Reported by:
RACHEL FERRIER, CSR
CSR No. 6948

1   BE IT REMEMBERED that on Tuesday, June 19,

2   2007, commencing at the hour of 9:11 a.m., thereof,

3   at the Law Offices of ORRICK, HERRINGTON & SUTCLIFFE,

4   LLP, 1000 Marsh Road, Menlo Park, California 94025,

5   650.614.7400, before me, RACHEL FERRIER, a Certified

6   Shorthand Reporter for the State of California,

7   personally appeared

8   WINSTON WILLIAMS,

9   called as a witness by the Plaintiffs herein, who,

10   being by me first duly sworn/affirmed, was thereupon

11   examined and testified as hereinafter set forth.

12   ---oOo---

13   Appearing as counsel on behalf of Plaintiffs:

14   MONTE M.F. COOPER, Esquire
           THERESA A. SUTTON, Esquire

15   ORRICK, HERRINGTON & SUTCLIFFE, LLP
           1000 Marsh Road

1   A   My friend Joel showed me their Website.

2   Q   And that would be Joel Voss?

3   A   Correct.

4   Q   All right. Do you recall why he showed you

5   the Website?

6   MR. MOSKO: Calls for speculation.

7   THE WITNESS: I don't know.

8   BY MR. COOPER:

9   Q   Do you recall the circumstances when he

10   showed you the Website?

11   A   By "circumstances" you mean what?

12   Q   What were they? I mean, how did it come --

13   A   I mean, we were sitting at a computer and

14   he was showing me a social networking Website. He

15   was showing me, you know, basically how you can

16   browse through people's public profiles and look at

17   their whatever class information and send messages

18   and whatnot.

19   Q   All right. And you say you were seated at

20   a computer?

21   A   Yes.

22   Q   Was this a computer that was owned by

23   Pacific Northwest Software?

24   A   No.

25   Q   Was this at Joel Voss's house?

```
1       A       Yes.
2       Q       All right.  What was that?
3       A       There were several instances.  One instance
4  of an importer -- I mean, there were several.
5       Q       Okay.  What was the earliest?
6       A       I don't recall.
7       Q       Did you develop the first one?
8       A       I don't recall.
9       Q       Do you know who else worked on importer?
10      A       I know Joel Voss did.  I believe others may
11 have.
12      Q       Do you know if David Gucwa did?
13      A       I believe he had some hand in working on
14 some importer at some point, yes.
15      Q       Did you know if Wayne Chang did?
16      A       I don't believe he did any programming on
17 any importers, but he may have control of the
18 administration of the importers.
19      Q       All right.  And how would he have control
20 of the administration?
21      A       Starting, stopping the service and watching
22 the alerts or the status monitors.
23      Q       All right.  So you had a
24 network-monitor-watching importer?
25      A       We had a automated system that would alert
```

1 us when the -- when the system was malfunctioning.

2   Q   All right. And what was the automated

3 system?

4   A   It was some method for a script to

5 determine whether the system appeared to be

6 malfunctioning. It would provide an alert on the

7 Website.

8   Q   All right. Did you, yourself, write any of

9 the code for importer?

10   A   Yes.

11   Q   All right.

12   A   Wrote code for some instances of the

13 importer, yes.

14   Q   All right. When was the first time you

15 recall writing any code for importer?

16   A   I don't recall the dates.

17   Q   All right. Did you receive a version of

18 importer, or did you actually create one from

19 scratch?

20   A   I created at least one importer system from

21 scratch.

22   Q   All right. You say at least one.

23   So do you know if that was the first one or

24 the --

25   A   I don't know.

1   Q   All right. And when you say you know you

2   created at least one from scratch, why do you --

3   when -- when did this occur?

4   A   I don't know the dates.

5   Q   All right. Who instructed you to develop

6   one from scratch?

7   A   I believe Cameron Winklevoss.

8   Q   All right. And was this still while you

9   were working for Pacific Northwest Software?

10   A   Yes.

11   Q   All right. And what was the function of

12   this importer that you developed from scratch?

13   A   It was to import some type of data from the

14   Facebook Website.

15   Q   All right. Could you go back to what has

16   now been redacted version Exhibit 47.

17   A   Yeah.

18   Q   Turn to February 16th.

19   A   Okay.

20   Q   Do you see where -- on page 2 of 16?

21   A   Yes.

22   Q   You see where it says "site was in chaos -

23   old hardware could not handle the traffic, made as

24   many optimizations as possible"?

25   A   Yes.

1 Trying to get into facebook, put together javascript

2 engine to decode e-mail addresses?

3   A   Yes.

4   Q   All right. What did you mean by "trying to

5 get into facebook"?

6   A   We were probably seeing what we could build

7 as an automated system to have our system log in to

8 Facebook based on credentials that were provided to

9 us.

10   Q   All right. Did you employ, as part of the

11 importer program, a program that was called crawler?

12   A   We built some code that we probably called

13 a crawler at one point.

14   Q   All right. And did you also employ a code

15 that you called grabber?

16   A   I don't know.

17   Q   All right. Did you employ -- strike that.

18   Stepping back to your entry fixed --

19 "trying to get into facebook" -- do you see that?

20   A   Yes.

21   Q   -- did there come a time when you were

22 working on the importer in which you were aware that

23 the Facebook e-mail accounts were not made visible to

24 the public?

25   MR. MOSKO: Can I have that question read

1   again, please.

2   (Record read by the Reporter as follows:

3   "QUESTION: Did there come a time when you

4   were working on the importer in which you

5   were aware that the Facebook e-mail

6   accounts were not made visible to the

7   public?")

8   THE WITNESS: No.

9   BY MR. COOPER:

10   Q   All right. Did you ever run into any issue

11   where the e-mail accounts were protected by optical

12   or OCR mechanisms?

13   A   I don't know what you mean by "protected."

14   Q   Well, that the script was not made

15   available.

16   A   I recall a time when the e-mail addresses

17   were displayed as images.

18   Q   Okay. And that would be an optical

19   mechanism; correct?

20   A   Right.

21   Q   All right. So when you would go on to the

22   Facebook Website in or about February 2005, do you

23   have a recollection what scripting language you saw

24   the Facebook site employed?

25   A   I believe they used JavaScript and html and

```
 1            THE VIDEOGRAPHER:  Okay.  We are back on

 2   the record now at 12:14.

 3   BY MR. COOPER:

 4       Q    Mr. Williams, before we broke, we were

 5   talking about the ability to identify what e-mails

 6   had been sent to California students.

 7            Do you recall that?

 8       A    Yes.

 9       Q    Is there any way to equally determine the

10   extent e-mail accounts were obtained from the

11   Facebook Website and imported to ConnectU which ones

12   came from California schools?

13            MR. MOSKO:  Can I have that question

14   reread, please.

15            (Record read by the Reporter as follows:

16            "QUESTION:  Is there any way to actually

17            determine the extent e-mail accounts were

18            obtained from the Facebook Website and

19            imported to ConnectU which ones came from

20            California schools?")

21            THE WITNESS:  There may be some way.

22   BY MR. COOPER:

23       Q    All right.  Was a database set up to relate

24   Facebook accounts in the ConnectU database field?

25       A    I don't know if your wording is correct,
```

```
1    STATE OF CALIFORNIA          )
                                  :ss
2    COUNTY OF SAN FRANCISCO      )

3

4              I, the undersigned, a Certified Shorthand

5    Reporter of the State of California, do hereby

6    certify:

7              That the foregoing proceedings were taken

8    before me at the time and place herein set forth;

9    that any witnesses in the foregoing proceedings,

10   prior to testifying, were placed under oath; that a

11   verbatim record of the proceedings was made by me

12   using machine shorthand, which was thereafter

13   transcribed under my direction; further, that the

14   foregoing is an accurate transcription thereof.

15             I further certify that I am neither

16   financially interested in the action, nor a relative

17   or employee of any attorney or any of the parties.

18             IN WITNESS HEREOF, I have this date

19   subscribed my name.
