Retina display

The Retina display on iPod touch brings out the awesome in

iPod screen ever, with four times the pixel count of previous

iPod models. In fact, there are so many pixels, the human eye

can't distinguish individual ones. Which makes graphics and

images stunningly sharp, and text amazingly crisp. Just like

anything on it. That's because it's the highest-resolution

Learn more about Game Center >

It's time to make a game plan. The new Game Center app on iPod touch lets you add more players to your gaming network. Invite friends to join. Then totally dominate them. Take a look at how your score ranks against your friends and other players of each game. Compare game achievements with your friends. Put together a select group of friends to play with. Or

choose to automatically go up against people you don't know in a multiplayer game. So get in the game. And

Music With iPod touch, you don't just play your music. You hear it, and see it, in entirely different ways. Let Genius search your library and automatically create a mix just for you. Or give Genius playlist a go, and Genius will use a song you really love to find other tracks from your library that go great with it. You can also view album art in Cover Flow. Or shake to shuffle for a fresh take on your music library. Learn more about music > Pod € 9:41 AM
