

EXHIBIT 22

**Congratulations, you and your MacBook Pro
were made for each other.**

ELN1041762

Use the MacBook Pro trackpad to select and move items on the screen, just as you use a mouse with a desktop computer.

- To move the arrow pointer on the screen, slide one finger across the trackpad. Press the trackpad button to select, click, or double-click items.
- Drag two fingers on the trackpad to scroll.

For more information, choose Help > Mac Help and search for “trackpad.”

Step 4: Configure your MacBook Pro with Setup Assistant.

The first time you turn on your MacBook Pro, Setup Assistant starts. Setup Assistant helps you enter your Internet and email information and set up a user account on your MacBook Pro. If you already have a Mac, Setup Assistant can help you automatically transfer files, applications, and other information from your previous Mac.

If you don't intend to keep or use your other Mac, it's best to deauthorize it from playing music, videos, or audiobooks that you've purchased from the iTunes Store. Deauthorizing a computer prevents any songs, videos, or audiobooks you've purchased from being played by someone else and frees up another authorization for use. For information about deauthorizing, choose iTunes Help from the Help menu in iTunes.

If you don't use Setup Assistant to transfer information when you first start up, you can do it later using Migration Assistant. Go to the Applications folder, open Utilities, and double-click Migration Assistant.

**Power button**

Turn your MacBook Pro on and off, or put it to sleep.

Trackpad and trackpad button

Move the pointer on the MacBook Pro display with one finger on the trackpad, or scroll with two fingers. Press the trackpad button to click or double-click.

Slot-loading SuperDrive

This optical drive reads and writes to standard-size CDs and DVDs.

Display release button

Push to release the display and open your MacBook Pro.

Sleep indicator light

A white light pulses when the MacBook Pro is in sleep.

Battery

Run your MacBook Pro using battery power when you are away from a power outlet.
