Second Supplemental Information Disclosure Statement

Assistant Commissioner for Patents
Washington, DC 20231

Sir:

Listed on accompanying Form PTO-1449 are documents that may be considered material to the examination of this application, in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.56, 1.97 and 1.98. The numbering on this Second Supplemental Information Disclosure Statement is a continuation of the numbering in Applicants' First Information Disclosure Statement filed on February 10, 1999, in connection with the above-captioned application.

Where the publication date of a listed document does not provide a month of publication, the year of publication of the listed document is sufficiently earlier than the effective U.S. filing date and any foreign priority date so that the month of publication is not in issue. Applicants have listed publication dates on the attached PTO-1449 based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Remarks

Reconsideration of this Application is respectfully requested.

Upon entry of the foregoing amendment, claims 33-75 are pending in the application, with 33, 50 and 60 being the independent claims. New claims 60-75 are sought to be added.

These changes are believed to introduce no new matter, and their entry is respectfully requested.

Based on the above amendment and the following Remarks, Applicants respectfully request that the examiner reconsider all outstanding objections and rejections and they be withdrawn.

Rejections Under 35 U.S.C. §102

The Examiner has rejected claims 33-37 and 41-49 under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent No. 5,130,792 to Tindell *et al.* ("the Tindell patent,"). Applicants believe the Examiner has misinterpreted the claim element of "identification encoder." In the application, the "identification encoder" is in data communication with a compressed data library and the identification encoder gives items in the compressed data library a unique identification code." See application page 22, ll. 3-14. The Examiner suggests that encoder 46 of the Tindell

09120452.072398

patent teaches such a function. *See* Office Action ¶ 5, line 4. However, encoder 46 functions to encrypt data and not to give a unique identification code. *See* the Tindell patent, col. 3, ll. 25-27. Applicants have amended claim 33 to more clearly define the function of the identification encoder of the present invention. Because of their dependence on independent claim 33, claims 34-38 and 41-49 are also allowable.

Moreover, with respect to claim 44, the receiver format converter is in data communication with a transceiver *in the reception system*. Such an element is not shown or disclosed in the Tindell patent. The Examiner suggests that elements 32 and 33 [*sic*] of the Tindell patent are analogous to Applicants' claimed format converter. *See* Office Action ¶ 5, line 7. The Tindell patent discloses elements 32 and 34 as being located in the Central Data Facility 10, and not in the reception system as claimed by the Applicants.

Other Matters

The Examiner has rejected claims 33-37 and 39-59 under the doctrine of obviousness-type double patenting over claims 1-27 of U.S. Patent No. 5,132,992. Applicants submit herewith a Terminal Disclaimer to Obviate a Double Patenting Rejection under 37 C.F.R. § 1.321(c). The filing of a terminal disclaimer to obviate a rejection based on nonstatutory double patenting is not an admission of the propriety of the rejection. *Quad Environmental Technologies Corp. v. Union Sanitary District*, 946 F.2d 870 (Fed. Cir. 1991) (the filing of a terminal disclaimer simply serves the statutory function of removing the rejection of double patenting, and raises neither a presumption nor an estoppel on the merits of the rejection); M.P.E.P. § 804.02.

09120452-072398
866220-25102160

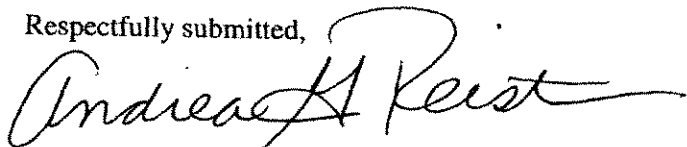

Applicants note with appreciation the Examiner's indication of allowable subject matter in claim 38. Accordingly, Applicants have added new claim 60 that incorporates the elements of original claims 33 and 38. Applicants have also added claims 61-74 that depend from new claim 60 and include the elements of claims 34-37 and 39-49. Because of their dependence on allowable claim 60, these claims are also allowable.

Conclusion

All of the stated grounds of objection and rejection have been properly traversed, accommodated, or rendered moot. Applicants therefore respectfully request that the Examiner reconsider all presently outstanding objections and rejections and that they be withdrawn. Applicants believe that a full and complete response has been made to the outstanding Office Action and, as such, the present application is in condition for allowance. If the Examiner believes, for any reason, that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at the number provided.

Prompt and favorable consideration of this Amendment is respectfully requested.

Art Unit: 2734

1. Claims 33-59 are pending in this application. This Office Action supersedes the Office Action mailed on 03/05/99 which did not take into consideration of the Preliminary Amendment filed on 2/10/99.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985), *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970), and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969)

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 33-37, 39-59 are rejected under the judicially created doctrine of double patenting over claims 1-27 of U. S. Patent No. 5,132,992 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matters.

Furthermore, there is no apparent reason why applicants were prevented from presenting claims corresponding to those of the instant application during prosecution of the application which

09120452.072398

Art Unit: 2734

matured into a patent. See *In re Schmeller*, 397 F 2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

5. Claims 33-37, 41-49 are rejected under 35 U.S.C. 102(e) as being anticipated by Tindell et al (submitted by Applicants, U.S. Patent no. 5,130,792)

Tindell et al's store and forward video system (Fig. 2, 3, 5-7) teaches the following claimed subject matters: "identification encoder" (46, or col. 3, lines 25-27); "compressed data library" (22); "transceiver" (col. 2, line 60-col. 3, line 3); "storage device" (76, 78); "user playback control" (72); "digital decompressor" (82); "playback device" (88, 126, col. 5, lines 55-58); "source material library" (24); "converter" (26); "compressor" (44); "format converter" (32, 33); "user request interface" (80, col. 2, line 60-col. 3, line 3); "output converter" (86, 88); "transmitter" (108).

Art Unit: 2734

1. Claims 1-9, 12-20 are pending in this application.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-9, 12-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9, 12-17, 19-21 respectively of U.S. Patent No. 5,132,992. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed limitations that differ from that of the patented are either covered by the patented claims or would have been obvious to one of ordinary skill in the art at the time of the invention to implement based on the teachings of the patented claims.

4. Claims 1 and 18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 or 14 and 2 or 5 respectively of U.S. Patent No.

09120452-002160

Art Unit: 2734

5,253,275. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed limitations that differ from that of the patented are either covered by the patented claims or would have been obvious to one of ordinary skill in the art at the time of the invention to implement based on the teachings of the patented claims.

5. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,550,863. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed limitations that differ from that of the patented are either covered by the patented claims or would have been obvious to one of ordinary skill in the art at the time of the invention to implement based on the teachings of the patented claims.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

06E240" 25402160

Art Unit: 2734

7. Claims 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Ballantyne et al. Ballantyne et al's distribution method (Fig. 1B) teaches the following claimed steps: "storing audio and video information" (element 32, col. 3, lines 59-61); "requesting transmission" (element 34); "sending at least a portion" (26); "receiving the sent information" (Fig. 2, 36); "buffering the received information" (38, col. 5, line 14); "playing back the buffered information" (col. 5, lines 45-48).
