Sara:

I wanted to give you a heads up that we've identified approximately 35 extremely large documents in this production that appear to be the result of some sort of technical error and do not belong in the production. As soon as possible tomorrow we'll send you the bates ranges for those documents, 35 "Intentionally Left Blank" pages to insert for them, and a new load file for those ranges showing "Intentionally Left Blank" as the custodian.

Let me know if you have any questions.
