Administrative Law Judge in U.S. International Trade Commission Issues Initial Determination that MediaTek's Chips Do Not Infringe Zoran and Oak '736 And '440 Patents; Certain MediaTek Old Model Chips Found to Infringe '527 Patent

MediaTek to Appeal Initial Ruling

Hsinchu, Taiwan, May 17, 2005 – On May 16, 2005, Administrative Law Judge (ALJ) Paul J. Luckern in the United States International Trade Commission (the "ITC") issued an initial determination that MediaTek's chipsets do not infringe two patents (U.S. Patent No. 6,466,736 ("the '736 patent") and U.S. Patent No. 6,546,440 ("the '440 patent")), which had been asserted against MediaTek by Zoran Corporation and Oak Technology, Inc. (collectively, "Zoran"). However, ALJ Paul J. Luckern also preliminarily found that although a few MediaTek's old model chipsets do not infringe on 2 of Zoran's Claims in relation to its U.S. Patent No. 6,584,527 ("the '527 patent"), they infringe Claim No. 3 of the '527 patent,

The finding only concerns certain MediaTek's old model chips. MediaTek has already developed a design-around solution that is specifically crafted to avoid infringement of Zoran's '527 patent. The design-around solution was carefully developed with thorough input from several teams of U.S. patent counsels whom have concluded that the new design does not infringe upon Zoran's patent. Additionally, Zoran and MediaTek have mutually agreed that the design-around chips are not within the scope of this investigation. As such, these new generation chipsets will not be affected by the result of this investigation. MediaTek has already provided its customers with the new generation chipsets to ensure that customers will have an uninterrupted supply.

MediaTek will appeal the initial determination on the infringement of Claim 3 of the '527 patent to the full ITC, asking for a review of this matter. The ITC's schedule anticipates a final resolution by September 2005. MediaTek believe that it has excellent invalidity and noninfringement defenses on Zoran's '527 patent and will immediately and vigorously pursue on appeal to the full ITC of this matter.

In addition, with respect to the patent infringement case MediaTek filed against Zoran in the ITC, the case is moving along smoothly and a hearing is scheduled on
