1 any other applicable privilege or immunity recognized by statute or case law.

2 2. TechCrunch objects to each interrogatory to the extent that it seeks information protected by 3 a constitutional right of privacy or applicable privacy law.

4 3. TechCrunch objects to each interrogatory to the extent that it seeks information not 5 reasonably related to the claims or defenses in this matter.

4. TechCrunch objects to each interrogatory, and the instructions contained therein, to the extent they purport to impose any requirement or discovery obligation on TechCrunch other than those set forth in the Federal Rules of Civil Procedure and the applicable rules of this Court.

5. TechCrunch responds to the interrogatories with information of which it is now aware and reserves the right to modify or amend its responses if and when it becomes aware of information not reflected in its responses.

## **RESPONSE TO SPECIAL INTERROGATORIES**

## SPECIAL INTERROGATORY NO. 1

Describe with particularity each and every "business idea" that YOU contend DEFENDANT misappropriated.

# **RESPONSE TO SPECIAL INTERROGATORY NO. 1**

17 TechCrunch objects that this interrogatory is overbroad and unduly burdensome and seeks 18 information outside the scope of permissible discovery because it seeks information that is not relevant to the subject matter of this action and because it is not reasonably calculated to lead to the discovery of admissible evidence. TechCrunch further objects to this interrogatory as vague and ambiguous. TechCrunch also objects to the extent this interrogatory seeks information protected by the attorney-client privilege or the work product doctrine.

23 Without waiving and subject to TechCrunch's general and specific objections, TechCrunch 24 respond as follows:

25 Fusion Garage has appropriated for its own benefit the joint collaborative effort between 26 CrunchPad Inc. and Fusion Garage to develop the so-called "CrunchPad." The CrunchPad was 27 conceived by CrunchPad Inc.'s principal, Mr. Arrington, no later than July 2008, before CrunchPad

법화 있는 것이 지지가 지지 않는 것은 것을 했다.

Inc. came into existence. On July 21, 2008, Mr. Arrington described his business idea as "a dead 2 simple web tablet for \$200." He elaborated:

Here's The Plan

We'll organize a small team of people to spec this out. First is the marketing document that just outlines what the machine will do – we have a first draft of that already and will post it soon. Then we'll spec out the hardware and get people to help write the customized Linux and Firefox code. Once we've completed the design we'll start to work with the supply chain company to get an idea on the cost of the machine (the goal is \$200), and hopefully build a few prototypes. Anyone who contributes significantly to the project would get one of those first prototypes. If everything works well, we'd then open source the design and software and let anyone build one that wants to.

The goal is to keep the machine very simple and very cheap. I think this will be a lot of fun, and it may just turn into an actual product that we can use to surf the web and talk to our friends.

We'll be coordinating the project over at TechCrunchIT. Leave a comment there if you want to participate and we'll be in touch soon.

By August 30, 2008, TechCrunch had constructed its first prototype web tablet. Fusion Garage played no role in the development of that prototype. TechCrunch posted pictures and a description on the TechCrunch blog, referring to it as Prototype A. As Michael Arrington noted in the blog posting: TechCrunch was "still far from having beta units but there is now a team working on the project, and an incredible group of people and companies have reached out to us to help. We've learned a lot about building a hardware device over the last few weeks, and it's clear that it is quite possible to build a high performance web tablet in the price range we anticipated."

In September 2008 TechCrunch and CrunchPad recruited Louis Monier to lead the project to build the CrunchPad. Mr. Monier was the founder and former CTO of AltaVista and had held positions at eBay, Google, and other high-performance Web- or technology-focused companies. As Fusion Garage publicly acknowledged, it "worked closely with Louis Monier in getting the software in shape for the hardware prototype B. We continue to work with [CrunchPad and TechCrunch] in getting the software in shape to make crunchpad a easy to use device." All of the contributions of Mr. Monier and the other CrunchPad-affiliated individuals referenced in this Fusion Garage blog post constitute business ideas. Fusion Garage further conceded that "We continue to work with

Louis Monier on the feature set and the user experience. We are thrilled with this progress and would like to take the opportunity to thank Michael and Louis for giving us the opportunity to work with them on the Techcrunch Tablet." Mr. Monier made presentations to Google and others concerning the project in an effort to encourage interest, raise investment capital, and assist in the development effort. At the time, Fusion Garage acknowledged that it had never built hardware, but instead wanted to build software that Fusion Garage would license to mobile device creators for a fee. TechCrunch imparted its substantial knowledge of hardware design to Fusion Garage. All of these contributions to the feature set and user experience were business ideas that Fusion Garage has now sought to misappropriate for its private benefit. All of the contributions of Mr. Monier and the other CrunchPad-affiliated individuals referenced in Fusion Garage's January and February 2009 blog post were business ideas that have now been misappropriated by Fusion Garage and incorporated into Fusion Garage's ersatz "JooJoo" device.

In approximately April 2009 Mr. Rathakrishnan traveled to Palo Alto and remained in the Bay Area through the summer. During this period Mr. Rathakrishnan was hosted by TechCrunch's Keith Teare and, through Mr. Teare, introduced to multiple potential investors in the CrunchPad project. Potential investors contacted by TechCrunch during this period included Intel, Dell, HP, NVidia, The New York Times, LG, Merus Capital, Atlas Ventures, Ron Conway, and First Round Capital. During this same period, Mr. Rathakrishnan used TechCrunch's and CrunchPad's facilities and met with their in-house personnel to discuss the specific atom processor that would be used in the eventual CrunchPad device. Mr. Teare set up other funding and supplier meetings, including a meeting in Asia with LG that Mr. Rathakrishnan failed or refused to attend. Through Mr. Teare, Intel introduced Pegatron as the ODM for the CrunchPad project and made the initial introductions.

In Fall 2009, Fusion Garage flew most of its personnel to California to integrate the teams and to work with TechCrunch personnel on the CrunchPad at the TechCrunch facility in Palo Alto, California for an extended period. Specifically, the TechCrunch and Fusion Garage employees worked together on almost every component of the project. Particular objects of attention included screen visibility issues, touch screen performance issues, user interface issues, issues relating to "gestures" used for commands, and keyboard page design issues. All of these contributions

1 constitute business ideas that Fusion Garage misappropriated for its private benefit. The overall 2 conception, blueprint, guidance, and senior level support for the project emanated substantially from 3 TechCrunch. Specifically, the CrunchPad's design and specifications, performance characteristics 4 (including boot speed that Defendant prominently features in the advertising and promotion of its 5 JooJoo product), software architecture, hardware platform design and component sourcing, hardware 6 form factor and other designs, driver integration, application programming interface, user interface, and documentation all constitute business ideas conceived and developed by CrunchPad Inc. and misappropriated by Fusion Garage for its private benefit.

Winston & Strawn LLP 101 California Street an Francisco, CA 94111-5802

San

26

27

28

9 Plaintiffs, not Fusion Garage, came up with the original concept of the CrunchPad as a "dead 10 simple and dirt cheap touch screen web tablet to surf the web," which uses an iPhone-like touch 11 screen keyboard to input data and which loads directly to the web browser and uses a browser, in 12 effect, as an operating system. TechCrunch furnished to the joint project many of the 13 CrunchPad/JooJoo's design characteristics. The entire concept of the product derived from Michael 14 Arrington at Techcrunch, including the use of a large-screen touch-screen device; the function of 15 booting extremely rapidly and straight to a browser, the lack of a desktop, no hard drive other than 16 for the software footprint, and other aspects. Among the other detailed design ideas that 17 TechCrunch contributed to this joint project that were evident in the limited public display to date of 18 the JooJoo product are: (1) the use of a white instead of a black background to better display web 19 pages; (2) the use of large icons on the home screen so that users can quickly navigate to their 20 favorite web pages; (3) the use of video proxied directly to the device so that video can be played 21 without the use of a flash player; (4) the application programming interface, or API, with the 22 browser for custom applications; (5) the idea and know how for empowering the device to play 23 video output to a resolution of 1080p, also known as full high definition. TechCrunch also believes, 24 and therefore alleges, that Defendant's ersatz JooJoo product incorporates other, less visible, ideas 25 that TechCrunch furnished to Defendant in the course of their joint project as set forth above.

#### **SPECIAL INTERROGATORY NO. 2** 1

For each business idea that YOU identified in response to Interrogatory. No. 1, state all facts that support YOUR contention that such alleged "business idea" is protectable as intellectual property or otherwise.

# **RESPONSE TO SPECIAL INTERROGATORY NO. 2**

TechCrunch objects that this interrogatory is overbroad and unduly burdensome and seeks information outside the scope of permissible discovery because it seeks information that is not relevant to the subject matter of this action and because it is not reasonably calculated to lead to the discovery of admissible evidence. TechCrunch further objects to this interrogatory as vague and ambiguous. TechCrunch also objects to the extent this interrogatory seeks information protected by the attorney-client privilege or the work product doctrine, especially to the extent it calls for counsel's contentions and legal conclusions as to what business ideas are "protectable as intellectual property." A business idea need not be protectable as intellectual property to be protected against misappropriation.

Without waiving and subject to TechCrunch's general and specific objections, TechCrunch incorporates by reference its response to Interrogatory No. 1.

## **SPECIAL INTERROGATORY NO. 3**

IDENTIFY all DOCUMENTS that contain or memorialize every allegedly protectable business idea that YOU identified in response to Interrogatory No. 1.

# **RESPONSE TO SPECIAL INTERROGATORY NO. 3**

TechCrunch objects that this interrogatory is overbroad and unduly burdensome and seeks 21 information outside the scope of permissible discovery because it seeks information that is not 22 relevant to the subject matter of this action and because it is not reasonably calculated to lead to the 23 discovery of admissible evidence. TechCrunch further objects to this interrogatory as vague and 24 ambiguous. TechCrunch also objects to the extent this interrogatory seeks information protected by 25 the attorney-client privilege or the work product doctrine, especially to the extent it calls for counsel's contentions and legal conclusions as to what documents "contain or memorialize every allegedly protectable business idea" identified in Response Interrogatory No. 1.

We'll organize a small team of people to spec this out. First is the marketing document that just outlines what the machine will do – we have a first draft of that already and will post it soon. Then we'll spec out the hardware and get people to help write the customized Linux and Firefox code. Once we've completed the design we'll start to work with the supply chain company to get an idea on the cost of the machine (the goal is 200), and hopefully build a few prototypes.

A few months later Interserve, Inc. met with Fusion Garage, a Singapore software start-up. In late September 2008, the Interserve, Inc. and Fusion Garage agreed to collaborate on the project. Interserve, Inc. turned down several other companies that also expressed an interest in a collaboration. Two weeks later, CrunchPad Inc. was incorporated as an instrument of Interserve, Inc. to commercialize the product. This was a tremendous opportunity for Fusion Garage, an unknown Singaporean company, to work with TechCrunch, the most influential technology blog in Silicon Valley.

Plaintiffs worked hand-in-glove with Fusion Garage for the next 13 months. In a December 2008 email exchange, Plaintiffs' Louis Monier—an industry veteran who founded AltaVista and played key technology-development roles at eBay and Google—engaged in direct communications with Fusion Garage to help define the user interface, technical specifications, and software details for a working prototype assembled by Mr. Monier's team. Fusion Garage commented: "This is great news. Good to see the first signs of the baby :)." Plaintiffs and Fusion Garage jointly announced the birth of the "baby" in January 2009. The parties worked in close collaboration, mostly out of Plaintiffs' headquarters in Atherton, where Fusion Garage's CEO and software team worked for several months. Later public and private communications confirm the close and umbilical connection between the parties—each touting their shared vision, each praising the other's efforts, each clearly moving toward the same joint goal. Here is a sampling:

25 26

27

28

- TechCrunch blog post, January 19, 2009: "The software has been created by Fusion Garage, who continue to work with Louis on the feature set and user experience."
- Fusion Garage blog post, the same day: "It's our software running on the tablet ... We continue to work with Louis Monier on the feature set and the user experience. We ... would like to take the opportunity to thank Michael [Arrington] and Louis for giving us the opportunity to work with them on the TechCrunch Tablet."

- Fusion Garage blog post, February 2009: "the collaboration with the Crunchpad project happened as a result of meetings we had with Mike Arrington and co, subsequent to [TechCrunch50]. We worked closely with Louis Monier in getting the software in shape for the hardware prototype B. We continue to work with them in getting the software in shape to make crunchpad an easy to use device."
- TechCrunch blog post, April 2009: "we've continued to tinker with the project ... We did meet with Fusion Garage today to test out the most recent prototype (B.5)? ... The software stack is now entirely customized. ... This time the ID and hardware work was driven by Fusion Garage out of Singapore. ... All credit should go to Fusion Garage ... you need partners to actually make things happen, and the credit for what we saw today goes entirely to the Fusion Garage team. Those guys are rock stars."
- Fusion Garage tweet, May 2009: "just leaving techcrunch office, last to leave today and its memorial day."
- Fusion Garage tweet, June 2009: "CrunchPad Update, the launch prototype, we are excited working on this."
- TechCrunch blog post, June 2009: "Our partner Fusion Garage continues to drive the software forward ... Our vision of the user interface and the last version of the software stack ... The device boots directly into the browser,"
- Fusion Garage email, June 2009: "my suggestion is that we do a post, update new device pictures and at the same time announce that we will be having a press conference in july to unveil the device, do a demo etc."

The CrunchPad project had the typical ups and downs of start-up ventures. And Fusion Garage, in 16 particular, was constantly looking for money. Thus, throughout the joint venture, Plaintiffs advanced Fusion Garage money or paid Fusion Garage's bills. By the end of June of 2009, the 17 parties had agreed on the basic terms of their eventual plan to merge Fusion Garage into CrunchPad 18 Inc., with Fusion Garage receiving 35% of the merged company's stock. 19

Over the summer of 2009, the collaboration shifted to Asia. Plaintiffs' senior technologists 20 Brian Kindle (hardware) and Nik Cubrilovic (software) spent the bulk of August in Taiwan and 21 Singapore working with Fusion Garage on software, design, user interface issues, and with the 22 parties' jointly-selected manufacturer, Pegatron, on hardware and pricing. 23

There was significant friction during this period, and Plaintiffs seriously considered ending 24 the joint project. In response, on August 31, 2009, Fusion Garage's CEO begged Plaintiffs to 25 continue the partnership and promised to fly his entire team to the Bay Area to drive the CrunchPad 26 to completion: "Pls do not kill the project as yet. Pls hold off a week. ... I know how to deal with Pegatron and some of the challenges that we are currently facing. We can overcome these

challenges. ... If we decide to move forward and get the product launched at TC50 or separate press 1 2 event, then I will have my team to back me and get the product where it needs to be. ... So [a] team 3 of guys will fly with me." Relying on these representations, Plaintiffs sponsored business visas for 4 four of the Indian nationals on the project, and starting in September of 2009, Fusion Garage and Plaintiffs' personnel worked feverishly together out of Plaintiffs' offices to get the CrunchPad ready for launch.

As late as November 13, 2009 all seemed well, with Fusion Garage's CEO confirming that "we shd target the [November 20] event in sf" for the CrunchPad's public debut. But then, on November 17, 2009 — in an email that Defendant concedes "came out of the blue" — Fusion Garage aborted the partnership, asserting that it owned all intellectual property rights in the CrunchPad product and would manufacture and market the CrunchPad product on its own.

#### **SPECIAL INTERROGATORY NO. 9**

IDENTIFY all DOCUMENTS supporting YOUR contention that PLAINTIFF and DEFENDANT entered into a partnership or joint venture.

#### **RESPONSE TO SPECIAL INTERROGATORY NO. 9**

16 TechCrunch objects that this interrogatory is overbroad and unduly burdensome and seeks 17 information outside the scope of permissible discovery because it seeks information that is not 18 relevant to the subject matter of this action and because it is not reasonably calculated to lead to the 19 discovery of admissible evidence. TechCrunch further objects to this interrogatory as vague and 20 ambiguous. TechCrunch also objects that this interrogatory seeks information protected by the 21 attorney-client privilege or the work product doctrine, in that it calls for counsel's contentions 22 concerning the "partnership or joint venture" entered into between Fusion Garage, TechCrunch, and 23 CrunchPad.

#### 24 SUPPLEMENTAL RESPONSE TO SPECIAL INTERROGATORY NO. 9

25 TechCrunch objects that this interrogatory is overbroad and unduly burdensome and seeks 26 information outside the scope of permissible discovery because it seeks information that is not 27 relevant to the subject matter of this action and because it is not reasonably calculated to lead to the 28 discovery of admissible evidence. ambiguous. TechCrunch also objects that this interrogatory seeks information protected by the attorney-client privilege or the work product doctrine, in that it calls for counsel's contentions concerning the "partnership or joint venture" entered into between Fusion Garage, TechCrunch, and CrunchPad. TechCrunch further objects that this is a premature contention interrogatory Fusion Garage propounded it as part of expedited discovery preceding the Rule 26(f) conference in this case. The parties have only just begun their document productions. TechCrunch reserves the right to supplement or modify this response as the case progresses.

8 Without waiving and subject to TechCrunch's general and specific objections, TechCrunch 9 responds as follows: At this time, TechCrunch identifies all documents it has produced to date in 10 this case, including all documents attached as exhibits to the Complaint, the Arrington Declaration in support of Plaintiffs' preliminary injunction motion, the documents produced by Fusion Garage to date, and other pleadings in this case.

## **SPECIAL INTERROGATORY NO. 10**

IDENTIFY all persons affiliated with YOU who provided any allegedly protectable business ideas, trade secrets, or intellectual property to DEFENDANT.

# **RESPONSE TO SPECIAL INTERROGATORY NO. 10**

17 TechCrunch objects that this interrogatory is overbroad and unduly burdensome and seeks 18 information outside the scope of permissible discovery because it seeks information that is not 19 relevant to the subject matter of this action and because it is not reasonably calculated to lead to the 20 discovery of admissible evidence. TechCrunch objects to this interrogatory as vague and ambiguous 21 with respect to the phrase "allegedly protectable business ideas, trade secrets, or intellectual 22 property." TechCrunch also objects to the extent this interrogatory seeks information protected by 23 the attorney-client privilege or the work product doctrine, in that it calls for a legal conclusion and 24 for counsel's contentions concerning the legal status of information provided by TechCrunch or 25 persons associated or affiliated with TechCrunch to Fusion Garage.

#### 26 SUPPLEMENTAL RESPONSE TO SPECIAL INTERROGATORY NO. 10

27 TechCrunch objects that this interrogatory is overbroad and unduly burdensome and seeks 28 information outside the scope of permissible discovery because it seeks information that is not

relevant to the subject matter of this action and because it is not reasonably calculated to lead to the 1 2 discovery of admissible evidence. TechCrunch objects to this interrogatory as vague and ambiguous 3 with respect to the phrase "allegedly protectable business ideas, trade secrets, or intellectual 4 property." TechCrunch also objects to the extent this interrogatory seeks information protected by 5 the attorney-client privilege or the work product doctrine, in that it calls for a legal conclusion and 6 for counsel's contentions concerning the legal status of information provided by TechCrunch or 7 persons associated or affiliated with TechCrunch to Fusion Garage.

Without waiving and subject to TechCrunch's general and specific objections, CrunchPad responds as follows:

The following employees and independent contractors of Interserve, Inc. and/or CrunchPad, Inc. provided business ideas to Defendant: Michael Arrington, Heather Harde, Louis Monier, Nik Cubrilovic, Dave Paulsen, and Dave Gallatin. Defendant may contact these individuals through Plaintiffs' counsel.

#### **SPECIAL INTERROGATORY NO. 11**

Describe with particularity all alleged promises DEFENDANT made to YOU that DEFENDANT did not fulfill.

# **RESPONSE TO SPECIAL INTERROGATORY NO. 11**

TechCrunch objects that this interrogatory is overbroad and unduly burdensome and seeks 19 information outside the scope of permissible discovery because it seeks information that is not 20 relevant to the subject matter of this action and because it is not reasonably calculated to lead to the 21 discovery of admissible evidence. TechCrunch further objects to this interrogatory as vague and 22 ambiguous. TechCrunch also objects that this interrogatory seeks information protected by the 23 attorney-client privilege or the work product doctrine.

24 Without waiving and subject to TechCrunch's general and specific objections, TechCrunch 25 respond as follows: Fusion Garage promised to work with CrunchPad and TechCrunch to jointly 26 develop and market the CrunchPad. It did not fulfill that promise. Fusion Garage promised 27 CrunchPad and TechCrunch that it would collaborate with Tech Crunch in a joint effort to develop 28 and bring the CrunchPad to market. It did not fulfill that promise.

TECHCRUNCH'S SUPP. RESP. TO SPECIAL INTERROGATORIES, SET ONE

When Fusion Garage met TechCrunch in September 2008, it claimed to have developed a browser-based operating system, just like the one TechCrunch was seeking for its CrunchPad project. In fact, it had developed no such thing, and the demo product it showed to TechCrunch was little more than an off-the-shelf browser and some HTML--something the plaintiffs did not realize until nearly a year later, by which time the project was well underway. Similarly, starting as early as January 2009, Fusion Garage represented to CrunchPad and TechCrunch that it was devoting substantially all of its resources to the CrunchPad project. This was false. Upon a visit to Singapore in August 2009, TechCrunch learned that Defendant did not start significant development efforts until many months later.

TechCrunch and CrunchPad were approached by multiple software and hardware developers with offers to assist it in developing the CrunchPad. Based on Fusion Garage's misrepresentations, TechCrunch selected Fusion Garage over these other prospective partners, and thus relied upon Fusion Garage's misrepresentations to its detriment.

Fusion Garage promised to repay CrunchPad and TechCrunch for amounts they paid to vendors on Fusion Garage's behalf. It did not fulfill that promise.

16 On or before June 27, 2009, Fusion Garage agreed to the material terms of a merger in which 17 CrunchPad would acquire Fusion Garage in exchange for 35% of the merged company's stock. 18 Fusion Garage specifically promised that its investors and creditors had agreed to this arrangement. On or after November 17, 2009, Fusion Garage reneged on this agreement, in the process revealing that its investors had never approved it despite Fusion Garage's unequivocal statements to the contrary just a few months before.

22 Fusion Garage assured CrunchPad and TechCrunch that it could and would deal with 23 problems that had emerged with Pegatron. It did not fulfill that promise. In August, when 24 TechCrunch executives visited the Taiwan headquarters of Pegatron, the company preparing to 25 manufacture the CrunchPad, TechCrunch learned that Defendant had been falsely representing to 26 TechCrunch the costs of the product's components as \$20-\$30 per unit higher than the actual costs 27 indicated by Pegatron. Fusion Garage's contract with Pegatron was terminated shortly thereafter, 28 unbeknownst to CrunchPad and TechCrunch.

TECHCRUNCH'S SUPP. RESP. TO SPECIAL INTERROGATORIES, SET ONE

Fusion Garage promised CrunchPad and TechCrunch that they would jointly market the collaborative project under the name "CrunchPad." It did not fulfill that promise. Fusion Garage promised CrunchPad and TechCrunch that a launch prototype of the CrunchPad would be ready for a public debut on November 20, 2009. It did not fulfill that promise.
