1 **I. INTRODUCTION**

2 Plaintiff's sole argument challenging the jurisdiction of this Court is *not* that the amount  
3 in controversy is insufficient to reach the \$5 million threshold required by the Class Action  
4 Fairness Act, but that *Google has not demonstrated* that the amount in controversy crosses that  
5 threshold. Indeed, nowhere in the Motion to Remand ("Motion") does Plaintiff commit to an  
6 amount in controversy that is less than \$5 million, preferring instead to use the occasion of the  
7 Motion to suggest that Google's burden on removal requires it to concede the factual allegations  
8 of the complaint and provide free evidence in support of Plaintiff's damages theory. Plaintiff's  
9 Motion turns the legal burden for establishing federal jurisdiction on its head and fails for at least  
10 the following reasons:

11 *First*, Google's burden in this matter requires only that it show that it is *more likely than*  
12 *not* that Plaintiff's claims—which are assumed valid for purposes of the Motion—involve a total  
13 amount in controversy greater than \$5 million.<sup>1</sup> While Plaintiff does not herself "do the math,"  
14 she does plead facts sufficient to establish the requisite amount in controversy on the face of her  
15 Complaint. Plaintiff contends that a portion of Google's advertisers are so-called Fraudulent  
16 Mobile Subscription Services whose ad revenues are "ill-gotten gains" for which Plaintiff  
17 demands remedies of disgorgement and restitution.<sup>2</sup> She also alleges that "[m]any if not all of the  
18 Fraudulent Mobile Subscription Services *monthly* or periodic payments to Google for the  
19 AdWords services *exceed \$10,000.*" *Id.*, ¶ 54.<sup>3</sup> The logical conclusion from these allegations is  
20 that Plaintiff has pled facts sufficient to establish the jurisdictional minimum. If only eleven of  
21 the 250 mobile subscription service advertisers who are the target of the Complaint (*id.*, ¶ 29) fall  
22 within Plaintiff's definition of "fraudulent," then Plaintiff seeks an amount in excess of the  
23 jurisdictional minimum (\$120,000 per year per advertiser x 11 advertisers x four years covered by  
24 the Complaint = \$5,280,000). Plaintiff has already identified seven Google advertisers that she

25 <sup>1</sup> Google denies Plaintiff's allegations and is confident that when the merits of this case are considered  
26 those allegations will be proven to be factually and legally devoid of substance. At this point, however,  
those merits are not at issue.

27 <sup>2</sup> Complaint (hereafter, "Compl."), ¶ 29 and Prayer for Relief.

28 <sup>3</sup> All emphasis herein is added unless otherwise indicated.

1 contends are "fraudulent." *Id.*, ¶ 36, Ex. B. Given Plaintiff's allegation that Google is "the most  
2 widely-used Internet search engine in the world, (Compl., ¶ 2), it requires no willing suspension  
3 of disbelief to expect Plaintiff to identify at least four other offending advertisers. These  
4 allegations, and the reasonable inferences to be drawn from them, are sufficient to establish that it  
5 is more likely than not that the amount in controversy exceeds \$5 million for Plaintiff's  
6 disgorgement and restitution prayer alone.

7 **Second**, as set forth in the accompanying declaration,

8 **REDACTED**

See Declaration of

9 Matthew Hudson in Support of Google Inc.'s Opposition to Motion to Remand ("Hudson Decl."),  
10 ¶ 6. Although Plaintiff is not clear precisely how many advertisers for which she seeks to hold  
11 Google responsible, her complaint expressly covers cell phone "ring tone" subscription providers.  
12 Compl. ¶ 7.

13 **REDACTED**

14  
15 Plaintiff makes clear that ring tone  
16 subscription providers are only a slice of the total Google revenue she contends should be  
17 subjected to disgorgement and restitution. *See* Compl. ¶ 7 (mobile subscription services defined  
18 to include "customized ring tones for use with cell phones, sports score reports, weather alerts,  
19 stock tips, horoscope services and the like").

20 **Third**, Plaintiff seeks multiple remedies in this action, including breach of contract  
21 damages, "restitution and disgorgement of all ill-gotten gains unjustly obtained," injunctive relief,  
22 and attorneys' fees and costs. The facts establish that *any one* of these remedies has the potential  
23 to exceed the jurisdictional minimum. For instance, Plaintiff seeks damages on behalf of every  
24 person in the United States who was charged without authorization for mobile content service by  
25 *any* cellular telephone company or service provider (*e.g.*, AT&T Mobility, Verizon, Sprint, T-  
26 Mobile), if that cellular customer used the Google search engine to locate an AdWords  
27 advertisement for mobile content. With more than 255 million mobile customers in the U.S. and  
28 a nationwide annual market for mobile premium content in excess of \$1.1 billion, it is more likely

OHS West:260495622.3

1 than not that the damages component alone pushes this case beyond the jurisdictional threshold.  
2 See Compl. ¶ 8 (mobile subscription industry is a “multi-billion dollar marketplace”).<sup>4</sup> Taken  
3 together with disgorgement, the costs of an injunction and attorneys’ fees in a complex case, it  
4 cannot reasonably be disputed that Plaintiff has placed substantially more than \$5 million at issue.

5 **Fourth**, Plaintiff’s counsel’s results in similar (but more narrowly drawn) cases  
6 demonstrate beyond reasonable dispute that the amount in controversy far exceeds the threshold  
7 amount. A proposed settlement in one such case proposes class notification be delivered to more  
8 than 70 million AT&T customers and would reward Class Counsel, including KamberEdelson—  
9 Plaintiff’s counsel in that case *and* this one— \$4.3 million in attorneys’ fees. See RJN, Ex. A  
10 (*McFerren* settlement memorandum at 6, 11, 16 n.7). In a second KamberEdelson case against a  
11 billing aggregator, Plaintiff’s counsel obtained a \$12 million settlement fund and a \$1.2 million  
12 fee award. See RJN, Ex. B (*Gray v. Mobile Messenger* settlement agreement at 6, 12, 27). In yet  
13 another lawsuit, KamberEdelson sought more than \$5 million in attorneys fees after settling just  
14 three months after filing the complaint, on the theory that Plaintiff’s counsel was entitled to 25%  
15 of the value of the settlement benefits. See RJN, Ex. C (*Abrams v. Facebook, Inc.* Application for  
16 Attorneys’ Fees at 2). Plaintiff’s counsel’s history of big money demands in these cases is  
17 persuasive evidence that the amount in controversy here far exceeds \$5 million.

18 **Finally**, although Plaintiff has asserted no federal claims against Google in this action,  
19 this Court will be asked at the outset to resolve a question of federal law. As a provider of an  
20 interactive computer service, Google has federal immunity from Plaintiff’s claims; this litigation  
21 is an ill-concealed attempt to circumvent the federal law immunizing interactive service providers  
22 such as Google against liability for the alleged wrongdoing of third-parties who use its platform.<sup>5</sup>

23 <sup>4</sup> See also Request for Judicial Notice (“RJN”), Exhibit H (CTIA Wireless Quick Facts at 1).

24 <sup>5</sup> Specifically, Google intends to move for dismissal of this action pursuant to Section 230 of the  
25 Communications Decency Act. 47 U.S.C. § 230(c)(1) (“No provider or user of an interactive computer  
26 service shall be treated as the publisher or speaker of any information provided by another information  
27 content provider.”). Section 230(c)(1) provides immunity from liability for providers and users of an  
28 “interactive computer service” who publish information provided by others and provides Google with  
complete immunity from the claims asserted here. The Ninth Circuit has consistently held that providers  
of interactive computer services such as Google are entitled to protection from the precise types of claims  
asserted in this lawsuit – that is, wrongdoing committed by third-parties that makes some use of the  
Google platform. See *Carafano v. Metrosplash.com*, 339 F.3d 1119 (9th Cir. 2003); *Batzel v. Smith*, 333  
OHS West:260495622.3

1 That Plaintiff's claims are legally and factually doomed does not affect this Court's jurisdictional  
2 analysis however, because it is required as a matter of law for purposes of this Motion to assume  
3 the claims are valid and that liability will result. Plaintiff's demands for restitution and  
4 disgorgement, injunctive relief, damages, and attorneys' fees are sufficient to establish the  
5 jurisdictional threshold required by CAFA. Plaintiff's motion to remand should be denied.

## 6 **II. LEGAL STANDARD FOR REMOVAL JURISDICTION UNDER CAFA**

7 The Class Action Fairness Act vests district courts with "original jurisdiction of any civil  
8 action in which, *inter alia*, the amount in controversy exceeds the sum or value of \$5,000,000."  
9 28 U.S.C. § 1332(d). Plaintiff's sole argument challenging jurisdiction is *not* that her complaint  
10 does not exceed CAFA's \$5 million amount in controversy threshold, but that Google's removal  
11 petition did not sufficiently demonstrate an amount in controversy greater than \$5 million.<sup>6</sup>

12 Where a removed complaint "alleges on its face an amount in controversy sufficient to  
13 meet the federal jurisdictional threshold, such requirement is presumptively satisfied, unless it  
14 appears to a 'legal certainty' that the plaintiff cannot actually recover that amount." *Guglielmino*  
15 *v. McKee Foods Corp.*, 506 F.3d 696, 699 (9th Cir. 2007).

16 Where the "complaint fails to allege a sufficiently specific total amount in controversy,"  
17 the removing party need only show that the amount in controversy more likely than not exceeds  
18 the jurisdictional amount. *Id.* at 701. This "burden is not 'daunting,' as courts recognize that  
19 under this standard, a removing defendant is *not* obligated to 'research, state, and prove the  
20 plaintiff's claims for damages.'" *Muniz v. Pilot Travel Centers LLC*, 2007 WL 1302504, \*2, Case  
21 No. S-07-0325 (FCD) (E.D. Cal. May 1, 2007) (citations omitted).<sup>7</sup> "In measuring the amount in

---

22 F.3d 1018 (9th Cir. 2003). Google does not contend that the CDA provides a basis for federal jurisdiction  
23 in this action, but that the ramifications of Plaintiff's artful pleading around the CAFA jurisdictional  
24 requirements should be considered with the backdrop of the CDA.

25 <sup>6</sup> Plaintiff's Complaint provides explicitly that the putative class size exceeds 1000 members, Compl. ¶  
41, and therefore presumptively meets the jurisdictional requirement. *See Guglielmino*, 506 F.3d at 699.

26 <sup>7</sup> Plaintiff argues that to defeat remand, Google was "*require[d] at a minimum*" to identify "(1) the 250  
27 largest advertisers of mobile subscription services (ranked by monies paid to Google) on or through  
28 Google; (2) the number of such advertisers operating landing pages in violation of the Google Content  
Policy; (3) the money Google received from the percentage of such advertisers operating landing pages in  
violation of the Google Content Policy; (4) the number of visitors Google referred to such rogue landing  
pages; and (5) the monies such visitors were ultimately charge for unauthorized mobile subscription

OHS West:260495622.3

1 controversy, a court must 'assum[e] that the allegations of the complaint are true and assum[e]  
2 that] a jury [will] return[ ] a verdict for the plaintiff on all claims made in the complaint.'"

3 *Kenneth Rothschild Trust v. Morgan Stanley Dean Witter*, 199 F. Supp. 2d 993, 1001 (C.D. Cal.  
4 2002) (citations omitted; brackets in original).

5 Calculation of the amount in controversy can be from the perspective of either the plaintiff  
6 or the defendant. *Guglielmino*, 506 F.3d at 700 (quoting *Ridder Bros. v. Blethen*, 142 F.2d 395,  
7 399 (9th Cir. 1944)). This "either viewpoint" rule applies to putative class actions brought under  
8 CAFA, as well as to single-plaintiff suits. *Tompkins v. Basic Research LL*, 2008 WL 1808316,  
9 No. 08-244 (LKK) (E.D. Cal. Apr. 22, 2008); *Rodgers v. Cent. Locating Svc.*, 412 F. Supp. 2d  
10 1171, 1179-80 (W.D. Wash. 2006); *see also* Senate Report No. 109-14 S. REP. 109-14, 42, 2005  
11 U.S.C.C.A.N. 3, 40 (2005) (noting that CAFA intended to adopt either viewpoint rule). Thus, the  
12 amount in controversy "requirement is satisfied if either party can gain or lose the jurisdictional  
13 amount." *Sanchez v. Monumental Life Ins. Co.*, 102 F.3d 398, 405 (9th Cir. 1996).

14 In determining whether the removal jurisdiction requirements are met, the court may  
15 consider evidence submitted subsequent to the notice of removal, including evidence submitted in  
16 conjunction with an opposition to a motion to remand. *Cohn v. Petsmart, Inc.*, 281 F.3d 837,  
17 840 n.1 (9th Cir. 2002).

18 If the Court finds that Google has met its "more likely than not" burden in this Opposition,  
19 "it then becomes plaintiff's burden to show, *as a matter of law*, that it is *certain* [she] will not  
20 recover the jurisdictional amount." *Kenneth Rothschild Trust*, 199 F. Supp. 2d at 1001.

21 With that legal backdrop in mind, we next review the allegations of the Complaint, as well  
22 as supplemental factual material, which demonstrates by at least a preponderance of the evidence  
23 that the amount in controversy here satisfies CAFA.

24  
25  
26 services." Motion at 2:10-18. In other words, Plaintiff contends Google can only defeat the remand  
27 motion by (a) conceding the merits of Plaintiff's claims; and (b) producing the evidence Plaintiff requires  
28 to make out her case. This, of course, is not what the law requires. As noted, the law simply assumes for  
the sake of argument that Plaintiff's claims have merit, and call on the defendant resisting remand to show  
only by a preponderance of the evidence that the potential damages in such circumstances *could* (not  
would) exceed \$5 million. *See Muniz*, 2007 WL 1302504, \*2.

OHS West:260495622.3

1     **III.     STATEMENT OF RELEVANT FACTS**

2             **A.     The Complaint.**

3             As noted above, for purposes of measuring the amount in controversy in a remand motion,  
4     the court must assume the allegations of the complaint are true. *Kenneth Rothschild Trust*, 199 F.  
5     Supp. 2d at 1001. The gravamen of the Complaint is that Google allegedly permitted third parties  
6     to advertise deceptive cell phone subscription services through its “AdWords” program in  
7     violation of corporate advertising policies which should have foreclosed the advertisements  
8     altogether. Compl. ¶¶ 13, 26. More specifically, Plaintiff claims she and other members of the  
9     proposed class were victimized by the so-called Fraudulent Mobile Subscription Services’ Google  
10    ads; clicking on ads for, e.g., free ring tones, they provided their cell phone numbers to the  
11    advertisers, only to discover thereafter that they were being charged \$9.99 per month by the  
12    service provider or mobile telephone company. *Id.*, ¶¶ 33-39. Plaintiff does not allege that she  
13    purchased anything from Google, that Google imposed unauthorized charges upon her, or that  
14    Google sold her some service or product she did not want. *Id.*, ¶ 13-29. Instead, she has  
15    attempted to connect Google to the alleged wrongdoing by mobile content providers by  
16    contending that Google knew or had reason to know that some of its advertisers were not in  
17    compliance with its AdWords program terms and that such non-compliance resulted in her being  
18    charged without authorization by third-parties such as Verizon, Sprint and other cellular  
19    providers. *Id.*, ¶¶ 29, 37, Ex. B.

20            On these facts, Plaintiff alleges class claims for Violation of the California Unfair  
21    Competition Law, Breach of Contract, Negligence and Aiding and Abetting others’ violations of  
22    the Computer Fraud and Abuse Act and California’s Unfair Competition Law.

23            The allegations in the Complaint relevant to assessing the amount in controversy are  
24    these:

- 25            • “Defendant Google, Inc. operates the most widely-used Internet search engine in the  
26            world. Google’s search engine is a top Internet destination, and Google claims  
27            publicly that it maintains the largest, most comprehensive index of websites and other  
28            online content. Google generates revenue primarily by online advertising.” *Id.*, ¶ 2.

- 1 • “A portion of Google’s top 250 AdWords customers who are mobile content  
2 purveyors utilize landing pages that are not in compliance with Google’s Advertising  
3 Program Terms.” *Id.*, ¶ 29.
- 4 • “[M]any if not all of the Fraudulent Mobile Subscription Services[’] monthly or  
5 periodic payments to Google for the AdWords services exceed \$10,000.” *Id.*, ¶ 54.
- 6 • Plaintiff identifies seven mobile subscription service advertisers in Exhibit B to the  
7 Complaint, which she characterizes as examples, not an exhaustive list. *Id.*, ¶ 36, Ex.  
8 B.
- 9 • Plaintiff prays for relief on behalf of the proposed class in the form of equitable and  
10 injunctive relief “including a constructive trust, an accounting, and an injunction  
11 prohibiting the continued unlawful business practices,” damages, “restitution and  
12 disgorgement of all ill-gotten gains,” and attorneys’ fees and costs. *Id.*, ¶ 18.

13 Taken together, these allegations support federal jurisdiction under CAFA. Accepting  
14 Plaintiff’s allegations as true, and assuming liability will result, Google could be required to  
15 disgorge revenues received from the fraudulent mobile subscription services advertisers at the  
16 rate of \$10,000 per month per advertiser throughout the period covered by the Complaint (in this  
17 case, the four-year statute of limitations period for the Unfair Competition Law claim). Thus, for  
18 each advertiser, Google allegedly collected \$10,000 x 12 months/year x 4 years, or \$480,000.  
19 Plaintiff has already alleged the identities of seven such advertisers, bringing the alleged total  
20 amount of potential disgorgement to \$3,360,000. Plaintiff also alleges, however, that those seven  
21 advertisers are a mere sampling from a group of as many as 250 Google advertisers engaged in  
22 the alleged fraud. If we accept Plaintiff’s allegations as true, Plaintiff need only show that eleven  
23 Google advertisers are engaged in the alleged fraud to cross the \$5 million CAFA amount in  
24 controversy threshold.<sup>8</sup>

25 **B. Plaintiff’s Counsel’s Other Class Actions and Google’s Revenues.**

26 The Court may also consider evidence beyond the allegations of the Complaint in

27  
28 <sup>8</sup> \$5,000,000 ÷ \$480,000 = 10.417. Eleven advertisers would thus put Plaintiff’s disgorgement claim over \$5 million.

1 assessing the amount in controversy. *Cohn*, 281 F.3d at 840, n. 1. In this case, that other  
2 evidence includes: (a) Plaintiff's counsel's demands and recent track record in other class action  
3 litigation concerning mobile content providers; and (b) Google's own advertising revenue data.

4 **1. Other KamberEdelson Litigation.**

5 Together with its liaison counsel in the *McFerren v. AT&T Mobility* case, Plaintiff's  
6 counsel in this case has filed no fewer than 15 class action lawsuits in multiple jurisdictions  
7 nationwide, most against the leading cellular telephone companies (including AT&T Mobility  
8 and Verizon), against cellular telephone billing aggregators (the middlemen responsible for  
9 ensuring that mobile content charges reach customers' cellular telephone bills), and against  
10 mobile content companies that sell ring tones and other mobile services. See RJN, Ex. D  
11 (Declaration of Myles McGuire at ¶ 3). These "mobile content" lawsuits all seek damages and  
12 restitution for allegedly unauthorized charges imposed by mobile service content providers  
13 through consumer cellular telephone bills. The challenged practices include the recycling of  
14 "dirty numbers" (a practice by which cellular telephone numbers are passed to new subscribers,  
15 along with the costs of any mobile subscription services subscribed to by the telephone number's  
16 prior owner), the sale of mobile subscription services to minors, and solicitation by allegedly  
17 deceptive websites that promise free ring tones, wallpaper, games, horoscopes and similar  
18 services.

19 As broadly-stated as these lawsuits may be, they are actually more limited in reach than  
20 the case against Google, which potentially includes as a class member *every* mobile device user in  
21 America who also uses the internet. Moreover, the cases are also potentially overlapping, since a  
22 recovery by, e.g., an AT&T cellular subscriber for injuries resulting from being charged  
23 improperly for a free ring tone subscription cannot be duplicated in a recovery from Google.  
24 Thus, while the *named* Plaintiffs may differ from one KamberEdelson lawsuit to the next, the  
25 proposed classes appear to have substantial common membership.

26 Given the commonality among the putative real parties in interest, the other  
27 KamberEdelson litigation is appropriately considered here in evaluating whether the CAFA  
28 amount in controversy requirement is met. In the *McFerren* action, plaintiffs alleged that AT&T

OHS West:260495622.3

1 Mobility had included charges for mobile content on its consumers' cellular telephone bills  
2 without their authorization. The parties have reached a tentative settlement of that matter which,  
3 if approved, will reimburse a class of "tens of millions" of consumers and will award Class  
4 Counsel, including KamberEdelson, \$4.3 million in attorneys' fees. See RJN, Ex. A at 6, 11, 18.  
5 A second settlement, with billing aggregator Mobile Messenger Americas, Inc., provides for a  
6 settlement fund of \$12 million and a fee award of \$1,225,000 (again, to the same lawyers). *Gray*  
7 *v. Mobile Messenger Americas, Inc.*, Case No. 88-61089 (CMA) (S.D. Fl. Aug. 5, 2008). See  
8 RJN, Ex. B at 6, 12, 27.<sup>9</sup> To the extent these cases represent subsets of the litigation against  
9 Google, these proposed settlements dispel any doubt about the amount in controversy in this case.  
10 See, e.g., *Cohn*, 281 F.3d 837 at 840 (holding a "settlement letter relevant evidence of amount in  
11 controversy if it appears to reflect a reasonable estimate of the plaintiff's claim").

12 Further illustrating the amount at stake in mobile content litigation (particularly that  
13 originating from popular online websites such as Google) is a recent settlement in *Abrams v.*  
14 *Facebook, Inc.*, No. 07-05378 (PVT) (N.D. Cal.). Abrams's suit—brought, once again, by the  
15 KamberEdelson firm—was a class action on behalf of cellular telephone users who received  
16 unauthorized text messages from Facebook because their phone numbers previously belonged to  
17 Facebooks users who had authorized such messages. Although Abrams settled that case just  
18 *three months* after filing, her attorneys' fee application demanded \$5,033,000, estimating that this  
19 figure reflected only "25% of the most conservative valuation of the settlement benefits." RJN,  
20 Ex. C at 2 (Abrams' Application for Attorneys' Fees). Abrams stated that her request could have  
21 been as high as \$14.3 million dollars but that, "in keeping with ... [her] cautious temperament,"

22 <sup>9</sup> Plaintiff may contend that these settlements eliminate a subsection of the putative class and therefore  
23 reduce the amount in controversy against Google. The relevant inquiry, however, is "what amount is 'put  
24 in controversy' by the plaintiff's complaint, not what a defendant will *actually* owe." *Muniz*, 2007 WL  
25 1302504 at \*3 (emphasis in original). Moreover, the amount in controversy is measured "at the instant of  
26 removal," not thereafter. *Kenneth Rothschild Trust*, 199 F. Supp. 2d at 1001. Furthermore, the AT&T  
27 Mobility settlement is only tentative and has not yet been approved. See RJN, Ex. G (AT&T Docket at 1).  
28 Accordingly, AT&T Mobility customers remain members of the putative class for purposes of determining  
the amount in controversy here. These settlements cover only a portion of the mobile market and mobile  
consumers, e.g., AT&T Mobility represents only about 27.1 percent of the mobile market. See RJN, Ex. J  
(USA Today Article, May 23, 2007 at 1). Even if the AT&T Mobility settlement is approved, the majority  
of cellular consumers are potential class members in this action (including customers of other wireless  
carriers, such as Verizon, Sprint and T-Mobile).

1 she reduced her request to a “conservative” \$5 million. *Id.* at 13:8-15.

2 **2. Google Revenue Data.**

3 Having brought suits against defendants actually involved in selling, distributing, or  
4 billing for mobile content, Plaintiff’s counsel has now (unjustifiably) targeted Google. Google’s  
5 primary source of revenue is its online advertising programs, including Google AdWords, an  
6 auction-based advertising program that lets advertisers deliver relevant ads targeted to search  
7 queries or web content across Google sites and through the Google Network. RJN, Ex. E (2007  
8 10-K at 39-42). Google’s revenue from its advertising programs was more than \$16 billion in  
9 2007 and reached \$5 billion in the first quarter of 2008. RJN, Ex. E (2007 10-K at 44); RJN, Ex.  
10 F (May 12, 2008 10-Q at 24).

11  
12  
13 **REDACTED**  
14  
15  
16

17 Although Google’s relationship with the mobile content industry is by far the most  
18 attenuated compared with the defendants in the other actions, the class at issue in this litigation  
19 promises to be one of the largest in size, involving the customers of every cellular service  
20 provider and aggregator in the United States, and any mobile subscription service that uses the  
21 Internet to advertise. Compl. ¶ 40 (defining class without limitation by any mobile carrier).  
22 Plaintiff acknowledges that the market for mobile subscription services and mobile content is an  
23 expanding market that has grown in recent years “to a multi-billion dollar marketplace.” Compl.  
24 ¶ 8. Nielsen Mobile, the leading provider of consumer research for the telecom and mobile media  
25 markets, calculated that the U.S. market for premium mobile content resulted in total revenues of  
26 \$273 million for the first quarter of 2007.<sup>10</sup> Assuming straight-line growth since 2007, the annual

27  
28 <sup>10</sup> See RJN, Ex. K (Nielsen Mobile Press Release at 1).

1 market for mobile content is more than \$1.1 billion. Even if only the two most recent years are  
2 taken into account, the market data strongly suggest that hundreds of millions of dollars are at  
3 stake. If five percent of that market is the result of unauthorized charges, more than \$100 million  
4 is implicated over two years. If only one-quarter of one percent of the \$2.2 billion in revenue was  
5 the result of unauthorized charges imposed by mobile content providers who were reached via a  
6 Google AdWords advertisement—a tiny fraction given Plaintiff’s allegation that Google is “the  
7 most widely-used Internet search engine in the world”—the jurisdictional minimum would be  
8 satisfied.<sup>11</sup>

9 **IV. THE PREPONDERANCE OF THE EVIDENCE DEMONSTRATES THAT THE**  
10 **AMOUNT IN CONTROVERSY EXCEEDS THE CAFA MINIMUM**

11 **A. Equitable Recovery**

12 Despite Plaintiff’s efforts to conceal the amount at stake in this litigation, the Complaint,  
13 taken on its face, alleges an amount in controversy sufficiently in excess of the jurisdictional  
14 minimum.<sup>12</sup> Reasonably construed, the Complaint demands disgorgement and restitution of all  
15 revenue Google received from all of the allegedly fraudulent mobile subscription services,  
16 defined as all of Google’s largest 250 mobile content advertisers that “utilize a landing page that  
17 is not in compliance with Google’s Advertising Program Terms.”<sup>13</sup> Compl. ¶ 29. With its four-  
18 year statute of limitations, Plaintiff’s Business and Professions Code Section 17200 claim places

19  
20 <sup>11</sup>  $\$2,200,000,000 \times 0.0025 = \$5,500,000$ .

21 <sup>12</sup> Plaintiff is correct that the Complaint’s “Prayer for Relief” does not allege an exact amount in  
22 controversy. However, the Court is not limited to an examination of the specific prayer, but may look to  
23 the entirety of the allegations asserted by plaintiff to determine if the complaint “on its face” alleges a  
24 sufficient amount. *Guglielmino*, 506 F.3d at 699; *Kenneth Rothschild Trust*, 199 F. Supp. 2d at 1001.

25 <sup>13</sup> Because Plaintiff’s definition of “fraudulent” includes actions that do not actually amount to fraud, the  
26 number of mobile content advertisers at issue is considerably larger than it would be if limited only to  
27 those who committed legal fraud. Google’s Advertising Program Terms are detailed and particular. As  
28 alleged by Plaintiff, such terms include, for example, that mobile content service advertisers “clearly and  
accurately display[] price, subscription and cancellation information,” “prominently display identification  
of the service as a subscription, the price of the service, and the billing interval,” “provide an opt-in  
checkbox or other clear mechanism on the first page where users enter personal data,” and “display  
cancellation information” on the ad’s landing page. Compl. ¶ 22 (quoting Google’s Content Policy).  
Plaintiff’s complaint contends that any lack of compliance with these terms by mobile subscription service  
customers subjects Google to possible disgorgement.

1 into controversy all such revenue since April 30, 2004.<sup>14</sup>

2 Plaintiff alleges that a portion of Google's mobile content advertisers are so-called  
3 "Fraudulent Mobile Subscription Services" because they do not comply with Google's  
4 Advertising Program Terms and that "many, if not all," of these advertisers pay Google at least  
5 \$10,000 a month in revenue. Compl. ¶¶ 29, 54. If Plaintiff's allegations are accepted as true,  
6 which they must be for this limited purpose, it takes only eleven of these advertisers to surmount  
7 the jurisdictional hurdle (\$120,000 per year x 11 advertisers x 4 years = \$5,280,000). Given that  
8 Plaintiff identified seven advertisers that she claims are not in compliance with Google's  
9 Advertising Program Terms (*id.*, Ex. B), it is a reasonable inference that an additional four of the  
10 thousands of Google advertisers fail Plaintiff's test.

11 The large number of Google "ring tone" advertisers and the substantial revenue generated  
12 by such advertisers supports this conclusion.

13  
14 **REDACTED**

15 This evidence, which only  
16 represents a fraction of the advertisements placed at issue by Plaintiff, demonstrates that it is  
17 more likely than not that Plaintiff's disgorgement and restitution claims surmount the  
18 jurisdictional threshold.

19 **B. Compensatory Damages**

20 Plaintiff also demands compensatory damages in the amount of all charges paid by  
21 putative class members for unauthorized mobile content services. *Id.*, ¶¶ 64 -5. Plaintiff alleges  
22 that each class member paid "amounts not less than \$9.99" in unauthorized fees (*id.*, ¶ 39), and  
23 contends that Google is liable for such damages under a third-party beneficiary breach of contract  
24 theory. *Id.*, ¶¶ 60-65.

25 The putative class consists of all persons and entities that "suffered damages as a result of

26 <sup>14</sup> Google does not concede that this is an accurate calculation. But for present purposes, all that is relevant  
27 is that Plaintiff *alleges* that all or nearly all revenue from a "fraudulent mobile subscription service" is  
28 "derived from a 'specific unlawful activity,'" Compl. ¶ 53, and that all acceptance of such revenue is  
therefore "unfair competition" subject to disgorgement under California Business and Professions Code §  
17200, *et seq.*

OHS West:260495622.3

1 clicking on a Google AdWords advertisement for mobile subscription services which linked to a  
2 Fraudulent Mobile Subscription Services website.” *Id.*, ¶ 40. A reasonable estimate of the  
3 putative plaintiff class size, based on plaintiff’s counsel’s allegations in this and previous cases  
4 (which Google does not concede are accurate), number in the tens of millions. *See* RJN, Ex. H  
5 (CTIA Wireless Quick Fact at 1) (255.4 million users of mobile subscriptions services in the  
6 United States); RJN, Ex. A (AT&T Mobility settlement memorandum at 16, n. 7; stating that  
7 more than 70 million AT&T Mobility subscribers will be provided with class notice). Indeed,  
8 Plaintiff’s counsel has estimated that there are “tens of millions” of putative class members in the  
9 AT&T Mobility class *alone*, a class which, by its own definition, overlaps with the putative class  
10 in this case. *See* RJN, Ex. A (AT&T Mobility settlement memorandum at 18). If the allegedly  
11 aggrieved customers of *all* cellular providers are factored into counsel’s calculation (Verizon,  
12 Cingular, Sprint/Nextel, and T-Mobile, for example), the number of consumers nationwide likely  
13 exceeds 50 million. *See* RJN, Exs. I, J (AT&T market share of 27%). Plaintiff herself attributes  
14 (albeit mistakenly) a significant portion of the claimed injuries of this overall class to consumers’  
15 contact with Google ads. Compl. ¶ 13 (“Absent advertising through Google, the fraudulent  
16 mobile subscription services would have significantly fewer visitors to their websites and their  
17 illegal revenues would drop dramatically.”). It will take only a very small fraction of the overall  
18 class to place \$ 5 million in controversy in the case against Google (500,000 x \$10 = \$5 million).  
19 Plaintiff’s counsel’s familiarity with the size of the allegedly aggrieved class should be given  
20 substantial weight by the Court in its analysis of the amount in controversy (particularly since  
21 there is no way Google could ascertain with certainty how many consumers have been charged  
22 for mobile content without their authorization). This data demonstrates that it is more likely than  
23 not that Plaintiff has breached the CAFA threshold.

### 24 C. Attorneys’ Fees.

25 The amount in controversy in this matter also includes a reasonable estimate of attorney  
26 fees Plaintiff may be entitled to recover in this litigation. In the Ninth Circuit, “where an  
27 underlying statute authorizes an award of attorneys’ fees, either with mandatory or discretionary  
28 language, such fees may be included in the amount in controversy.” *Lowdermilk v. United States*

1 *Bank Natl. Ass'n*, 479 F.3d 994, 1000 (9th Cir. 2007) (including aggregated attorneys' fees to  
2 calculate amount in controversy in CAFA case but remanding because amount in controversy was  
3 specified in complaint) (quoting *Galt G/S v. JSS Scandinavia*, 142 F.3d 1150, 1155-56 (9th Cir.  
4 1998) (holding that potential for discretionary award of fees under California Code of Civil  
5 Procedure § 1021.5 should be included as part of the amount in controversy)). Courts look to  
6 state law "to determine whether attorneys' fees are statutorily authorized." *Id.*

7 In calculating the attorneys' fees to factor into the amount in controversy, fees should be  
8 projected through the termination of the suit since "a reasonable estimate of fees likely to be  
9 incurred to resolution is part of the benefit permissibly sought by the plaintiff and thus contributes  
10 to the amount in controversy." *Brady v. Mercedes-Benz USA, Inc.*, 243 F. Supp. 2d 1004, 1011  
11 (N.D. Cal. 2002). In other words, just as a plaintiff's entitlement to damages and future costs is  
12 projected for purposes of calculating the amount in controversy, [t]he measure of fees should be  
13 the amount that can reasonably be anticipated at the time of removal, not merely those already  
14 incurred." *Simmons v. PCR Technology*, 209 F. Supp. 2d 1029, 1034-35 (N.D. Cal. 2002)  
15 ("Thus, the Ninth Circuit must have anticipated that district courts would project fees beyond  
16 removal."); *but see Faulkner v. Astro-Med, Inc.*, No. C 99-2562 SI, 1999 WL 820198 (N.D. Cal.  
17 Oct. 4, 1999) (explicitly distinguished by *Brady* and *Simmons*).

18 The amount of attorneys' fees that Plaintiffs' counsel could demand after trial in this  
19 matter can be reasonably extrapolated from the fees they have already sought and/or obtained in  
20 similar cases. Both the *McFerren* and the *Gray* settlements resulted in substantial sums to be paid  
21 to plaintiffs' counsel: \$4.3 million in the *McFerren* case and \$1.225 million in the *Gray* case. *See*  
22 *RJN*, Ex. A at 6, 11 ; Ex. B at 6, 12, 27. Notably, these cases were settled *before* any discovery or  
23 trial. Similarly, KamberEdelson's settlement and demand for attorneys' fees of more than \$5  
24 million in the Facebook case before any discovery or motion practice, let alone trial, is substantial  
25 evidence that Plaintiff and her attorneys are eyeing more than that in this case. It is reasonable to  
26 infer that plaintiffs demanded more attorneys' fees than ultimately obtained through a  
27 compromise settlement and that these same attorneys will demand even more from Google in the  
28 event they were to prevail after trial. *See MBNA America Bank v. Gorman*, 147 Cal. App. 4th

OHS West:260495622.3

1 Supp. 1, 12 (Cal. App. 2006) (quoting *Serrano v. Priest*, 20 Cal. 3d 25, 48 (1997)) (allowing fee  
2 awards to be calculated using the lodestar method and through application of a multiplier  
3 depending upon the complexity of the issues involved); *Vizcaino v. Microsoft Corp.*, 290 F.3d  
4 1043, 1047 (9th Cir. 2002) (recognizing a benchmark fee award of 25%).

5 **V. PLAINTIFF'S REMAND MOTION RELIES ON IRRELEVANT AUTHORITIES.**

6 In support of her motion to remand, Plaintiff cites three mobile content cases in which the  
7 district court remanded the action back to state court. See Remand Motion at 6-8. Plaintiff's  
8 reliance on these cases is misplaced. Each is readily distinguished, involving removal by only a  
9 single cellular telephone service defendant and a putative class limited to residents of a single  
10 state. Moreover, none of these cases demand both disgorgement *and* damages as Plaintiff does  
11 here. See Remand Motion Ex. B (*Gray v. Cellco Partnership*, Order on Motion to Remand at 2  
12 (defining class "consisting of all Verizon wireless telephone subscribers in Florida who suffered  
13 losses or damages . . .")); *Id.* Ex. A (*Paluzzi v. Cellco Partnership*, Order at 2 (considering  
14 Verizon's "evidence of its 400,000 wireless customers in Illinois")); *Fiddler v. AT&T Mobility*,  
15 *LLC*, 2008 WL 2130436, No. 08 C 416 (N.D. Ill. May 20, 2008) (noting that "the amount Fiddler  
16 seeks to recover against M-Qube consists of a substantial portion of the retail value of the content  
17 provided to Illinois customers"). None of those trial courts had before it the facts available here,  
18 facts that plainly make apparent the stakes of mobile content litigation: the \$4.3 million attorney  
19 fee provision in the *McFerren* settlement and over "tens of millions" of AT&T class members or  
20 the \$12 million settlement fund and \$1.2 million fee award by Mobile Messenger in the *Gray*  
21 litigation. Plaintiff's suggestion that the *Gray* case supports a remand of its case against Google  
22 is particularly disingenuous. Only five weeks after it filed its motion to remand here, Plaintiff's  
23 counsel settled that case against only *one* of the named defendants (Mobile Messenger) on behalf  
24 of the impacted consumers for amounts well in excess of the jurisdictional minimum. See RJN,  
25 Ex. B (*Gray* settlement agreement at 6, 12, 27).<sup>15</sup> The very large sums at issue in these related

26 <sup>15</sup> Notably, Judge Gettleman in the *Paluzzi* case followed a Northern District of Illinois District Court case  
27 in holding that the amount of attorneys' fees to be considered in the removal calculus was the "amount of  
28 fees incurred at the time jurisdiction is invoked." Remand Motion, Ex. A at 3. The Northern District of  
California has adopted a different rule and considers what fees will be at issue at the conclusion of the  
litigation. *Brady*, 243 F. Supp. 2d at 1011; *Simmons*, 209 F. Supp. 2d at 1034-35.

1 cases is persuasive evidence that the case asserted by Plaintiff against Google, involving a  
2 putative nationwide class of customers of *all* cellular services (Verizon, T-Mobile, AT&T,  
3 Sprint/Nextel, to name a few) from *all* fifty states, presents an amount in controversy clearly in  
4 excess of \$5 million.

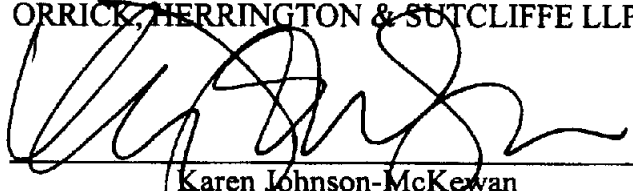

5 **VI. CONCLUSION**

6 As discussed above, Plaintiff's complaint demands (1) restitution and disgorgement of all  
7 "ill-gotten gains" since April 30, 2004, from the largest mobile content advertisers whose landing  
8 pages did not fully comply with Google's Advertising Program Terms; (2) damages for every  
9 individual nationwide who was charged without authorization by a mobile content service located  
10 through Google AdWords; (3) an injunction to prohibit future revenue from such advertisers; and  
11 (4) attorneys' fees for costs of litigating a nationwide class action. The weight of the evidence  
12 establishes that any one of these demands, in isolation, exceeds the \$5 million jurisdictional  
13 threshold. Taken together, it is certain (let alone "more likely than not") that the amount in  
14 controversy exceeds the CAFA threshold.

15 The Court should not reward Plaintiff's artful (but transparent), attempt to avoid federal  
16 jurisdiction while maintaining her ability to seek more than \$5 million in relief, particularly when  
17 the threshold legal issue is whether federal law bars her claims. For the reasons set forth above,  
18 Google respectfully requests the Court deny Plaintiff's motion to remand.
