22 After reviewing the parties' briefing, considering the record in the case, and balancing the considerations set forth in Federal Rule of Evidence ("FRE") 403, the Court rules on the parties' objections as follows:

EXHIBITS	Court's Ruling on Objections
PTX 128, PTX 302, and DTX 833	Overruled. The parties have stipulated to the admissibility of PTX128 and DTX 833. In addition, PTX302a is based entirely on exhibits to which the parties have stipulated as admissible. Therefore, D-Link Corp.'s objection goes to weight not admissibility, and is more properly the subject of cross examination.
DTX 115	Overruled. Assuming that Defendants are able to lay a proper foundation, the Court finds this evidence to be relevant to whether a slot on a motherboard is a "slot." Further, pursuant to FRE 403, the Court finds that this evidence is more probative than prejudicial, and unlikely to mislead the jury or confuse the issues.
