**I. Introduction**

On November 15, 2010, this Court entered an Order relating the instant case, *In Re: Facebook Privacy Litigation* (“*In Re Facebook*”) with seven other cases that concern allegations of privacy violations by Zynga Game Network, Inc. (the “Zynga Actions”).<sup>1</sup> Dkt. 47. In this Order, the Court invited all parties in the related actions to submit brief on or before November 22, 2010 concerning the following issues:

- whether the eight Zynga Actions should be consolidated with the instant matter or consolidated as a separate action;
- nominations for Lead Plaintiffs; and,
- nominations for Lead Counsel.

Plaintiffs respectfully request that this Court *not* consolidate the Zynga Actions with *In Re Facebook*). Furthermore, Plaintiffs hereby request that the Court renew its appointment of Michael Aschenbrener of Edelson McGuire, LLC and Kassra Nassiri of Nassiri & Jung LLP as interim co-lead counsel in *In Re Facebook*. Dkt. 16.

Plaintiffs’ understanding is that plaintiffs’ counsel in all Zynga Actions agree that the Zynga Actions should not be consolidated with *In Re Facebook*. Declaration of Michael Aschenbrener ¶ 2. (“Aschenbrener Decl.”) Plaintiffs in the Zynga Actions and the *In Re Facebook* plaintiffs have submitted their claims under different sets of facts that allege different defendants engaged in different conduct to the detriment of different classes. Under these circumstances, consolidation would impede judicial efficiency and unfairly prejudice the *In Re Facebook* plaintiffs. Any

---

<sup>1</sup> To date, the Court has related *In Re Facebook* with the following cases: *Graf v. Zynga*, Case No. CV 10-04680 (filed Oct. 18, 2010) (“*Graf*”); *Albini v. Zynga*, Case No. CV 10-04723 (filed Oct. 19, 2010) (“*Albini*”); *Gudac v. Zynga*, Case No. CV 10-04793 (filed Oct. 22, 2010) (“*Gudac*”); *Schreiber v. Zynga*, Case No. CV 10-04794 (filed Oct. 22, 2010) (“*Schreiber*”); *Swanson v. Zynga*, Case No. CV 10-04902 (filed Oct. 28, 2010) (“*Swanson*”); *Carmel-Jessup v. Facebook, Zynga*, Case No. CV 10-04930 (filed Oct. 29, 2010) (“*Carmel-Jessup*”); *Phee v. Facebook, Zynga*, Case No. CV 10-04935 (filed Nov. 1, 2010) (“*Phee*”); and *Bryant et al. v. Facebook; Zynga*, Case No. CV 10-5192 (filed Nov. 16, 2010) (“*Bryant*”).

1 efficiencies that might come from consolidation can, and should, be secured through the cooperation  
2 of counsel and a coordinated discovery schedule.

3  
4 Concerning appointment of Lead Counsel, Plaintiffs' current Lead Counsel—Michael  
5 Aschenbrener and Kassra Nassiri—have exceeded all requirements of Lead Counsel and have  
6 aggressively litigated *In Re Facebook* to the benefit of putative class members. Accordingly, this  
7 Court should renew their appointment as Interim Co-Lead Counsel, thus allowing them to continue  
8 working to the benefit of the putative class.

9 **II. Legal Standard for Consolidation**

10 To determine whether to consolidate, a district court “weighs the saving of time and effort  
11 consolidation would produce against any inconvenience, delay, or expense that it would cause.”  
12 *Huene v. U.S.*, 743 F.2d 703, 704 (9th Cir. 1984). “The mere existence of common issues, a  
13 prerequisite to consolidation, does not require consolidation.” *Waste Distillation Tech., Inc. v. Pan*  
14 *Am. Res., Inc.*, 775 F. Supp. 759, 761 (D. Del. 1991). Considerations of convenience and economy  
15 must yield to a paramount concern for a fair and impartial trial. *Johnson v. Celotex Corp.*, 899 F.2d  
16 1281 (2d Cir.1990), cert. denied 498 U.S. 920 (1990).

17 The party moving for consolidation bears the burden of proving that consolidation is  
18 appropriate. *See, e.g., Medlock v. Taco Bell Corp.*, Nos. CV-F-07-1314, CV-F-08-1081, CV-F-09-  
19 0200, CV-F-09-0246, 2009 WL 1444343, at \*1 (E.D. Cal. May 19, 2009). *See also In re Repetitive*  
20 *Stress Injury Litig.*, 11 F.3d 368, 374 (2d Cir. 1993) (“The burden is on the party seeking  
21 aggregation to show common issues of law or fact; the burden is not on the party opposing  
22 aggregation to show divergences”).

23 **III. The Court Should Not Consolidate the Zynga Actions with *In Re Facebook***

24 **A. Material Facts and Allegations Forming the Bases of the Cases Are Entirely Separate.**

25 The fundamental claims in *In Re Facebook* and the Zynga Actions, respectively, are entirely  
26 distinct. Each involves different disclosing parties, different recipients of that information, different  
27 privacy policies, different plaintiff classes, different modes of transmission, and different time  
28 periods.

1                   **1.        *The Cases Allege Different Disclosing Parties.***

2                   The *In Re Facebook* plaintiffs allege that Facebook wrongly transmitted its users’ personally-  
3 identifiable information (“PII”).<sup>2</sup> The *Zynga* plaintiffs, on the other hand, allege that Zynga wrongly  
4 transmitted its users’ PII. This distinction alone, as described in more detail below, demands that the  
5 *In Re Facebook* plaintiffs and the *Zynga* plaintiffs pursue substantially different discovery, resulting  
6 in substantially different litigation trajectories, such that consolidation would not benefit either the  
7 parties or the Court.<sup>3</sup>

8                   **2.        *The Cases Allege Different Recipients of the Private Information.***

9                   The *In Re Facebook* plaintiffs allege that Facebook disclosed user PII to Facebook’s  
10 advertisers.<sup>4</sup> The *Zynga* plaintiffs, on the other hand, allege that Zynga disclosed user PII to Zynga’s  
11 advertisers and Internet marketing companies.<sup>5</sup> Because the recipients of PII differ, the contracts  
12 governing the respective advertising relationships will also differ, as will third party discovery.

13                   **3.        *The Cases Allege Breaches of Different Privacy Policies.***

14                   The *In Re Facebook* plaintiffs allege that Facebook violated Facebook’s Privacy Policy.<sup>6</sup>  
15 The *Zynga* plaintiffs, on the other hand, allege that Zynga violated Zynga’s Privacy Policy and the  
16 Facebook App Developer Policy.<sup>7</sup> Thus the operative contracts in *In Re Facebook* and the *Zynga*  
17 Actions are entirely distinct.

18  
19  
20  
21 \_\_\_\_\_  
22 <sup>2</sup> *In Re Facebook*, Dkt. 36, Consolidated Complaint (“*Facebook Compl.*”) ¶¶ 3, 27-33.

23 <sup>3</sup> The consolidated complaint in *In Re Facebook* makes no mention whatsoever of Zynga or any  
24 application developers.

25 <sup>4</sup> *Facebook Compl.* ¶¶ 27-30.

26 <sup>5</sup> See, e.g., *Schreiber*, Dkt. 1, Complaint ¶ 15 (“*Schreiber Compl.*”); *Gudac*, Dkt. 1, Complaint ¶ 29  
27 (“*Gudac Compl.*”).

28 <sup>6</sup> *Facebook Compl.* ¶¶ 100-109.

<sup>7</sup> See, e.g., *Graf v. Zynga Game Network, Inc.*, 10-CV-4680-JW, Dkt. 1, Complaint ¶ 15 (“*Graf*  
*Compl.*”). With respect to the Facebook App Developer Policy, the *Zynga* Plaintiffs allege that they  
are intended third-party beneficiaries of this policy. *Id.* ¶ 14.

1                   4.        *The Cases Allege Different Plaintiff Classes.*

2                   Plaintiffs in *In Re Facebook* seek to certify a class of Facebook users who clicked on a third-  
3 party advertisement.<sup>8</sup> The Zynga plaintiffs, on the other hand, seek to certify a class of all users of  
4 Zynga’s Facebook applications,<sup>9</sup> and there is no evidence before the Court indicating any substantial  
5 overlap between the two classes. As described below, of the thirteen named plaintiffs now before  
6 this Court, only three would fit into both putative classes.<sup>10</sup>

7                   5.        *The Cases Allege Different Modes of Transmission.*

8                   The *In Re Facebook* plaintiffs allege that PII was transmitted only when a Facebook user  
9 clicked on an advertisement.<sup>11</sup> The Zynga plaintiffs, on the other hand, allege that PII was  
10 transmitted when a Zynga user loaded a Zynga application into their browser, irrespective of  
11 whether the user clicked on an advertisement.<sup>12</sup> As described below, this critical distinction reflects  
12 substantial differences in the underlying technologies at issue. Because the technologies are  
13 materially different, the factual inquiries and evidence of liability will differ. As related to the  
14 technology issues in the cases, no efficiencies will result from consolidating the Zynga Actions with  
15 *In Re Facebook.*

16  
17  
18                   <sup>8</sup> *Facebook* Compl. ¶ 37.

19                   <sup>9</sup> *See, e.g., Graf* Compl. ¶ 20 (“Plaintiff brings this action on behalf of herself and all other persons  
20 in the following similarly situated class: ***all registered users of Facebook.com in the United States***  
21 ***who, at any time after October 18, 2006 registered a profile with Zynga***”); *Schreiber* Compl. ¶ 21  
22 (“Plaintiff brings this action . . . on behalf of himself and all other persons in the following class: all  
23 persons in the United States who registered with Zynga while on the Facebook web site”); *Gudac*  
24 Compl. ¶ 41 (“Plaintiff bring[s] this action on behalf of . . . a class defined as all users of Zynga’s  
25 Facebook applications from the time of Zynga’s founding through the present day.”).

26                   <sup>10</sup> Two of the Zynga Cases, *Phee* and *Bryant*, seek to certify two classes each—one class coinciding  
27 with the class alleged in the other Zynga Actions, and the other class coinciding with the *In Re*  
28 *Facebook* putative class. *Phee*, Dkt. 1, Complaint ¶ 23 (“*Phee* Compl.”); *Bryant*, Dkt. 1, Complaint  
¶ 30 (“*Bryant* Compl.”). Plaintiffs respectfully request that if the *Phee* and *Bryant* plaintiffs do not  
amend their respective complaints to remove the *In Re Facebook* class definition, the Court should  
sever those claims. *See* n. 18, *infra*.

<sup>11</sup> *Facebook* Compl. ¶ 28.

<sup>12</sup> *See, e.g., Gudac* Compl. ¶ 29.

1                                   **6.        The Cases Involve Different Time Frames.**

2                    The *In Re Facebook* plaintiffs allege that Facebook engaged in wrongful disclosure of PII for  
3 a limited time—February 2010 through May 21, 2010.<sup>13</sup> The Zynga plaintiffs, on the other hand,  
4 allege that Zynga engaged in wrongful disclosure of PII for an unspecified time. Each Zynga  
5 complaint, however, refers to an article published on October 18, 2010 in the *Wall Street Journal*  
6 revealing Zynga’s transmission of personally-identifiable information.<sup>14</sup> The *Wall Street Journal*  
7 article was published approximately five months after Facebook allegedly ceased its non-consensual  
8 transmissions on May 21, 2010.<sup>15</sup> Discovery will likely reveal that Zynga’s transmissions continued  
9 well past May 21, 2010.

10                   Thus, the critical factual inquiries into liability and damages in the *In Re Facebook* case and  
11 the Zynga Actions are separate, distinct, and non-overlapping, and do not support consolidation.

12                   Parties (if any) arguing for consolidation will seek to brush these material differences aside  
13 by asserting that all cases involve “referrer headers” and wrongful disclosure of Facebook user  
14 identification numbers (“UID”). But the fundamentals of how Internet browsers have worked since  
15 the advent of the web (i.e., “referrer headers”)<sup>16</sup> and the fact that all plaintiffs and classes are drawn  
16 from among the hundreds of millions of Facebook users are *not* the operative facts in any of the  
17 cases before the Court. Although the allegations of the complaints may be similar, the factual  
18 contexts of the claims in these actions are wholly distinct. Consolidation is not appropriate in these  
19 circumstances. *See, e.g., Alley v. Chrysler Credit Corp.*, 767 F.2d 138, 140 (5th Cir. 1985)  
20 (“Although the same van was involved in the two cases, the transactions forming the basis of the  
21  
22

---

23 <sup>13</sup> *Facebook* Compl. ¶¶ 31-33.

24 <sup>14</sup> *See, e.g., Gudac* Compl. ¶ 38.

25 <sup>15</sup> *Id.*

26 <sup>16</sup> In response to a Congressional inquiry regarding alleged privacy violations, Facebook itself  
27 asserted that “referrer headers” are common to all internet browsers. Aschenbrener Decl. ¶ 18,  
28 Exhibit A at p. 2, Letter from Marne Levine, Facebook’s Vice President, Global Public Policy, to  
Congressman Edward J. Mackey (Oct. 29, 2010) (“[T]he inadvertent sharing of UIDs, not by  
Facebook itself, but rather by applications – **is a by-product of how Internet browser work**”)  
(emphasis supplied).

1 lawsuits were entirely separate. We do not find abuse of discretion [by the district court] in refusing  
2 to consolidate the cases, and accordingly affirm [its] denial of the motion to consolidate.”)

3  
4 This conclusion is not altered even when the cases involve common theories of recovery. In  
5 *Gaddy v. Elmcroft Assisted Living*, for example, the court found that while the three cases before it  
6 involved common question of law and fact, consolidation for summary judgment purposes would be  
7 inappropriate:

8 While there are similarities between the cases (i.e., all three claims  
9 involve assertions of hostile work environment and retaliation under  
10 Title VII against the same defendants; all three suits are brought by  
11 former employees of Elmcroft whose employment temporally  
12 overlapped; and attorney Howard Widis represents all three plaintiffs,  
13 while Philip Van Hoy and Bryan Adams represent the defendants in all  
14 three cases), each of the Plaintiffs have submitted their claims under  
15 different sets of facts. Specifically, the ways in which each Plaintiff  
16 allegedly notified the Defendant of the un-welcomed, harassing  
17 behavior, and the ways in which the Defendant allegedly retaliated  
18 against the Plaintiffs vary significantly in each case.

19 Nos. 3:04CV36, 3:04CV309, 3:04CV458, 2005 WL 2989658, \*1 (W.D.N.C. Nov. 2, 2005).

20  
21 **B. Consolidation Will Impede Judicial Efficiency**

22 Given the substantial differences between the facts necessary to prove liability and damages,  
23 consolidation will considerably complicate case management and trial.

24 For example, *In Re Facebook* and the Zynga Actions allege violations of the Electronic  
25 Communications Privacy Act (“ECPA”), which are, in large part, issues of first impression.  
26 Whether violations of the ECPA are viable claims will depend on whether Facebook (and, in a  
27 separate inquiry, Zynga) is an electronic communications service provider, remote computing  
28 service provider, or both. But because Facebook and Zynga offer substantially different services to  
their users, deciding a motion to dismiss will require wholly separate and distinct briefing vis-à-vis  
application of the ECPA to Facebook, on the one hand, and to Zynga, on the other. And, for  
example, should Zynga alone succeed in dismissing the Zynga plaintiffs’ ECPA claims, then the *In  
Re Facebook* plaintiffs will have to sit on the sidelines while the consolidated complaint is amended  
and Zynga’s renewed motions to dismiss are decided. This alone could delay proceedings for  
months.

1 Consolidation is also not likely to yield any efficiencies on the motions for class certification.  
2 At this early stage of the litigation, there is no evidence of how much overlap there will be between  
3 the *In Re Facebook* classes and the Zynga classes. But the evidence before the Court suggests that  
4 there may be relatively little overlap. For example, the *In Re Facebook* plaintiffs, Mike Robertson  
5 and David Gould, have not alleged any facts giving them standing to bring claims against Zynga  
6 because neither used any Zynga application. (In fact, the *Facebook* complaint makes no mention  
7 whatsoever of Zynga or any application developers.) Similarly, there is no evidence before the  
8 Court that any of the plaintiffs in *Graf, Albin, Gudac, Schreiber, Swanson, and Carmel-Jessup* ever  
9 click on a third-party ad displayed on Facebook.com, which is required to have standing to bring the  
10 *In Re Facebook* claims against Facebook. Of the thirteen plaintiffs before this Court, only three  
11 have alleged facts supporting their standing to pursue all claims in a consolidated suit.<sup>17</sup> Because no  
12 *In Re Facebook* plaintiff has standing to bring claims against Zynga, and because the great majority  
13 of Zynga plaintiffs lack standing to bring *In Re Facebook* claims, no single class can be certified.  
14 Instead, each set of plaintiffs will submit a separate class certification application and present  
15 separate evidence, and each class will seek to be certified as wholly distinct from the other.

16 Consolidated discovery is also likely to present significant case management problems and  
17 may greatly delay the progress of the case. For example, the *In Re Facebook* plaintiffs and the  
18 Zynga plaintiffs will require discovery from Facebook and Zynga, respectively, of each company's  
19 voluminous server log data to prove who was affected by the alleged disclosures, and to what extent.  
20 Because Facebook and Zynga are wholly-independent entities, each with their own proprietary  
21 infrastructure and unique databases, what may be burdensome for one defendant may not be for the  
22 other, and the character and scope of the data which exist may vary greatly by defendant. Similarly,  
23 the *In Re Facebook* plaintiffs will seek discovery from Facebook advertisers, while the Zynga  
24 plaintiffs will seek discovery from Zynga advertisers and various, currently unknown Internet  
25

---

26  
27 <sup>17</sup> See *Phee* Compl. ¶ 20 (plaintiff Iris Phee alleges to have “clicked on at least one third-party  
28 advertisement that appeared on Facebook’s website”); *Bryant* Compl. ¶ 27 (“Plaintiffs Karen Bryant  
and Christopher Brock . . . have each clicked on third party advertisements on Facebook”).

1 marketing companies. While there may be some overlap between the third-party advertisers, there is  
2 no evidence before the Court that forcing consolidated discovery from these two possibly distinct  
3 sets of third parties won't present significant delays for one set of plaintiffs or the other. While these  
4 differences present no problem when each case is allowed to proceed at its own pace, consolidation  
5 will result in one unwieldy and massive action.

6 As argued below, any benefits that might be attained through consolidation are better  
7 achieved by coordination, particularly since all of the related cases are presently before this Court.  
8 And coordination, as opposed to consolidation, will avoid the risk that one or more parties will seek  
9 to sever their claims at summary judgment or trial in order to avoid prejudice. If the cases are  
10 consolidated, however, the slowest moving case will dictate the pace and timing of motions for  
11 motions to dismiss, discovery, class certification, motions for summary judgment and trial, and delay  
12 adjudication of the other cases that would otherwise occur much sooner.

13  
14 **C. Consolidation Will Result in Prejudice to the *In Re Facebook* Plaintiffs**

15 Because consolidation is likely to protract the litigation, the *In Re Facebook* plaintiffs will  
16 likely be subject to unnecessary delay. And to the extent that discovery and motion practice relate  
17 only to the *Zynga* claims, the *In Re Facebook* plaintiffs will bear a disproportionate amount of  
18 attorneys' fees and costs "monitoring and appearing in numerous cases to which they have no  
19 relation," and vice versa. *Jackson v. Ford Consumer Finance Co., Inc.*, 181 F.R.D. 537, 540 (N.D.  
20 Ga. 1998); *see also In re Repetitive Stress Injury Litig.*, 11 F.3d at 374 ("A party may not use  
21 aggregation as a method of increasing the costs of its adversaries—whether plaintiffs or  
22 defendants—by forcing them to participate in discovery or other proceedings that are irrelevant to  
23 their case").

24 Moreover, given the factual dissimilarity between the cases, consolidation poses a substantial  
25 risk of prejudice at trial. As numerous courts have recognized, consolidation does not merge the  
26 lawsuits into a single action. Each party is entitled to present evidence pertaining to their individual  
27 claims or defenses at trial. This is especially significant here, where the *In Re Facebook* plaintiffs  
28 and the plaintiffs in the *Zynga* Actions may be largely distinct groups that have standing for only a

1 subset of claims, used different services, were parties to different privacy agreements, and have  
2 different liability and damages claims. Adding to this complexity, if the ECPA claims are tried, for  
3 example, defendants are likely to present separate factual defenses pertaining to whether each is an  
4 electronic communications service provider and/or remote computing service provider under the  
5 statute. Because a jury could very well lose track of which facts pertain to which parties, there is a  
6 substantial likelihood that one or more parties would move to bifurcate trials under Federal Rule of  
7 Civil Procedure 42(b). The fact that the Zynga Actions may be properly subject to severance under  
8 Rule 42(b) serves to reemphasize the point that they do not lend itself to consolidation with *In Re*  
9 *Facebook*.<sup>18</sup>

10  
11 **D. There is No Risk of Inconsistent Judgments**

12 Defendants may argue that if the Court does not consolidate the cases, there is a risk of  
13 inconsistent judgments. Trying the *In Re Facebook* and Zynga Actions separately, however, poses  
14 little or no risk of inconsistent rulings for at least two reasons. First, whether or not these matters are  
15 consolidated, they are now pending in the same Court and before the same Judge. Under principles  
16 of *stare decisis*, the Court will be obligated to follow its legal rulings in the first-filed case when it  
17 rules upon the second-filed case, thereby eliminating the danger of inconsistent judgments. As such,  
18 it is reasonable to expect that to the extent there are overlapping questions of law, they will be  
19 resolved in a consistent manner. *See, e.g., Antoninetti v. Chipotle Mexican Grill, Inc.*, Nos. 05-CV-  
20 1660-J and 06-CV-2671-J, 2007 WL 2669531, at \*3 (S.D. Cal. Sept. 7, 2007) (denying motion to  
21 consolidate).

22  
23  
24 <sup>18</sup> To the extent that two of the Zynga Actions—*Phee* and *Bryant*—include allegations “merging”  
25 the *Privacy* and *Zynga* claims and classes (*see* n. 10, *supra*), the Court is reminded of its power to  
26 sever the claims into two distinct cases. Under Federal Rule of Civil Procedure 21, this Court may  
27 “add or drop a party [or] sever any claim against any party.” And Rule 20 allows this Court to  
28 “issue orders—including an order for separate trials—to protect a party against . . . delay, expense,  
or other prejudice that arises from including a person against whom the party asserts no claim and  
who asserts not claim against the party.”

1  
2 Second, the cases involve different defendants and different services used at different times  
3 by different plaintiffs who were subject to different privacy policies. As such, the factual  
4 determinations will be individualized to each defendant and claim. Because each case involves  
5 different claims directed at different defendants, a defense verdict in one case and a verdict for  
6 plaintiffs in another would not be inconsistent “because they would be decided on the basis of  
7 different records.” *Campbell v. PricewaterhouseCoopers*, Nos. CIV. S-09-2376, S-08-965 to S-08-  
8 997, 2008 WL 3836972, at \*4 (E.D. Cal. Aug. 14, 2008).

9 **E. Any Benefits from Consolidation Can Be Better Achieved Through**  
10 **Coordination – Plaintiffs’ Counsel Have Already Shown a Willingness to Engage**  
11 **in Such Coordination.**

12 As argued above, the evidence currently before the Court does not suggest that there will be a  
13 tremendous amount of overlap in discovery. Directing discovery to one consolidated complaint,  
14 rather than two consolidated complaints, will not yield substantial, if any, benefits. But to the extent  
15 there is overlap in discovery, however, the parties have a shared interest in avoiding duplicative  
16 discovery.

17 The *In Re Facebook* plaintiffs will not seek discovery from Zynga on any issues related to  
18 the claims raised in the Zynga Actions. This is true for the simple reason that the *In Re Facebook*  
19 plaintiffs have no claims against Zynga; Zynga’s privacy policy is not implicated in the *In Re*  
20 *Facebook* claims, and Zynga is not alleged by the *In Re Facebook* plaintiffs to have disclosed any  
21 PII. To the extent that the *In Re Facebook* plaintiffs will seek discovery from Zynga, it will be  
22 directed only to Zynga’s role as one of Facebook’s many advertisers.

23 Plaintiffs in the Zynga Actions may seek discovery from Facebook. However, to the extent  
24 that Facebook is subject to 30(b)(6) depositions regarding technology matters that may be relevant to  
25 both the *In Re Facebook* and Zynga Actions, for example, coordination will ensure that Facebook  
26 need produce each witness only once. Similarly, if there is any overlap between Facebook  
27 advertisers and Zynga advertisers, coordination will ensure that those advertisers are not subject to  
28

1 duplicative discovery. Any efficiencies that might come from consolidation can, and should, be  
2 secured through the cooperation of counsel and a coordinated discovery schedule.<sup>19</sup>

3  
4 The fact that the Zynga Actions have been related and transferred to this Court addresses  
5 many of the concerns likely to be raised by proponents of consolidation. Inconsistent results will be  
6 avoided in the related actions because a this Court will decide the issues in all cases. Judicial  
7 economy in deciding motions arising out of the related cases will be achieved for that same reason.  
8 The Court will be able to familiarize itself with any common issues that exist and recognize  
9 economies by, for example, holding case management conferences in these actions at the same time,  
10 or by holding “technology seminars” with all the parties present. Duplication of discovery, to the  
11 extent it might otherwise exist, can be avoided by an agreed plan to share discovery in the related  
12 actions and to limit defendants’ discovery obligation to one-time productions, to the extent  
13 applicable. Indeed, the procedures for related actions contemplate coordination and are intended to  
14 avoid conflicts and duplication. David F. Herr, *Annotated Manual for Complex Litigation*, 4th ed. §  
15 11.455 at p. 116. The fact that efficiencies can be realized with a less drastic remedy is another  
16 reasons to deny any request for consolidation. *See MacAlister v. Guterma*, 263 F.2d 65, 69-70 (2d  
17 Cir. 1958) (holding that consolidation “should not be resorted to where other more conventional  
18 remedies will suffice”).

19 **IV. The Court Should Affirm Its Previous Appointment of Interim Class Counsel**

20 On August 20, 2010, this Court appointed Michael Aschenbrener of Edelson McGuire LLC  
21 and Kassra Nassiri of Nassiri & Jung LLP as Interim Co-Lead Counsel in *In Re Facebook*. Dkt. 16.  
22 Messrs. Aschenbrener and Nassiri have exceeded all requirements of Lead Counsel and have  
23 aggressively litigated the matter. Accordingly, this Court should renew their appointment as Interim  
24 Co-Lead Counsel, thus allowing them to continue working to the benefit of the putative class.

---

25 <sup>19</sup> All parties appear to be in agreement that consolidated discovery would be appropriate, which can  
26 occur without a consolidating the *In Re Facebook* with the Zynga Actions. In conference calls  
27 between counsel for the *In Re Facebook* plaintiffs and counsel for a majority of the Zynga  
28 plaintiffs—prior to this Court’s order relating the Zynga Actions—all counsel agreed that relating  
the Zynga Actions to *In Re Facebook* would be the most efficient way to proceed with any  
overlapping discovery.

1 Since their appointment, Messrs. Aschenbrener and Nassiri have:

- 2 - Organized the work in the most efficient and productive manner possible;
- 3 - discussed settlement options with defendant Facebook;
- 4 - worked with Facebook to develop a discovery plan;
- 5 - filed a consolidated complaint;
- 6 - issued dozens of subpoenas to locate, preserve, and gather potentially relevant evidence;
- 7 - consulted extensively with recognized experts to advance the case;
- 8 - conducted e-discovery preparation;
- 9 - worked with Facebook to preserve potentially relevant evidence;
- 10 - propounded written discovery on Facebook; and,
- 11 - communicated with Plaintiffs' counsel in the Zynga Actions to reach agreement on
- 12 coordination of discovery.

13 Aschenbrener Decl. ¶¶ 3-12.

14 In short, Messrs. Aschenbrener and Nassiri have done everything possible to advance the  
15 case to the benefit of putative class members.

16 **A. Messrs. Aschenbrener and Nassiri Exceed the Legal Standards for Renewed**  
17 **Appointment Under Fed. R. Civ. P. 23(g).**

18 Rule 23(g)(3) authorizes the Court to “designate interim class counsel to act on behalf of a  
19 putative class before determining whether to certify the action as a class action.” FED. R. CIV. P.  
20 23(g)(3). Rule 23(g) does not specify the standards for designating interim class counsel, but courts  
21 have held the factors used to appoint class counsel for class certification should also be used to  
22 designate interim class counsel. *See, e.g., In re Air Cargo Shipping Antitrust Lit.*, 240 F.R.D. 56, 57  
23 (E.D.N.Y. 2006).

24 Rule 23(g)(1)(A) specifies the following factors for appointing class counsel:

- 25 (1) the work counsel has done in identifying or investigating potential claims in the action,
- 26 (2) counsel's experience in handling class actions, other complex litigation, and claims of  
27 the type asserted in the action,
- 28 (3) counsel's knowledge of the applicable law, and

1 (4) the resources counsel will commit to representing the class.  
2 FED. R. CIV. P. 23(g)(1)(A).

3 While the Court should consider all factors, no one factor is dispositive. *See* Advisory  
4 Committee Notes to the 2003 Amendments to FED. R. CIV. P. 23(g). Additionally, the Court may  
5 “consider any other matter pertinent to counsel’s ability to fairly and adequately represent the  
6 interests of the class.” FED. R. CIV. P. 23(g)(1)(B).

7 Not only do Messrs. Aschenbrener and Nassiri satisfy and exceed each of these factors by  
8 virtue of their respective experience, but they have also demonstrated through their work in this case  
9 as already-appointed interim class counsel that they exceed the criteria. Thus, there can be no doubt  
10 as to their ability to continue as interim class counsel.

11 In addition, the fact that all plaintiffs’ counsel in the related Zynga Actions have decided to  
12 oppose consolidation with the instant matter further demonstrates that Messrs. Aschenbrener and  
13 Nassiri have already ably performed their duties and will continue to do so. Aschenbrener Decl. ¶ 2.

14 **B. This Court Should Renew Messrs. Aschenbrener and Nassiri’s Appointment as**  
15 **Interim Co-lead Counsel.**

16 **1. Counsel Have Performed Extensive Investigation into the Claims Asserted.**

17 Counsel have demonstrated their commitment to this case by devoting substantial resources  
18 to the litigation. Counsel have already worked extensively with experts who have helped perform  
19 extensive investigation into Facebook’s alleged transmission to its advertisers of user PII.  
20 Aschenbrener Decl. ¶ 8. This work has led directly to the filing of a consolidated complaint (Dkt.  
21 36) and the propounding of discovery. Aschenbrener Decl. ¶¶ 6, 7, 11. Counsel have also  
22 proactively communicated with Facebook to preserve relevant evidence and establish electronic  
23 discovery protocols. Aschenbrener Decl. ¶ 10. Notably, Counsel have performed all this before any  
24 of the Zynga Actions were even filed.

25 Additionally, Counsel have also communicated with plaintiffs’ counsel in the Zynga Actions  
26 to reach agreement on issues of case relation and discovery coordination. Aschenbrener Decl. ¶ 12.  
27

1                                   **2.       Counsel Have Extensive Experience Litigating Class Actions, Including**  
2                                   **Many Concerning the Issues Present in the Instant Case.**

3                                   Messrs. Aschenbrener and Nassiri, and their respective law firms, are particularly well-suited  
4 to continue as interim class counsel. Not only are they experienced class action litigators, but they  
5 also possess significant experience in the field of Internet privacy. Aschenbrener Decl. ¶ 13.  
6 Specifically, they have litigated Internet privacy cases against Amazon, Google, Facebook,  
7 RockYou, Storm8, Spokeo, NebuAd, and AdZilla, among others. *Id.*

8                                   **a.       Michael Aschenbrener of Edelson McGuire LLC**

9                                   Edelson McGuire is a leader in plaintiffs' class and mass action litigation, with a particular  
10 emphasis on technology class actions, and has been called a "class action 'super firm'" by the  
11 Decalogue Society of Lawyers. *See* Aschenbrener Decl. ¶ 19, Exhibit B (Edelson McGuire LLC  
12 firm resume). As has been recognized by federal courts, Edelson McGuire has an "extensive  
13 histor[y] of experience in complex class action litigation, and [is a] well-respected law firm[] in the  
14 plaintiffs' class action bar." *In re Pet Food Prod. Liab. Litig.*, MDL 1850, No. 07-2867 (NLH)  
15 (D.N.J. Nov. 18, 2008). A leading arbitrator concurred: "The proof of [the firm's] experience,  
16 reputation, and abilities is extraordinary. . . . Each [of their cases] elaborates on the experience and  
17 unique success [they] have had in achieving leading roles in the area of 'technology consumer  
18 protection class actions.'" (Arbitration award in mobile content class action settlement, August 6,  
19 2009). The Firm's reputation for leadership in class action litigation has led state and federal courts  
20 to routinely appoint its members as lead counsel in many high-profile class action suits. For  
21 example, in appointing Edelson McGuire interim co-lead counsel in one of the most high profile  
22 cases in the country, a federal court pointed to the firm's ability to be "vigorous advocates,  
23 constructive problem-solvers, and civil with their adversaries." *In Re JPMorgan Chase Home*  
24 *Equity Line of Credit Litig.*, No. 10 C 3647 (N.D. Ill., July 16, 2010). This Court also recently  
25 appointed Michael Aschenbrener as one of the interim class counsel in *In Re: T-Mobile Sidekick*  
26 *Litigation*, 5:09-cv-4854-JW (N.D. Cal.) (Dkt. 39), another case concerning electronic  
27  
28

1 communications. Mr. Aschenbrener was also appointed as Class Counsel in *Turner v. Storm8, LLC*,  
2 4:09-cv-5324-CW (N.D. Cal.). Aschenbrener Decl. ¶¶ 13-15.<sup>20</sup>

3  
4 **b. Kassra Nassiri of Nassiri & Jung LLP**

5 Leading the prosecution of *In Re Facebook* for Nassiri & Jung LLP is Kassra P. Nassiri, a  
6 partner in the firm's San Francisco office. The firm's lawyers have litigated numerous class actions  
7 and have been recognized as among the best young lawyers in Northern California. See  
8 Aschenbrener Decl. ¶ 20, Exhibit C (Nassiri & Jung LLP firm resume). Substantially all of Mr.  
9 Nassiri's practice is focused on complex commercial litigation and class actions. Mr. Nassiri, a  
10 graduate of Harvard Law School, has litigated numerous complex litigations over the past decade,  
11 including the following federal class actions: *Settlement Recovery Center, LLC v. Valueclick, Inc.*  
12 (C.D. Cal.); *Morgenstein v. AT&T Mobility LLC* (N.D. Cal.); *Clark v. Sprint Spectrum L.P.* (N.D.  
13 Cal.); *Gaos v. Google, Inc.* (N.D. Cal.); *Kemp v. 51job, Inc.* (S.D.N.Y.); *Hanrahan v. Hewlett-*  
14 *Packard Co.* (N.D. Cal.); *In re Intrabiotics Pharmaceuticals, Inc. Sec. Litig.* (N.D. Cal.); *In re*  
15 *LeapFrog Enterprises, Inc. Sec. Litig.* (N.D. Cal.); *In re Read-Rite Corp. Sec. Litig.* (N.D. Cal.); and  
16 numerous state court class actions. *Id.*

17 **3. Counsel Have and Will Continue to Commit Significant Resources on**  
18 ***Behalf of the Putative Class.***

19 Counsel have already demonstrated leadership and resource commitment in this litigation,  
20 and will continue to do so in order to effectively prosecute the matter and secure benefit for the  
21 putative class. Aschenbrener Decl. ¶ 17.

22 **V. Conclusion**

23 Because the allegations in *In Re Facebook* and the Zynga Actions pertain to different  
24 defendants and different services used at different times by different plaintiffs who were subject to

25 \_\_\_\_\_  
26 <sup>20</sup> Edelson McGuire is also more than proficient at pursuing eDiscovery as currently is necessary in  
27 all complex class litigation. Edelson McGuire partner Steven Tepler serves on the Seventh  
28 Circuit's eDiscovery Committee and as co-Chair of the American Bar Association's Electronic  
Discovery and Digital Evidence Committee. Aschenbrener Decl. ¶ 16. And in May 2010, Edelson  
McGuire co-hosted the Electronic Discovery and Digital Evidence Practitioners' Workshop at  
Chicago-Kent College of Law. *Id.*

1 different privacy policies, this Court should not consolidate the cases. For the reasons set forth  
2 above, consolidation would prejudice the *In Re Facebook* plaintiffs and impede judicial efficiency.  
3 Any benefits that might be gained by consolidating the cases are better achieved through  
4 coordination. And because Interim Class Counsel have diligently and effectively advanced this case  
5 on behalf of plaintiffs and the putative class, this Court should affirm its previous appointment of  
6 Michael Aschenbrener and Kassra Nassiri as Interim Class Counsel.
