Recommendations For Wayne

Director of Business Development

"Wayne is extremely hard working and knows how to get things done. Working with Wayne has been a real opportunity." *June 29, 2006*

Joe Ferris, *Lead Developer, Pacific Northwest Software*
reported to Wayne at Pacific Northwest Software

"Wayne is an inspiring and energetic colleague who gets things done and whose vision and advice i trust and respect. I am very pleased to know Wayne and very happy to recommend him." *June 29, 2006*

Alexandr Novikov, *Director of Europe Branch, Pacific Northwest Software*
worked directly with Wayne at Pacific Northwest Software

"Wayne is a sheer genius when it comes to marketing. He developed and executed a brilliant marketing campaign that resulted in a huge increase in our leads." *June 27, 2006*

Mike Hayner, *VP of Engineering, Pacific Northwest Software*
managed Wayne at Pacific Northwest Software

"Wayne is driven, decisive, and smart. I can trust his decisions and work to be thought out and practical. Very enjoyable to work with." *June 27, 2006*

Carl Corcoran, *Development Lead, Pacific Northwest Software*
worked directly with Wayne at Pacific Northwest Software

"A very smart and driven individual. Highly recommended. Working with Wayne was a real pleasure." *January 5, 2004*

Eric Schoonover, *Project Manager, Pacific Northwest Software*
worked with Wayne at Pacific Northwest Software

**Founder
i2hub**

"I've worked with Wayne on i2hub.com efforts for almost a year now and I can honestly say that the project would never have seen the light of day without his guidance and vigilance. He has overseen every step of the process, kept us focused and motivated, and worked to develop a strong sense of community that has made the project the success it has become. Thanks for bringing me on board :)" *July 30, 2004*

Jeremy Caron, *i2EEE Application Engineer, ADESA Impact*
reported to Wayne at i2hub

**Founder
Dorm2Dorm**

"Very motivated and creative individual. A pleasure to work with." *January 19, 2004*

Dan Dumont
worked directly with Wayne at Dorm2Dorm

[Web-cyradm] compiling problem with postfix

Wayne Chang [wchang at pnwsoft.com](mailto:wchang@pnwsoft.com)
Mon Jun 9 18:46:17 CEST 2003

- Previous message: [\[Web-cyradm\] feature request](#)
- Next message: [\[Web-cyradm\] setting up accounts](#)
- Messages sorted by: [\[date \]](#) [\[thread \]](#) [\[subject \]](#) [\[author \]](#)

Hi guys,

I'm trying to compile postfix. The command I used before "make" was:

```
make makefiles 'CCARGS=-DHAS_MYSQL \
-I/usr/local/mysql/include/mysql -DUSE_SASL_AUTH \
-I/usr/local/include/sasl -I/usr/local/BerkeleyDB.4.1/include' \
'AUXLIBS=-L/usr/local/mysql/lib/mysql \
-lmysqlclient -lz -lm -L/usr/local/lib -lsasl2 -L/usr/local/BerkeleyDB.4.1/lib'
```

The error that I'm getting is:

```
[src/master]
gcc -Wmissing-prototypes -Wformat -DHAS_MYSQL -I/usr/local/mysql/include/mysql -DUSE_SASL_AUTH -I/usr/local/include/sasl -I/usr/local/BerkeleyDB.4.1/include -g -O -I. -I../include -DLINUX2 -o master master.o master_conf.o master_ent.o master_sig.o master_avail.o master_spawn.o master_service.o master_status.o master_listen.o master_vars.o master_wakeup.o master_flow.o
../lib/libglobal.a
../lib/libutil.a -L/usr/local/mysql/lib/mysql -lmysqlclient -lz -lm -L/usr/local/lib -lsasl2 -L/usr/local/BerkeleyDB.4.1/lib -ldb -lnsl -lresolv
/usr/local/BerkeleyDB.4.1/lib/libdb.so: undefined reference to `pthread_condattr_setpshared'
/usr/local/BerkeleyDB.4.1/lib/libdb.so: undefined reference to `pthread_mutexattr_destroy'
/usr/local/BerkeleyDB.4.1/lib/libdb.so: undefined reference to `pthread_mutexattr_setpshared'
/usr/local/BerkeleyDB.4.1/lib/libdb.so: undefined reference to `pthread_mutexattr_init'
/usr/local/BerkeleyDB.4.1/lib/libdb.so: undefined reference to `pthread_mutex_trylock'
collect2: ld returned 1 exit status
make: *** [master] Error 1
make: *** [update] Error 1
```

Any ideas? I deviated from the HOWTO a little by not using BerkeleyDB 4.0, but using 4.1, and not installing in /bdb.

Best regards,

Wayne Chang

From John Turner <tomcat-u...@johnturner.com>

Subject Re: mod_jk questions

Date Fri, 13 Jun 2003 17:08:23 GMT

Well, building it is pretty easy, all things considered. Is that an option for you? I haven't built any of the 1.2.4 releases yet, but I doubt they are much different than the others. I can furnish build instructions, as can others on the list.

Otherwise, you will have to wait for the binary, probably next week.

John

"Only one remote hole in the default install, in more than 7 years!"

I take it that it means there has been only one remote hole in the default install a one 7-year stretch, whether that includes this year or not, it doesn't say.

1990-1997 is a 7-year stretch.
1991-1998 is a 7-year stretch.

By default install, it means the default install of any opensbd in that 7-year stretch, not specific on one.

It's pretty tricky that the marketing strategists over there wrote up that sentence, but if it sells one more license, then so be it.

From "Wayne Chang" <wch...@pnwsoft.com>
Subject RE: mod_jk questions
Date Sat, 14 Jun 2003 00:37:49 GMT

John,

I could wait until next week. What do you think about the fact that jsp refuses to load but html files load fine? This happens once in awhile. Is it the max number of connections were made? Or is mod_jk/tomcat puking? What would be a way of remedying this?

Best regards,

Wayne Chang

John Taves, President and Senior Engineer

John Taves started Pacific Northwest Software in 1998 with the objective of providing superior software contract programming.

John has over 16 years of technical computer experience. He is also an expert in OCR Algorithms, having developed machine print algorithms used currently on the bulk of the mail processed by the United States Post Office.

See John's resume for more details.

Mike Hayner, Corporate Officer and Director of Software Development

Mike Hayner has over 10 years of technical computer experience.

Mike Hayner is an experienced software development manager and an expert in web and database design. He has managed the development of several internal and external sites for Microsoft that utilize SharePoint Portal Server 2003, SharePoint Team Services, ASP.NET, C# Web Parts, SQL Server databases, ActiveX controls, and ISAPI filters and extensions.

See Mike's resume.

LiWen Liang, Senior Software Engineer

LiWen Liang has more than 10 years of professional experience, including 5 years as a technical lead, mentoring junior team members.

She has been working with different size of companies developing both their intranets and external web sites. She has solid technical background, which includes skills in ASP.NET, SQL Server Database, SharePoint Portal Server 2003, C# Web Parts, ASP, PHP, mySQL, Java.

Alex Novikov, Senior Software Engineer

Alex has more than 9 years of professional experience, and has lead development teams.

He has extensive experience with Java and ASP.NET as well strong skills in C/C++, SQL, and other programming languages.

David Rivard, Senior Software Engineer

David has 7 years of development experience after obtaining a Bachelors degree in Computer Science. He is an expert in C++, C#, SQL Server, and .NET technologies.?? David is an expert in web application development from ISAPI applications, ASP, ASP.Net, and SharePoint. He also has years of experience developing large enterprise applications focused on manageability and security.

Eric Schoonover, Software Engineer

Eric Schoonover is developer with 3 years of experience, including both web and C# development.

Alexy Shurkopat, Software Engineer

Alexy has more than 5 years of experience and is an expert on Java and SQL.

Thompson Hayner, Database Administrator

Thompson has 11 years of experience in database design and development, database administration, and IT security (including HIPAA). He has worked in a variety of industries (financial, tax planning, high-tech, and manufacturing).

Kelly Frasure, Quality Assurance Engineer

Kelly's experience of 3 years consists of software testing, developing and executing test plans, developing and executing test cases, analyzing the results of test plans and test cases, and determining when bugs have been fixed satisfactorily. She also has experience programming in Visual Basic, Java, Perl. She has web development experience using HTML, PHP, ASP, Perl CGI, JavaScript. She has developed databases using SQLServer, Access, Oracle, PostgreSQL.

Wayne Chang, System Administrator

Wayne sets up and manages the computers that PNWSoft uses including a mix of Windows and Linux servers. He also manages and configures the software that those systems run.

Ed Winkle, Writer and Editor

Ed Winkle writes the manuals and other documentation that PNWSoft provides. He also is an excellent content editor for the online information on the projects that we work on.
