

EXHIBIT 12

**Congratulations, you and your MacBook
were made for each other.**

ELN1040807

Note: Your MacBook also comes with AirPort Extreme technology for wireless networking. For information about setting up a wireless connection, in the menu bar, choose Help > Mac Help, and then choose Library > AirPort Help. See “Getting Answers” on page 28.

Step 3: Press the power (⏻) button briefly to turn on your MacBook.
You hear a tone when you turn on the computer.

It takes the computer a few moments to start up. After it starts up, Setup Assistant opens automatically.

If your computer doesn't turn on, see “If your MacBook doesn't turn on or start up” on page 44.

Use the MacBook trackpad to select and move items on the screen, just as you use a mouse with a desktop computer.

- To move the arrow pointer on the screen, slide one finger across the trackpad. Press the trackpad button to select, click, or double-click items.
- Drag two fingers on the trackpad to scroll.

For more information, choose Help > Mac Help and search for “trackpad.”

Step 4: Configure your MacBook with Setup Assistant.

The first time you turn on your MacBook, Setup Assistant starts. Setup Assistant helps you enter your Internet and email information and set up a user account on your MacBook. If you already have a Mac, Setup Assistant can help you automatically transfer files, applications, and other information from your previous Mac.

If you don't intend to keep or use your other Mac, it's best to deauthorize it from playing music, videos, or audiobooks that you've purchased from the iTunes Store. Deauthorizing a computer prevents any songs, videos, or audiobooks you've purchased from being played by someone else and frees up another authorization for use. For information about deauthorizing, in iTunes, open Help > iTunes Help.

If you don't use Setup Assistant to transfer information when you first start up, you can do it later using Migration Assistant. Go to the Applications folder, open Utilities, and double-click Migration Assistant.

Built-in microphone

Capture sounds directly with the microphone (located to the left of the iSight camera) or talk with friends live over broadband using the included iChat AV application.

Built-in iSight camera and camera indicator light

Videoconference with others using iChat AV, snap pictures with Photo Booth, or capture video with iMovie HD. The indicator light glows when the iSight camera is operating.

Built-in stereo speakers

Listen to music, movies, games, and multimedia files.

Battery

Run the MacBook using battery power when you are away from a power outlet. Removing the battery also gives you access to the memory in your MacBook.

Trackpad and trackpad button

Move the pointer with one finger on the trackpad, or scroll with two fingers. Tap the trackpad to click or double-click a selection.

Sleep indicator light

A white light pulses when the MacBook is in sleep.

Infrared (IR) receiver

Use your Apple Remote and the built-in IR receiver to control Front Row and Keynote on your MacBook from up to 30 feet away.

Slot-loading optical drive

Your optical drive can read CD and DVD discs and write to CDs. If you have a SuperDrive, you can also write to DVD discs.

**Power button**

Turn your MacBook on or off, or put it to sleep. Press and hold to restart your MacBook during troubleshooting.
