Pacific Northwest Software Announces Development Contract City Ticket Exchange

FOR IMMEDIATE RELEASE

AUGUST 10, 2006 - Pacific Northwest Software, a leading innovator of software and web development, today announced that it is developing City Ticket Exchange's ticketing engine, web application, web site, market depth analysis aggregator, and other components.

City Ticket Exchange will rely on Pacific Northwest Software to deliver the enterprise-class site utilizing a team of developers and award-winning graphics designers.

Pacific Northwest Software will develop the application using open source technologies as well as AJAX methodologies, including Ruby on Rails and Flash.

ABOUT PACIFIC NORTHWEST SOFTWARE
Pacific Northwest Software is a leading software and web development firm based in Washington. The Company has created many products including Sarbanes-Oxley Act compliance software for large corporations, OCR systems for the United States Postal Service, web applications for Microsoft, desktop software for Mashboxx and i2hub, wireless applications for the Blackberry handheld devices, and many more. Pacific Northwest Software works with a wide variety of clients, ranging from the start-ups to the Fortune 500 enterprises.
