actually --

8 I think it's just -- it would be easier
9 to have the user fill out a new profile on a new
10 website.

11 Q. What do you understand this email to be
12 asking Marc to do?

13 A. I'm not cc'd here. This is my first time
14 seeing this. But to me it looks like --

15 MR. SCHULTZ: Objection. Calls for
16 speculation.

17 A. It looks like Cameron is asking Marc,
18 saying, you know, people who are on the Facebook, if
19 they want to make a ConnectU account, we want to
20 make this easy for them to move over, so what if
21 they have like a page on ConnectU where they type in
22 their log-in information and it imports their
23 Facebook profile over to ConnectU?

24 Q. And you said this isn't something iMarc
25 would have done. Why not?

1 A. I mean, I don't know. Maybe we would have.
2 If you -- there's lots of sites that actually do
3 this. I actually don't see this -- I don't see
4 anything unethical about this, where if the user
5 types in their own log-in and password and then the
6 website uses what the user typed in to try and
7 retrieve that same user's information --

8 So maybe we would have. But --

9 Q. But you didn't.

10 A. We didn't. I would say we didn't in this
11 case, because it doesn't -- technologywise, it's
12 easier just to make them fill out a new profile.

13 MR. CHATTERJEE: Let's mark this as
14 Exhibit 77.

15 (Exhibit 77 marked for identification.)

16 A. Yep.

17 Q. Do you recognize this document?

18 A. Yes.

19 Q. And what is this document?

20 A. This is ConnectU founders -- I assume it's
21 the ConnectU founders; "the boys from ConnectU" --
22 asked Marc how long it would take to write a script
23 that can actually go and screen-scrape the
24 information from the Facebook.

25 Q. What do you mean "screen-scrape"?

1 A. Whereas the other one the user is actually
2 putting in their information and saying, "Go get my
3 information," this one is just us saying we're going
4 to just keep randomly keep going through Facebook
5 pages and get information without any user's
6 knowledge of it.

7 Q. Were there any discussions internally at
8 iMarc about the request made by the ConnectU
9 founders to create a program to extract email
10 addresses from Facebook?

11 A. Yes, there's three or four follow-up emails
12 to this.

13 Q. Were there any live discussions?

14 A. Probably. They probably just echoed what
15 was in the follow-ups, the emails.

16 Q. Describe for me generally what was the
17 feeling about writing the sort of a program that
18 would take email addresses from Facebook.

19 MR. SCHULTZ: Objection, vague and
20 overbroad.

21 A. I can actually read the emails, if you
22 want.

23 Q. We'll get to that. I'm just trying to get
24 a general sense.

25 MR. SCHULTZ: Same objection.

1 A. We didn't want to do it. We didn't think
2 it was ethical.

3 MR. CHATTERJEE: Let's mark this as 78.

4 (Exhibit 78 marked for identification.)

5 Q. Before I ask about this, I want to ask you:
6 Why didn't you want to do it?

7 A. It just doesn't -- it doesn't feel right.
8 I mean, we're going to go harvest people's email
9 addresses who don't know it. Would you do it?

10 Q. Well, fortunately, I get to ask the
11 questions today.

12 A. It doesn't feel like a good thing to do.

13 Q. I guess I want to probe a little bit into
14 that. Like why doesn't it feel like a good thing to
15 do?

16 A. It feels like -- I.

17 I mean, right here, what it says, "It
18 seems sketchy. I wonder if we should have a Web
19 ethics committee." We're kind of joking about it.
20 "It just seems completely unethical."

21 Q. And what about it seems unethical? Let me
22 ask you that question first.

23 A. Everything about it.

24 Q. Did it feel like stealing?

25 A. I mean, we didn't do it. It just doesn't

1 seem ethical to us. I mean, you know what "ethical"
2 means, and it doesn't seem ethical.

3 Q. You drew a distinction between if you were
4 using someone's password to go and take profile
5 information.

6 A. Yes.

7 Q. Versus what this was.

8 A. Yes.

9 Q. Why was that distinction important to you?

10 A. Well, because a number of websites actually
11 do this. You sign up for an iPhone account, and it
12 will move your entire account information over from
13 Sprint or whatever over to Cingular. A number of
14 Web applications do that, because you actually say,
15 "Here's my information to this website. You go get
16 it." So that, to me, seems okay and it seems like
17 it's okay to a number of other companies, because a
18 number of other companies are doing stuff like that.

19 Whereas this -- let's say we go to
20 profile ID number. Whoever owns that profile never
21 came to ConnectU and said, "Here's my information,
22 here's my page, and go get the information." So
23 that's the distinction.

24 Q. So the distinction, if I'm understanding
25 you correctly, is whether the user has given

1 permission for that information or not.

2 A. Whether the user has requested to actually
3 do that. The other one actually seems like here's a
4 way where you can go move all your information over.
5 You go and fill in submit. So when you hit submit,
6 you're actually making a request to the Web server.
7 So one the user is requesting, "Hey, please do this
8 for me." In this one the user isn't requesting
9 that, the user doesn't know about it. To me, it
10 seems like night and day.

11 Q. Do you ever have conversations with the
12 ConnectU founders about why it was you were not
13 willing to write this script that they requested?

14 A. I don't know if we had any deep "You guys
15 shouldn't do this" preaching conversations. But we
16 turned it down. We said, "No, we don't want to do
17 that. We don't think it's ethical," probably.

18 Q. Do you know if iMarc told them that they
19 didn't think it's ethical?

20 A. I'm imagining we did. I mean, Marc turns
21 it down in one of the other emails, and I don't know
22 if -- they probably had some conversation off line
23 after that.

24 Q. And do you know if that kind of a script
25 was ever written by anyone on behalf of the

1 Winklevoss brothers or Divya Narendra?

2 A. There's another email of some guy asking me
3 advice on how to write the script, and I ignore him,
4 I don't write back to him. I didn't do anything.
5 So I don't know if it actually ever got done. That
6 was after they moved on from iMarc.

7 MR. CHATTERJEE: If we could mark this
8 as Exhibit 79.

9 (Exhibit 79 marked for identification.)

10 A. Yep.

11 Q. Do you recognize this email that's been
12 marked as Exhibit No. 79?

13 A. Yes.

14 Q. And what is this exhibit?

15 A. This is me responding to Marc.

16 Q. And what were you responding to him about?

17 A. I imagine he pressed me on the issue of,
18 you know, "Putting your moral issues aside,
19 technically how long would it take?" And I give him
20 a technical answer.

21 Q. And when you say "putting the moral issues
22 aside," with respect to what?

23 A. It says "moral/legal issues aside." So
24 obviously it's already been determined that it's
25 unethical and we don't want to do it, but it can be

1 done.

2 Q. And when you say "it," what is the "it"
3 you're referring to?

4 A. Well, again, I'm assuming the subject and
5 the dates, that it is in reference to this email,
6 "Mining the Facebook."

7 Q. So this is in respect to the effort, the
8 script that the ConnectU founders wanted to write to
9 extract emails from the Facebook website.

10 A. Yes.

11 Q. Did you know whether it was even actually
12 possible to extract emails from the Facebook
13 website?

14 A. Of course. I say it can be done in 10 to
15 15 hours.

16 Q. How did you know that?

17 A. Well, because you can extract anything that
18 you can see on the Web. So, you know, if you can
19 see it on the Web, you can -- if you can read it, a
20 computer script can read it. So, again, I think
21 this is where Marc was just saying like, whatever
22 moral issues aside, how long would it take? So I
23 presumed it wouldn't be too difficult.

24 Q. Well, you understand that you can't see
25 profiles on Facebook without first logging into the

1 website?

2 A. So are you saying a computer script
3 couldn't log into a website?

4 Q. Well, that was my question. Because you
5 can't see it without doing some sort of actions,
6 were you aware of a security hole or a password?
7 How would you envision going in to extract those
8 email addresses?

9 A. The same way that if -- I mean, the same
10 way, if you hired someone to log into the website
11 and copy and paste every single email. That would
12 take someone a hundred hours to do, but a computer
13 script could do that in a fraction of the time.

14 MR. CHATTERJEE: Let's mark this as
15 Exhibit 80.

16 (Exhibit 80 marked for identification.)

17 A. Yep.

18 Q. Have you ever seen this email before?

19 A. No.

20 Q. And Marc Pierrat is an iMarc employee?

21 A. Yes.

22 Q. At the very end of the paragraph -- at the
23 very end of the email the remark is made, "Actually,
24 you can steal addresses from the Facebook. You
25 can't from ConnectU. This is our big advantage, so

1 it is far more likely that someone mined Facebook
2 for email addresses." Do you see that?

3 A. Yes.

4 Q. Do you have any understanding of why email
5 addresses could not be stolen from ConnectU?

6 MR. SCHULTZ: Objection, calls for
7 speculation.

8 A. I don't think we printed email addresses on
9 the screen.

10 Q. So they weren't listed.

11 A. Correct.

12 MR. CHATTERJEE: Let's mark this as
13 Exhibit 81.

14 (Exhibit 81 marked for identification.)

15 A. Yes.

16 Q. How did you first learn that the ConnectU
17 founders were actually trying to write code to
18 extract email addresses from the Facebook?

19 MR. SCHULTZ: Objection, foundation.

20 A. I don't know. I mean, in that first email,
21 they asked us to do it.

22 Q. And after you said no, did you ever have
23 occasion to learn that someone else may be doing it?

24 A. This email, sent from Deva Mishra, it looks
25 like there's how you can do that.

1 Q. Let me spell that for the record:

2 D-e-v-r-a M-i-s-h-r-a.

3 Have you ever met Deva Mishra before?

4 A. No.

5 Q. Do you see the code that's written in this
6 paragraph?

7 A. Yes.

8 Q. And what do you understand that code to do?

9 A. It goes -- I mean, this is exactly what we
10 just talked about -- how any person or computer
11 script would do this. It goes to ConnectU. It
12 codes --

13 Q. Do you mean the Facebook?

14 A. Sorry, the Facebook. It goes to Facebook.
15 It posts someone's log-in.

16 Q. And is that drm25@cornell.edu?

17 A. That's an email that it sounds.... And
18 then I'm guessing it actually reads what it sees on
19 the screen. It doesn't look like this actually goes
20 through and reads profiles. It looks like this
21 person is just trying to read a single page and then
22 quit.

23 Q. And what did you understand Mr. Mishra was
24 asking you to do in this email?

25 A. I mean, I think it was pretty obvious that

1 from -- when was that other one? So on June 13 they
2 ask us if we can do that and we turn them down.

3 Q. Do you mean May 13 or June 13?

4 A. I mean June 13.

5 Q. I'm sorry.

6 A. The ConnectU founders asked us to write a
7 script like this and we turned them down. And then
8 on July 6 Deva Mishra sent an email through the
9 iMarc website -- he didn't get my personal email,
10 but he went to -- I can tell by the subject line.
11 He went to imarc.net, found my page -- there's like
12 about us and it describes all the employees. He
13 found my page and sent me an email through the
14 website, and he sent this in the email. So I
15 presume that he was -- ConnectU had found him and
16 talked to him about doing it.

17 Q. And again, I'm sorry, to get hung up on
18 prepositions. The "it," what do you mean by that?

19 A. About writing a script that logs into the
20 Facebook.

21 Q. And does what?

22 A. Again, the original request was something
23 that logs into the Facebook and grabs people's
24 emails. This one seems like it's just logging into
25 the Facebook. But, I mean, I think that any sane

1 person could presume what the next step is for this
2 guy to do.

3 Q. And when he wrote in the second paragraph,
4 "What I'm working on now is getting emails of
5 thefacebook.com," what did you understand that to
6 mean?

7 MR. SCHULTZ: Objection, calls for
8 speculation.

9 A. I mean, I would speculate that it means
10 that he is trying to get emails of users off of
11 thefacebook.com. That's what I would speculate that
12 means.

13 Q. And what's your basis for believing that's
14 what he meant?

15 MR. CHOW: Objection.

16 A. I mean, just by reading this. That is my
17 basis.

18 Q. Is that what you understood it to mean when
19 you received the email?

20 A. Yes.

21 Q. Did you ever respond to this email?

22 A. No.

23 Q. Did you have any other conversations with
24 the ConnectU founders or anyone on behalf of
25 ConnectU with respect to this email?

1 A. I don't know. I actually looked up this
2 guy in all my emails, sent emails, and I didn't find
3 anything else about it. You know, it's not my
4 problem. It's not something I'm doing. He found --
5 he sent a request to me through a website. That's
6 it.

7 Q. And you didn't have any further discussions
8 after that about trying to extract email addresses
9 from the Facebook website?

10 A. I don't think so. I mean, it wouldn't
11 surprise me if ConnectU kept hounding us. If you
12 show me some other email -- but to my recollection,
13 no, we didn't.

14 Q. You mentioned that in July of 2004 you
15 learned that ConnectU was sending unsolicited emails
16 to people. How did you learn of that?

17 A. I think there was a couple. Some of them
18 bounced back. A person complained, and -- I think
19 certain messages got bounced back to the server.
20 You can see that and see what the original message
21 was. I think that's what that is.

22 Q. Was there any server activity that was
23 occurring that created a problem?

24 A. Oh, like slowing it down or something?

25 Q. Right.

1 A. Not to my knowledge, no.

2 Q. And you mentioned something earlier about
3 at 6:00 o'clock you learned of something and then at
4 9:00 o'clock you learned of something else. Could
5 you describe what you meant when you're referring to
6 that?

7 A. If you hand that out, I could.

8 Q. Sure, I'm happy to. This is Exhibit 82.

9 (Exhibit 82 marked for identification.)

10 A. All right. So at -- this is on July 22nd,
11 2004, at 3:13 a.m., this message -- I think it got
12 bounced back, either bounced back or forwarded. But
13 either way, at 3:13 a.m. I got this message, with
14 all these emails, this email bounce. And then at
15 6:00 a.m. I say, "In the past --

16 So we got this email to us at 3:13, and
17 then three hours later, 6:25 a.m., I sent an email
18 to Nick and Marc, to iMarc in place, Marc Pierrat.
19 And I said, "In the past 12 hours ConnectU admins
20 have sent thousands of invite emails." I'm
21 presuming it's thousands. I didn't actually count
22 all these, but to me it looked like thousands.
23 "Every single one was sent using a bogus from
24 address. I've restored the old page until this gets
25 all straightened out."

1 What I was referring to, the old page,
2 there's an invite form, which we talked about
3 earlier, so if you have an account at ConnectU, you
4 could invite your friends to join. And I think if
5 you were -- if you were logged in as an admin -- I
6 don't think there was any limit on how many people
7 you could invite to join.

8 So I'm presuming that ConnectU, because
9 they were admins, made these different accounts, so
10 they'd log in as god@harvard.edu, and send out --
11 paste in a whole bunch of email addresses inviting
12 people to join. It says Jen Starr wants you to join
13 ConnectU. That's the subject. They must have been
14 logged in as someone named Jen Starr at this point.
15 And then an hour after that, at 7:30 a.m., is when
16 we say, "You know, we should move them off" -- we
17 moved the site to Rackspace -- Rackspace is another
18 hosting company -- and let them do whatever they
19 want. We don't want that happening, if they're
20 sending out spam through us.

21 So within three hours of getting this
22 bounced back, I disabled the page, and then Marc
23 suggested an hour later of moving them off our
24 server.

25 Q. And you used the term "bogus from address."

1 What do you mean by that?

2 A. I'm not 100 percent sure, but
3 "god@Harvard.edu" seemed like a bogus from address
4 to me.

5 Q. And what about J. Starr?

6 A. The chances of -- again, this is me
7 presuming. But the chances that a
8 jstarr@georgetown.edu, a jstarr@amherst.edu, and a
9 jstarr@Dartmouth.edu all logged into the ConnectU
10 website and invited 1,000 people -- I don't know, I
11 just guessed that those were bogus, and by "bogus" I
12 meant not real.

13 Q. And what you mean by that is that these
14 email addresses were not accurately reflecting who
15 was actually sending the email.

16 A. That's what I was guessing, yes.

17 Q. And do you know what these -- you used the
18 phrase "invite emails."

19 A. Yes.

20 Q. What were the invite emails?

21 A. Well, the subject, it tells you whoever
22 you're logged in as. So this one we're looking at
23 here says, "Jennifer Starr wants you to join
24 ConnectU." And then in the body of the text there's
25 a marketing paragraph, "ConnectU is for college

1 students. It lets you do this, this, this. Click
2 here to create your account." It was like some
3 predefined text that was used to invite people to
4 sign up for their website.

5 Q. And at the beginning of this sentence you
6 say, "ConnectU admins have sent thousands of invite
7 emails."

8 A. Yes.

9 Q. How did you know it was ConnectU admins?

10 A. I think just because of the number of these
11 addresses. I mean, I don't think a real Jennifer
12 Starr at georgetown.edu is sending these. So I'm
13 guessing, the same way that I'm guessing that
14 god@harvard.edu and all the other emails are bogus.
15 I'm guessing that one of the members at ConnectU
16 logged in, created the accounts, and then sent the
17 emails.

18 Q. Did you ever discuss the sending of these
19 emails with someone from ConnectU?

20 A. I'm sure we did, because right here the
21 thing I do is I took down the page so they couldn't
22 do that. So I'm sure we had to bring that up, and
23 we like told them that, "If you do this, our server
24 could get email blacklisted. You know, you can't
25 legitimately do this. People are going to complain"

1 and whatnot. It's unsolicited email. It's spam.

2 You can't just do that.

3 Q. And do you recall them responding in any
4 way?

5 A. No, unless there's an email dialogue.

6 Q. But you don't remember any discussions.

7 A. No. I think stuff like that was more
8 important to us because we were running a business
9 that had other clients and ethically we didn't think
10 it was right. So I'm not sure what dialogue
11 happened after that.

12 Q. Let's mark this as 83.

13 (Exhibit 83 marked for identification.)

14 A. Yep.

15 Q. Do you recognize what's been marked as
16 Exhibit 83?

17 A. Yes.

18 Q. And what is Exhibit 83?

19 A. An email in response to that last one, a
20 couple of hours later in the morning.

21 Q. And this is from Nick Grant to you?

22 A. To me and Marc.

23 Q. Marc Pierrat?

24 A. Marc Pierrat, yes.

25 Q. In this email the phrase is made, "Give

1 them an inch, and they take a mile."

2 A. Yes.

3 Q. And remember, you are being deposed on
4 behalf of iMarc.

5 A. Yes.

6 Q. Do you have any understanding as to what
7 that phrase meant?

8 A. Yes.

9 MR. SCHULTZ: Objection, calls for
10 speculation.

11 A. I believe that, you know, the inch is
12 creating this tool that allows you to invite people.
13 There's the tool. It has a valid purpose that can
14 be used for a valid reason. If you join ConnectU
15 and you really like it, maybe you want to invite
16 people and tell them about it. It's a pretty common
17 feature. On news features you can send stuff to a
18 friend or whatever. So that's the inch. And the
19 mile is using that tool to send to all these people.

20 Q. And the following paragraph says, "Let's
21 get them on the phone and let them know that this is
22 unacceptable and if they want to continue this sort
23 of thing they should look for another hosting
24 provider." Do you see that?

25 A. Yes.

1 Q. And do you recall if that was actually
2 done?

3 A. Oh, yes, because shortly after this they
4 moved to another hosting provider.

5 Q. Do you have any idea how they got these
6 email addresses?

7 A. No.

8 Q. Did they ever tell you how they got the
9 email addresses?

10 A. No.

11 Q. Did they ever deny that they sent all these
12 unsolicited email messages?

13 A. Did they ever deny? I don't remember.

14 Q. Did they ever tell you that they did send
15 them?

16 A. I don't remember.

17 Q. Have you ever had somebody try and hack
18 into iMarc's site?

19 A. Not to my knowledge. That doesn't mean
20 anyone hasn't tried.

21 Q. What about websites that iMarc hosts?

22 A. There was a third-party forum that we
23 installed on someone's computer that got hacked
24 into. Not ConnectU, though.

25 MR. CHATTERJEE: Let's mark this as

1 Exhibit 84.

2 (Exhibit 84 marked for identification.)

3 THE VIDEOGRAPHER: I'd like to inform
4 counsel that there are five more minutes on the
5 tape.

6 A. Yep.

7 Q. Do you have any knowledge about what's been
8 marked as Exhibit 84?

9 A. This is my first time seeing this.

10 Q. Were you aware that Marc Pierrat had
11 discussed with Cameron Winklevoss the sending of
12 unsolicited commercial email addresses?

13 A. What was the question, again?

14 MR. CHATTERJEE: Why don't you read it
15 back.

16 (Question read.)

17 A. I think that we all -- I mean, especially
18 after this first one, I think we all said that -- I
19 mean, that it's not a good thing to do.

20 Q. Do you know if anyone from iMarc ever said
21 to Cameron Winklevoss, Tyler Winklevoss, or Divya
22 Narendra that doing so could be unlawful?

23 MR. SCHULTZ: Vague and overbroad.

24 A. I don't remember.

25 MR. CHATTERJEE: We need to change the

1 tape. Why don't we take a break and I will come
2 back in a few minute. I don't think I'll have any
3 more questions.

4 THE VIDEOGRAPHER: The time is 2:21, and
5 we are off the record.

6 (Recess taken.)

7 THE VIDEOGRAPHER: The time is 2:44, the
8 beginning of Tape 3, and we are back on the record.

9 Q. If you can take a look back, Mr. Tufts, at
10 Exhibit No. 82.

11 A. Yes.

12 Q. Now, in looking at Exhibit No. 82, in the
13 forwarded email from Jennifer Starr --

14 A. Yes.

15 Q. -- all of the email addresses seem to start
16 with either a number or the letter A. Do you see
17 that?

18 A. Yes.

19 Q. Did you forward all of the emails that were
20 being sent by Jennifer star?

21 A. Yes, you can actually see at the end it
22 says "End of forwarded message." I'm guessing that
23 there's a limit to the file size of the header that
24 is going to display on this. I didn't cut off
25 anything, though.

1 Q. Do you know if there were additional emails
2 sent from these other email addresses that are
3 identified in Exhibit 82?

4 A. I don't know if there were.

5 Q. Well, how did you know that there were
6 emails being sent from each one of these?

7 A. I guess there must have been multiple
8 bounces.

9 Q. And so this forwarded message is an
10 exemplary one of all of the emails that were sent?

11 A. Right. So this is from me at 6:25 a.m.,
12 from me to Nick and Marc. I presume that I picked
13 one and said, "In the past 12 hours ConnectU admins
14 have sent thousands of invite emails," and it looks
15 like there were four email addresses. So there must
16 have been at least four bounce-backs with those
17 addresses.

18 Q. And how did you find these exemplary email
19 addresses?

20 A. I'm not too sure on that, because actually
21 where it says "Forwarded from Jennifer Starr, 3:13
22 a.m.," it's to -- the "to" address is dave@imarc,
23 marc@imarc, and then nick@imarc, and then sent to
24 all these other people. So I'm not sure.

25 Q. So these wouldn't have traveled through the

1 ConnectU system?

2 A. They would have traveled from the ConnectU
3 Web server out to the Internet.

4 Q. Because of the way you fill out the invite
5 form?

6 A. Correct.

7 Q. And would the ConnectU website in the way
8 it was designed have stored these invitation
9 requests somewhere?

10 A. No, I think they were just -- they were
11 emails.

12 Q. So when someone goes to the ConnectU
13 website to invite somebody and they type in the
14 email address that they want to send an invitation,
15 is that recorded anywhere in the ConnectU system?

16 MS. SCHOENFELD: Objection, vague.

17 A. I don't remember. I think after this they
18 implemented some plan that encouraged their users to
19 send invites, where they offered gift certificates
20 if you, you know, invited X amount of people. So I
21 think that we would have tracked --

22 And so in this case we knew that
23 Jennifer Starr was actually logged into the system
24 and that that person sent out an email. But yeah, I
25 don't think that we -- I think we might have --

1 Again, I think this was after this
2 email, we added a new feature that actually counted
3 like how many invites you sent out, that they wanted
4 to do to encourage users to invite more people.

5 Q. Well, that would count the number of
6 invites, but I'm talking about actually recording
7 the specific email address that it was sent to.

8 A. No, I don't think so.

9 MR. CHATTERJEE: Let's mark this as
10 Exhibit 85.

11 (Exhibit 85 marked for identification.)

12 A. Did we ever do 84?

13 Q. Yes, I think we already talked about that.

14 MS. SCHOENFELD: We didn't.

15 (Discussion off the record.)

16 Q. Turn to Exhibit 84.

17 A. Yes.

18 Q. Do you have any understanding what
19 "blacklisting" means?

20 A. Yes.

21 Q. Go ahead.

22 A. "Blacklisting" means -- as I said, the
23 invite email is authored on a Web page, and then you
24 hit the Submit button, and it sends it out from the
25 Web server to someone's email address. The

1 destination email server knows where the message was
2 originated from. You know, to combat spam, most
3 incoming mail servers then have a list of known spam
4 servers. It's called a blacklist. So if it sees
5 mail coming from one of those Internet addresses, it
6 will ignore it, delete it, bounce it back, do
7 whatever it needs to do. That's what I would call
8 "blacklisting."

9 Q. And did you have any discussions with
10 Mr. Pierrat about the response from neu.edu?

11 A. No, I don't think so. I think this is the
12 first time I've seen this.

13 Q. And you're not aware of any conversations
14 between iMarc and Mr. Winklevoss related to
15 responses by people about unsolicited commercial
16 email?

17 A. I think later on someone contacted us, and
18 we forwarded it to them. But I think in this case
19 it's clearly someone contacted Cameron, and Cameron
20 contacted Marc, saying, "Hey, should I be worried
21 about this?" And Marc said, "Yes, you shouldn't be
22 doing this."

23 Q. At this point in time Mr. Pierrat was an
24 employee of iMarc; right?

25 A. Yes. I'm not 100 percent sure. It doesn't

1 have his email address on here. But I think he
2 still was, August 2004.

3 Q. If we go to Exhibit 85 --

4 Oh, I have one other question: You had
5 mentioned that in response to the emails that were
6 being sent out, that you were getting bounce-backs,
7 I think you used the phrase.

8 A. Yes.

9 Q. What did you mean by that?

10 A. So on this one, I thought --

11 Q. Could you identify the number?

12 A. Sorry. On 83 or 82, where it's showing who
13 it was sent to, it looks like it was like a
14 bounce-back, but I'm not 100 percent sure.

15 Q. Say that again?

16 A. Typically -- like if the Web server sends
17 an email to an unknown address, that -- the server
18 that it sent it to could bounce it back to the Web
19 server, and then the Web server could, you know,
20 bounce it to one of the iMarc accounts, forward it
21 back to the iMarc accounts.

22 And that's what I thought this looked
23 like, these headers. But I don't know, the more I
24 look at them, I don't really understand how these
25 headers were put together. So I'm not sure if this

1 actually was a bounce-back.

2 Q. So your belief is that these might have
3 been unrecognized email addresses that were sent
4 back to iMarc?

5 A. No, because if all of those bounced back,
6 we would have been inundated, and it would have
7 probably taken our mail server down. So I'm not
8 sure. I'm not sure how these email headers are put
9 together.

10 Q. And were you inundated with bounce-backs?

11 A. No, I don't think so.

12 Q. And what's the problem associated with
13 bounce-backs? When you say you were inundated, you
14 would have taken the server down. Why would you do
15 that?

16 A. Because the server the website is hosted on
17 is a pretty high-performance server, and it's really
18 easy to send out a thousand emails, or however many
19 are here. And at this time iMarc's internal email
20 server was pretty antiquated, pretty slow. So
21 obviously if you have a high-performance thing
22 pushing stuff out and then they're bouncing back at
23 that same rate, it's going to take our mail server
24 down.

25 From the tone of my email, obviously

1 these weren't all bounce-backs, or else I would have
2 been a lot more angry. I mean, we're angry they're
3 sending out spam, but nowhere in here do we mention
4 that it's ruining our email server.

5 Q. Let's go to Exhibit 85. Do you recognize
6 Exhibit 85?

7 A. Yes.

8 Q. And what is it?

9 A. A -- it starts off, "Someone with a
10 brown.edu address sent an email to iMarc through our
11 website contact form." I can tell that because of
12 the subject regarding in brackets iMarc@www.mci.com.
13 That means this person went to imarc.net, clicked on
14 Contact Us, and sent the email. And he says that he
15 was spammed by one of our customers and would like
16 to take action. I'm guessing -- I don't know how
17 he -- I'm guessing that he found us through maybe
18 our portfolio page, where we announce that we did
19 this connectu.com website. But he obviously didn't
20 look it up -- he went to our website and contacted
21 us that way. So he knew that one of our customers
22 was spamming him, and he wants to know what he
23 should do. Says he's extremely serious.

24 And we reply, and he thanks us for our
25 prompt replies. And then he tells us he received a

1 broadcast email "from one of your clients,
2 connectu.com. While I'm usually satisfied with
3 being removed from a spammer's email list, the
4 magnitude of this problem requires me to take
5 further action. I will be gathering and compiling
6 these emails from multiple people in the next few
7 days and will send it all your way. At that point,
8 thank you for your cooperation."

9 I think this is exactly why we didn't
10 want them on our servers, because we don't want to
11 deal with crap like this. So even at this point,
12 September 14th, they weren't on our servers, we
13 weren't managing their website. But if you looked
14 up connectu.com or ConnectU on the Internet, you'd
15 see iMarc made a new press release or whatever, in
16 our portfolio, that we made the website. So
17 obviously this guy still found us. And we're trying
18 to help him out, because I hate spam as much as the
19 next guy. I think we forwarded all this information
20 in a following email to, I think,
21 webmaster@connectu.com.

22 Q. Do you know if they took any action with
23 respect to it?

24 A. Don't know.

25 Q. Did you ever hear from Mr. Gomel,

1 G-o-m-e-l, again?

2 A. I don't know. I think there was one more
3 email of us forwarding everything that he had sent
4 us to ConnectU. So I'm not sure what other
5 information, but it's in the stack of emails.

6 Q. I'm going to thank you very much for your
7 time. I know that depositions aren't the thing that
8 most businessmen want to spend a lot of their time
9 doing. But thank you very much. I don't think I
10 have any further questions at this time. I may
11 follow up following the other attorneys' questions.
12 I'm going to pass the witness to Mr. Hampton.

13 EXAMINATION

14 BY MR. HAMPTON:

15 Q. Hi, Mr. Tufts. I'm Dan Hampton, and I just
16 have brief follow-up questions in one area. If I
17 recall correctly, Mr. Chatterjee earlier asked you
18 some questions about the process of transferring the
19 ConnectU information from the iMarc server to the
20 new server. And if I recall your testimony
21 correctly, you said that when everything goes well,
22 no data is lost.

23 A. Correct.

24 Q. Do you recall that testimony?

25 A. Yes.

1 Q. Did everything go well in the case of the
2 transfer of the ConnectU information?

3 A. I think so.

4 Q. So to your knowledge, was any data lost in
5 the transfer of the ConnectU information from the
6 iMarc servers to the servers that John Taves was --

7 MS. SCHOENFELD: Objection, calls for
8 speculation.

9 A. I don't think that any important
10 information vital to running the website was lost.
11 You know, obviously, if the home page didn't get
12 transferred, we would hear about that immediately.
13 If one of the lesser important pages -- you know,
14 there was a problem with that, maybe we'd hear about
15 that a day or two later. As pages are less
16 important, maybe further down the road, we'd hear
17 that something was lost. But we didn't hear that,
18 "We didn't get this, this thing isn't working any
19 more." So as far as I know, all the functionality
20 of the website that people actually used was
21 transferred over.

22 Q. Did you ever hear from anyone associated
23 with the ConnectU website that any data had not
24 transferred properly?

25 A. No.

1 Q. Thank you. That's all I have.

2 EXAMINATION

3 BY MR. CHOW:

4 Q. I just wanted to clarify one of the
5 exhibits, which is the contract, Exhibit 71. If you
6 can look at that.

7 A. Yes.

8 Q. Mr. Tufts, is this document, Exhibit 71, a
9 form contract that is used by iMarc?

10 A. Right about this time we were trying to be
11 a little more professional, and when we were kicking
12 off a project, starting with something like this.
13 Obviously, by this day we weren't kicking off
14 ConnectU.

15 Q. "This date" being?

16 A. Sorry, July 12th, 2005. So we kind of just
17 used this as -- before we handed over all the source
18 code.

19 Q. Did you have a prior form agreement that
20 you used?

21 A. No. We had a proposal doc that basically
22 put a budget and time line on a project, that iMarc
23 signs off on and the client signs off on, mostly for
24 budget and time line.

25 Q. Were you involved in any of the drafting of

1 all the source code in our possession associated
2 with the website connectu.com as it appeared on May
3 26, 2004, to a CD-ROM, the CD-ROM containing the
4 source code, and we'll mail it to the client.

5 Q. So was this the creation of a website?

6 A. No. This was just turning over all of the
7 code to them, which they actually had access to on
8 their own server.

9 Q. What work was actually done on this
10 contract?

11 A. On this contract? We went to our backups,
12 unarchived, everything having to do with ConnectU,
13 saved it into a CD-ROM, and FedExed it to the
14 client.

15 Q. And what was charged for that?

16 A. \$1,000.

17 Q. And what was this in response to?

18 A. It was in response to a number of emails
19 from them going back and forth, asking for copies of
20 the source code.

21 MR. CHOW: No further questions.

22 MS. SCHOENFELD: No further questions.

23 RE-EXAMINATION

24 BY MR. CHATTERJEE:

25 Q. I want to ask you three subject matters;

1 hopefully it won't be too many questions, as to that
2 contract that Mr. Chow just asked you about.

3 A. Yes.

4 Q. Did you understand that contract to be
5 confirming the ownership of the source code to the
6 ConnectU website?

7 MR. SCHULTZ: Objection, vague.

8 A. What do you mean, "confirming the
9 ownership"?

10 Q. Was it saying that iMarc owned the ConnectU
11 source code?

12 A. Yes.

13 Q. Mr. Hampton asked you a few questions about
14 what was transferred to the other server.

15 A. Yes.

16 Q. Two things about that. The first thing, he
17 asked you if it was transferred to a hosting service
18 provided by John Taves. Do you know what hosting
19 service it was actually transferred to?

20 A. Yes. It was an account you can tell -- I
21 think Exhibit 84, where the person actually makes
22 the complaint to abuse@cihost.com and
23 noc@cihost.com. I'm not sure -- I don't think that
24 that website was actually -- or that server was paid
25 for or purchased -- set up by John Taves. I believe

1 that we told ConnectU, "We don't want to host your
2 website any more. Here is a place where you can get
3 Web hosting. You guys set up the account and give
4 us the information, and we'll help you move it over,
5 and then you can continue developing. We'll help
6 you get it going." But I believe it was ConnectU,
7 not John Taves, who actually, you know, purchased
8 the account at cihost.com.

9 Q. And that was -- that cihost.com is where
10 you transferred the ConnectU website server to?

11 A. Correct.

12 Q. And one thing -- now going to my second
13 point. Mr. Hampton asked you a question about what
14 was transferred, and you said that all the
15 functionality was transferred to this new Web
16 server. Do you recall that?

17 A. Yes.

18 Q. What about all of the data? And I'm going
19 to give you some very precise questions. I've seen
20 documents in the production where the Web host, or
21 the ConnectU administrator, could follow
22 instant-message chats occurring on the ConnectU
23 website.

24 A. Uh-huh.

25 Q. Would those instant-message chat files,

1 that maybe aren't viewable any more, also be
2 transferred?

3 MR. SCHULTZ: Objection, vague and
4 overbroad.

5 A. The ones that still existed should. There
6 actually was something written into the code
7 something to clean those up so it doesn't fill up
8 the server. I mean, you can tell, like we open up a
9 chat connection, we chat for a while, and then we
10 close, and once it's inactive for a couple of hours,
11 the system assumes that we're no longer chatting any
12 more. So there was garbage cleanup, scripts written
13 into the application to clean up these files, so
14 they don't overtake everything.

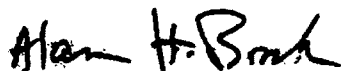

15 So there's chat -- if you're asking
16 specifically about chat IM transcripts, the recent
17 ones should have been transferred over, but on
18 purpose old ones were cleaned up, for obvious
19 reasons.

20 Q. And what about things like emails and other
21 sorts of data that might occur on the website but
22 were kind of similar degrees of transience?

23 A. Actual -- again, if I find your -- search
24 for your profile on the website and click Email to
25 You, I send you an email, an alert goes to your

1 CERTIFICATE OF COURT REPORTER

2 I, Alan H. Brock, Registered
3 Professional Reporter and Certified Realtime
4 Reporter, do certify that the deposition of David
5 Tufts, in the matter of Face Book, Inc., and Mark
6 Zuckerberg v. ConnectU, Inc., et al., on October 5,
7 2007, was stenographically recorded by me; that the
8 witness provided satisfactory evidence of
9 identification, as prescribed by Executive Order 455
10 (03-13) issued by the Governor of the Commonwealth
11 of Massachusetts, before being sworn by me, a Notary
12 Public in and for the Commonwealth of Massachusetts;
13 that the transcript produced by me is a true and
14 accurate record of the proceedings to the best of my
15 ability; that I am neither counsel for, related to,
16 nor employed by any of the parties to the above
17 action; and further that I am not a relative or
18 employee of any attorney or counsel employed by the
19 parties thereto, nor financially or otherwise
20 interested in the outcome of the action.
